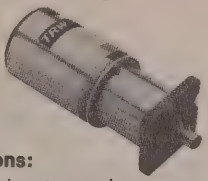
D.C. 1-1/2″ Permanent Magnet Gearmotors

TRW

Type IM-15 Planetary Gearmotor



Special order options:

- Integral tachometer generators
- Ball bearing motors

Type IM-15 d.c. planetary gearmotors are designed for high-volume, low-cost production. Typical applications include tape decks business machines, computer peripherals, audio-visual, automotive, medical, recreational, and other industrial equipment where high torque and lower speeds are needed.

Specifications

Rating: 9.0 to 1250 oz in.

Voltage: 6 to 24 v.d.c.

Weight: 14 to 21 oz., depending on ratio and motor.

Gears: Precision manufactured and heat treated for reliable performance and long life.

Backlash: Varies with ratio, but average backlash is 3°.

Cover: Corrosion-resistant steel housing.

Bearings: Motor shaft and geartrain output shaft, life-lubed sleeve bearing. Ball bearing motors available.

Lubrication: Life-lubricated bearings and geartrains are standard. Consult TRW Motors about special lubricants for temperature extremes.

Shaft: Precision ground case-hardened steel. Variations available: length, smaller diameter, flats, pinions, gears, holes (through or tapped), threaded ends and tapers.

Note: Type of steel used may vary with above variations.

Leads: AWG-22, 8 inches long, 105°C PVC, with strain relief.

Mounting: Four holes & pilot are standard.

Life: 1000 hours depending upon ratio & load.

When You Order

**** Part Number.** Units described are standard and may be ordered by part number. Complete part number consists of the basic part number followed by the armature dash number. Consult TRW Motors for other voltages and variations for special applications.

BASIC MOTOR DATA (more data in Bn. E-2410)

409A6012-6094 (Short Stack Motors)

Arm. Dash #	Voltage (v.d.c.)	Speed ±800 No Load (rpm)	Current No Load (max amps)	Rated Torque (oz. in.)**	Current at Rated Torque (max. amps)
-1	6	4800	.6	3.0	3.0
-2	12	5200	.35	3.5	1.6
-3	24	5400	.2	4.0	1.0

409A6178-6260 (Long Stack Motors)

Arm. Dash #	Voltage (v.d.c.)	Speed ±800 No Load (rpm)	Current No Load (max amps)	Rated Torque (oz. in.)**	Current at Rated Torque (max. amps)
-1	6	5500	.75	4.0	4.0
-2	12	5500	.4	4.5	2.2
-3	24	5500	.25	5.0	1.2

** Maximum continuous rated torque values are based upon motor temperature rise considerations. Starting or impact loads greater than ten times the torque multiplier (or 1500 oz. in.) could result in gear or shaft damage. Maximum gear life will occur at loads of 3.5 x torque multiplier or less.

MOTOR DIVISION, TRW ELECTRONIC COMPONENTS GROUP, 2275 STANLEY AVE., DAYTON, OH 45404, (513) 228-3171 • RT. 6, Box M-30A, DOTHAN, AL 36303, (205) 983-3542

D.C. 2.6″ Dia. Permanent Magnet Motors

Type IM-26

Type IM-26 d.c. motors offer high efficiency and cool operation. Perfect for demanding industrial applications such as computer peripherals and machine tools. Various torque constants available up to 32 oz. in./amp.

Special order options:

- EMI filters.
- Stainless steel shafts.
- Optical tachometers.
- Different voltages, performance or length.
- (4) pole option.
- plastic brush holder.

Specifications

rated voltage: 12 to 115 v.d.c.

weight: 4.5 lb. max.

inertia: See table.

shaft: Hardened high carbon steel. Variations available: length, flats, pinions, gears.

magnets: Ceramic. These tolerate high pulse currents without demagnetizing. (2) pole construction

bearings: Pre-loaded ball bearings.

cover: Corrosion-resistant steel housing.

end bell: Die cast metal.

mounting: Standard mounting is by tapped holes in motor face.

brush holder: Cartridge replaceable style.

terminals: Tab terminals mate with AMP Faston 187 series receptacles. Leads optional.

life: 1,000 hours minimum nominal continuous duty at rated voltage.

winding temperature rise: 6.25°C/watt, measured when mounted to 8″ x 8″ x ¼″ aluminum plate. Multiply by 1.4 when mounted to heat insulator.

maximum winding temperature: 130°C.

electrical time constant: 3 to 5 milliseconds. Nominal.

mechanical time constant: 25 milliseconds. Nominal.

When You Order

*** * Part Number.** Units shown above are standard and may be ordered by part number. Consult TRW Motors for variations in mechanical or electrical performance to suit specific applications.

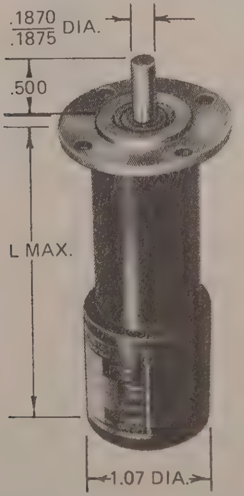
Type SC Planetary Gearmotors



This extremely small size and lightweight gearmotor consists of a Type SC a.c. motor and a precision planetary geartrain. The combination provides smooth, dependable performance and maximum output torque in the smallest possible space.

Type SC gearmotors are designed to meet MIL-M-7969.

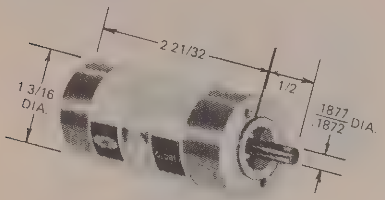
How to Order

The complete motor part number con-
ists of the standard part number shown
or gearmotors. See the following pages.

A.C. 1-3/16″ & 1-1/4″ Dia. Hysteresis Synchronous & Induction Planetary Gearmotors

TRW

Type CMC Basic Motor



Type CMC motors are designed to meet requirements for extremely compact high-performance synchronous motors in high-quality industrial/commercial products. They are ideally suited to such applications as dictating machines, recorders, business machines, industrial timers, tools, and controls.

Thermosetting plastic encapsulation provides protection against shock and vibration and is impermeable to dirt and moisture.

Induction versions and units for operation at other voltages and frequencies can be provided. Single phase operation requires a phasing capacitor (not furnished by TRW).

‡¼ O.D. shafts are limited to 600 oz. in.

Max. Cont. Torque: The values in this column are based upon geartrain strength and capability for 1000 hrs. minimum life. Max. rated torque of motor selected x torque multiplier ratio must not exceed these values.

Max. Intermittent Torque = 2 x Max. Cont. Torque.

Momentary Stall Torque = 5 x Max. Cont. Torque.

Minimum Efficiency = Torque Multiplier Ratio divided by Speed Reduction Ration x 100.

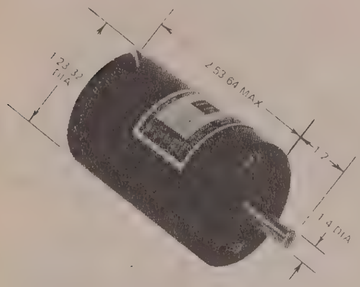
*How to Order

To specify gearmotors, select the standard part number prefix from the data table, plus the even or odd speed reduction ratio desired. For higher ratios consult factory.

MOTOR DIVISION, TRW ELECTRONIC COMPONENTS GROUP, 2275 STANLEY AVE., DAYTON, OH 45404, (513) 228-3171 • RT. 6, Box M-30A, DOTHAN, AL 36303, (205) 983-3542

A.C. 1-23/32" Dia. Hysteresis Synchronous and Induction Motors

Type CFC Basic Motor



Type CFC motors are totally enclosed for dirt and moisture resistance, and have life-lubricated bearings. Induction versions, units for operation at other voltages and frequencies, and integral planetary geartrains are available. Single phase operation requires a phasing capacitor (not furnished by TRW).

Hysteresis Synchronous — Standard Part Numbers and Data

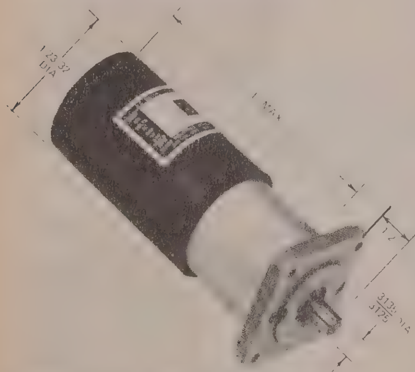
Type CFC Planetary Gearmotors Commercial Motors



Type CFC planetary gearmotors are lightweight a.c. commercial/industrial units designed to provide performance and size advantages of military gearmotors in lower cost package. Both hysteresis synchronous and induction versions can be provided with any of 83 standard planetary geartrains with speed reduction ratios from 4:1 to 46,656:1, and torques to 1250 oz. in.

Hysteresis Synchronous — Standard Part Numbers and Data

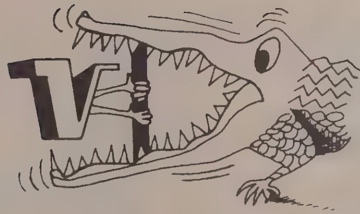
If you want to move it

,

control it,

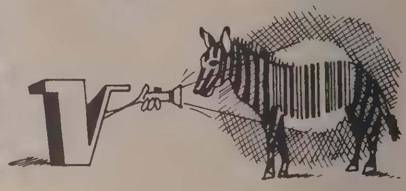
sense it

,



stop it,

or scan it



,

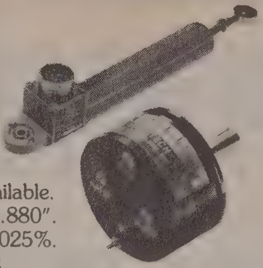
call Vernitech.

That is, if you're looking for instrument motors, optical and contacting shaft angle encoders, rotary and linear potentiometers, potentiometric pressure transducers, industrial precision brakes or clutches, or laser scanning motors, we'll probably have just what you're looking for. Just look on the opposite page. And if you *don't* find what you want, call Vernitech, give us the particulars, and we'll make it for you.

VERNITECH

VERNITECH, a division of Vernitron Corp., 300 Marcus Blvd., Deer Park, NY 11729 • 516-586-5100 • TWX 510-227-6089

POTENTIOMETERS



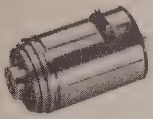
employing Vernitech's unique conductive film and precious metal wipers... respond to wiper motions as small as .000005".

Rotary Single Turn
Linear, non-linear, sine/cosine available.
Sizes 0.5", L 0.5" to Dia 5.0", L 1.880".
Linearity or conformity ±2% to 0.025%.
Resistance range 1KΩ to –250KΩ.

Rotary Multi-Turn
10 to 100 turns available.
Sizes Dia 0.5", L 1.5" to Dia 2.0", L 2.625".
Linearity or conformity ±0.5% to 0.015%.
Resistance range 1KΩ to 500KΩ.

Linear Motion
Electrical stroke lengths 1" to 60".
Linearity or conformity ±0.2% to 0.01%.
Resistance range 250Ω/in to 250KΩ/in.

CLUTCHES AND BRAKES



(electromagnetic)

hundreds of models and sizes available from stock.

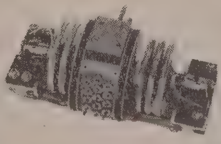
Precision Instrument Type
Sizes 5, 8, 11, 13, 15, and 18.
Standard length and wafer types. Spring and magnetic.
Meet MIL-E-5272C. Zero backlash.
Torque 5 to 150 oz. in. Response time 5 to 142 ms.

Industrial Types — open frame
Sizes 8, 12, 17, 22, 26. Torque to 75 in. lb.
Response time 6-30 ms at rated voltage.

Industrial Types — enclosed frame
Hybrid or special units designed for particular applications when MIL-SPECS and close tolerances are not essential, but where having a complete "self-contained" unit is desirable: cassette tape decks, analog devices actuators, etc.

Fail Safe
Braking action occurs 10 ms after coil is de-energized or power fails. Sizes 8, 17, 30, and 45.
Torque up to 50 in. lb. Zero backlash. Adjustable to compensate for wear.

PRESSURE TRANSDUCERS



potentiometer type,

featuring infinite resolution, long life, and high reliability through the use of conductive film resistance elements, multiple wipers, and direct coupling of pressure sensing element to potentiometer wipers.

Pressure ranges from 0.1 to 10,000 psi in gage, absolute and differential types. Also available with high overpressure capability.

Linearity to ±0.3%. Air speed, altitude and low cost types available.

VERNITECH

MOTORS

Over 1500 Standard Designs or Custom Designed to your requirements.

Synchronous — for laser scanning
Sizes 5, 8, 11, 15, 18, 20, 25, 35.
Speeds 100 to 48,000 rpm.
5 through 1600 Hz. 2, 4, 8, 12 poles.

Servo
Viscous damped — sizes 8, 10, 11, 15, 18.
Speeds 3000 to 10,000 rpm.
Inertially damped — sizes 8, 11, 15, 18.
Speeds 3000 to 9500 rpm.

Stepper
Sizes 5, 8, 11, 15. Stepping angles 7.5°, 15°, 45°, 90°.
Stepping rates 100, 110, 125, 130, 175, 180, 225, 240, 260, 400, 725, 800, 1000 pps.

Precision Motor Generators Sizes 8, 10, 11, 15, 18, 23.

Integrating and Computer Motor Tachometers
Sizes 8, 10, 11, 15, 18, 23.

SHAFT ANGLE ENCODERS

featuring precision chrome on glass discs for highest accuracy.

Optical Incremental
VOE 005 — Dia. 0.500", 0.510" L. To 256 pulses (modular)
VOE 05 — Dia. 0.500", 0.820" L. To 256 pulses
VOE 11 — Dia. 1.062", L. 1.80". To 1024 pulses
VOE 015 — Dia. 1.510", L. 0.88". To 1024 pulses (modular)
VOE M15 "Dial Coder" — panel mounted, 1.500" dia., L. 1.08" 127-256 pulses
VOE 023 — Dia. 2.25", L. 80". To 1250 pulses (modular)
VOE 23 — Dia. 2.250", L. 1.875". To 1250 pulses (available sealed)
VOE L23 "Thrift-Line" Dia. 2.250" L. 1.875". To 600 pulses
VOE 25 — Dia. 2.500", L. 2.500". To 3000 pulses (available sealed)

Optical Absolute
VOE 23: Binary, Gray or BCD to 512 counts per turn. Counting speed: 3000 rpm.
VOE 30: Single or multi-turn; Binary, Gray or BCD. To 1024 counts per turn. Max count (2^{19}) in 512 turns. Counting Speed: 30KHz.

Contacting Absolute
Sizes 11, 18, 23, & 31. Binary, Gray, and BCD. Single or multi-turn. Max count (2^{19}) in 2048 turns. 64 to 1024 counts per turn. Operating speed 200 rpm max.

SYNCHRO CONVERTER MODULES

Tracking Synchro-to-Digital and Resolver-to-Digital Converters
Economy Series VSD/VRD. Precision Series VSDH/VRDH Compact, solid state, high performance converters employing type 11 servo loops for lag free tracking at rates to 3600°/sec. Resolution 10 bits, 12 bits, or 14 bits.

Digital-to-Synchro and Digital-to-Resolver Converters Series VDS/VDR: Accept shaft angle data in digital form for conversion to analog at accuracies up to ±4'.

Tracking Synchro-to-Linear DC Converter Module
Series VSDCH/VRDCH: Accept 3-wire synchro or 4-wire resolver input data, convert it to DC analog voltage proportional to synchro angle of input. Accuracy ±6' (typ.).

Tracking Angle Position Indicator
VNST-104: Tracking Synchro-to-Digital Converter, can also be used as a control element. Four decade 0.8" red LED display. Display accuracy ±6' arc (typical). Tracking rate 3600°/sec max. Parallel binary or BDC output.
Self contained line operated power supply.

Custom designs available to your specifications.

vernitorq™ BRUSHLESS DC TORQUE MOTORS

VERNITORQ^{TM} BRUSHLESS DC TORQUE MOTORS

Brushless, direct drive, limited rotation motors available in two and four pole configurations, frameless or housed, for precise positioning, actuation and infinite control. Available with Alnico or air stabilized samarium cobalt magnets for ease of handling and assembly. All units are toroidally wound and encapsulated in a high temperature medium through a precision transfer molding process.

Vernitorq motors feature:

- Quick response
- Wide angular excursion
- Hi torque, lo input power
- Infinite resolution
- No slot effect

In addition to the above features, "Vernitorq" motors are friction free, explosion-proof, and offer no electrical or mechanical noise. They are ideally suited for such typical applications as:

- Mirror positioning in infra-red/thermal imaging systems
- Tension control on hi speed printers
- Missile safe/arm actuation systems
- Disc drive head positioners
- Open/close valve actuators
- Medical scanning equipment
- Camera control mechanisms

"Vernitorq" motors are optimally designed to enhance system performance.

Vernitron Control Components is also a primary source of synchros, resolvers, Torqsyn® Remote Positioners, & electromechanical assemblies and indicator packages.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

PHOTOSENSORS • PHOTODIODES

LOW NOISE, RED-ENHANCED, SILICON PLANAR DIFFUSED PHOTODIODES

From the world leader in Photodiodes, the PH Series. Designed for optimized performance in the red region of the spectrum. Provide linear response over 7 decades of incident power range. In 5 standard sizes. Hermetic packaging in TO cans.

FAST RESPONSE SILICON PLANAR DIFFUSED PHOTODIODES

Designed for fast risetime applications, the PS Series provide optimized response with linearity over a wide incident power range. Applications include photovoltaic and photoconductive use as in fiber optics, optical encoders, process control, photocopiers and flash detection. Call ASEC for special requirements. All PS Series are supplied in hermetically sealed TO packages for maximum reliability.

SPECIAL HIGH SPEED SILICON PIN PHOTODIODES

For use in the 600-900 nm range of the spectrum where minimum risetime and maximum response are needed. For use in telecommunications links. Supplied in a sealed TO5 can. Available without seal when fiberoptic must be butted against active area.

Type No.	Outlines	Effective Photosensor Surface cm²	Max Dark Rev Current I_{DR} @ −50V	Reverse Brk Voltage V_{BR} Volts	Source Impedance R_{SO} Meg-Ohm	Junction Capacitance C_J @ −50V pf	Rise Time 10-90% 50 ohm load @ −50V ns

DUAL & QUAD ELEMENT SILICON PHOTOSENSORS

Unique devices designed for use in Laser positioning and other null applications which require detection of the relative position of a light spot. Supplied in TO5 packages. See terminal arrangements in drawing below.

CENTRONIC

Optoelectronic Devices

The Centronic line of optoelectronic components is one of the most complete — if not the most complete — in the industry today.

Whatever your requirements are . . . high performance or economy . . . single or multiple element . . . quadrant or dual . . LED's . . . photo interrupters . . . phototransistors . . . optocouplers . . . solar cells . . . etc., you can depend on Centronic for performance-rated products, quick delivery and very competitive pricing.

Ask your local Centronic representative to quote your next requirement, or **CALL (201) 233-7200** and ask for an applications engineer.

VISIBLE LED's (Red, Orange, Yellow, Green)

OPERATING CHARACTERISTIC (Ta = 25 Degree C)							
Parameter	Condition	Red	Red(GaP)	Green	Yellow	Orange	Unit
Vf Forward Voltage (TYP)	IF=20mA	1.7	2.1	2.2	2.2	2.2	V
Vf Forward Voltage (MAX)	IF=20mA	2.0	2.8	2.8	2.8	2.8	V
Ir Reverse Current	Vr=5v	100	100	100	100	100	μA
P Wave Length at Peak Emission	IF=20mA	655	695	565	585	635	nm
Special Line Half-Width	IF=20mA	35	25	25	25	25	nm

ABSOLUTE MAXIMUM RATING (Ta= 25 Degree C)						
Parameter	Red(GaAsp)	Red(GaP)	Green	Yellow	Orange	Unit
Reverse Voltage Min.	3	5	5	5	5	V
Average Forward Current	20	20	30	30	30	mA
Power Dissipation	100	120	105	105	105	mW
Operation Temp Range	−40 to 80 degree C					
Storage Temp. Range	−40 to 100 degree C					
Lead Solder Temperature (1.6 mm From Body) 230 Degree C For 5 Second						

Typical luminous intensities are 0.4 to 2.5 MCD at 20mA. Those with −H suffix are 1.5 to 15 MCD at 20mA.
Also available LED strips and arrays.
All LED's available diffused, clear, or water clear

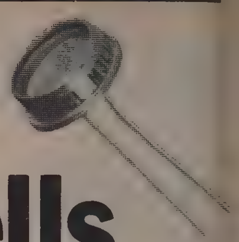
Clairex Photoconductive Cells



Part No.	Diam. X Length (inches)	Resistance @ 2 ftc ± 33-1/3%	Minimum resistance ratio from 2 ftc to Dark within 5 sec.	Maximum voltage	Power Dissipation @ 25°C (mw)
CL5M9M	.55 X .18	11K	1:1000	250	2000 500[1]
CL709L	.36 X .18	28K		100	125
CL909L	.21 X .15	100K		100	50

Type 9 CdS, peak spectral response 5500 angstroms combines high speed with extreme temperature stability and high linearity.

CL5M3	55 X .18	7.2K	1 10,000	250	2000 500[1]
CL603	.25 X .5	133K		300	75
CL603A	.25 X .5	75K		300	75
CL603AL	.25 X 5	3.5K		170	75
CL703	.36 X .18	133K		300	125
CL703A	.36 X .18	67K		300	125
CL703L	36 X 18	2 7K		100	125
CL903	.21 X .15	133K		250	50
CL903A	21 X .15	67K		250	50
CL903L	21 X .15	6 0K		100	50

Type 3 CdSe, peak spectral response 7350 angstroms, fast response, and verv high light-to-dark resistance ratio. Can be used for high speed switching or counting. Sensitive to near infra red. For use with incandescent or neon lamps.

CL5M4	55 X 18	1.5K	1 400	250	2000 500[1]
CL5M4L	.55 X .18	0.25K		170	2000 500[1]
CL604	25 X 5	30K		300	75
CL604L	25 X .5	1 5K		170	75
CL704	36 X .18	30K		300	125
CL704L	.36 X .18	0 6K		100	125
CL904	21 X 15	30K		250	50
CL904L	.21 X .15	2K		100	50

Type 4 CdSe, peak spectral response 6900 angstroms, lowest resistance photocells available. Can be used for "on-off" applications when low resistance is desired. For use with incandescent or neon lamps.

CL5M5	.55 X .18	9K	1 100	250	2000 500[1]
CL5M5L	.55 X .18	1.5K		170	2000 500[1]
CL605	.25 X .5	166K		300	75
CL605L	.25 X .5	7.5K		170	75
CL705	.36 X .18	166K		300	125
CL705L	.36 X 18	3.3K		100	125
CL905	.21 X .15	166K		250	50
CL905L	.21 X .15	10K		100	50

Type 5 CdS, peak spectral response 5500 angstroms (closely matches the human eye), most stable, lowest memory photocell available. Can be used in light measuring applications and precision low speed switching. For use with incandescent, fluorescent or neon lamps.

CL705HL	.36 X .18	28K	1:1000	100	125
CL905HLL	.21 X .15	15K		60	50
CL905HL	.21 X .15	100K		100	50
CL905HN	.21 X .15	700K		100	50

Type 5H CdS, peak spectral response 5500 angstroms (closely matches the human eye). Combines high speed, stability, linearity. and uniform color temperature response. Footnote 1. with and without heat sink.

Part No.	Diam. X Length (inches)	Resistance @ 2 ftc ± 33-1/3%	Minimum resistance ratio from 2 ftc to Dark within 5 sec.	Maximum voltage	Power Dissipation @ 25°C (mw)
CL707H	.36 X .18	500K	1:1000	300	125
CL707HM	.36 X .18	100K		250	125
CL907H	.21 X .15	600K		250	50
CL907HN	.21 X .15	300K		100	50
CL907HL	.21 X .15	24K		100	50

Type 7H CdS peak Spectral response 6200 angstroms. Very fast decay time coupled with low resistance and high linearity. Ideal for beam breaking applications.

CL5M7	.55 X .18	7.2K	1:300	250	2000 500[1]
CL607	.25 X .5	133K		300	75
CL707	.36 X .18	133K		300	125
CL707L	.36 X .18	2.7K		100	125
CL907	.21 X .15	133K		250	50
CL907N	.21 X .15	66K		100	50

Type 7 CdS, peak spectral response 6150 angstroms, moderate speed and ratio. Can be used in general beam breaking applications. For use with incandescent, neon or fluorescent lamps.

Part No.	Diam. X Length (inches)	Resistance @ 2 fc ± 33-1/3%	Minimum resistance ratio from 2 ftc to Dark within 5 sec.	Maximum voltage	Power Dissipation @ 25°C (mw)	Type

MINIGLOSSARY

OPTO SEMICONDUCTORS

Avalanche Photodiode: A photodiode that takes advantage of avalanche multiplication of photocurrent. It is particularly suited to low noise and/or high speed applications.

Contrast: A noticeable difference in color, brightness, or other characteristics in a side-by-side comparison.

Chrominance Contrast: The color contrast between two adjacent surfaces of identical area, shape, texture, and luminance. The human eye is more sensitive to differences in color than it is to differences in brightness.

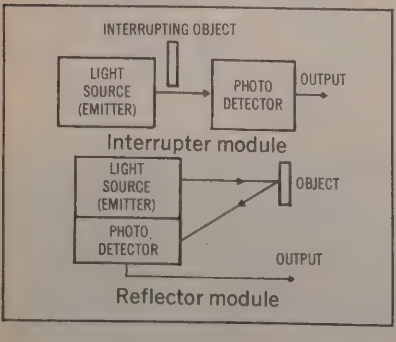
Current Transfer Ratio: The ratio of an optocoupler's output current to input current at a specified bias.

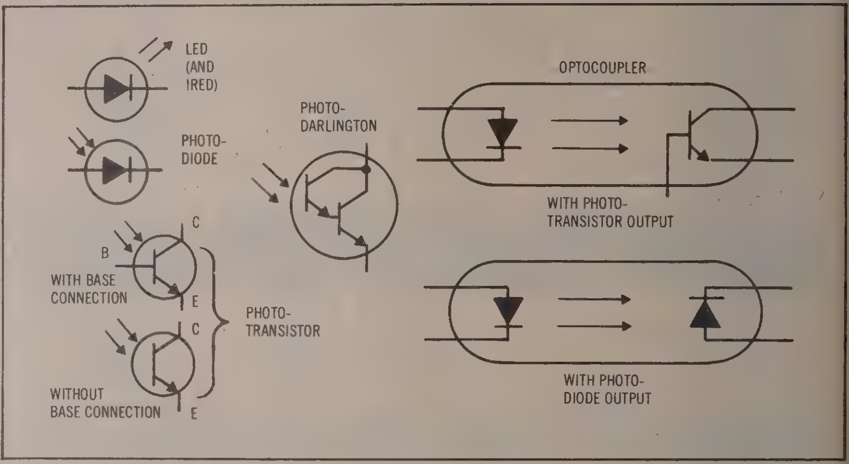
Dark Current: The leakage current of a photodetector with no incident light.

Dominant Wavelength: The wavelength that is a quantitative measure of apparent color of light as perceived by the human eye.

Infrared Radiation: The electromagnetic wavelength region between approximately 0.75 and 100 micrometers longer than the wavelength of visible light.

Interrupter (module): A device that produces an electrical output signal when an object breaks the light (visible or invisible) between a light source and a photodetector.





IRED: An infrared-emitting diode. See light-emitting diode.

Light Current: The current that flows through a photodetector when it is exposed to radiant energy.

Light-Emitting Diode (LED): A semiconductor diode that emits incoherent light at its PN junction when forward biased. The light can be in the visible or invisible (infrared) wavelength region.

Luminance Contrast: The observed brightness of a light-emitting element compared to the brightness of the "surround," an integral part of the device and inseparable from it.

Optocoupler: A device that transmits electrical signals, without electrical connection, between a light source (input) and the receiver (output). The input is generally an LED; the output might be a photodiode, phototransistor, a photo–Darlington, etc. Sometimes referred to as optoisolator.

Peak Wavelength: The wavelength at the peak of the radiated spectrum of an emitter.

Photo–Darlington: A light-sensitive Darlington-connected transistor pair. The photo–Darlington has a very high sensitivity to illumination or radiation.

Photodetector: A device that provides an electrical output signal when subjected to radiation in the visible, infrared, or ultraviolet regions of the electromagnetic spectrum. Photodiodes, phototransistors, and photo–Darlingtons are the most common type of photodetectors.

Photodiode: A junction diode that is responsive to radiant energy. Photodiodes have a high degree of linearity between the input radiation and the output current, and faster switching speeds than phototransistors.

Photothyristor: A thyristor whose switching action is controlled by light applied to the thyristor gate.

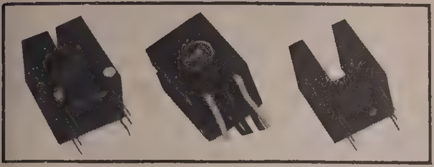
Phototransistor: A light-sensitive transister that delivers an electrical output proportional to the light intensity at its input. The low-level photocurrent that is generated is amplified by the current gain of the transistor. The base region (or gate in a FET) may or may not be brought out as an external terminal.

Point Source: A source with a maximum dimension less than one-tenth the distance between sources and detector.

Reflector (module): A device containing a light source and a photodetector that detects any object that reflects light produced by the source back to the detector.

HEI OPTOELECTRONIC PRODUCTS

OPTICAL SWITCHES



HEI optical switches consist of an LED/photo-transistor pair operating across an air gap. Light beam interruption causes a change in output. Switches are contactless, highly reliable, and extremely long-lived. The LEDs operate in the infrared range.

Choose from 32 models, including some with integral hybrid amplifiers and Schmitt triggers. Both analog and digital models.

Two small packages available with either DIP pins or 12-in. leads. Most styles compatible with TTL/DTL/MOS circuits. OS-591S series have TTL/DTL square wave output. Switches are normally closed when uninterrupted. Precise alignment gives maximum output, and lens system reduces ambient light. HEI offers custom packaging, and can meet special performance requirements. Contact factory representative for specific information.

- **OS-521S-XXX** Contains LED and high-gain photo transistor. Medium speed, analog output.
- **OS-581-XXX** Contains LED and photo Darlington transistor. High gain, medium speed. Ideal for limit switching, presence detection. Analog output.
- **OS-561A-XXX** LED/photo transistor with integral hybrid amplifier for high speed, high output current. Used with TTL/DTL gates, analog output.
- **OS-591S-XXXL** Ultimate optical switch with hybrid amplifier and Schmitt trigger. Square wave output at TTL levels. Positive switching at all speeds.

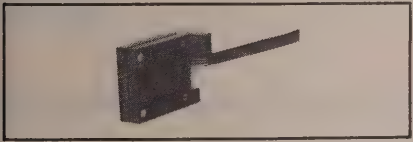
MULTI-CHANNEL READER



The 125-1 assembly contains infra-red LEDs which are spectrally matched with silicon photo transistors. Hybrid circuitry is included for TTL compatibility. Primarily designed as an 8 or 12 channel vertical format unit for line printers.

Number of channels and centerline spacing may be varied to suit assorted applications. Air gap may be specified, along with analog or digital output.

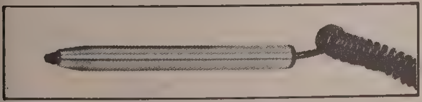
Using a data hole width of .030″, an obstruction of ≤15% transmissivity will result in a low output. Obstruction of ≥40% transmissivity causes a high output. A glass wear plate provides self cleaning and dust elimination.

- Each channel has a fanout capacity of 10 TTL gates, with CMOS compatibility optionally available.
- Source and sensor sides electrically isolated to avoid ground loop.
- Non-standard data holes (less than .030″ or greater than .073″) available on request.
- Standard sensor spacing is .1094″ for 12 channel unit, .100″ for 8 channel unit (except for channels 6 and 7 which are .250″).
- Supply voltage 4.5 to 5.5V. Output current 800 μA high, 16 mA low.
- Slot depth 1.725″ standard, width 1.5″, gap .020″.

CHARACTERISTICS		MIN.	TYP.	MAX.
High Level Output Voltage (V_{CC}=4.75V, I_{OH}=-800 μA)	V_{OH}	4.5V	4.75V	
Low level Output Voltage (V_{CC}=4.75V, I_{OL}=16 mA)	V_{OL}		0.2V	0.4V
*Short Circuit Output Current (V_{CC}=5.25V)	I_{OS}	-1.8 mA		-2.5 mA
Supply Current (Per Channel)				
Source Side (V_{CC}=5.25V)	I_{CC}		21 mA	25 mA
Detector Side (V_{CC}=5.25V)	I_{CC}		3.6 mA	5.0 mA

*Not more than one output should be shorted at one time.

LIGHT PENS (New Color-Sensitive Light Pen Available in 1983)



HEI light pens for CRT terminals are solid state assemblies which utilize opto-electronics and hybrid circuitry to provide two TTL-compatible outputs: "Light Pen Hit" and "Light Pen Switch". The latter is generated when tip of pen is pressed against CRT face. A "Hit" is generated when an unblanked spot on the CRT face is under the pen tip. Signals are transmitted to control logic of the terminal for fast data manipulation.

Two models available: 120-3 has black plastic barrel, 120-2 has slimmer stainless steel barrel. Both available with optional coiled cord, and adjustable sensitivity. Resolution is excellent, along with high ambient light rejection. Both models light weight, meet Mil Stds. for radiation susceptibility and vibration.

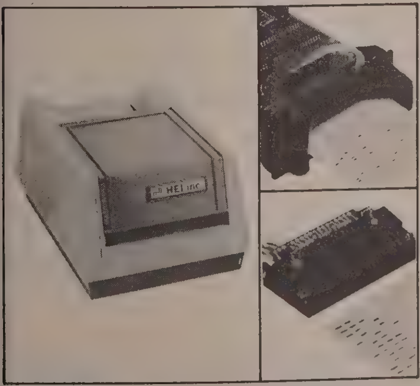
ELECTRICAL

Input Power	5V @ 125 mA
Sensitivity	7 FL Spot Brightness (Minimum Pickup)
Ambient Rejection	100 FL
Response Time	<.5us @ 20 FL
Field of View	<.075 inches
Light Pen Switch	TTL compatible (Normally high, low while nose cone is actuated)
Light Pen Hit	TTL compatible (Normally high, low during pulse period)

MECHANICAL

	120-3	120-2
Length	<6.2 inches	5.96 inches
Diameter	<.625 inches	.495 inches
Weight	<2 ounces	<2 ounces
Nose Cone Travel	<.100 inches	.090 inches
Cable Length	4 feet	4 feet
Cable Diameter	<.150 inches	.150 inches
Color	Black	Silver

CARD READERS



HEI offers several card reader models as well as OEM read heads. Call or write for details.

HEI's hand-fed card reader offers capability to interpret either marked or punched cards. High reliability hybrid circuitry provides TTL-compatible output. Designed to read standard 80-column cards with clock marks. Can handle other cards of reasonable length.

This reader has superior mark detection capability, and will read a wide variety of pencil and ink colors. Toleration of worn or mutilated cards is good.

The reader head is self cleaning, and no lubrication is required. Cards are fed by hand, internal mechanism transports cards through at 6″/second.

Either parallel or RS-232 interface format available. The unit may be ordered with or without internal power supply. For mark/sense applications, cards must have printed strobe marks on either margin.

Specifications

Input Power	115VAC, 60 Hz, .35A +5VDC, .2A −12VDC, .1A
Output	TTL Compatible 12 rows paralleled up to 80 rows serial
Physical Size	4.75″ (120.6mm) W 9.75″ (247.6mm) D 4.25″ (108mm) H
Weight	4.5 lbs. (2 kg)

Introduction

Honeywell

OPTOELECTRONICS INC.
830 EAST ARAPAHO ROAD
RICHARDSON, TEXAS 75081
(214)—234-4271 TELEX 73-0890
TWX 910-867-4757

Honeywell offers industry's broadest range of optoelectronic products. They include:

- LEDs
- Silicon photodetectors (Transistor, and IC)
- Transmissive switches
- Reflective switches
- Encoders
- Emitter/Detector arrays
- Discrete chips
- Custom components and assemblies
- Pin diodes
- Fiber optic components
- Fiber optic links

Honeywell strives for continuing leadership in high-technology optoelectronic products — today and tomorrow. That's why we're committing substantial resources to research and development efforts for the next generation of optoelectronics.

In addition to its standard products, Honeywell can develop custom components, assemblies and systems to meet exact customer requirements.

today at (214) 234-4271.

Optical switches

- LED and photodetector in the same package.
- Reflective and transmissive (interrupter) types.
- Plastic and hermetic components.
- Transistor, Darlington and Schmitt trigger outputs.
- Variety of package designs.

- Choice of diode, transistor, darlington and Schmitt outputs.
- Photodiodes for fast speed of response.
- Phototransistors offer medium response and high stability.
- Photodarlingtons for applications requiring extremely high sensitivity.
- Optoschmitt devices have voltage regulator, differential amplifier and Schmitt trigger on the same chip, eliminating additional signal processing circuitry.
- Plastic and hermetic packages available.

Notes:

(1) Storage temperature −65°C to +150°C (hermetic)
−40°C to +85°C (plastic)
(2) Operating temperature −65°C to +125°C (hermetic)
−40°C to +80°C (plastic)
(3) Angular response is defined to be the total included angle between half sensitivity points.

(a) Light source is a 940nm LED.
(b) $I_C = 250\mu A$

*The value of H is measured in mW/cm^2 from a tungsten source @ a color temperature of 2870°K.

Specifications indicated are for 25°C ambient temperature.
See individual data sheets for temperature derating information.

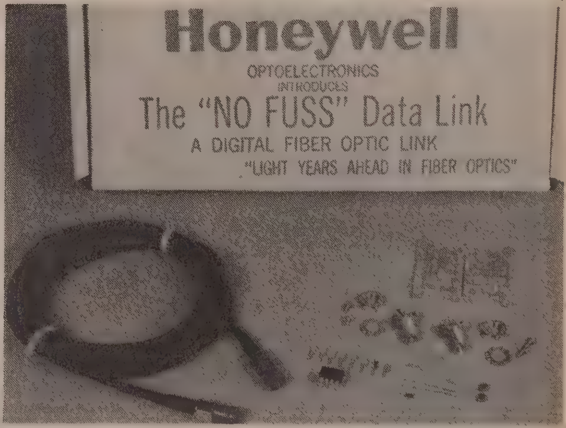
C to 5 MB/s Fiber Optic ink Kit HF 4102



Honeywell
OPTOELECTRONICS
INTRODUCES
The "NO FUSS" Data Link
A DIGITAL FIBER OPTIC LINK
"LIGHT YEARS AHEAD IN FIBER OPTICS"

his link has been designed to be used in computer nd process control applications. It requires no knowledge f optics or communications protocols or adjustment of ny components.

eatures:

- Code transparent digital data transmission
- Data rates up to 5 MB/s, bandwidth DC to 2,5 MHz
- TTL compatible inputs and outputs
- Operation to 2 km
- Supply voltage - 0,5 V to + 7 V
- No additional components needed

ow Cost Digital Fiber Optic Link Kit

PX 4101

his is ideal for first contact with fiber ptics technology. No special tool is equired. The kit contains all necessary omponents to construct a 5 meter ligital data link.

Features

- TTL/CMOS compatible input and output
- Single power supply (5V to 15V)
- DC to 200 Kbit data rate
- Operation to 15 meters
- GaAlAs LED
- Monolithic Schmitt Trigger detector
- Low profile AMP field-applicable connectors
- DuPont OE1040 plastic fiber (5 m)
- No special tools, no polishing, no adhesive for fiber termination
- Press-fit components (AMP Optimate Simpex connector)

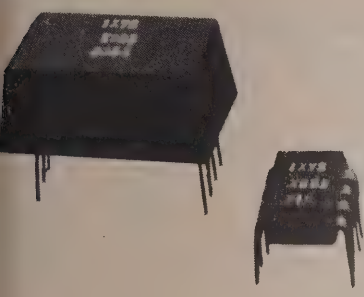
TELEPHONE: (408) 733-4045

XVS OPTO-COUPLED VOLTAGE SENSOR



FEATURES:

- Built in precision reference
- ±50 ppm/deg C average Threshold TC
- Fast turn on response
- Low output noise
- 3500-7500V isolation voltage
- Low coupling capacitance
- TTL compatible
- High noise immunity
- 8 lead DIP or VDE package

DESCRIPTION:

The XVS includes an amplifier/comparator/driver having a built in precision bandgap reference of 2.5V, the output of which drives directly a GaAs infrared transmitting diode optically coupled to a Si NPN transistor. The amplifier has a high current sinking capability of 100 ma with a transconductance of 2 siemens minimum. The amplifier output is brought out to pin 3 such that feedback can be applied. The built in optocoupler has a high CTR of 50% typical. Built in precision reference. Fast turn on response. Low output noise. A 3500V isolation voltage. Low coupling capacitance. TTL compatible. High noise immunity. XVS-2 in 8-pin DIPpackage. XVS-3 in 8-pin VDE package.

APPLICATIONS:

- Fault-tolerant line voltage sensing
- Feedback element switching power supply
- Signal ground isolation
- Replace pulse transformers
- Opto-isolated microprocessor data bus
- Isolated line receiver/transmitter
- AC/DC voltage monitoring element

Infrared Emitters, Sensors and Photologic™ Devices

Emitters

Infrared emitters from the Optoelectronics Division of TRW are currently made of two basic materials, gallium arsenide (GaAs) and gallium aluminum arsenide (GaAlAs). These materials are cut into a variety of chip sizes and mounted into a much greater variety of package styles and lens configurations to suit almost any application requirement.

The latest state-of-the-art solution grown epitaxial techniques are used to ensure high efficiency, long operating life, and minimum degradation.

Aside from slight differences in spectral emission, (GaAs is centered at 930 nanometers, GaAlAs is centered at 875 nanometers), there are some other things to consider when deciding which material to choose for a specific application:

GaAs	GaAlAs
1. Less degradation	1. 2.5 times the effective P_O at the same I_F.
2. Lower cost	2. Large area chips available for high current pulsing applications.
3. Lower V_F	3. Improved spectral match with silicon phototransistors and ICs.

Sensors

For every infrared emitter made by TRW, except the T-1¾ package, there is a spectrally and mechanically matched sensor. Though most are phototransistors, there are several package styles which allow a photodarlington, photodiode or photologic™ option.

Photodarlingtons are used when infrared signal levels are low and more current gain is needed than is possible with phototransistors. Photodiodes are used where high speed, low noise and linear output are needed. Photologics are used where direct interface to logic circuitry is needed.

All sensors are fabricated using advanced silicon planar diffused technology and are silicon nitride passivated for long term stability. An antireflective coating over the active area ensures maximum absorption of irradiated energy.

Photologic™ Devices

"Photologic™" is a trademark TRW uses to identify its family of direct interface logic compatible sensors. Each device is a bipolar monolithic integrated circuit containing a high speed photodiode, a linear amplifier and a Schmitt trigger on a single silicon chip. Four output options are available: buffer totem-pole, buffer open-collector, inverter totem-pole and inverter open-collector. Sink current of 12.8 mA is available for driving up to 8 TTL loads without additional circuitry and medium speed data rates to 250 KBaud are possible with typical rise and fall times of 25 nsec.

OPTOELECTRONICS DIVISION, TRW ELECTRONIC COMPONENTS GROUP, 1207 TAPPAN CIRCLE, CARROLLTON, TX 75006 • (214) 323-2200 TWX: 910-860-5958

Infrared Emitters, Sensors and Photologic™ Devices

Electrical Characteristics ($T_A = 25°C$)

Emitters

Devices containing GaAs chips can be distinguished from devices containing GaAlAs chips by the first *number* of the part number sequence.

Example: An OP160 contains GaAs. An OP260 is a mechanical equivalent containing GaAlAs.

TRW

Optically Coupled Isolators

Optically coupled isolators allow direct circuit control with complete electrical isolation of input from output and are currently the best, lowest cost way to eliminate ground loops and EMI/RFI problems associated with such control.

With one of the largest and most varied product lines in the industry, the Optoelectronics Division of TRW is able to offer the designer everything from standard 6 pin plastic P-DIP couplers, to 8 pin P-DIP high speed, high gain, "High Tech" couplers, specialty couplers, triac driver couplers, and photologic couplers. Most of TRW's optocouplers are UL recognized and several are VDE approved.

OPTOELECTRONICS DIVISION, TRW ELECTRONIC COMPONENTS GROUP, 1207 TAPPAN CIRCLE, CARROLLTON, TX 75006 • (214) 323-2200 TWX: 910-860-5958

Slotted Optical Switches, Reflective Assemblies, and Matched Pairs

TRW

lotted Optical Switches

Slotted optical switches, also known as interrupter assemblies, are designed to provide non-contact sensing of linear or rotary motion as in optical encoders. Devices from the Optoelectronics Division of TRW consist of an infrared emitting diode and a silicon photosensor mounted on opposite sides of a slot in a molded plastic housing. Switching takes place whenever an opaque object passes through the slot. Slotted optical switches are available with the following options:

1. Phototransistor, photodarlington or Photologic™ output.
2. Gallium arsenide or gallium aluminum arsenide LEDs.
3. Dual channel devices in side-by-side or over-under configuration for speed, direction of movement and relative position sensing.
4. Different slot widths.
5. Different lead spacing.
6. Sensor apertures, emitter apertures, or both for high resolution sensing.
7. Different mounting configurations.
8. Lead wires and connectors.

ustomer Selected lotted Optical Switches

TRW offers a line of products which allows the engineer complete flexibility to select a standard part to meet exact design requirements. These are called Customer Selected Slotted Optical Switches. Customers build their selected part through the use of a simple option selection guide, which controls mechanical and electrical variations through the use of a unique part number. The available options are as follows:

1. Phototransistor output—three different $I_{C(ON)}$ ranges.
2. Photologic™ output—four different output variations.
3. Different sensor and emitter lead spacings.
4. Different aperture widths in front of sensor and emitter.
5. Standard leads or 18″ (minimum length) lead wires.
6. Different mounting configurations—four housing styles
7. Housing material—polycarbonate or polysulfone.

It should be noted when making a decision on whether to specify polycarbonate or polysulfone housings, that polycarbonate is opaque to infrared and visible light. Therefore openings in the housings are required for infrared energy to pass from emitter to sensor. As a result, polycarbonate is not recommended for use in high dust and dirt environments. Polysulfone, however, is transparent to infrared, and, housings are completely sealed making them ideal for high dust and dirt environments. In unique applications where standard or customer selected parts will not work, TRW can help custom design a part to match your exact specifications. Call TRW for more information.

eflective Assemblies

Reflective assemblies are designed to provide non-contact sensing of the presence of a reflective surface, or a change in surface reflectivity. Unfocused types, where the emitter and sensor are mounted on parallel optical axes, are best suited for sensing diffuse or rough surfaces. Focused types, where the emitter and sensor are mounted on converging optical axes are best suited for sensing specular or polished surfaces. Reflective assemblies come in a wide variety of sizes and shapes and contain an infrared emitting diode and an NPN silicon phototransistor or photodarlington. They have the advantage of having both the emitter and sensor mounted on the same side of the surface being sensed.

An important design consideration when using reflective assemblies is that the photosensor will not necessarily see infrared radiation the same way the human eye sees visible light. In other words, a black surface and a white surface could have similar reflective properties when illuminated with infrared radiation.

latched Pairs

TRW currently makes two different series of matched emitter and sensor pairs; the OPS660 mini-axial or "end looker" series and the OPS690 lateral or "side looker" series. The end lookers provide high $I_{C(ON)}$ ratings due to higher lens magnification. The side lookers offer reduced mounting space requirements. Matched pairs are characterized and specified in the coupled configuration. This allows the user the flexibility to design unique mounting configurations and to control specified performance in various applications.

tes: 1. First dimension shown is aperture width. Second dimension is aperture height.
2. 2) indicates dual channel device with apertures in front of both sensors.
2E–2S) indicates dual channel device with apertures in front of both emitters and sensors.
E–S) indicates single channel device with apertures in front of emitter and sensor.

Slotted Optical Switches, Reflective Assemblies, and Matched Pairs

TRW

Customer Selected Slotted Optical Switches

By using the Part Number Selection Guide shown, it is possible to select a Customer Selected Slotted Optical Switch to meet almost any mechanical or electrical requirement. An example is provided to illustrate use of the selection guides.

Following each selection guide, a listing of the most popular types is provided. These are recommended for new designs and may be used as direct replacements for earlier discontinued part numbers. In addition, these are normally stocked by authorized TRW distributors.

Phototransistor Output Part Number Selection Guide

OPB 8XX X XX

TRW Assembly Prefix

8 = Phototransistor Output

Housing Material Designation
- 6 = Polysulfone with standard leads
- 7 = Polycarbonate with standard leads
- 8 = Polysulfone with 18″ (457 mm) minimum #26 PVC wires
- 9 = Polycarbonate with 18″ (457 mm) minimum #26 PVC wires

Note: Wire leads for 8 and 9 (above) are stripped and tinned 0.125″ (3.18 mm) minimum and color coded as follows: Red—Anode, Orange—Cathode, Black—Emitter, Brown—Collector

Mechanical and Electrical Variations
(See chart below for additional detail)

Lead spacing 0.320″ (8.13 mm)	Lead spacing 0.220″ (5.59 mm)
0 = Electrical parameter A	5 = Electrical parameter A
1 = Electrical parameter B	6 = Electrical parameter B
2 = Electrical parameter C	7 = Electrical parameter C

Wire lead devices are available only with options 0, 1, and 2.

Aperture Width in Front of Sensor
- 1 = 0.010″ (0.25 mm) × 0.060″ (1.52 mm)
- 5 = 0.050″ (1.27 mm) × 0.060″ (1.52 mm)

Note: Devices specified with a 0.010″ (0.25 mm) wide sensor aperture (1 above) are available with electrical parameter A only. For custom aperture sizes, call TRW.

Aperture Width in Front of Emitter
- 2 = 0.020″ (0.51 mm) × 0.060″ (1.52 mm)
- 5 = 0.050″ (1.27 mm) × 0.060″ (1.52 mm)

Note: Devices specified with a 0.020″ (0.51 mm) wide emitter aperture (2 above) are available only with electrical parameter A and polycarbonate housings.

Mounting Configurations
- T = Mounting tabs both sides
- N = No mounting tabs
- L = Single mounting tab, emitter side
- P = Single mounting tab, sensor side

Power Semiconductors

Power Switching Transistors and Darlingtons

High speed NPN switching transistors from the Optoelectronics Division of TRW, feature MIL-quality construction, including gold-silicon eutectic die attach and gold plated package headers. Discrete transistor and monolithic high gain Darlington configurations are offered with continuous collector currents from 5 to 30 Amps.

MIL screening to "S" levels are available upon special request.

Fast Recovery Rectifiers

Fast recovery rectifiers from TRW incorporate a platinum doped process which yields maximum reverse recovery times of as low as 25 nanoseconds.

Featured are the "double-slug" A and B packages, DO-4, DO-4 isolated, DO-5, and DO-5 isolated packages which find wide usage in both military and industrial service.

Typical uses are as commutating and clamp diodes in switching power supplies and modulators.

Schottky Rectifiers

The inherent low forward voltage drop (≤0.86 V) caused by the Schottky barrier principle makes Schottky diodes ideally suited for use in low voltage/high frequency power supplies.

Schottky diodes from TRW feature switching times of less than 50 nanoseconds and are available in the TO-3, DO-4, DO-5 and DO-203AB (DO-5 with flexible lead) package styles.

LVA® Zener Diodes

The LVA® series of devices from TRW exhibit sharper breakdown characteristics than conventional zeners in the 4–10 volt range.

Below 10 volts the field emission phenomenon starts and its effect on the breakdown mechanism increases as the voltage decreases. These effects are altered at TRW by optimum selection of doping levels. LVA® zener diodes from TRW are available in the 400 milliwatt DO-7 package.

Notes:
(1) Numbers shown are ±20%, A suffix is ±10%, B is 5%, C is ±2%, D is ±1%.
(2) Guaranteed for B, C, and D suffix only.
(3) Measured at DC test current with 10% VAC RMS superimposed (60 Hz).
(4) 1 KHz to 3 KHz.
(5) ΔV_z is max. difference between V_z at I_z and V_{zL} at I_{zL}.
(6) ±.5 mV/°C, 0–100 °C, ±Vz nominal only.
(7) Suffix denotes zener voltage tolerance.
A = ±.200 Vdc, B = ±.15 Vdc, other tolerances available on special order. Consult factory.
(8) V_F = 1.1 volts max. @ I_F = 200 mA for all types.

- Photoconductive Cells
- Interrupter Switches
- Phototransistors and Photodarlingtons
- Retroreflective Switches
- Light Activated Switches

VACTEC

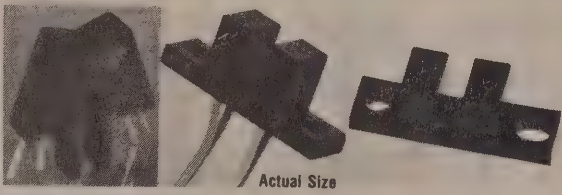
- Selenium Photovoltaic Cells
- Vactrols (Opto-Isolators)
- Infrared Emitters

INDUSTRY'S BROADEST OPTOELECTRONIC LINE

- Standard Silicon and Blue-Enhanced Photovoltaic Cells, Blue-Enhanced Photodiodes, and PIN Photodiodes

RETROREFLECTIVE & INTERRUPTER SWITCHES (Slotted)

Standard and custom optical switches—infrared GaAs LED and silicon phototransistor in an I-R transmitting housing. No openings or seams to collect dirt—available completely sealed for submersion during board cleaning—interchangeable with industry standard sizes. Request bulletins RPS-1 and SPS-1. New slotted switch with Schmitt Trigger output, bulletin SPS-2.



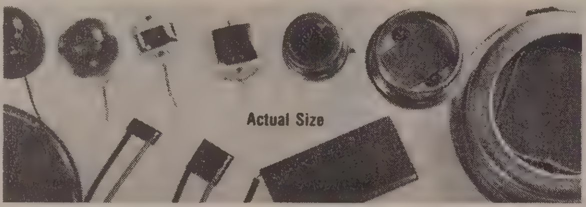
PHOTOCONDUCTIVE CELLS

Vactec light dependent resistors (LDR's) are available in three hermetic enclosures (TO-18, TO-5, TO-8) and 4 ceramic types. Ceramic types have automatically inserted wires which insure perfect contact integrity. Six materials of CdS, CdSe and CdSeS-CdS mixtures with spectral response peaks from 565-735 nm. Each material has a variety of sensitivities to satisfy all requirements. Request bulletin PCD-6.

Actual Size

SILICON PHOTOVOLTAIC CELLS

Three processes: BLUE ENHANCED, LOW CAPACITANCE, STANDARD SOLAR. All available in a variety of hermetic, ceramic, as chips, or with flying leads. The BLUE ENHANCED cells are unique large area detectors with high U-V sensitivity to as low as 200 nm. Almost non-existent U-V enhancement effect with stability equivalent to high quality photodiodes. Request bulletin VTS3A. LOW CAPACITANCE cells have fast response less than 15μS with 10KΩ load. The high shunt impedance is desirable for driving amplifiers. Request bulletin VTS-2. SOLAR cells have high V_{OC} at low illumination (typ 200mV at .05mW/cm²). Linear over wide illumination range—request bulletin VTD-1.



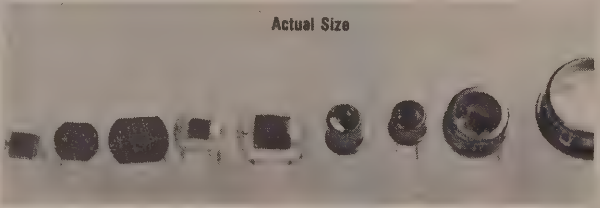
PHOTOTRANSISTORS — LED'S — PHOTODARLINGTONS — LIGHT ACTIVATED SWITCHES (LAS)

Phototransistors and photodarlingtons are NPN passivated—4 chip sizes of 25, 40, 50, and 60, mil square in TO-18, ceramic, coaxial, and lateral (side looking) packages. High light current at very low drive current ideal for instrumentation applications. Request bulletin VTTA-3A. GaAs I-R LED's with excellent stability in TO-18, T-1, T-1¾, lateral packages. Bulletin VTE-1. LAS (light activated switches) have high sensitivity with Schmitt Trigger output. Bulletin LAS-1, LAS-2.

Actual Size

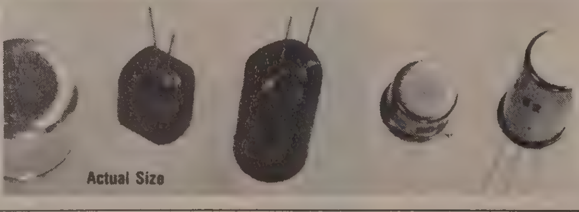
PHOTODIODES

BLUE ENHANCED photodiodes are extremely low dark current devices with excellent response in the U-V. Less than 10pA (I_D) for small chips. Large area diodes (VTB5051) 14.8mm² active area with 1.2A/(W/cm²) at 365nm and I_D of 250pA max. Request bulletin VTB-1B. FAST photodiodes have low capacitance. Use with reverse bias for fast response time and excellent linearity. Ideal for remote I-R sensor digital controls. Request bulletin VTD-1.



VACTROLS

Optical couplers using LED's, neons, or incandescent lamps as the emitter and Vactec photoconductive cells (LDR's) as the detector. For noiseless switching and signal monitors for audio. Neon types to sense telephone ring. LED types for triac gate control. Incandescent types for low cost true RMS sensor as voltage regulator or control of constant wattage heater. Five package types include 2 hermetic. Request bulletins VTL1, VTL2C, VTL3, VTL5CA, VTL5C8 and VTL9.



SELENIUM PHOTOVOLTAIC CELLS

Large area detectors for direct meter drive or in conjunction with amplifier. Spectral response peaks at 575 nm and is close to visible response. Available with integral #102 filter to match standard observer curve (CIE) Available in many flat or round cells with or without leads—also in 9 package styles including 2 hermetic. Request bulletin SPV-5A.

NEW FROM LITTELFUSE

The right industrial fuse for the right place. At the right price. Right on time.

We've been manufacturing small dimension fuses for over half a century, giving you state-of-the-art performance, reliability and service.

Now we can offer the same advantages in our new line of top quality industrial fuses: midget, semi-conductor rectifier, general purpose, hi-interrupting, one-time and renewable fuses. All backed by Littelfuse. And all available at competitive prices and ready for quick delivery. So when the time comes to replace your industrial fuses, we hope you'll save this handy guide and think of Littelfuse…the company that can meet all of your fuse requirements…big or small.

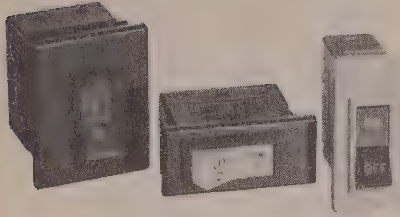
Circuit Breakers

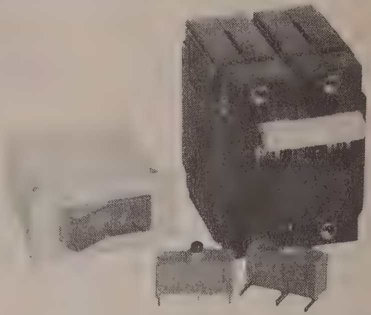


Model 203

Front panel mount device combines overcurrent protection, ON-OFF switching, pilot light. Series, shunt or relay trip.

Specifications: 1 to 3 poles. Ratings: 0.05-10A, 250Vac, 50Vdc, 10.1-20A, 120Vac, 32 Vdc. Interrupting capacity: 1000A.

Approval: SP S ЯU



Models SNAPAK®, CARDGARD™, IPG

All conform to VDE and IEC spacing requirements. CARDGARD is pc board mountable.

Specifications: SNAPAK®: 1 or 2 pole ratings: 0.10 to 15A at 32Vdc/125Vac, 0.10 to 7.5A at 50Vdc/250Vac. 2 pole only (2 pole breaking) and ratings; 7.6 to 15A at 125/250Vac, 32/50Vdc. Interrupting capacity: 1000A at 125Vac, 32Vdc and 50Vdc.

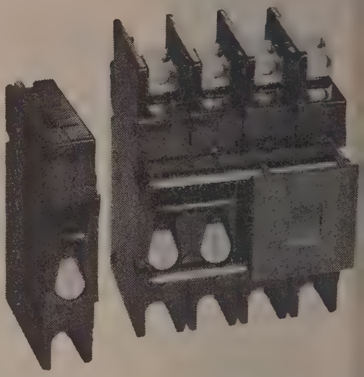
Approval: IEC SP S ЯU

CARDGARD™: 1 pole. Ratings: 1.0 to 6.0A, 32Vdc, 250Vac. Interrupting capacity: 10 times rated current.

Approval: ЯU

IPG: 1 to 4 poles. Ratings: 0.02-30A, 250Vac, 65Vdc, 31-50A, 50Vdc. Interrupting capacity: 1000A, 250Vac, 65Vdc, and at 5000A, max. ratings of 30A at 120Vac, 20A at 250Vac, 10A at 250Vac.

Approval: SP S ЯU
Q P L : MIL-C-55629

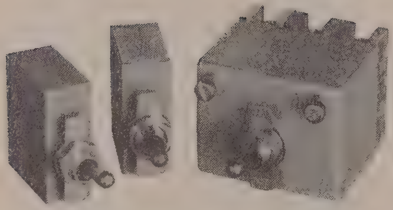


Model 209

Ideal for branch circuits. Mount in switch boards, panel enclosures, panel boards, junction boxes. Series includes 219 manu motor controller, 229 appliance controller 249 marine power selector.

Specifications: 1 to 6 poles. Ratings: 0.10-100A, 125Vdc; 0.10-77A, 600Vac; 0.10-100A, 120, 240, 277 and 480 Vac. Interrupting capacity: 5000A.

Approval: SP S UL ЯU

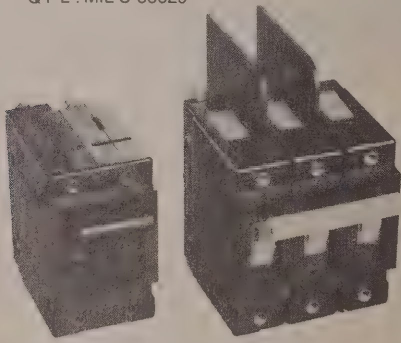


Models AP and UP

Hermetically sealed. DC, 50/60Hz or 400Hz versions. Various delays to meet your needs. UP version has wide glass terminals.

Specifications: 1 to 3 poles. Ratings: 0.05-20A, 240Vac, 50Vdc. Interrupting capacity: 1000A.

Approval: SP S ЯU
(UP single pole series only)
Q P L : MIL-C-39019

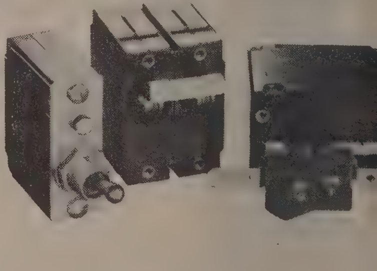


Models APL/UPL & 205

These breakers offer precision operation for critical service. Series, shunt and relay configuration options. Choice of delays, ratings. 205 dust-sealed for harsh environments.

Specifications: 1 to 9 poles. Ratings: 0.05-20A, 277Vac (Mod. 205, 277/480Vac); 0.05-50A, 250Vac, 65Vdc; 51-100A, 32Vdc. Interrupting capacity: 1000A, 65Vdc (Mod. 205 also 250Vac), 2000A, 32Vdc, 5000A, 120Vac (50A max. rating); 5000A, 277Vac (Mod. 205, 277/480Vac) (20A max. rating).

Approval: SP S ЯU
Q P L : MIL-C-55629



Models APG/UPG

Low-cost, precision operation. Multipole assemblies, single or multi-handle. For da processing, broadcast equipment, vendin machines, controllers, etc.

Specifications: 1 to 4 poles. Ratings: 0.02-30A, 277Vac, 65Vdc, 31-50A, 50Vdc Interrupting capacity: 1000A, 277Vac, 65Vdc, and at 5000A, max. ratings of 30 at 120Vac, 20A at 250Vac, 10A at 277Va

Approval: SP S ЯU
Q P L : MIL-C-55629

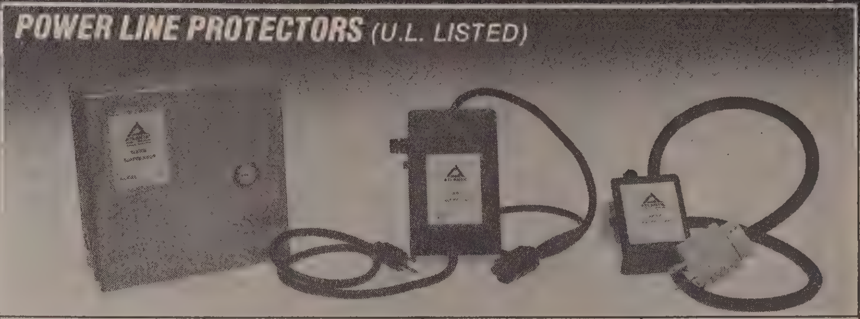
STATE-OF-THE-ART PROTECTION FOR POWER LINES AND DATA LINES

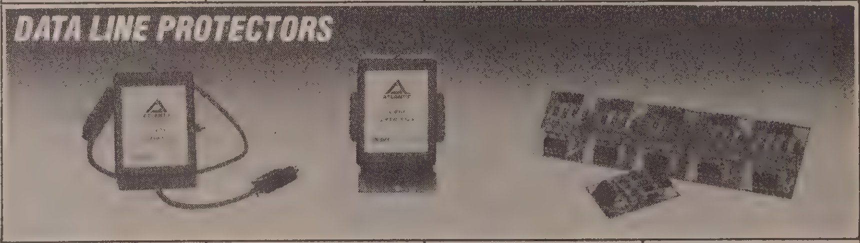
PROTECT YOUR SENSITIVE ELECTRONIC EQUIPMENT AGAINST ALL HAZARDS — FROM RANDOM TRANSIENTS TO LIGHTNING INDUCED SURGES

POWER LINE PROTECTORS *(U.L. LISTED)*



FEATURES:	M B SERIES	R B SERIES	H P B SERIES
Protection from surges	Up to 65,000A	Up to 25,000A	Up to 250A
Response time	50 nanoseconds	<10 nanoseconds	<10 nanoseconds
Holdover current	None	None	None
Failure indicator light	Yes	Yes	Yes
Solid state	100%	100%	100%
For protection of:	-power lines at service entrance and circuit breaker panels, against high current line surges and lightning induced effects	-solid state equipment control systems, and computers, where high energy powerline surge protection is required	-secondary power insertion applications to semiconductor equipment, such as computer, CATV, and control systems
Models available (VAC)	120, 240, 277, 350, 480, 600 split-phase or 3-phase	120, 240, 277 1-phase or split-phase	120, 240 1-phase, split-phase or 3-phase
Recovery time	Instant	Instant	Instant
Life of unit	500A>5000 times	500A>5000 times	250A>1500 times
Fail safe	Short	Short	Short
Other features	Wall or knockout mounting, metal enclosures	Completely self contained in phenolic enclosure with line cord and connectors as specified	

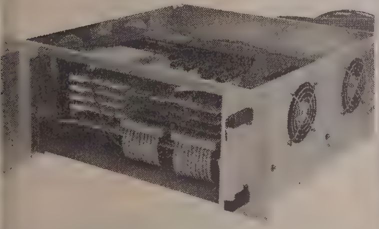
DATA LINE PROTECTORS



FEATURES:	RS 232 SERIES	D L SERIES	D L(E) SERIES
Protection from surges	Up to 6500A surges	Up to 6500A surges	Up to 6500A surges
Response time	5 nanoseconds	5 nanoseconds	5 nanoseconds
Holdover current	None	None	None
Recovery time	Instant	Instant	Instant
For protection of:	-the EIA (RS-232-C) digital interface of computers, terminals, and modems from surge and transient voltages caused by lightning, inductive load switching and static electricity	-low energy, low voltage DC data, telephone, or signal lines from surge and transient voltages caused by lightning, inductive load switching and static electricity	
Solid state	100%	100%	100%
Number of wires protected	1, 2, 3 and 7 standard additional wires available	2 to 8	4 to 20 each card
Other features	Plug-in protection for RS-232	Protection for RS-232, RS-422, 20 ma loop, etc.	

AS USED BY THE WORLD'S LARGEST COMPUTER MANUFACTURERS

FIBER OPTIC TECHNOLOGY



FIBER OPTIC MULTIPLEXER

APPLICATION:

Computer to computer links

Secure communication links

Error free operation in high electrical noise environment

MULTIPLEXER FEATURES

- Synchronous or Asynchronous operation
- 32 channel modular construction expandable to 128 channels/chassis
- Selectable channel/data rate configuration from 128 channels at 9.6 KBPS to 8 channels at 153.6 KBPS
- RS232-C electrical interface standard
- High density modular packaging and local/remote loop back provides easy maintenance and fault isolation
- Synchronous clocks provided at all standard rates at or below 9.6 KBPS

ATLEE COMPONENT HOLDERS

Atlee component clips are made of spring steel and beryllium copper because they afford the most generally desirable combination of properties. Specific selection of material will depend on conditions of the application. In addition clips can be manufactured to your specification for a variety of uses. Please contact the factory with your questions and special requirements.

FEATURES

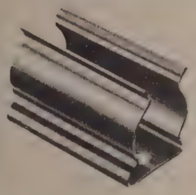
- The design of our component holders, from raw material through the finished product, ensures maximum performance and reliability under extreme usage, insertion, withdrawal force, and shock and vibration.
- Holding power increases as shock and vibration increase, measured by force required to remove component.
- Special contour design acquires closer set to component during shock and vibration, increasing security without localized pressure.

Atlee offers a complete line of MS and NAS component clips.

M24066 M17160

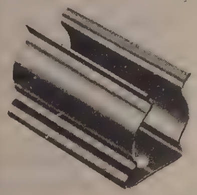
MS28136 MS28137 NAS1464

- Slotted design assures firm retention for fragile components without risk of injury.
- As an indication of the spring characteristics of Atlee's component holders, all of which are heat treated after forming, the following data is supplied; beryllium copper will withstand over 500 and spring steel 100 insertion-withdrawals of a slug 1/32" larger than nominal diameter, without metal fatigue.



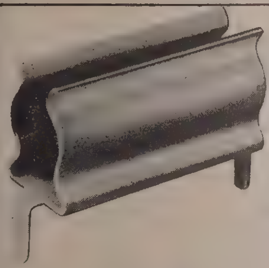
Beryllium Copper, QQ-C-533a

PLATING: cadmium CQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-T-425; nickel, QQ-U-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold resistors, capacitors and small cylindrical devices. Fastened by means of rivets, eyelets, screws or similar fasteners.



Spring Steel, QQ-S-777a

PLATING: cadmium CQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-T-425; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold resistors, capacitors and small cylindrical devices. Fastened by means of rivets, eyelets, screws or similar fasteners.



Tab Mounted Clips

MATERIAL: beryllium copper, QQ-C-533a.
PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold resistors, capacitors, relays and similar cylindrical components. Fastened to a circuit board by tabs.

Industrial Component Holders

MATERIAL: spring steel S.A.E. 1065, .020 thick.

PLATING: commercial nickel, commercial nickel and vinyl coating
Designed for use in industrial and commercial applications.

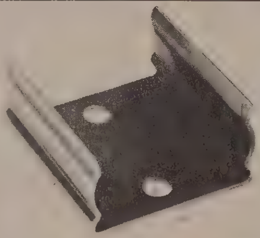
No-Twist Clips

MATERIAL: spring steel, QQ-S-777a.
PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; zinc, QQ-Z-325; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed for holding capacitors and similar cylindrical components, without twisting.

Fuse and Resistor Holders

MATERIAL: phosphor bronze, QQ-B-750; beryllium copper, QQ-C-533a.

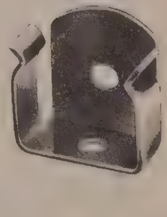
PLATING: silver, QQ-S-365a.
Finishes available silver plate.
Designed to hold fuses and ferrule-type resistors plus reduce heating by providing high contact pressure.



Crystal Clips

MATERIAL: spring steel, QQ-S-777a, spring steel S.A.E. 1065.

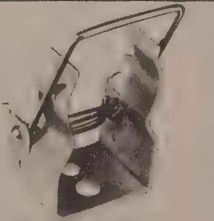
PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; zinc QQ-Z-325; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to provide secure mounting for flattened elliptical components.



Transistor Clips

MATERIAL: beryllium copper, QQ-C-533a.

PLATING: cadmium, QQ-P-416a; silver, QQ-S-365a; tin, QQ-M-151; nickel, QQ-N-290; black matte, MIL-F-495A.
Various finishes available.
Designed to hold transistors without depending on soldered leads and at the same time act as a heat sink.



Locking Clips

MATERIAL: spring temper phosphor bronze, QQ-B-750.
PLATING: silver, QQ-S-365a; cadmium, QQ-P-416a; nickel, QQ-N-290; Class II, Type VI.
Various finishes available.
Designed to hold a fuse, ferrule-type resistor or similar component against the most severe shock and vibration.

Heat Dissipating Liners

MATERIAL: beryllium copper, .002 thick per QQ-C-533a, heat treated.

FINISH: black matte
Designed to cool many types of components combined with different types of cooling methods.

5MF700	7/10	250	5MF6	6	125
5MF800	8/10	250	5MF7	7	125

Listed by Underwriters' Laboratories from 700 mA to 5 amperes. Certified by Canadian Standards Association through 5 amperes.

Type 5MF fuses, described as fast acting are manufactured to meet the requirements of UL 198.6 and CSA 22.2. They permit European manufacturers of original equipment to substitute a fuse listed or certified by UL/CSA when exporting their equipment to the United States or Canada without making costly changes in mountings and printed circuit board layouts. Since fusing characteristics are different than those specified by IEC 127 for specific ratings, a careful analysis of the blowing curves should be made before determining the proper substitution. The small size of these fuses also offer the American/Canadian designer a protective device where space limitations are an important consideration. Pigtail leads (5MFP) are available when direct soldering into circuits is desired.

Approved by SEMKO for 80 mA, 125 mA, and from 250 mA through 6.3A.

Type 5SF fuses, described as quick acting, low breaking capacity, are manufactured to the specifications of IEC 127, CEE 4, Standard Sheet II (Type F). Used throughout Europe, they carry the SEMKO mark in the ratings indicated. They are used for general circuit protection in electrical and electronic equipment where momentary transients are not anticipated. Pigtail leads (5SFP) are available when direct soldering into circuits is desired.

Microbel Type Micro Fuses are subminiature fuses for use in circuits where space requirements are an important factor. Built to meet the requirements of UL 198.6 for micro-fuses, they are supplied in the four different mechanical configurations illustrated below.

Type MF is supplied with Kynar sleeve. Type MFE* is supplied with epoxy coating. Marked with or without color coding, MF fuses are available with radial or axial leads with the axial construction packaged either bulk or taped and reeled.

*** UL Pending.**

Listed by Underwriters' Laboratories through 7 amperes.

Flat pack fuses, TYPE DJB with pigtails for direct soldering and TYPE BER for mounting with #10 screws, find broad application in telecommunication circuits and in low energy circuits where cost and space are important considerations. They are recognized under the component program of Underwriters' Laboratories and may be used in those circuits where the suitability of application has been investigated.

All Bel Fuse clips are manufactured from .020 phosphor bronze stock and specially hardened to assure long life and minimum contact resistance. They are bright tin plated to facilitate soldering and prevent oxidation. In addition to the stock designs illustrated, clips can be quickly tooled to meet customer specifications.

The bases on mountings illustrated above are molded from a polyamid modified nylon rated by Underwriters' Laboratories at 94V-0. Clips are riveted to the base for maximum strength and are butted against a barrier to prevent rotation and assure alginment. The fuse mounts illustrated use Type FC-105 clips. Fuse mounts can be supplied with any combination of hole mount tyoe clips.

A New Generation in State of the Art Power Conditioning by Control Concepts

Islatrol®

"Active Tracking Spike & Transient Suppressors That Work"

Islatrol's unique active suppression is the secret of its success. The patented circuitry senses spikes and transients on incoming AC power and triggers itself into action. Islatrol effectively clamps the spike and absorbs the energy in the series and shunt elements, while simultaneously supplying energy to fill any undershoot. The result is clean incoming AC power. Islatrol means active protection for sensitive solid state equipment.

Secondary induced voltages from lightning, line faults or power switching often found in commercial and manufacturing environments can generate transients far exceeding the peak value of applied voltage. If not attenuated, these microsecond pulses can destroy semiconductors, and damage normal low level logic types. Islatrol protection reduces logic errors, erroneous control or memory loss and the possibility of equipment degradation or total failure.

Islatrol Specifications

General Description: A solid state, active tracking voltage suppressor which protects against transients, spikes, short-term outages and noise on incoming AC power lines.

Standard Voltage Inputs: 120V, 240V, 480V

Power Line Frequency: 50 to 60 Hz. (400 Hz available)

Response Time: Less than 10 nanoseconds

Transient Reduction: Minimum of 40 db, from the midband audio range through 50 MHz. The active filter improves the quality of the input line. Attenuation is greater than 50 db to IEEE surge withstand capability test No. 587 Category A and B.

Preset Switch Level: +/-2V

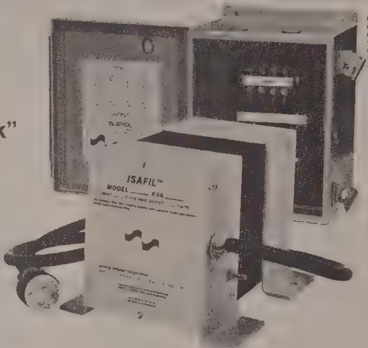
Regulation: Better than 1% no load through full load.

Leakage: Less than 50 microamperes. Voltage isolation to case 5000V RMS.

Operating Temperature: -40°C to 85°C

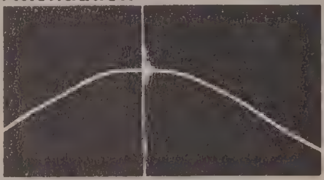
Reliability/Test Criteria: Each Islatrol unit is 300% fully tested at an input energy level of two joules for approximately 1000 spikes, superimposed at the peak of the input sinusoid at main power line distribution impedance.

Standard Available Models:
.5A to 100A, 120V Single Phase
.5A to 100A, 240V Single Phase
7.5A to 400A, 480V Single Phase
15.0 to 1500A, 240V Three Phase
15.0 to 1500A, 480V Three Phase

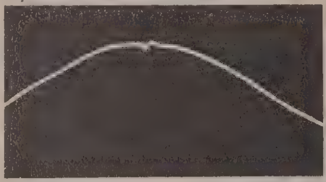


Patent #4095163, #4156838 and #4434396

Normal Mode Transient Attenuation



700V P-P 30 Microseconds Wide Input to Islatrol or Isafil



Output After Islatrol or Isafil

Isafil Common & Normal Mode Noise Attenuation:

Isafil easily attenuates IEEE 587-80 category A and B oscillatory and impulse surges. The unit incorporates a shielded isolation transformer, which is superior in common mode noise attenuation and the active tracking Islatrol filter for maximum normal mode transient attenuation. This significant attenuation occurs to both sinusoid type noise and oscillatory transient disturbances.

Islatrol Suppression Performance:

Destructive or spurious transients, present at any point on the input sine wave of the AC power line, are clamped to within several volts, both above and below the instantaneous value of a filtered input sinusoid. For example, a two joule, 1000V spike (peak-to-peak) is suppressed to 10V (peak-to-peak). The above is accompanied with minimal power line loss.

Isafil™

"The Best in Isolation and Greatest Attenuation of Common and Normal Mode Noise"

Isafil is a combination of the newest in magnetic technology plus active tracking filters designed to provide the best in isolation and greatest attenuation of common and normal mode noise. Isafil works effectively well for sinusoidal or random transient noise.

Isafil provides far superior rejection capability than other products available today. So good, in fact, that it easily attenuates IEEE 587-80 category A and B transients.

In today's electrical environment we encounter many types of power pollution that prevent power operation of sensitive electronic equipment. Transients usually show themselves by causing random errors, soft data, loss of memory or even catastrophic failures. Spikes and transients are probably the greatest cause of degradation of IC's, capacitors, diodes and other electronic components.

Isafil Specifications

General Description: A super magnetic isloator incorporating a shielded isolation transformer offering superior isolation combined with an active tracking filter to effectively eliminate both normal and common modes of power line disturbances.

Terminals: Two-terminal input and two-terminal output, all floating. Fifth terminal, super shield, attaches to earth ground.

Attenuation: Noise voltages between power line and ground to less than one part in 20 million (146 db).* Noise voltages across the power line to less than I part in 500 (54 db).** **Greater than 50 db for IEEE 472-74 and IEEE 587-80.**

Through-Capacitance: Input to output with shield grounded, less than .0005 picofarads (5×10^{-16} Farads).

Leakage: Leakage resistance greater than 1000 Megohms D.C.

Active Filtering: Squelches either spike or oscillatory noise voltages across input terminals within 10 nanoseconds (10×10^{-9} Second).

Super Isolation: High conductivity copper barrier shield between input and output circuits gives greater protection against high energy discharges of power line, such as induced lightning surges.

Power Sizes:
125 to 600VA, Single Phase
1 to 15KVA, Single Phase
3 to 45KVA, Three Phase

---

*Common mode transient reduction exceeding 80 db.
**Normal mode (Transverse mode) transient reduction exceeding 80 db

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

HEINEMANN

CIRCUIT PROTECTORS

Heinemann Electric Company
P.O. Box 6800, Lawrenceville, NJ 08648-0800 USA
(609) 882-4800 • Telex 843431

Heinemann offers the widest range of styles and current ratings in high-quality, reliable circuit protectors–from miniature, environmentally-sealed models with ratings as low as 0.020A to high-capacity industrial breakers rated 700A,160Vd

Heinemann hydraulic-magnetic circuit protectors hold their rated capacity regardless of ambient temperature—no derating, no nuisance tripping. A variety of time-delay characteris-

		APPLICATIONS	NO. OF POLES	CURRENT RATINGS	MAX. VOLTAGE
TYPE J	The Series J is an exceptionally compact, lightweight, and moderately-priced breaker for single or multipole OEM applications. Snap-in mounting, rocker handles, sealed-mount, and push-button models are available. Color-coded caps serve as panel accents and for circuit identification. Bulletin 81JA. 	OEM (power supplies, medical-electronic equipment, control systems, office and EDP equipment), control panels, marine equipment, field instrumentation.	1 to 4	0.020 — 30A	277V, 50/60 Hz 240V, 400 Hz 415V, 50/60 Hz, 3-phase "Y" 65Vdc
Series J/S	Designed to meet VDE 0730 requirements; SEV approved. Series JB/S is J/S with snap-in mounting. Bulletin 81JS.				
SERIES AM	A low-cost, lightweight breaker available in single or multipole configurations, the Series AM features rear-connection studs, a high level of moisture resistance, and a current range up to 100A dc or 60A ac. Qualified under Mil-C-55629 to 50A dc and ac. Bulletins 81AM and 82AM-MIL. 	OEM (data-processing equipment, mobile applications, humid environments)	1 to 4	0.020-60A (ac) 0.020-100A (dc)	250V, 50/60 or 400 Hz 277V, 50/60 Hz, 1-phase 480V, 50/60 Hz, 3-phase "Y" 65Vdc
Series AM/S	Designed to meet VDE 0730 requirements; SEV approved. Bulletin 82AM/S.				
SERIES CF E-FRAME	Priced considerably lower than competitive E-frame breakers, the Series CF is the most compact and versatile circuit breaker available for equipment and branch-circuit protection. Single and multipole models are stocked in a wide range of standard ratings for fast, off-the-shelf delivery. Bulletin 81CD. 	Panelboards, switchboards, branch circuits, EDP equipment, machine tools, environmental systems, single- and three-phase applications.	1 to 6	0.01 — 100A (ac) 0.04 — 100A (dc)	240V, 50/60 or 400 Hz 480V, 1- and 3-phase 125Vdc
SERIES GH EH-FRAME	 This rugged new EH-frame breaker offers all the advantages of a completely magnetic three-pole breaker with 14,000A interrupting capacity for less than most thermal units. Compact, environmentally stable to 100A at 480Vac and 250Vdc Bulletin 81GJ. 	Motor controls, air conditioning, electric heating, computer main frames, transportation, indoor or outdoor installations.	3	10 — 100A (ac) 10 — 100A (dc)	480V, 50/60 Hz 250Vdc
SERIES GJ	 Where space is at a premium and current capacity up to 250A is called for, the Series GJ is the answer. Available in one-, two-, or three-pole models, it is especially suitable for panelboards, service-entrances, and electric vehicles Bulletin 81GJ. 	Commercial, industrial, and residential service-entrance or panelboard applications; lighting, appliance, transformer, electric vehicles, EDP power supplies, heating, air conditioning, and electronic circuit protection.	1 to 3	100 — 250A	240V, 50/60 Hz 125/250Vdc
Series GJ1P	Special 1-pole dc breaker with up to 700A capacity. Optional 25 mV shunt output permits current metering. Bulletin 83GJ1P.		1	100-700A	160Vdc

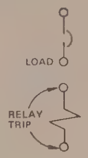
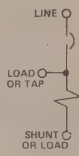
Special-Function Circuits

Heinemann protectors (except KD and TX) can be furnished with a number of special-function internal circuits. They permit a single protector to perform the protection and control functions of several components.

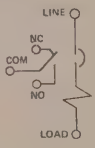
RELAY-TRIP
Provides for remote actuation using separate control circuit. Electrical isolation permits use of a different current or voltage from contact circuit. Both time-delay and non-time-delay constructions are available.



SHUNT/TAP
Use of third terminal permits remote tripping by utilizing line voltage with or without a time-delay response. On breakers rated up to 1A, the trip point may be raised by shunting with an external resistor on the shunt/tap terminal.

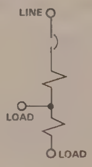


AUXILIARY SWITCH
Used for logic functions, alarms, lights, and other circuits. Miniature snap-action SPDT or DPDT switch is mounted on back of breaker, mechanically connected to switching mechanism. Contact capacity: 10A at 125/250V, 50/60 Hz; 4A resistive at 30Vdc; 2.5A inductive at 30Vdc. Minimum operating voltage: 6Vdc or ac, at 3VA dc or ac.

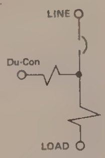


SERIES-TRIP (Standard internal circuit)
Ideal for use as both power switch and overload protector. Usually installed in series with line and load terminals to provide circuit interruption in the protected circuit.

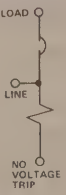
DUAL RATING
Two concentrically-wound sensing coils provide two discrete current ratings in the same breaker. Protects equipment designed to operate at two different current levels or supply voltages within certain limitations.



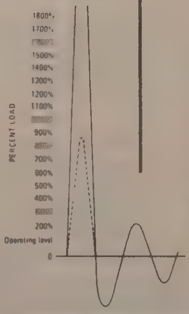
DU-CON™ (DUAL-CONTROL)
Provides sensing of both overcurrent and separate voltage signals in a single-pole breaker through a small, non-continuous-duty voltage sensing coil. DU-CON overload and voltage coils must be specified separately.



NO-VOLTAGE TRIP
Prevents uncontrolled re-start of equipment after power outage. Used in ground-fault interrupters and other safety applications. Not intended for overload protection without one pole connected in series-trip configuration.

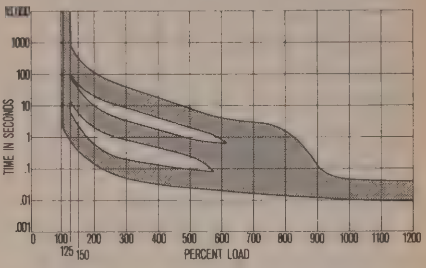


HIGH-INRUSH
Economical protection of high-reactance loads, which draw starting surges often as high as 30 times normal load current in a 50/60 Hz ½ cycle pulse, such as ferro-resonant power supplies and distribution transformers. Eliminates nuisance tripping without derating or special circuitry.



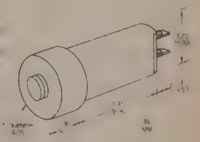
Typical Time-Delay Curves

Below are three time-delay curves for the Series CF at 50/60 Hz. Other special application curves, including high-inrush, dc, and non-time-delay, are also available.



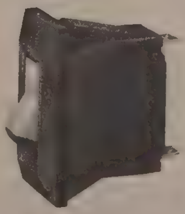
Re-Cirk-IT® Series KD

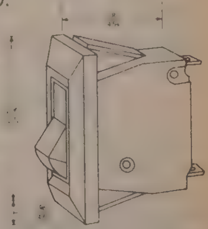
The UL- and CSA-recognized Re-Cirk-It® is a low-cost (non-magnetic) pushbutton circuit protector designed as a direct replacement for conventional ⅝-diameter fuse assemblies in consumer products and appliances. Resettable up to 1000% of its current rating of 2.5A through 15A, 500% at 0.25A to 2A. Both 250V, 50/60 Hz and 32Vdc models. SEV approvals. Bulletin 84KD.



Series TX

The Series TX is an attractive circuit protector designed to snap into a front panel to double as an off/on switch. A selection of colored rocker handles; backlighting available. Smudge-resistant matte black escutcheon. Cannot be held ON during an overload condition. Current rating from 2A to 20A at 125V, 50/60 Hz, or a 32Vdc; 2A to 10A at 250V, 50/60 Hz. UL- and CSA-recognized. Unlighted models designed to meet VDE requirements. Bulletin TX-4020.





8010

LITTELFUSE® CIRCUIT PROTECTION DEVICES

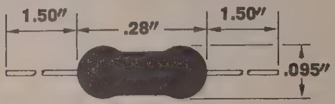
PICO II™ SUBMINIATURE FUSES

- World's smallest fuse for use in micro electronic circuits including computer and aerospace applications.
- Short circuit current of up to 300A.
- Low resistance values.
- Hi-speed action.
- Epoxy coated body for protection against environmental conditions.
- Withstand axial pull of 7 lbs.
- Available with or without color-coding per I.E.C. standards.

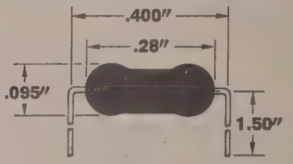
ENVIRONMENTAL CHARACTERISTICS

- Operating ambient temperature range: −55°C to 125°C
- Current carrying capacity:
  - −55°C = 110% of rating
  - 25°C = 100% of rating
  - 125°C = 80% of rating
- Withstand vibrations of 10 to 2000 cps at 20 G's per method 204 test condition D of MIL-STD-202.
- Withstand shock of 100 G's for 6 milliseconds per method 213 test condition I of MIL-STD-202.

255 Series - Axial Leads



256 Series - Radial Leads



Note: Leads are solder-coated copper, .025″ diameter for ¹⁄₁₆-10A, .032″ diameter for 12-15A.

Blow Time: 100%, 4 hrs. min.; 200%, 5 sec. max. (1/16-10A) 10 sec. max. (12-15A)

U.L. Recognized through 10 amps.

SUBMINIATURE FUSES (250V) 5 x 20mm

For original installations and replacements in foreign-made equipment, such as home and car radios, amplifiers, tape recorders, etc. and in other applications where space is a factor. Ava able in fast-acting, high interrupting; fast-ac ing; and slo-blo types.

FAST-ACTING HIGH-INTERRUPTING (250V) TYPE F

Blow Time: .050-3.15 amp — 150%, 60 minutes min.; 210%, 30 minutes max.; 275%, .01-2 seconds; 400%, .003-0.3 seconds; 1000%, .02 seconds max. **4-10 amp** — 150%, 60 minutes min.; 210%, 30 minutes max.; 275%, .01-3 seconds; 400%, .003-0.3 seconds; 1000%, .02 seconds max.

For manufacturers' sales offices, see yellow pages

LITTELFUSE® CIRCUIT PROTECTION DEVICES

G FUSES (32V) ¼" x 1¼"

dium-acting fuses for use in cars, radios, plifiers, etc.

Blow Time: 110%, 4 hour min.; 135%, 1 hour max.; 200%, 10 sec. max.

U.L. Listed under U.L. STD 275 through 30 amps.

CSA Certified through 30 amps.

311007	7	**311012**	12	**311035**	35

G FUSES (250V or less) ¼" x 1¼"

ck-acting, normal-blo fuses for general cir- t protection.

G PIGTAIL FUSES

ne as above but with pigtails for direct wiring chassis. Leads are 1-1/2" long, copper wire.

Blow Time: 110%, 4 hour min.; 135%, 1 hour max.; 200%, 5 sec. max.

U.L. Listed and Certified by CSA

Note: Internal construction may vary depending on ampere rating.

* 125 volt. **Note: To order fuses with pigtail leads,** change **312** series number to **318.**

G SLO BLO® FUSES (250V or less) ¼" x 1¼"

igned to withstand momentary high-current ges but still blow quickly on shorts. Provide tection for equipment with high reactive rent surges or heavy starting currents such solenoids, motors and lamp circuits.

G SLO BLO® PIGTAIL FUSES

ne as above but with pigtails for direct wiring chassis. Leads are 1-1/2" long, copper wire.

Blow Time: 110%, 4 hour min.; 135%, 1 hour max., 200%, 5 sec. min.

U.L. Listed and certified by CSA through 7 amps. U.L. Recognized from 8-30 amps.

Note: Internal construction may vary depending on ampere rating.

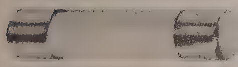
3 CERAMIC SLO BLO® FUSES (250V or less) ¼" x 1¼"



Similar to 313(000) series above, but have higher interrupting capacity.

Blow Time: 110%, 4 hour min.; 135%, 1 hour max.; 200%, 5 sec. min.

U.L. Listed 1/100 - 10 amps.

***U.L. Recognized** 12-30 amps.

CSA Certified 1/4-10 amps.

*Note: 15 and 20 amp ratings are U.L. Recognized at 250V but meet all requirements for listing at 125V.

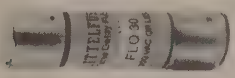
FLQ FUSES (500V or less for U.L.) 13/32" x 1½"
(600V or less for CSA)



Dual element, time delay fuses for circuits with high in-rush currents.

Blow Time: 110%, 4 hrs. min.; 135%, 1 hr. max., 200%, 12 sec. min.
Short Circuit Rating: 10,000 Amperes AC.
U.L. Listed. CSA Certified

Note: Numerals indicate amperage ratings.

TYPE T FUSE BLOCKS WITH SCREW TERMINAL CLIPS

Open type blocks available for 3AG and 5AG fuse sizes from one to twelve poles. Bases are of grade X black laminate with 1/32" insulator sheet cemented to underside. Screw terminal clips.

Mounting Hole: 3AG—.142"/.147" dia. with .295"/.302" by 82°CS. **5AG**—.171"/.176" dia. with .342"/.349" x 82°CS.
Clip Material: 356 Series—Nickel Plated Spring Brass. **359** and **556** Series—Silver Plated Beryllium Copper.
Size: Width: 2-3/8" (3AG), 2-3/4" (5AG). See chart for length dimensions. **356 Series is Recognized under the Components Program of Underwriters Laboratories.**

No. of Poles	For 3AG Fuses		For 5AG Fuses	
	Length (In.)	Part No.	Length (In.)	Part No.
1	25/32	356001	27/32	556001

12	10-3/4	356012	11-1/2	556012

For 3AG block with silver plated beryllium copper, change series number to **359**.

TYPE S BLOCKS WITH SOLDER LUG CLIPS

Similar to Type T blocks above but with solder terminals which are an integral part of the clip. For 3AG and 8AG fuses.
Mounting Hole: .142"/.147" dia.
Clip Material: 357 and **387** Series — Tin Plated Spring Brass. **357(200)** Series — Silver Plated Beryllium Copper.
Size: Width: 1-5/8" (3AG), 1-3/8" (8AG). See chart for length dimensions.

No. of Poles	Length (inches)	For 3AG Fuses Catalog No.	For 8AG Fuses Catalog No.

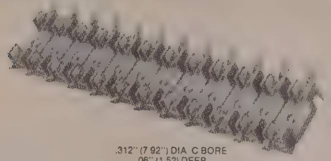
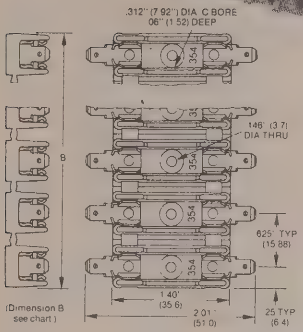
LITTELFUSE® CIRCUIT PROTECTION DEVICES

OMNI-BLOK® FUSE BLOCKS





For 3AG fuses. New, low profile fuse blocks with "break-away" pole feature . . . 12 pole units may be broken apart as needed to obtain desired number of poles. One piece-high amperage clip/terminal eliminates resistance build-up and allows operation at higher current levels than previous designs.

Specifications: 354 (000) Series (Solder type terminals); 30 amps, 300V. 354 (600) Series (3/16" Q.C. terminals); 20 amps, 300V. 354 (800) Series (¼" Q.C. terminals); 30 amps, 300V. 354101-GY (PC Board): 15A, 300V.

Materials: Clip/terminal; High tensile spring brass, electro-tin plated. Base; Grey Polyester, glass reinforced. UL-94VO flammability rating.

Special Options: Standard color is gray. Contact factory for special colors. Single pole units can be supplied with anti-rotation boss. Contact factory.

U.L. Recognized up to 30 amperes, 300V

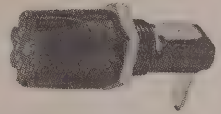
3AG FUSEHOLDERS WITH SOLDER TYPE, 3/16" OR 1/4" QUICK-CONNECT TERMINALS

Extend only 1" behind panel. **UL Recognized and Certified by CSA.**

KNURLED KNOB

FLUTED KNOB



SPECIFICATIONS

Electrical: Rated at 20 amperes for any voltage up to 250V. Dielectric withstanding voltage exceeds 2400 volts.

Mounting: Withstands 15 pound/inch (1.69Nm) mounting torque. Maximum panel thickness .18" (4.8)

Molded Parts: Black thermoset

Knob: Bayonet style with white lettering

Brass Terminals: Tin plated except 1/4" quick connect terminals are nickel plated.

Hardware: Standard fuseholders supplied with a neoprene washer and a hex nut unassembled. Lockwasher (L) and drip-proof seal (P) variations available by adding appropriate suffix letters (L, P or PL) to catalog number.

HOW TO ORDER
LOW PROFILE FUSEHOLDERS

The six digit catalog number is a coded desc tion of the finished unit. To specify type quired, select appropriate code numbers fr chart below. To order a cap assembly only 3AG fuses, use **348** series numbers and inser "0" in the terminal style and bezel color lo tions. To order a body assembly only, use 3 series number and insert a "0" in the cap co location.

SIX DIGIT CATALOG NUMBERS CONSIST

Series No.	Terminal Style	Bezel Color	Cap C
348 For 3AG Fuses		1 Red	1
		2 Green	2
		3 Yellow	3
		4 Blue	4
	6 3/16" Wide Terminals	5 White	5
	8 1/4" Wide Terminals	7 Black	7
		9 Grey	9

For example: 348615 is a holder with 3/16" termina red bezel and white cap.

PANEL FUSEHOLDER FOR
13/32" DIAMETER FUSES #571007

Versatile fuseholder for 13/32" diameter fuses with lengths from 1-3/8" to 1-1/2". Minimum rear panel projection, 3/4" spacing between mounting flange and terminals to accommodate even the thickest panels. Recessed side terminal for additional shock-safe characteristics. For watertight version, order #571007P. **U.L. Recognized and Certified by CSA.**

SPECIFICATIONS

Molded Parts: Black Phenolic.

Knob: Spring-loaded, extractor type, knurled for finger grip. Threaded nickel-plated, brass insert. Watertight O-ring seal provided with model 571007P. White markings.

Terminals: Side terminal, electro tin-plated brass. End terminal electro tin-plated brass with elongated 1/8" hole (5/32" long). Terminals will accept solder or 1/4" female connector.

Electrical Characteristics: Rated at 30 amps for any voltage up to 600. Dielectric withstanding voltage greater than 2400V. Contact resistance less than 0.004 ohms when checked in accordance with MIL-STD-202, method 307.

EEM-1984

PROTECT MAJOR INSTALLATIONS FROM LIGHTNING, TRANSIENTS AND SURGES WITH "SURGE-MASTER" POWER LINE PROTECTORS BY... MCG

Surges on electric power lines can not only damage the solid state components in equipment, but a major surge (e.g. one caused by a nearby lightning strike) can completely devastate your equipment. It can even knock out a UPS.

MCG Surge-Masters are widely used to protect such installations as computer systems, automatic control equipment, radar systems, process instrumentation, marine services, and hospitals.

- 5 nanosecond response
- Large energy handling capability
- Triply redundant - 2 stage
- Field repairable - in minutes
- Detailed status monitoring
- 2 year warranty

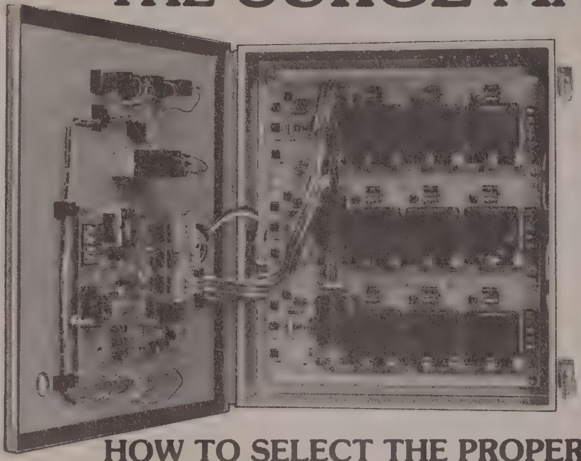
THE SURGE-MASTER



Internal view (Models 1800-3100) shows redundant protection per phase.

Black modules simply unplug for replacement.

HOW TO SELECT THE PROPER MODEL

Example:
A computer facility manager in Baton Rouge, LA., needed to protect his equipment from damage. Utility provides 120/208 VAC, 3 phase, wye (4-wire and ground) to a 200 Amp service panel.

Approach:

1. On Chart 1, the service panel current load of 200 Amp would be protected by a 300 Amp unit. However, since lightning activity is common in LA., MCG would recommend using 1 model higher. Therefore, choose Model 3100, rather than Model 2800.
2. On Chart 2, in Column 1, find the 120/208 VAC listing. Column 2 description permits a double check, while Column 3 indicates the suffix of -120Y for specifying purposes. Columns 4 and 5 give information on the clamping capacity provided.
3. To order, combine the above to read Model 3100-120Y

CHART 1 Specifications

Model	1800	2800	3100	4100	12,000
Service Panel Current	to 100A	to 300A	to 1000A	to 2000A	to 5000A
Power diss. /per leg ‡	6-1mw	1.2-2mw	1.8-3mw	3.6-6mw	7.2-12mw
Energy handling/per leg ‡	600-1000j	1200-2000j	1800-3000j	2600-6000j	7200-12,000j
Standby power diss. (max.)	5w	7w	9w	20w	35w
Response time (nanosec.)	5	5	5	5	5
Voltage	see chart 2				
Frequency/Phase	50/60/400Hz/1 phase, 3 phase, wye, delta				
Temperature Operating	− 40 degrees C to + 85 degrees C				

‡ Depends on the nominal AC voltage level

CHART 2 Voltage

Line AC (rms) Volts	Description	Model Suffix	(Line-Ground) Protection Levels Min.	Max.
120	120V, 1 phase, 2 wire + gnd	− 120S	200V	350V
120/240	120/240V, 1 phase, 3 wire + gnd	− 120T	200	350
120/208	120/208V, 3 phase, 4 wire + gnd	− 120Y	200	350
240	240V, 3 phase, 3 wire + gnd	− 240D	400	600*
240	240V, 3 phase, 4 wire (note 2)	− 240DCT	400	600*
277/480	277/480V, 3 phase, 4 wire + gnd	− 277Y	450	650
480	480V, 3 phase, 3 wire + gnd	− 480D	800	1000*

*Measured Line-Line

(1) Ground wire is connected to case only.
(2) Center tapped phase to ground.

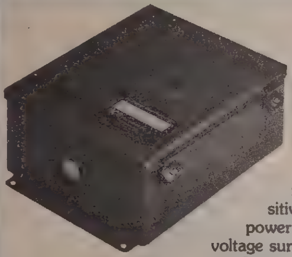
PROTECT SENSITIVE ELECTRONIC EQUIPMENT WITH POWER LINE PROTECTORS BY MCG

COMPUTER GRADE PROTECTION

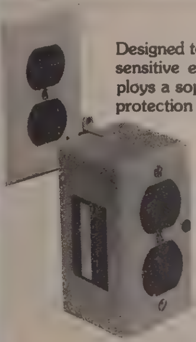


5000 SERIES

The 5000 Series offers moderate cost, high performance protection for computers, mini-computers, and other sensitive electronic equipment against power line noise and destructive high voltage surges, spikes and transients. The 5000 Series combines filtering (50db/500kz) and substantial suppression of high energy transients in a variety of protectors that respond in less than 5 nanoseconds, and have 320 joule energy handling capability. These units are suitable for operation on 120 VAC to 480 VAC, to 40 Amps for delta and wye configurations.

500 SERIES

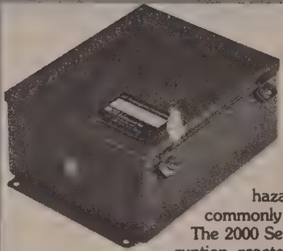
The 500 Series has been designed to protect a wide variety of modern mini-computers that operate on the 120 VAC or 240 VAC, single phase AC lines requiring up to 30 Amps. The compact and rugged constructed protector provides vigorous transient suppression and eliminates the need for dedicated lines. In use, it is simply plugged into the AC power outlet and the equipment into it. Status monitoring, replaceable fusing, and a range of connector options make the 500 Series a versatile protector.



P210

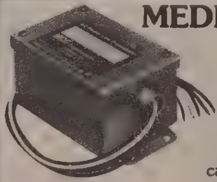
Designed to keep "transients and noise" from damaging sensitive electronic equipment. The Model P210 employs a sophisticated combination of brute force surge protection and impulse filtering. The P210 reacts in 5 nanoseconds, has an energy absorption capability of 160 joules, and resets automatically when the transient has passed. In use, it is simply plugged into any AC outlet, and the equipment plugged into it. Rated at 117 VAC and 10 Amps, the P210 converts your AC wall outlet into a "dedicated line". The P210 is used where the requirement is critical and only first rate protection will suffice.

INDUSTRIAL GRADE PROTECTION FOR O.E.M.'S



2000 SERIES

The 2000 Series are Heavy Duty Shunt Protectors that install at main service panels (to 3000 Amps) and provide superior protection from lightning and hazardous transient overvoltages that commonly occur in industrial environments. The 2000 Series protects without power interruption, reacts in 5 nanoseconds, has an energy absorption capability up to 6000 joules, and resets automatically when the transient has passed. Long life and maintenance free operation make these units the perfect protectors for remote, unattended sites, for facilities, mobile vans, or stations with no back-up circuits available. Protects 120 VAC, to 480 VAC, 1 ϕ, 3 ϕ, delta and wye service panels.



MEDIUM DUTY BRANCH PROTECTORS

These units are connected in shunt to the load side of the local branch panel and provide substantial protection for all equipment on the line. Load-carrying capacity for models intended for 120 VAC service is 240j, and for all models intended for use with higher voltages, 480j. All models can be used on lines having currents up to 50A. When any form of transient appears, raising the voltage on the line over the clamping threshold, the unit reacts within 50 nanoseconds to clamp it to a safe level. The clamping mode lasts only until the transient disappears, after which the unit recovers automatically. The units are of extraordinary rugged construction, with moisture-proof housings. They are thus ideal for remote and unattended locations where long life and maintenance-free operation are essential. Protects 120 VAC to 480 VAC, 1 ϕ, 3 ϕ, delta, wye service panels.

400 SERIES

The 400 Series install "within" a piece of equipment and is designed to keep "transients and noise" from damaging sensitive electronic equipment. The 400 Series employs a sophisticated combination of brute force surge protection and impluse filtering. Reacting in less than 5 nanoseconds, the 400 Series has an energy absorption capability exceding 200 joules and resets automatically when the transient has passed. The 400 Series will protect 120, 240 and 480 VAC, single phase lines handling currents to 15A. The 400 Series protects against lightning, EMP and switching transients.

MCG ELECTRONICS, INC. • 12 BURT DRIVE, DEER,PARK, NEW YORK 11729 (516) 586-5125 • TELEX 645518

PROTECTION FOR SIGNAL/DATA/TELEPHONE LINES

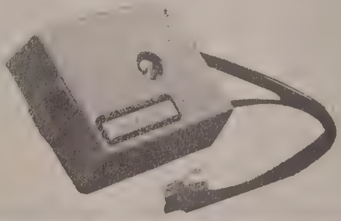
RS-232, RS-422, RS-423, 20 MA LOOPS, MODEMS

DLP-3: RS232 PROTECTION

Designed to provide complete protection for computers and terminals. RS232 connectors make installation easy, taking minutes for non-technical personnel. Pins 2, 3, 7, and 20 are protected. Other pins can be protected, consult factory.

DLP-4: MODEM PROTECTION

Dial-up protection unit puts an end to downtime and costly equipment failure for dial-up modems and CPU's. Compatible with RJ11 and RJ45 telephone jacks.



DLP-5: VIDEO CABLE PROTECTOR

Prevents coaxial cable from transmitting damaging transients to sensitive loads. Using isolated BNC connectors, the DLP-5 shunts damaging transients from the cable shield and center conductor to earth ground. Ideal for communications protection where wide baud width(to 20 mhz) is desired. The DLP-5 protects one circuit.

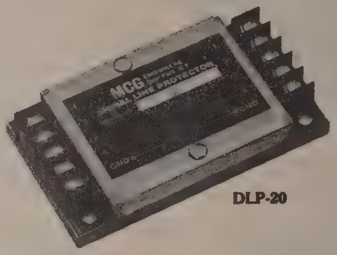
DLP-6:
Same as DLP-5 but protects 5 circuits.

DLP-5

Connector Options: BNC shown, twin ax, F connectors, N connectors, etc. Consult Factory.

DLP-10: MULTIPLE PROTECTION

Gives protection for 2 wires or 1 twisted pair circuit. Protection available for RS232, 20ma loops, etc.



DLP-20

DLP-20: Protects 4 wires or 2 pairs.

DLP-30: Protects 8 wires or 4 pairs.

DLP-33: Open PC board, protects 24 wires or 12 pairs. Not sold with case or cover.

DLP-40:RACK MOUNTED PROTECTION

Independent protection for up to 20 terminals or printers per system. Plug-in protection cards for all applications: RS-232, -422, -423, 20ma loops, etc. Protects up to 100 individual lines per system. Ideal for data logging & monitoring complex instrumentation. Protects computer main frames. Interface options include terminal strips, RS-232C connectors.

EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

INTERNATIONAL

interpower™ International 5 × 20 mm Fuses

The 5 × 20 mm fuse is commonly used in international markets, particularly Europe. (The North American standard fuse is ¼ × 1¼″ or 6.3 × 32 mm.)

Interpower™ 5 × 20 mm fuses conform to IEC 127; most have been tested and approved by SEMKO and carry the SEMKO test mark. Approval documents available upon request.

All fuses are rated at 250 VAC.

Case Style and Color: (prefix) P-Tan plastic case
R-Beige with Oak plastic sides K-Silver with textured black sides

SURGE SUPPRESSOR MODEL FEATURES

- Both normal and common mode suppression
- Low let-through voltage
- High single-surge energy rating
- Automatic failure shutdown
- 1 year warranty

EXTENDED LIFE SURGE SUPPRESSOR MODEL FEATURES

- Both normal and common mode suppression
- Lower let-through voltage
- High pulse lifetime
- High steady-state (repetitive surges) power rating
- High single-surge energy rating
- Automatic failure shutdown
- 3 year warranty

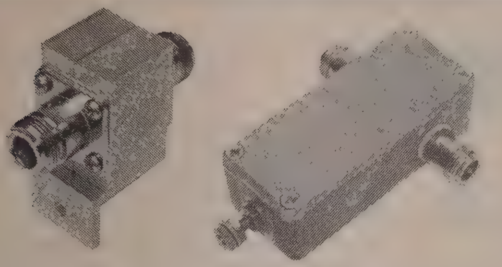
Nano-Fast Coax Protection from PolyPhaser Corporation



The patented PolyPhaser Impulse Suppressor Family is your best answer for protecting those vital communication links from lightning and static induced impulses.

With over 36 models of patented Impulse Suppression, PolyPhaser Corporation makes more reliable, longer lasting, faster, better VSWR, lower loss and having less throughput energy to your valuable equipment than air-gap type arrestors. Designed using the time proven controlled gas ionization discharge tube, these family members can handle tens-of-thousands of amperes time after time. They are made from quality, highly conductive aluminum with 18-8 stainless fasteners and weather-coated for marine applications.

BULKHEAD MOUNTABLE - TRANSMIT/RECEIVE

SUB-MINIATURE FUSES

Type TR 3

Catalog numbers:
TR3-F No. 19300 (Pigtails)
TR3-F No. 19300 K (Plug-in-pins)
Holders No. 19556, 19557 and 19561

The TR 3 construction evolved from our well-established microfuse. Because of more economic production the TR 3 offers the advantage of automatic insertion. TR 3 construction meets UL 1986 and international standard 32C (CO34).

Rated current range: 50 mA, 5A
Rated voltage: 125V
Characteristic: F (quick acting)
Breaking capacity: 50A
Pin distance: 2.54 mm, round pins, surface
Pluggable into (miniature) holder No. 19556, No. 19557, No. 19558 and **solderable**
Body: Temperature resistant thermoplastics, black
Temperature range: −55°C to +125°C
Vibration test: from 10-2000 Hz at 10g-0.06 inch amplitude
Acceleration test: up to 50g
Weight: 100 pieces = 36g (No. 19300); 100 pieces = 29g (No. 19303)
Packaging: boxes of 100 pieces; industrial boxes of each 1000 pieces resp. taped
Approvals: application for UL approval has been filed

Microfuses

Catalog numbers:
278 (pigtails)
278 K (plug-in- pins)
274 acc. to MIL-F-23419 Type FM 02, (on request)

Rated current range: 2 mA, 5A (acc. to UL)
Rated voltage: 125V
Characteristic: F
Breaking capacity: 10,000A (acc. to UL); 40A art 1/16 and 1/20A
Pin distance: 2.54 mm, round pins, tin plated
Socket: 278 and 278 K, rated current 1/500, 132A, temperature resistant glass socket with Vacon pins
278 and 278 K, rated current 1/20, 5A, temperature resistant plastic socket with copper pins
274, rated current 1/500, 5A, temperature resistant plastic socket with copper pins
Temperature range: −55°C to +125°C
Vibration test: from 10-2000 Hz at 10g-0.06 inch amplitude
Acceleration test: up to 50g
Pluggable into different holder and **solderable**
Also available with UL approval (on request)
Weight: 100 pieces = 50g
Packaging: 50 pieces resp. 100 pieces

Picofuses

Catalog numbers:
275 axial
277 according to MIL-F-23419 (Type FM 04)

Rated current range: 62 mA, 10A acc. to UL (15A)
Rated voltage: 125 VDC (32V)
Characteristic: FF
Breaking capacity: 300A
Temperature range: −55°C to +125°C
Vibration test: from 10-2000 Hz at 10g-0.06 inch amplitude
Acceleration test: up to 50g
Solderable, wire leads tin-coated, **pluggable** into tubular receptacles No. 19555
Weight: 100 pieces = 50g
Packaging: 100 pieces; 200 resp. 5000 pieces taped

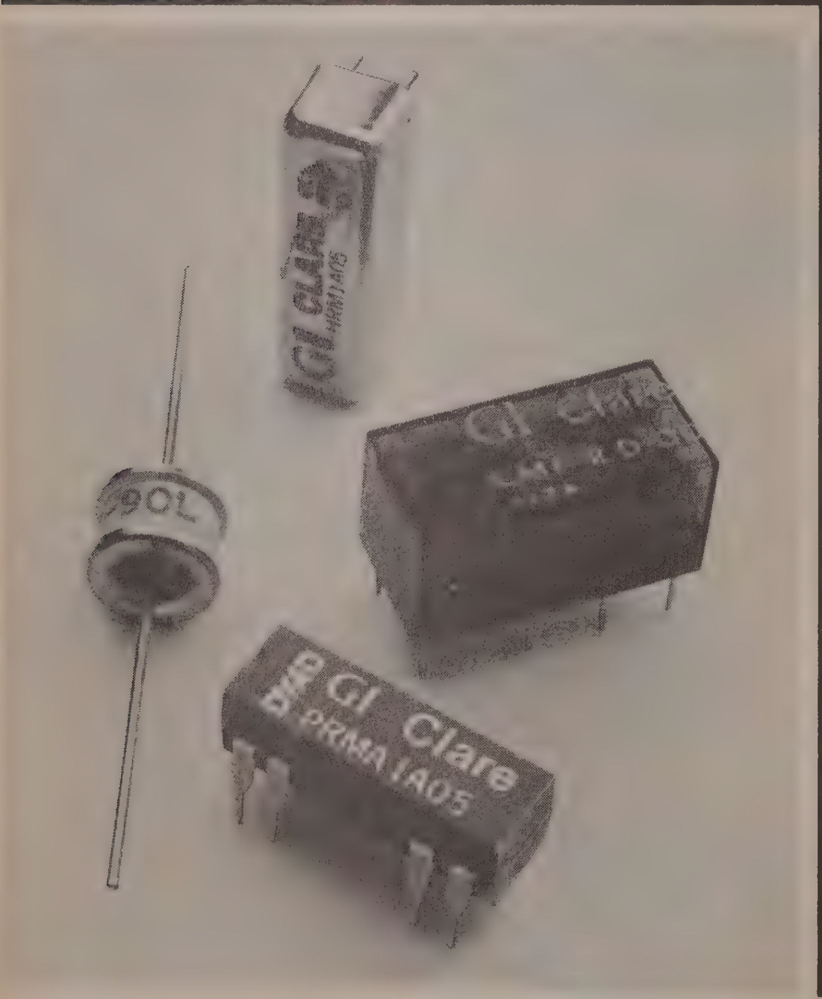
The Clare Division Family Of Quality Products.

Reliability Through Technology.



Quality in the Clare Tradition.

Clare Division has earned the position of being the world's largest supplier of mercury-wetted and dry reed relays.

This leadership position has not come easy, but has come as a result of Clare Division's total commitment to products offering improved technology through innovation . . . and to the quality and performance you expect from the leader in switching technology.

Couple this with high volume manufacturing capabilities, and you get superior quality products, at competitive prices, with fast off-the-shelf delivery.

Call your local Clare Representative or authorized Clare Distributor for more information about:

- Mercury-wetted contact relays
- Dry reed relays
- Electromechanical relays
- Surge arresters

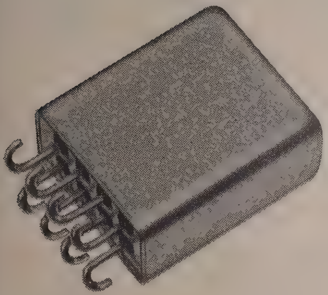
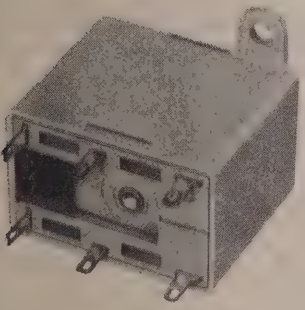
Relays and Solenoids



eries 07—Crystal Can

eveloped specifically for the aerospace
ndustry. The standard unit features a solder
erminal arrangement, 26.5Vdc coil voltage
nd 10 amp contacts.

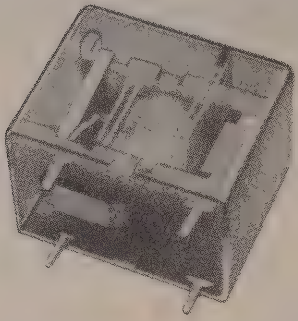
eatures:
Qualified to MIL-R-5757, M5757/23,
MS 27245, MS 27247 and MIL-R-6106.
Withstands severe vibration and shock.
DPDT Contacts.



eries 39—2 Pole, 10 Amp Relay

his low-cost relay features 2 heavy-duty,
0 amp contacts available in a number of
aterials and configurations. Fast-on/solder
ombination terminals aid installation and
ervice replacement. Ideal for home appliance
here heavy work loads are common, but
ower to drive coils is at a premium.

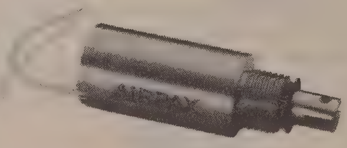
eatures:
Contact ratings available up to 15 amps.
Can be furnished with DPNO, DPNC, DPDT.
470 milliwatts sensitivity.
Available with one heavy-duty contact and
one signal contact for economy.
Approval: ЯU Ⓢ



Series 27—Miniature General Purpose Relay

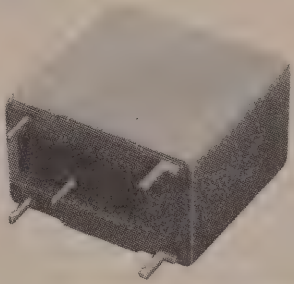
This small relay is well suited for appliance controls, remote TV tuning, automotive controls, office equipment and many types of instrumentation. Form A, B or C contact configurations. Coil voltages from 3Vdc to 24Vdc may also be specified. These relays are especially suited for use as output devices for microprocessors. They not only give complete isolation from noisy environments but can handle hi-inductive loads with ease.

Features:
- Small size—.526 cubic inches.
- Sensitive—as little as 180 milliwatts coil power.
- Powerful—can switch up to 1/3 HP at 125Vac.
- Inexpensive—under $1 typically.
- TV 5 rating available.
- Approval: ЯU Ⓢ



7019 Solenoid

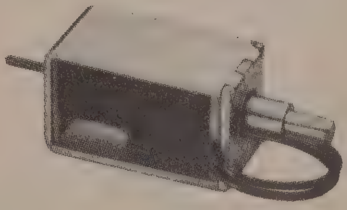
This direct Current Tubular Pull Type Solenoid is designed to provide up to 50 ozs. of force with a maximum stroke of .437".
Actual usable force will depend on the stoke and power level. Coils are available from 6Vdc to 115Vdc with a continuous duty power level of 5 watts and an intermittent (25%) duty power of 15 watts.



Series 28—Sensitive Control Relay

Applications of this relay include automotive control functions (electronic fuel injection, intermittent windshield wiper, etc.), entertainment equipment—remote TV tuning—and other communication switching functions. A variety of D.C. coil voltages and contact configurations are available. Ratings up to 15 amp, 120Vac may also be specified.

Features:
- High amperage ratings in small package.
- Super sensitivity—44 milliwatts coil power.
- Variety of contact materials.
- TV 5 rating available.
- Approval: ЯU Ⓢ



7007ED33-0013 D.C. Box-Frame Push-Type Solenoid

Provides up to 20 ozs. of force with a maximum stroke of .200". Actual usable force will depend on the stroke and power level. Coils are available from 6 to 115Vdc with a continuous duty power level of 3.0 watts and an intermittent (25%) duty power level of 9.0 watts.

MINIGLOSSARY ELECTROMECHANICAL RELAYS

RELAYS

Hybrid: Isolated input and output either with a solid-state input and an electromechanical output or vice versa. Typically a reed switch is used to trigger a solid-state output or a solid-state amplifier is used to trigger an electromechanical relay.

Differential: Have multiple windings to function when voltage, current and/or power difference reaches a specific level or value.

Close-differential: The dropout value is specified close to the pickup value.

Frequency sensitive: Operates at a set frequency or within specific frequency bands. A resonant reed, for example.

Hermetically sealed: Totally sealed by glass-to-metal or metal-to-metal seals to ensure very low rates of gas leakage over long time periods.

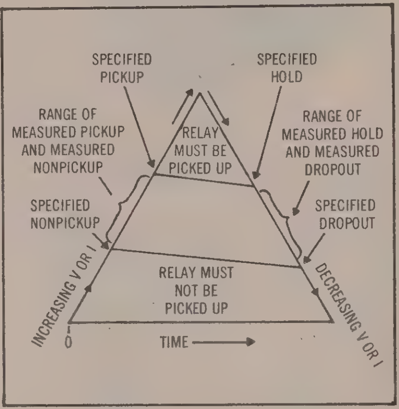
Encapsulated: Imbedded in a suitable potting compound.

Sealed: Enclosed in a relatively airtight cover. (Not the same as hermetically sealed.)

Covered: Unsealed metal or plastic enclosure or housing.

CONTACTS

Dry circuit: contacts that carry current but do not open or close during energizing of the load circuit. Often wrongly used in reference to low level contacts.



SPECIFIED PICKUP
SPECIFIED HOLD
RANGE OF MEASURED PICKUP AND MEASURED NONPICKUP
RELAY MUST BE PICKED UP
RANGE OF MEASURED HOLD AND MEASURED DROPOUT
SPECIFIED NONPICKUP
SPECIFIED DROPOUT
RELAY MUST NOT BE PICKED UP
INCREASING V OR I
DECREASING V OR I
0
TIME

Low Level: Contacts controlling relatively low voltages and low currents. Generally below 5 Vdc and 10mA.

OPERATING CHARACTERISTICS

Measured dropout: The value at which all contacts restore to their unoperated position as current or voltage decreases.

Specified dropout: The value at or *above* which all contacts *must* restore to their unoperated position as voltage or current is decreased.

Specified hold: The value that *must* be reached before any contact change occurs as voltage or current is decreased on an operated relay.

Specified nonpickup: The value that *must* be reached before any contact change occurs as voltage or current decreases on an unoperated relay.

Measured pickup: The value at which all contacts function as voltage or current increases on an unoperated relay.

Specified pickup. The value at or *below* which all contacts *must* function as voltage or current increases on an unoperated relay.

Sensitivity: Specified pickup expressed in watts.

Normal bridging: The make-before-break action between adjacent contacts on relays designed for this purpose.

Abnormal bridging: The undesired closing of contacts caused by a metal bridge or protrusion developed by arcing.

Magnetic freezing: Sticking of the armature to the core as a result of residual magnetism.

TIME

Actuation: The interval from coil energization or de-energization to the functioning of a specified contact.

Initial actuation: The interval from coil energization or de-energization to the *first* closing or opening of a previously open or closed contact.

Final actuation: Sum of initial actuation *and* bounce intervals following an actuation.

Contact bounce: The interval from close or opening of a contact to the end of the bounce of "chatter."

Chatter: See bounce.

Operate: Normally taken as the interval between energization and the opening or closing of the last contact to function not including bounce.

Release: Normally taken as the interval between de-energization and the opening or closing of the last contact to function excluding bounce.

Transfer: The interval between opening a closed contact and closing an open contact of a break-before-make relay.

The OPTOSWITCH™ general purpose AC solid state relays have been specifically designed to meet or exceed commercial requirements. Applied Electro Technology Int. has a long history of manufacturing aerospace and military high reliability solid state relays and this high quality experience has influenced a new design in solid state relays with stringent manufacturing and testing.

Use these relays in all your commercial applications such as copiers, instruments, controls, gas pumps, microprocessor controllers, automated machinery, etc.

The OPTOSWITCH™ totally solid state AC relays are total encapsulated and especially recommended for harsh industrial environments where high shock or severe temperature excursions are encountered. All inputs are opto-isolated and turn-on is synchronized with load voltage zero crossing to minimize radio frequency interference.

In many instances these relays have been replaced and are constantly replacing mechanical relays very successfully.

Our special features are:

- Operating temperature range of −40 to 100°C.
- Optical isolation of 2500 Vrms between control and load circuits.
- Zero voltage turn-on for reduced EMI.
- High transient immunity to prevent false turn-on.
- Maximum control current of 2 ma DC (rms for AC control type) to turn on relay over temperature range.
- Optional DC control voltage range of 4-32 VDC.
- Optional AC control voltage range of 90-140 VAC or 90-280 VAC.

These relays are available in 6, 10, 15, 25 and 40 amp switching capacity at 120, 240 or 480 VAC.

In addition, the user has a choice of DC control or AC control as stated above.

For further information please contact AET directly.

More than 30,000,000 pcs. in use all over the world

- Low profile — stands only .402 inches high
  Ideal for high packaging density
- High sensitivity — minimum operating power
  NF2/150mW, NF4/240mW
- Variety of available lines —
  Amber Sealed types
  MBB (Form D) contact types
  High breakdown voltage types for transient protection — 1,000V rms between open contacts, contact sets
- Gold capped silver palladium contacts available.

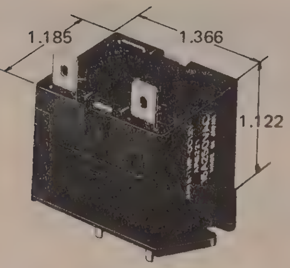
1 Horse Power Compact Power Relays

JA-RELAYS



1.185
1.366
1.122

- High switching capacity — 55A inrush, 15A steady state inductive load
- Particularly suitable for air conditioners, dish waters, copiers and other consumer and office equipment
- Two types available
  "TM" type for direct chassis mounting
  "TMP" types for PCB mounting
- TV-rated types available

Types and Data

Type	Coils			Contacts	
	Voltage	Res. (Ω)	Nom. Power (mW)	Arrange-ment	Rating (A)
JA1a–TM– DC 6V DC12V DC24V	6VDC 12 24	30 120 480	1.2W 1.2 1.2	1a	1 HP
JA1a–TM– AC24V AC115V AC240V	24VAC 115 240	– – –	*1.4VA 1.4 1.4	1a	1 HP
JA1a–TMP– DC 6V DC12V DC24V	6VDC 12 24	30 120 480	1.2W 1.2 1.2	1a	1 HP
JA1a–TMP– AC24V AC115V AC240V	24VAC 115 240	– – –	1.4VA 1.4 1.4	1a	1 HP

Notes: 1. *1.4VA is nominal operating power at 50Hz.
In case of 60Hz, nominal operating power is 1.3VA.
2. JA1b (1 Form B) and JA1C (1 Form C) versions are available.
3. Terminals
"TM" type : .187" quick-connect terminals for coil and .250" for contacts.
"TMP" type : PC board terminals for coils nd .250" quick connect terminals for contacts.
4. Upgraded rating types available as JA-P types.
(25A 250VAC 1HP 125, 250VAC)
5. Standard packing → Carton: 20 pcs./Case: 200 pcs.

- Many safety-oriented characteristics incorporated.
- High dielectric strength — 10,000V surge in µsec.
- High inrush resistance —
  1X : 117A (TV-8 equivalence)
  2X : 91A (TV-6 equivalence)

Dave Robson

"Tell me your relay application and I'll tell you how Bosch Mini-Giants® can help."

Whether it's automobiles or main frame computers, alarm systems or 100-ton cranes, Robert Bosch speaks your language on any of dozens of relay applications. So let's talk.

Whether it's plug-in relays (30 amp; 6, 12 and 24 VDC) or PCBs (15 or 30 amp), let's talk.

Whether your main concern is quality (automated production keeps Mini-Giant® Relays quality consistent) or price (we'll match any of our competitors), let's talk.

Whether delivery is needed in 24 days or 24 hours, let's talk.

I'm **Dave Robson.** For a free brochure on Robert Bosch Mini-Giant® Relays just phone me or my colleague **Rich Inglot** at **(312) 865-5301.** Or write us at:

CLARE Mercury-Wetted Contact Relays

GENERA
INSTRUMEN

RELAY TYPE	TERMINAL TYPE/GRID	CONTACT FORMS AVAILABLE	NOMINAL VOLTAGE	DESCRIPTION
HGJM **HGJ2MT** 	1.400/1.200 x .100 staggered	1C 2C (Break-Before-Make)	5 Vdc 12 Vdc 24 Vdc 48 Vdc	Highest speed mercury-wetted con tact relay. Life at 2A, 100VA rate load: 20 billion operations with con tact protection. Low noise, high rep etition rate. Stable at 200 Hz.
HGWM **HGW2MT** 	1.20 x .100	1C 2C	5 Vdc 12 Vdc 24 Vdc 48 Vdc	Compact package mercury-wette relay. Life at rated load: 20 billio operations. Same characteristic as HGJM
HGSM **HGS2MT** 	1.800/1.500 x .200 staggered	1C 1D 2C 2D	5 Vdc 12 Vdc 24 Vdc 48 Vdc	Sensitive mercury-wetted relay Life at 2A rated load: 20 billion op erations with contact protection 120 Hz repetition rate.
HGRM **HGR2MT** **HGSR** 	1.400/1.200 x .100 staggered	1C 1D 2C 2D	5 Vdc 12 Vdc 24 Vdc 48 Vdc	Small mercury-wetted relay. Life a rated load: 20 billion operation with contact protection. Same con tact characteristics of HGSM.
HGM **HG2M** 	3.000/2.400 x .200 staggered	1D 2D (Make-Before-Break)	12 Vdc 24 Vdc 48 Vdc	High current (5.0A, 250VA) mer cury-wetted module. Life at rate load: 20 billion operations with con tact protection. 80 Hz maximun repetition rate.
HG **HGP** **HG2A** **HG3A** **HG4A**	8, 11 and 14 Pin Plugs	1D 2D 3D 4D	As Required	Heavy duty (5.0A, 250VA) mercury wetted plug-in relays. Life at rate load: 20 billion operations with con tact protection.
HGS	8 Pin Octal Plug	1C 1D	As Required	Sensitive mercury-wetted plug-i relay. Life at rated load: 20 billio operations with contact protection 2A, 100VA contact rating.
851	1.300 x .100	1A 2A 4A (Normally Open)	5 Vdc 12 Vdc 24 Vdc	Mercury-wetted reed, epox molded. End lead construction. Lif at rated load: 1 billion operations .5A, 50VA contact rating.
HRB 	1.00 x .150	1A thru 5A	5 Vdc 12 Vdc 24 Vdc	Mercury-wetted reed, metal cove Standard grid spacing. Life at rate load: 1 billion operations. .5A 50VA contact rating.
HRM	.800 x .150	1A	5 Vdc 12 Vdc 24 Vdc	Subminiature form A module fo PCB mounting. Life at rated load: 1 billion operations with contact pro-tection. .5A, 50VA contact rating.

CLARE DIVISION, 3101 W. Pratt Avenue, Chicago, Illinois 60645 ● 312/262-7700

CLARE Mercury-Wetted Contact Relays

GENERAL INSTRUMENT

RELAY TYPE	TERMINAL TYPE/GRID	CONTACT FORMS AVAILABLE	NOMINAL VOLTAGE	DESCRIPTION
MSS2	DIP, .3 x .10	1A	5 Vdc 12 Vdc 24 Vdc	Mercury wetted contact relay that can be mounted in any position. Epoxy molded construction, dual-in-line package. Life at rated load: 100 million operations with proper contact protection.
CUP (5)	Staggered	1A–5A 1B 2B	5 Vdc 12 Vdc 24 Vdc 48 Vdc	Mercury wetted contact relay. Staggered pin-out. Life at rated load: 100 million with proper contact protection. 2A, 30VA contact rating.
CUP (6)	Staggered	1A–5A 1B 2B	5 Vdc 12 Vdc 24 Vdc 48 Vdc	Mercury wetted contact relay that can be mounted in any position. Fully sealed construction, staggered pin-out. Non-conductive plastic cover with internal magnetic shield. Life at rated load: 100 million operations with proper contact protection.
MMRB	1 x .1, 1 x .15	1A–6A	5 Vdc 12 Vdc 24 Vdc	Mercury wetted contact relay that can be mounted in any position. Electromagnetic shielding standard on a 1 x .10 inch in-line pin-out. Life at rated load: 100 million operations with proper contact protection.
MHC	1 x .10	1C 2C	5 Vdc 12 Vdc 24 Vdc 48 Vdc	Miniature mercury Form C relay. Fully sealed construction, 1 x .10 inch in-line pin-out. Life at rated load: 1 billion operations. 1A, 50VA contact rating.

CLARE CIRCUIT PROTECTION

Surge Arrester Selection Guide

PRODUCT	VOLTAGE RATINGS	APPROXIMATE SIZE AND MOUNTING METHOD	PHYSICAL CONSTRUCTION	SPECIAL FEATURES
Comgap (CG)	75V–1000VDC	.265" L x .380" Dia. Solder Leads .892" L P/C Mtg. Mtg. Clips for Units w/o Leads	Ceramic/Metal	Small Size Rugged Ceramic Construction Low Capacitance < 1 5 pF High Peak Current Capability > 10 kA
Uni-Imp® (UBD, UGT, UBT)	550V–20kVDC	2.20" L x .560" Dia. Solder Lugs	Glass/Metal	Ultra Fast Protection No Overshoot (DC to 200kV/μS) Life Thousands of Operations
Spark Gaps (SB & SG)	400V–40kVDC	3.562" L x 1.202" Dia. Solder Lugs Ferruled Ends for Clip Mtg.	Glass/Metal	Sub-Microsecond Responsive Time Electrical Energy Transfer DC Overvoltage Protection
Triggered Spark Gaps (TA & TB)	1.0kV–2kVDC	3/4" H x 21/22" Dia. Solder Lugs 2.10" H x 2.82" Dia. Stud Screw Mtg.	Ceramic/Metal	Command Energy Switching DC Overvoltage Protection Rugged Construction
ESP1	Plasma surge arresters in a dual-in-line, automatically insertable package. Epoxy molded construction. Available in voltages from 90 to 470 volts. Printed circuit board mountable.			
ESP2	Dual-in-line signal line protector that combines the high current capability of the surge arrester with the fast operating speed and low voltage capability of the "superzorb." Available in voltage 5 to 150 volts. Epoxy molded construction. Printed circuit board mountable.			

CLARE DIVISION, 3101 W. Pratt Avenue, Chicago, Illinois 60645 ● 312/262-7700

CLARE Electromechanical Relays

GENERAL INSTRUMENT

RELAY TYPE	TERMINAL TYPE/GRID	CONTACT FORMS AVAILABLE	NOMINAL VOLTAGE	DESCRIPTION
 **LM**	Dual-in-line Package (DIP)	1C 2C 1C Latch 2C Latch	3 Vdc 5 Vdc 6 Vdc 12 Vdc 24 Vdc 48 Vdc	Miniature dual-in-line package. Epoxy sealed. Bifurcated contacts for more reliable switching 1 and 2 coil latching versions available. Life at low to signal level loads: 10 million operations.
 **LX**	Dual-in-line Package (DIP)	1 Form C	3 Vdc 5 Vdc 6 Vdc 12 Vdc 24 Vdc	Subminiature "sugar cube" relay. Epoxy sealed. Contact rating: 1 Amp. Life at full rated load: 100,000 operations.
 **LA**	.100 in-Line	4 Form C	6 Vdc 12 Vdc 24 Vdc 30 Vdc 48 Vdc	Low-cost miniature relays offer high switching capacity and versatility for their size. Bifurcated contacts switch from low level to 2 ampere full rated loads. Life at rated load: 100 thousand operations.
 **LB, LBP**	.100 in-Line	6 Form C	6 Vdc 12 Vdc 15 Vdc 18 Vdc 24 Vdc 30 Vdc 36 Vdc 48 Vdc	Miniature relays offer high switching capacity and versatility at low cost. Bifurcated contacts switch from low level to 2 ampere full rated loads. LB series are designed for direct plug into socket mounting. Life at rated load: 100 thousand operations.
 **LC**	.10 in-Line	12A 6A6C 6B6C 6A6D 6B6D 6A4C2D	As Required	Low-cost relay offering the highest switching capacity—to 12 poles. Bifurcated contacts switch from low level to 2 Amps. Versatility allows combinations of contact forms A, B, C, and D. Life at low to signal loads: 10 million operations.

HIGH PERFORMANCE RELAYS
from
COMMUNICATIONS INSTRUMENTS, INC.

MIGHTY MICRO MM

THE SMALLEST MICRO-MINIATURE HIGH RELIABILITY INDUSTRIAL GRADE RELAY

Special Features

- Two Form C bifurcated contacts gold clad silver-palladium.
- Rated for low level to 2.0 amp switching.
- Requires only .155 square inch circuit board space, thus permitting a mounting density of more than six relays per square inch.
- Long Life – Mechanical life expectancy more than 100 million operations.
- High shock/high vibration resistance.
- Footprint compatible with .1 inch (2.54 mm) grid arrangement.
- Total volume less than a cubic centimeter.
- Fast operate and release time.
- Low contact resistance.

Electrical Characteristics

Contact Arrangement
CII Type MM relays are suitable for RF switching. The choice of contact materials and careful design assures consistently low contact resistance of 50 milliohms max.

Enclosure
All Communications Instruments type MM relays are epoxy sealed thus permitting automatic printed circuit board processing.

Flammability Rating
All plastic materials used in the construction of Communications Instruments type MM conform to UL 94-VO.

Contact Rating & Life Expectancy

Communications Instruments type MM relay is designed for long life, high reliability switching from low level (Microwatts) up to 2.0 amps. Mechanical life expectancy is 100 million operations.

Maximum voltage: 120 VAC, 150 VDC.
Maximum power switched: 60 watts or 120 VA.

Environmental Characteristics

Ambient Temperature Rating
−35° to +70°C.

Vibration Resistance
Functional:
MML 20Gs 10 to 2000 Hz
MMS 15Gs 10 to 2000 Hz
Destructive: 50G, both types

Shock Resistance
Functional:
MML 100G 6 mS Half Sine
MMS 50G 6 mS Half Sine
Destructive: 150G, both types

Operate & Release Time
When tested at nominal rated voltage, the maximum operate time is 3 milliseconds and the maximum release time is 1.5 milliseconds.

Insulation Resistance
Insulation resistance at 500 VDC exceeds 1000 megohms.

Dielectric Withstanding Voltage
All mutually insulated points – 500 VAC – 1 minute.

Contact Bounce
Typical contact bounce characteristics are 0.5 mS on operate and 3.0 mS on release.

Standard Sensitivity, 2 Form C

Part Number	Nominal Voltage (DC)	Coil Resistance Ohms ±10%	Pickup Voltage (Max)	Dropout Voltage (Min)

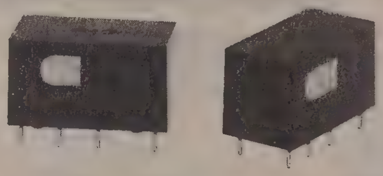
MINIATURE SEALED DUAL IN-LINE RELAY

MD



Special Features

- Two Form C bifurcated contacts – gold clad silver-palladium.
- Standard and high sensitivity models.
- Completely sealed or with optional dust cover.
- Contact rating from low level to 2.0 amps switching – 3.0 amps carry.
- Super clean construction – inert gas filled.
- Designed for low contact resistance and contact resistance stability during life.
- UL recognized component.
- Maximum voltage: 125 VAC, 150 VDC. Maximum power switched: 60 watts or 120 VA.
- Surge resistance – Type MD relay conforms to FCC Part 68-1500 V Peak.

COTO
CORPORATION

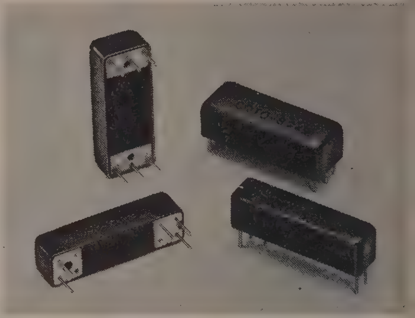
MICROMINIATURE REED RELAYS

SERIES 2200

Coto's microminiature 2200 series relays are now available with greater than 10^{12} ohm insulation resistance.

Utilizing a new low moisture absorbant bobbin material, Coto's special cleaning process and screening assures you of the most reliable high impedance relay available. This new microminiature design has been engineered to provide an improved system to lock in the terminal pins (up to 2 lbs. pull test prior to encapsulation).

The 2200 series reed relays, long recognized as the smallest high reliability relays in the industry, offer a wide variety of contact forms and coil resistances while occupying only .17 sq. in. of PC board space. Switching speeds of less than 500 micro seconds typical on most models and optional electrostatic or co-axial shielding contribute further to the versatility of the 2200 series.



RELAY SPECIFICATIONS

Model Number & Coil Voltage		2204- 05, 12	2211- 05, 12	2231† 05, 12

COTO
CORPORATION

MICROMINIATURE REED RELAYS FOR ATE

SERIES 2200

Relay models 2200-2301, -2302, -2310, 2311 and -2314 are specifically designed to meet the rigorous specifications of the component Automatic Test Equipment industry.

Available from stock, these relays are ideal for use in new OEM designs or by the ATE user for new test fixturing as well as maintenance of existing production fixtures.

Coto's quality workmanship and designed-in reliability have become the standard in the ATE industry.

PACKAGING

Series 2200 reed relays are fully encapsulated in a magnetically shielding steel shell coated with a bright red, chemically resistant and insulating epoxy finish. A new proprietary potting process provides stress-free encapsulation of both coil and reed switch.

TESTING AND RELIABILITY: Optimizing the 2200 Series Relays' operating parameters are coil windings carefully designed for power conservation.

All reed switch capsules are dry buzzed in a test coil for one million cycles and then tested for dynamic contact resistance. This process eliminates weak, contaminated or damaged reed switches which are subject to early failure. The switches utilize a contact plating which eliminates the low-level contact sticking failure mode.

- Dynamic contact resistance as described above, at the must-operate voltage and 100 Hz.
- Must operate time at 100 Hz.
- Insulation resistance at rated breakdown voltage between each isolated pin to all other pins tied together.
- Coil Resistance.
- See Engineering Bulletins #1 and #2 for further information on Coto testing procedures.

ENVIRONMENTAL RATINGS

Storage Temperature:
-50°C to +100°C
Operating Temperature:
-20°C to +70°C

Note: (The must-operate and must-release voltages and the coil resistance are specified at 25°C. These values vary by approximately 0.4%/°C as the ambient temperature varies.)

Vibration: 20 G's to 2000hz
Shock: 50 G's

ORDERING INFORMATION

2200-2301 through 2200-2311 are complete part numbers.

For 2200-2314 indicate coil voltage. Example, 2200-2314-05 or 2200-2314-12.

MOUNTING SOCKETS

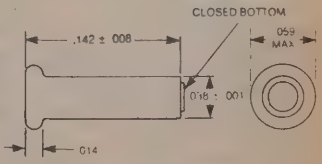
Miniature Spring Sockets suitable for use with 2301/2302 reed relays and the single pole versions of the 2200 series

MATERIAL

Spring: Tin plated Beryllium Copper
Eyelet: Tin Plated Copper

PART NUMBER

0116-0100



NOTE
- FOR .014-.017 DIA PIN
- RECOMMENDED MOUNTING HOLE .040 ± .002

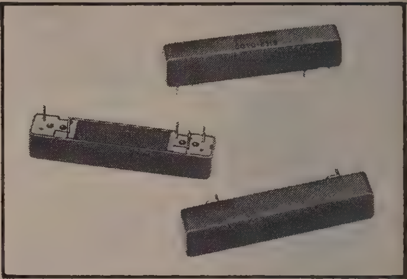
**Life expectancy at full rated loads is dependant upon the combination current/voltage switched. While typical life expectancy is >5 x 10⁶, consult factory for life data at your load levels.



Coto's new series 2400 miniature reed relays are ideal for use in Telephone Switching and ATE applications (such as Texas Instruments ATE equipment) or in applications where high sensitivity, high power or high voltage relays are required.

Slightly larger than the Series 2200 microminiature relays, the Series 2400 units are available in a wide variety of custom pin configurations In addition, wider pin spacing allows better contact to coil isolation on the PCB.

MICROMINIATURE REED RELAYS

SERIES 2900

Coto's microminiature 2900 series reed relays are specially designed and constructed for maximum versatility and dependability.

Almost one third smaller than a DIP (only .20 sq. in. of P.C. board space), these microminiature relays offer the same switching capabilities as larger "miniature" relays. With the electrostatic or co-axial shield options, these relays are ideal for switching fast digital pulses (without significant degredation of pulse edges) or R.F. to 1000 MHz with minimal insertion loss.

The 2900 relays exhibit a characteristic impedance of 50 ohms, typical. Their ability to carry one amp makes them ideal for use in A.T.E. Force/Sense applications, digital switching matrixes and other applications requiring small size, fast switching speeds (less than 300 μsec. typical w/#2 coil option) and high reliability.

PACKAGING: The package size of the 2900 allows utilization of a form C capsule as well as a mercury wetted form A capsule. The series incorporates Coto's quality engineered package designs. Relays are encapsulated in a magnetically shielding steel shell coated with a bright, chemically-resistant and insulating epoxy. A proprietary potting process provides stress-free encapsulation, avoiding problems common to many "molded" relays. The 2900 has a polyester bobbin material for superior insulation resistance and has rugged .022" diameter terminal pins.

Careful attention to reed capsule cleanliness and packaging material selection assures insulation resistances of greater than 10^{12} ohms, even under elevated temperature and humidity conditions (40°C, 95% RH).

All non-mercury wetted versions are supplied with a new contact plating material that eliminates low level contact sticking, which is a common problem with other reed relays.

TESTING & RELIABILITY: Each reed switch and completed relay is dry-buzzed a minimum of one million operations and tested for dynamic contact resistance, enhancing their reliability for low level switching and long life. The dry form A versions have been life tested to one billion* operations. The average contact resistance after one billion operations was less than .250 ohms.

Various contact configurations and coil resistances are available as well as electrostatic and co-axial shielding.

* Hot switching 1 VDC, 1mA, at a rate of 500Hz.

ULTRA-LOW THERMAL EMF REED RELAYS
SERIES 3400

Coto, the pioneer in low thermal EMF technology, announces the enhancement of its Series 3200, Low Thermal EMF Reed Relays. CR-3200 Relays feature superior thermal EMF performance with 1 microvolt thermals and 200 nanovolt stability. In addition, 3200 relays offer the advantages of encapsulated reed relays, such as high isolation, speed and improved reed contact stability to provide increased reliability and long life performance.

Series 3200 relays are designed for scanning low-level analog and digital signals, multiplexing, data acquisition and automatic testing of components and systems. Coto's new contact material eliminates contact sticking and unstable contact resistance usually associated with reed relays.

- contacts especially conditioned for reliable low-level switching
- contact plating material eliminates "sticking" and unstable contact resistance
- choice of stable low thermal EMF ratings: $<10\mu V$, $<5\mu V$, $<3\mu V$, $<1\mu V$, $<500nV$
- fully encapsulated in a steel shell
- high insulation resistance — greater than 10^{12} ohms
- designed to meet industrial component standards
- 1500 VRMS control to signal isolation
- 100% dynamic testing and burn-in for ultra-high reliability
- less than 1.0 msec. switching speed typical

DIP REED RELAYS
2600

Coto Dip Reed Relays (CR-2600 Series), designed for versatility and reliability, are offered in a wide variety of contact types and coil resistances to meet most switching applications.

Relays are available with electrostatic shielding, alternate switch and coil connections and diode coil suppression.

Highly reliable, CR-2600 relays are excellent for new designs or to retro-fit lesser quality molded DIP relays.

All 2600 relays are pre-conditioned and dynamically screened before encapsulation.

All relays are epoxy encapsulated utilizing a proprietary potting process to provide stress-free encapsulation. Premium grade, contamination-free reed switches are used throughout. A new contact plating material eliminates low-level "sticking" and unstable contact resistance.

2600 Dip Reed Relays are encapsulated in a magnetically-shielding steel shell coated with a bright, chemically-resistant and insulating epoxy. All coil connections are coated with a silicone rubber to ensure stress-free encapsulation.

QUALITY PROVEN REED RELAYS
SERIES 4000/4200

These uniquely designed reed relays are manufactured and tested by the most advanced production techniques, which result in minimum customer costs and a high standard of quality and performance. Relays are completely encased in a tough, flame-retardant shell with only premium grade catalogued reed switches used throughout. Switches, coils and completed relays undergo 100% high reliability testing.

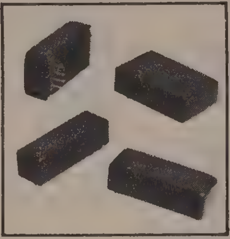
MINIATURE REED RELAYS
SERIES 7000 1" x .100"

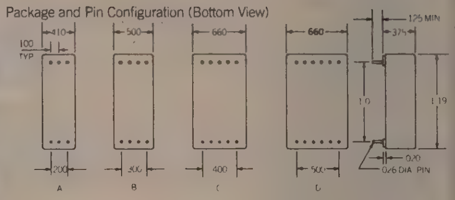
This totally new series of highly reliable reed relays incorporates more than 10 years of Coto design experience, a feature that has helped make Coto a leading manufacturer of low-thermal EMF relays.

All relays are encapsulated in a magnetically-shielding steel shell coated with a bright, chemically-resistant, insulating epoxy.

The bobbin and epoxy materials are specifically designed for low-moisture absorbency. Round .026" terminals are used throughout. All reeds are dry buzzed a minimum of 1 x 10⁶ operations and subjected to Coto's Dynamic Resistance Test before, during and after relay assembly. Standard and custom configurations are available.

A broad range of contact ratings and types are available: Dry Standard; High Voltage; Mercury Wetted.





CR-7100 DRY STANDARD RELAYS

Contact Form	Part No.	Coil VDC	Res. Ohms ±10% @ 25°C	Max. Pick-up VDC @ 25°C	Min. Drop-out V.D.C. @ 25°C	Pin Diagram Bottom View End to End	Pin Diagram Bottom View Same End

- Black dot on top of relay denotes Pin #1.

* These relays contain bias magnets. Correct polarity must be observed. Diode coil suppression is required for proper operation of latching relays. If internal diode option is selected on CR-7150 Pins #1 and #8 are positive. On all other relays Pin #1 is Positive.

‡ Break before make not guaranteed. Unused pins are omitted.

Octal Cycle Progress Timer

OCTAL PLUG-IN interchangeable with most octal timers

CYCLE PROGRESS shows time remaining in the cycle

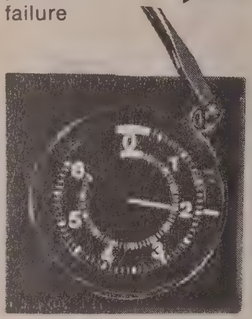
CROUZET
OCTAL TIMER
TYPE 88 226.510
110-127V 60Hz

±2% SETTING ACCURACY

MEMORY holds setting during power failure

TRANSIENT IMMUNITY built-in

MULTI-FUNCTION on-delay, interval and single shot in one timer!



MULTI-RANGE 2 models cover from 0.3 sec. to 12 hours

OCTAL LOCK prevents module from vibrating out of its socket

Easy **PANEL MOUNT** with no additional hardware

HOW TO ORDER

OCTAL CYCLE PROGRESS TIMER - part no. 88 226.5
(Example - 88 226.5 - 115V 60Hz Model 1)

VOLTAGE	FREQUENCY	TIME RANGES
115V	60Hz	Model 1: 6 sec./60 sec./12 min.
24V	60Hz	Model 2: 6 min./60 min./12 hrs.
240V	60Hz	
220V	50Hz

Heavy duty power relay for industrial control applications. Particularly suited for motor controls, heater loads, welder loads, and other power switching applications. Molded nylon coil resists fungus and moisture. Long life, rugged construction. Rating: 25 amps, 1-1/2 hp, 120/240 VAC. Heavy duty screw-type terminals. Mounting: two 3/16" holes on 1-7/8" centers. Listed under the Components Program of Underwriters Laboratories, Inc. (File No. E37066). CSA listed (File No. 20690).

FEATURES

OCTAL TYPE/PLUG IN TD SERIES

- CMOS CIRCUITRY
- FAST RECYCLE TIME
- VIRTUALLY UNLIMITED DELAYS
- NO FALSE TRANSFER
- CONTINUOUS DUTY CYCLE
- MOST MODELS - UL & CSA
- OCTAL TYPE, PLUG IN BASE
- LEXAN DUST COVER
- FACTORY STOCK

BLADE TYPE/PLUG IN TD SERIES

- CMOS CIRCUITRY
- FAST RECYCLE TIME
- VIRTUALLY UNLIMITED DELAYS
- NO FALSE TRANSFER
- CONTINUOUS DUTY CYCLE
- BLADE TYPE, PLUG IN BASE
- LOW POWER CONSUMPTION
- BOTH AC OR DC TYPES
- FACTORY STOCK

SOLID STATE TS SERIES

- CMOS CIRCUITRY
- NINE (9) OPERATING MODES
- ALL MODELS UL
- TOTALLY SOLID STATE
- DELAYS UP TO 2 HOURS
- SMALL SIZE
- EASY INSTALLATION
- TOTALLY ENCAPSULATED
- FACTORY STOCK

UNITIMER TDU SERIES

- FIELD PROGRAMMABLE
- OPERATES ON AC OR DC VOLTAGES
- FOUR (4) TIMING RANGES
- FIVE (5) OPERATING MODES
- NO FALSE TRANSFER
- LED GLOWS WHEN RELAY IS ENERGIZED
- FACTORY STOCK

DESCRIPTION

The TD Time Delay Relay series features a CMOS integrated circuit consisting of an RC oscillator, a binary counter and an output logic that operates an electromechanical relay. The delay period is adjustable by varying the oscillator frequency which is represented by the variable control on the enclosure. A dial is silk screened under the control providing a reference point. Extremely fast recycle times, along with high accuracy and repeatability make the TD series ideally suited for all applications encountered in the industry.

The TD series described here is electrically identical to the octal plug in types. The package and type of termination is the difference. This too features the CMOS integrated circuit providing extremely long delays, fast recycle times, high repeatability and accuracy. As with all other DEI timers, these will not false transfer when power is removed prior to completion of the timing cycle. They plug into standard blade type sockets. Specify QC-11.

The TS series offers a solid state addition to the existing broad line of DEI timers. Their small size and low cost provide an inexpensive alternative to the electro-mechanical types. Nine (9) different operations are offered. The totally encapsulated package features CMOS technology, allowing long timing ranges, 100% solid state circuitry, no moving parts to wear, and quick connect terminals for ease of installation. The same fast recycle times and accuracy employed in the other DEI timers make the TS series also ideally suited for all applications encountered in the industry. All models have UL

The TDU series Unitimer offers the most versatile single timer available today. 1 model replaces 40 standard devices. 4 wide range delays X 5 most common modes of operation X 2 supply voltages, since it will operate on both AC and DC. The CMOS digital circuitry provides high accuracy, repeatability and fast reset times. The long life, heavy duty relay output is rated to carry currents of 10 amps at 24VDC or 120VAC. All programming is easily accomplished externally by using one or more jumpers between designated base pins -no trap doors to open, no switches to set or disassembly required.

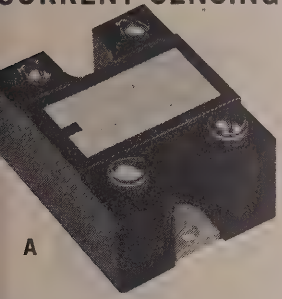
SPECIAL DESIGNS

ouglas Randall makes custom designed relays to solve difficult problems. A few models are shown below to illustrate he variety available. Special molding techniques make it possible to manufacture unusual sizes, shapes and terminal arrangements with low tooling costs.

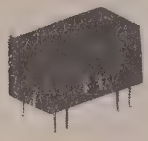
The electrical variatiohs possible with Reed Relays are practically limitless.

Douglas Randall will gladly review your applications and offer rapid engineering and prototype service.

CURRENT SENSING RELAYS



A



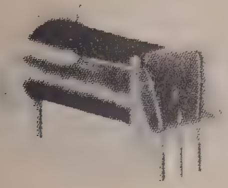
B

Douglas Randall offers a line of relays with coils capable of handling 25 Amperes DC. Contact arrangements can be Form 1A, Form 1B, or Form 1C.

Relay A has a Form B contact which opens at 1 ADC closes at .5 ADC and can operate continuously at 15 ADC coil current. It has screw terminals and can be bolted to a heat sink.

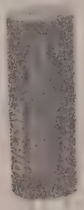
Relay B has standard DIP terminals. It has a Form B contact which opens at 2.3 ADC and closes at 1.7 ADC.

SENSITIVE RELAYS



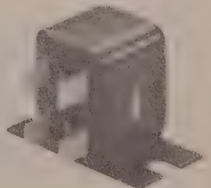
Proper switch selection and tight coil design result in relays operable at lowest coil power. The one shown operates at only 3.5 milliwatts.

VERTICAL MOUNTING



This relay is a miniature molded mercury wetted type .450″ Diameter x 1¼″. High designed for vertical mounting.

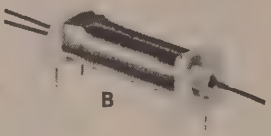
SPECIAL HOUSING



This relay is designed with spade terminals and epoxy molded into a steel case with welded mounting bracket.

HIGH INSULATION RESISTANCE RELAYS

A



B

Two typical designs are shown above:

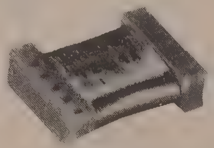
A — A miniature reed relay with a floating lead to maintain high IR.

B — This is a relay using Form A and Form B switches timed to provide a Form C (break before make) function with flying leads to maintain 10^{13} ohms. Up to 5 Form A contacts are available @ 10^{13} ohms.

SPECIAL HIGH VOLTAGE RELAY

This relay has three separate coils, each containing a 5,000VDC and a 10,000VDC switch. The package is molded with a flame retardant epoxy and constructed to withstand 18,500VDC between the switches and all other conductors. The relay is 3⅞″ L x 2⅜″ W x 1½″ H.

SNAP-IN RELAYS



This 4 pole relay mounts in Berg-clips, like the Series SI on page3
Douglas Randall can now duplicate the following discontinued IBM models:

1 — Position: 766040, 766042, 766059, 766060, 766065, 766068 and 766086

2 — Position: 766043, 766044, 766057, 766067, 766072 and 766087

4 — Position: 766046, 766047, 766066, 766071 and 766079

DOUBLE COIL RELAY

This is a special Form 2C relay with two coils. Either coil when energized at 90% nominal voltage must be able to cancel the other coil when energized at 110% nominal voltage. The relay must be able to withstand 600VRMS.

PROXIMITY SWITCHES

Douglas Randall manufactures standard and custom switches to meet many applications, a few of which are illustrated. All proximity switches are tested for operation by external magnets at specified distances.

MINIATURE LATCHING

This is a switch and magnet combination shown 3 times actual size. The length, excluding leads is only .350". This assembly will latch in either the open or closed state when approached by an external magnet.

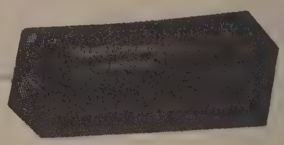
FORM B

This is a Form B switch and magnet assembly, .7" L x .150" Sq. The normally closed switch opens, when approached by an ⅛" Sq. steel rod.

STEP MOUNTING

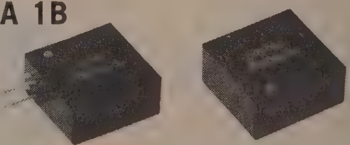
This encapsulated switch is available with Form 1A, Form 1B, Form 1C or Form 2A contacts. It can be supplied with dry reed, mercury wet, high voltage (to 1,000VDC) or high power (to 100VA) contacts. The one shown was designed for low contact resistance and low level switching.

HEAVY DUTY



The proximity switch shown above has heavy duty contacts rated at 100VA. This switch and matching magnet are epoxy encapsulated for heavy duty use on outdoor machinery.

FORM 1A 1B



This is a switch and magnet combination. The switch has Form 1A and Form 1B contacts designed so that one set of contacts is always open as the magnet approaches it.

SOLID STATE RELAYS SERIES K

DC OUTPUT / DC CONTROL SIGNAL

NEW Output to 250 VDC

Douglas Randall Series K are SPST (NO) or (NC) relays which will switch loads of 4, 8 or 12 Amps to 250 VDC. They provide rapid switching and opto-isolation between input and output. The sensitive inputs are compatible with DTL or TTL logic. Arc-free switching makes these relays suitable for hazardous atmospheres.

MODEL NUMBERS

Output Voltage	Current	Model
2-32VDC	4 Amp 8 Amp 12 Amp	K04A K08A K12A
2-55VDC	4 Amp 8 Amp 12 Amp	K04B K08B K12B
2-250 VDC	6 Amp	K06D

*Inductive loads must be diode suppressed.

† Normally closed add — (NC) K04A-NC.

INPUT SIGNAL DATA

Range	3-32VDC
Must Operate	3VDC
Must Release	1VDC
Input Impedance	1000Ω Min.
Isolation	
Signal to Load	1500V
Signal to Base	1500V
Temperature	−30°C to +80°C

MECHANICAL ARRANGEMENT

See AC output relays on page 7

OUTPUT DATA

Continuous Current	4A, 8A, or 12A
DC Line Voltage	2-32VDC or 2-55VDC
Off State Leakage	2mA DC
Turn On Time	50 Micro Sec.
Turn Off Time	500 Micro Sec.
Voltage Drop @ Rate Current	1.5VDC Max.
Isolation Load to Base	1500V

SIZE:
2¼L x 1¾W x 1⅛H Max.

WEIGHT:
4 Ounces Max.

TERMINATION:
Standard Models —
Control Signal:
6-32 Screws
Output:
8-32 Screws

Special Models can be provided with lead wires or other types of termination in OEM quantities. Consult the factory & see pg.7 for mechanical details.

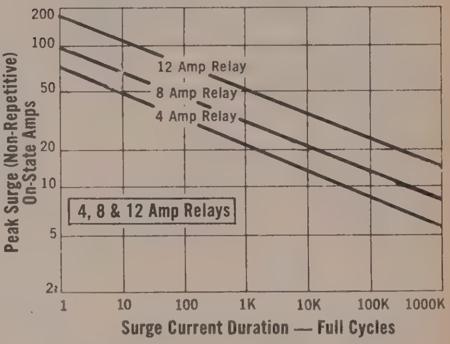
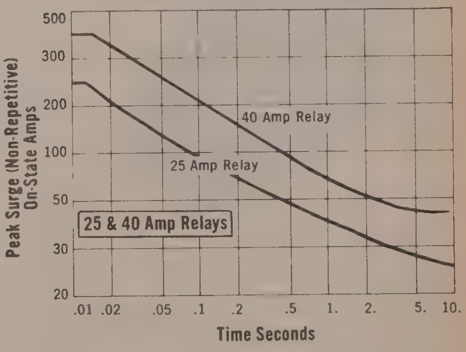
SURGE CURRENT VS TIME



SURGE CURRENT VS TIME



OTES AND OPTIONS

Special wide range models can be made which will switch loads from 18V to 140V. These relays can handle either 24VAC or 120VAC loads.

2500VAC isolation between input and output.

Form A (SPST-NO) relays are standard. Form B (SPST-NC) switching is optional. Models incorporating this feature are designated by NC. e.g. A40B-NC.

All DC models are TTL compatible over the full operating temperature range.

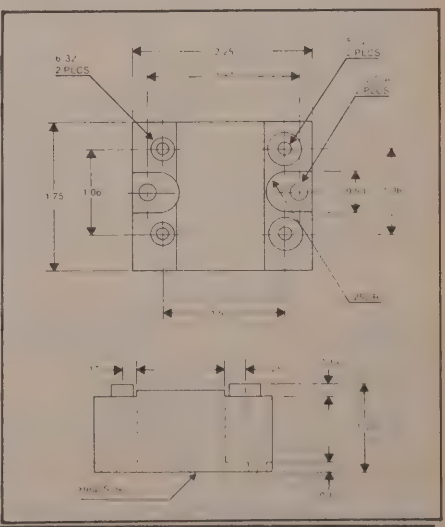
All relays except 480VAC Models incorporate an RC snubber network which prevents false operation from transients up to the dv/dt level shown. More severe transients may require additional external protection. We will review your application and recommend the additional protection needed.

ECHANICAL SPECIFICATIONS

ze: 2¼"L x 1¾"W x 1⅛" maximum.

eight: 4 ounces maximum.

rmination: Standard Models — Control Signal: 6-32 screws. Output: 8-32 screws. Special Models can be provided with lead wires or other types of termination in OEM quantities. Consult the factory for details.



PECIAL DESIGNS

ouglas Randall has designed many special solid state relays, such as a polarized, latching, SPDT unit which ill switch 12A at 28VDC. We also have the capability of making special package sizes and terminal arrange-ents for our solid state relays at moderate tool cost. Your inquiries will be reviewed promptly.

CONSTANT CURRENT CONTROLS

Constant Current Controls combined with Series R Proportional Controls eliminate current fluctuations regardless of changes in AC voltages or changing load demands. They control loads up to 40 Amps @ 120 or 240 VAC and are available in five ranges listed in the Table.

These controls will maintain uniform current and light intensity for lamp loads as shown in Figures A and B, as well as for resistive loads as shown in Figure C. The Constant Current Controls will also maintain a constant speed in universal and other types of AC motors regardless of changing line voltage.

Constant Current Controls provide overload protection by limiting the current to a preset maximum. This makes them especially useful for keeping motor current at a safe level even under lock or stall rotor conditions (see Figure E).

The controls are encapsulated in small-sized packages for use in harsh environments.

Control Range*	Proportional Control		Fixed Resistor @ Terminals1-2
	120 VAC	240 VAC	
2-4 Amp	R05A	R05B	None
4-8 Amp	R10A	R10B	6.65K ±1%
6-12 Amp	R15A	R15B	3.40K ±1%
10-20 Amp	R25A	R25B	1.74K ±1%
16-32 Amp	R40A	R40B	953 ±1%

* The lower end of the control range can be extended by additional loops of wire.

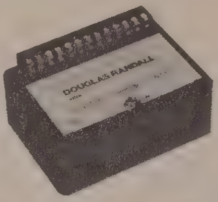

FIG. A

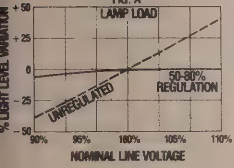

FIG. B

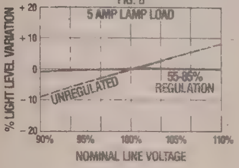

FIG. C

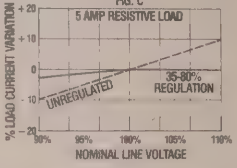

FIG. D

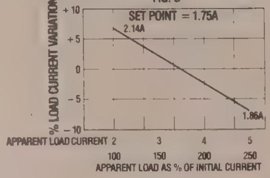

FIG. E

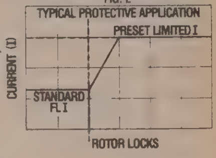


TIME BASE PROPORTIONAL DRIVERS

Time based proportional drivers transform any conventional DC-input solid state relay into a proportional controller. The driven relay may be a DC or AC output type. External power is derived from the controlled source. If the driven relay is a zero cross-over device, zero cross-over characteristics are maintained to reduce EMI caused by switching transients. Applications for time base proportional drivers include proportional control of heaters, platers, DC motors, universal wound DC-operated motors and certain AC motors. They are compact, epoxy encapsulated in the standard hockey puck design to withstand harsh environments. Two hole mounting is provided.

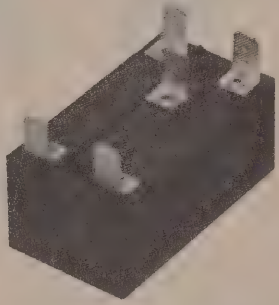
Shown at approximately 70 percent of full value is the load current and PDM control signal voltage of a typical time base proportional control of a zero cross-over relay, such as Douglas Randall D25B.

PDMA accepts external power from a 120 VAC controlled source, PDMB accepts power from a 240 VAC source and PDMD accepts power from a 10-32 VDC source.

Control Range*	Proportional Control		Fixed Resistor @ Terminals1-2
	120 VAC	240 VAC	
2-4 Amp	R05A	R05B	None
4-8 Amp	R10A	R10B	6.65K ±1%
6-12 Amp	R15A	R15B	3.40K ±1%
10-20 Amp	R25A	R25B	1.74K ±1%
16-32 Amp	R40A	R40B	953 ±1%

* The lower end of the control range can be extended by additional loops of wire.

PROPORTIONAL CONTROL TRIAC DRIVERS



Douglas Randall Proportional Control Triac Drivers control the firing angle of separate Triacs. They vary output voltages from 0 to 95% to AC loads up to 300 Amps @ 120, 240 or 480 VAC. Five models are available, two which accept 0-10 VDC inputs and three which operate from potentiometer inputs. They are compact epoxy encapsulated in phenolic cases to withstand harsh environments and designed to accept spade or solder termination. Two hole mounting is provided.

Models DPDA and DPDB accept DC inputs, and when connected to a Triac, will **increase the percentage load voltage as the DC input voltage is increased.** They provide 500 mAmps @ 6 V peak to the Triac's gate. Input to output isolation is 500 VRMS.

Models RPDA, RPDB and RPDD accept potentiometer inputs and when connected to a Triac, will **reduce the percentage load voltage as the potentiometer resistance is increased.** They provide 500 mAmps @ 6 V peak to the Triac's gate. There is no isolation between input and output.

Model	Input	Output
DPDA	0-10 VDC*	120 VAC
DPDB	0-10 VDC*	240 VAC
RPDA	Potentiometer 1W, 150 KΩ	120 VAC
RPDB	Potentiometer ½W, 1 MegΩ	240 VAC
RPDD	Potentiometer ½W, 1 MegΩ	480 VAC

* The input is not polarity sensitive but must be limited to 10 VDC.

Coaxial Relays

Applications
Dow-Key® relays are widely used for applications in air traffic control radios, CATV and CCTV systems, microwave communications, remote tone signal switches, satellite terminals, switching matrices, and RF test equipment.

Options
Each relay series has a variety of options available including different connector types, coil voltages, and auxiliary (indicator circuit) contacts. Standard coil voltages are 12 VDC, 26.5 VDC, and 115 VAC on most relay series. Other coil voltages are available on special order; consult the factory customer service representative for any special requirements you may have.

Power Switching (Hot-Switching)
Power ratings are for CW power carry only. Dow-Key relays are not designed for switching under load, although it may be possible to do so at low power levels. Consult the factory for information about power switching requirements.

Relay Impedance
Relay impedance is nominally 50 ohms unless otherwise specified. The addition of a 50 ohm relay in a 75 ohm or higher impedance line will generally result in negligible discontinuity at frequencies up to 300 MHz, because the length of the RF path through the relay is a small fraction of the signal wave length. Above 300 MHz it is increasingly important that the relay impedance be the same as the line impedance.

Microwave Relays

Applications
Dow-Key 400 series relays are designed for superior performance in microwave communications networks, laboratory instrumentation, high frequency test equipment, and CATV and satellite terminals.

Mechanical VS Solid State
Compared to diode or ferrite switches, coaxial relays offer the advantage of higher power handling capability, higher isolation and lower insertion loss over a broad frequency range. Operate time for Dow-Key relays is typically 10-15 ms.

Reliability
Dow-Key relays have been preferred for rugged military applications and commercial communications equipment for nearly thirty years. A balanced armature design makes Dow-Key Microwave relays well-suited for operation in severe environments. All connectors and sub-assemblies are manufactured by Dow-Key to ensure optimum conductivity and low insertion loss throughout the life of the relay.

If You Don't See What You Need
Call us. Kilovac® has many products in addition to the ones shown on this page. If we don't have a relay to fit your exact requirements, Kilovac has an experienced engineering staff available to design and produce a relay to your specifications.

The Nation's Most Advanced Facility for the Development, Production and Testing of Relays

With over 25 years of relay experience our product line now consists of more than 20 standard relays. Within the 67,000 square feet of manufacturing space we service the switching needs for major military and industrial accounts. Quality Control is not an accident here. We believe in and practice total control of all factors which could affect the end quality of our product. Continual emphasis is placed on utilizing state-of-the-art in new designs. We encourage all of our customers to visit our facility and view the operation first hand.

STANDARD HERMETIC SEALED RELAY SPECIFICATION

MICRO-MINIATURE HIGH CURRENT TYPE WITH INTERNAL ARC BARRIER FOR GROUNDED CASE APPLICATIONS

SPECIFICATIONS (METHODS PER MIL-R-5757)

Weight: 2.0 ounces maximum.

Terminal Finish: Electro-Tin, Type 1 per MIL-T-10727, followed by a Flow Process.

Terminal Strength (Pull): 5.0 ±0.5 pound in any direction.

Case Finish: Non Corrosive.

Sealing: Seal Test per MIL-R-5757 (10^{-6} SCCPS)*

DC Coil Resistance: ±10% rated value at +25°C.

Shock: Per MIL-R-5757, Level 4.
50 G's for 11.0±1.0 Millisecond.
No contact closures of open contacts.
10 Microseconds max. chatter of closed contacts.

Minimum Contact Life (Case Grounded): Tested at +125°C, with rated contact loads.
DC Resistive: 100,000 operations at 20 CPM.
DC Inductive: 100,000 operations at 10 CPM.
DC Lamp: 100,000 operations at 3 CPM.
AC Resistive: 50,000 operations at 20 CPM.

Contact Overload: Two times rated contact loads for 100 operations.

Vibration: Per MIL-R-5757, level 4 except 0.125 inch double amplitude, 10 to 56 Hz.
20 G's max. at 56 to 2,000 Hz.
No closures of open contacts.
10 microseconds max. chatter of closed contacts.

Centrifugal Acceleration: 50 G's: No closures of open contacts.
10 microseconds max. chatter of closed contacts.

Moisture Resistance: Per MIL-R-5757, (Coil to case polarized at 100VDC).

Dielectric Strength (Sea Level): 1000 VRMS between open contacts, 500 VRMS Post Life.
500 VRMS between coil and case.
1000 VRMS between all other combinations.

Dielectric Strength (1.3" Hg): 500 VRMS (Open contacts 350 VRMS)

Insulation Resistance: 1000 Megohms minimum at 500 VDC (Coil to case 500 Megohms at +125°C), 10 Megohms Post Life

Coil Overvoltage: Reference Max. rated operate voltage.

Maximum Coil Dissipation: 3.5 Watts maximum continuous at +125°C.

Standard Pickup Power: 500 Milliwatts at +25°C.

Contact Ratings (Max. Amperes Per Pole) Case Grounded*: Contacts monitored per dynamic contact res. limits.

Res: 28 VDC, Connected Form C: 10.0 Amperes.

Res: 115 VRMS 1ϕ, Connected Form A or B: 7.5 Amperes at 400 Hz.

Res: 115 VRMS 1ϕ, Connected Form C: 5.0 Amperes at 400 Hz.

Res: 240 VRMS 1ϕ, Connected Form C: 3.5 Amperes at 400 Hz.

Inductive: 20 Millihenries, 28 VDC: 5.0 Amperes (Load spikes suppressed below 10 VDC).

Lamp: 28 VDC: 1.5 Amperes (18.0 Amperes inrush for 15 MSEC.)

Static Contact Resistance High Level: 0.01 OHM maximum; 0.02 maximum after life (Measured at or above 100 milliamperes and 6 VDC).

Dynamic Contact Resistance High Level: 1.0 OHM max. at or above 500 MA & 28 VAC or VDC.

Contact Operate Time: 7.0 Milliseconds max.

Contact Operate Bounce Time: 2.0 MSEC. Max. (Contacts above ½ Ampere)

Contact Release Time: 3.0 MSEC. max. (Contacts below ½ Ampere)
5.0 Millisecond maximum.

Contact Release Bounce Time: 3.0 MSEC. max. (Contacts above ½ Ampere).
4.0 MSEC. Max. (Contacts below ½ Ampere).

Duty Cycle: Continuous.

Rated Miss Detection: 5,000 cycles at 5 Hz maximum.
Current: 0.5 Ampere.
Voltage: 28 VDC.
Miss Level: 2.0 OHMS max.

* Unless otherwise indicated, values apply throughout the ambient temperature range and with nominal voltage.

GROUNDED CASE APPLICATIONS MAY HAVE THE LOAD AND COIL SUPPLIES ELECTRICALLY CONNECTED TO CASE COMMON

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

ELECTROL
VARI-PACK REED RELAYS

General Description:
Elec-Trol Vari-Pack Reed Relays are specially designed to meet high performance and quality standards at low cost. They are available in both open and sealed versions and with coil terminals at the same end or opposite ends of the relay. The sealed version is the open version placed within a polyester cover then encapsulated. Optional features include magnetic shielding, electrostatic shielding and contact preconditioning.

The relay body is made of durable molded polyester with the reed contacts and terminals securely held in place at each end of the relay with epoxy. These relays are available with contact forms 1A through 6A, 1A and 2A mercury wetted, 1A latching, 1B, 2B, 1A1B, 2A2B and 1C through 4C. Consult factory for other coil or switch configurations.

ELECTROL
TELECOMM REED RELAYS

Elec-Trol Telecomm Reed Relays are specifically designed to meet the demanding requirements of the telecommunications industry. They will all meet FCC Part 68 surge requirements from coil to contact. Contact symbol #3 will also meet the surge requirement across the open contacts. Like all Elec-Trol products, our Telecomm Reed Relays are built to the highest quality and performance standards.

The BBT Series offers a sealed package with .400" pin spacing between the coil and contact leads. This enables the circuit designer to handle isolation potentials of greater than 2500 VDC.

Other contact forms and pin configurations are available. Please consult the factory.

ELECTROL

POWERMITE REED RELAYS

All Powermite Reed Relays are totally epoxy encapsulated in a five-sided metal cover providing magnetic shielding. There are five contacts available to meet almost any switching requirements. Other package styles and contact configurations are available upon request. Please contact the factory for further information.

Tolerance unless specified is ±.015".

The Micro Miniature relays can be driven directly from TTL logic and have very fast operating time. High density packaging is possible since each relay is completely magnetically shielded. Electrostatic shielding is also featured in the standard package. Encapsulation provides protection from the environment as well as water wash systems.

ELECTROL LOW THERMAL REED RELAYS

Ask for Catalog No. 200104

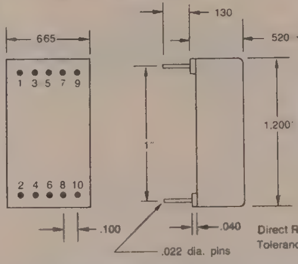
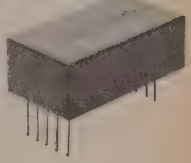
x indicates Thermal EMF rating @ 20°C, measured at pins 5 & 7 with pins 6 & 8 shorted.
1 = < 1μV, 2 = < 3μV, 3 = < 5μV, 4 = < 10μV.





Direct Replacements for Coto Series CR-3400.
Tolerance unless specified is ±.015".

The LTS series of relays are designed for switching low level signals such as thermocouples and strain gauges. The low thermal offset of these relays assures minimum system errors and high signal accuracy. Magnetic shielding as well as electrostatic shielding are offered as standard features to maintain low noise. Two pole and three pole (with guard) models are shown.

ELECTROL MICRO STRIP RF REED RELAYS

Ask for Catalog No. 200109

The new low cost Elec-Trol GHz Reed Relays with SPST-NO contacts will switch radio frequency and fast rise time pulse signals whose components extend into the GHz range with minimum signal degradation. A special reed switch designed for optimum performance at high frequencies and incorporated in a tubular shield to form a 50 ohms coaxial structure is uniquely packaged for low-loss GHz switching and ease of mounting. Input and output terminations are specifically designed to maintain low VSWR. The RFS series is designed for microstrip applications in both .032" and .062" circuit boards.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC alternating current
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AF audio frequency
AFC automatic frequency control
ALGOL algorithmic language
AM amplitude modulation
AND a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
AWG American wire guage

B

BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction code
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility system

C

CAD computer aided design
CAM computer aided manufacture
CATV cable television or community antenna television
CERMET ceramic metal element
Comm. communications
CMOS complementary metal-oxide semiconductor
CPS characters per second
CPU central processing unit

D

D/A digital to analog
DAC digital to analog converter
DC direct curent
DIL dual in-line
DIP dual in-line package
DPM digital panel meter
DTL diode transistor logic

E

EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EMC electromagnetic compatibility
EMI electromagnetic interference
EPROM electrically programmable ROM
ESR equivalent series resistance

F

FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

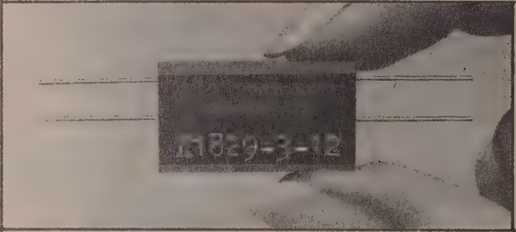
FIFTH DIMENSION, INC.

The Ultimate Modem Relay

Fifth Dimension mercury film relays exhibit excellent load-handling capabilities, 2-billion cycle reliability and operate in any position. These characteristics are augmented with features such as bounceless operation, compatibility with solid state circuitry and 2500 volts coil-to-contact breakdown which meets US and European lightning-surge standards. These are just a few of the reasons Fifth Dimension relays are repeatedly used in FCC-tested systems and in modem applications.

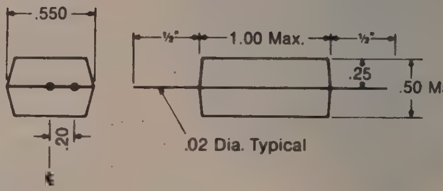
Since modems and autodialers are mounted in all sorts of positions — on walls, in racks or simply lying on a desk or table — the Series K is an ideal choice as an off-hook relay and line-pulsing relay because of its insensitivity to position. Unlike mercury-wetted reed relays (which cannot function if more than 30 degrees from vertical), there is no pool of mercury to bridge contacts or become separated from the contact parts. Instead, mercury on the contacts is replenished each operating cycle from a continuous film of mercury which covers the interior walls of the switch.

The Series K is bounceless and thus produces clean, square-wave pulses that cannot be misinterpreted by phone company dial receiver circuits. When contacts open, the mercury between the contact parts is drawn out into a thin thread by surface tension and ruptures, creating a clean break action which assures reliable dialing.



Series K Relays

Epoxy sealed, these miniature relays are available with axial leads or pins for PCB mounting.



Series K Relay Footprints

Axial distance between pins, all models, 1 inch nominal.

K18XX-3-24	24	1536	19.2	2.4	4	4	10^9					St

(XX indicates footprint)

Reliability is based upon tests conducted on over 200 relays which were exercised a total of over 34 billion operations. Specified values should not be considered as a guaranteed performance for a single relay, but rather a prediction of the performance of the cumulative results of a universe of units.

*Contact resistance is measured at end of switching capsule and does not include terminal lead resistance.
All specifications typical and subject to change without notice.

But not only for modems

Series K mercury film relays are particularly well suited for use in microprocessor input interfaces, telephone line switching test systems, touch-tone converters, automatic test equipment, data acquisition and industrial control systems and, in fact...in any application requiring low-noise, bounceless-switch, position-insensitive, outstandingly-reliable relays.

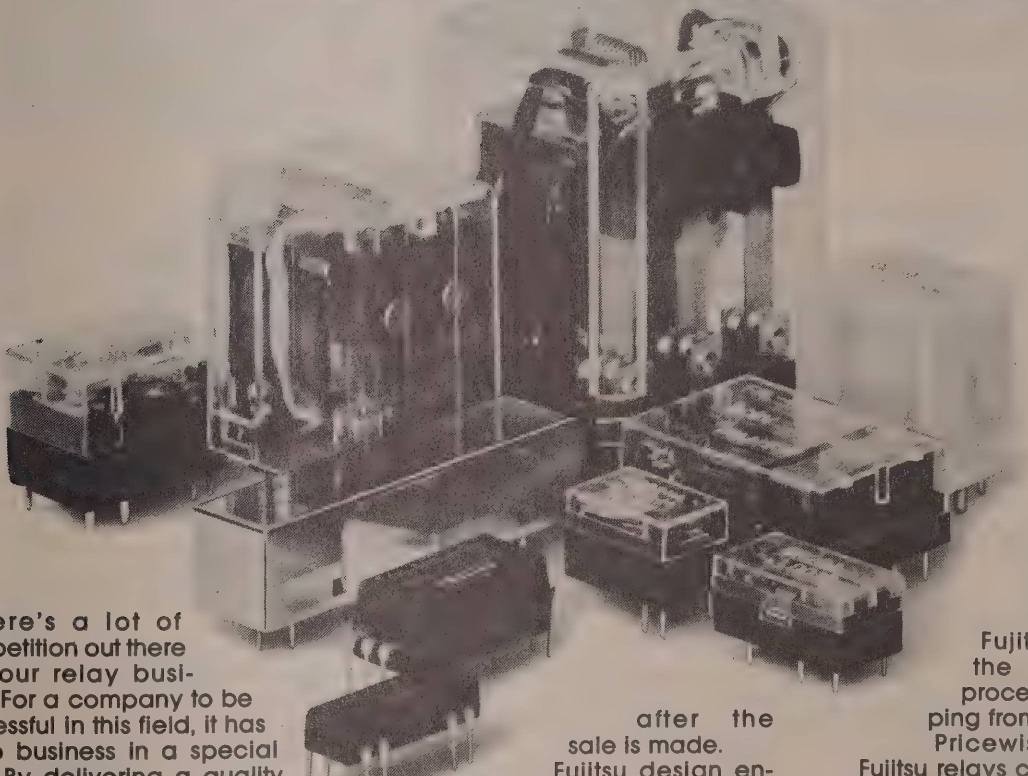
FUJITSU: RELAYS



There's a lot of competition out there for your relay business. For a company to be successful in this field, it has to do business in a special way. By delivering a quality product with built-in reliability, price and service.

Fujitsu relays have it all. Our relays meet or surpass the quality of those made by the competition. They're built to do a job and do it right. And Fujitsu relays are compatible with most relays on the market.

As far as service, Fujitsu considers it a point of pride, as well as good business to cater to your company's needs before, during and after the sale is made.

Fujitsu design engineers have developed a complete line of all the most popular relays in use today. A supply of these standard relays is always readily available. We also offer a customizing service where we work with your engineers to design relays tailored specifically to your needs.

Our warehouse is stocked to supply your company with samples of our fine products. Quantity orders come directly from the factory. And Fujitsu can match the lead time for processing and shipping from any source.

Pricewise, you'll find Fujitsu relays cost the same or less than the competition, leaving little reason not to try us.

For general purpose to flat package relays, for Mercury-wetted contacts to molded inline package (regular reed) and DIPs (latched reed), it pays to switch to Fujitsu where quality, reliability, price and service are part of our product.

For more information on our superior components, call or write us today.

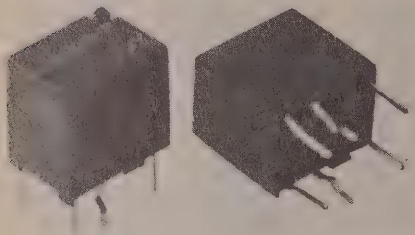
RELAYS

MICROMINIATURE RELAYS FOR P.C. BOARDS

FBR20 SERIES

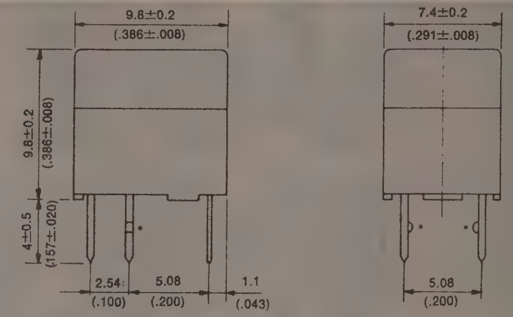


Fujitsu FBR20 series relays are designed for PC board mounting with 1A contact ratings — perfect for microminiature applications.

FEATURES

- **Microminiature size**
  Two FBR20 series relays can be mounted in the space now required for a single FBR210 series relay.
- **1A contact rating**
  Despite their microminiature size, FBR20 series relays have contact rating of 1A at 24 VDC for convenient installation.
- **Gold overlay bifurcated contact**
  Contact reliability is assured in low level applications by contact shapes and materials especially designed for signal switching applications.
- **Low power consumption**
  With a rated power consumption of only 0.3W, today's expensive energy costs can be reduced significantly.
- **Wide range of drive voltages**
  Drive voltages from 1.5 VDC to 24 VDC are available for a wide range of applications.
- **Strong shock resistance**
  Even with a 50G shock, FBR20 series relays never miss a switch.
- **Easy to pattern-design**
  Separate terminal connection with drive and output sections allow easy pattern design.
- **Formed terminal available for temporary lock**
  The unique design of the forming terminal allows FBR20 series relays to be temporary mounted for greater design flexibility.
- **Automatic soldering provision**
  The terminal is sealed to prevent flux from entering during automatic soldering.

DIMENSIONS



* Formed terminal for temporary mounting.

ENGINEERING DATA

Item	Specifications
Contact Arrangement	SPDT (1 Form C)
Contact Shape	Single contact (FBR21), Bifurcated contact (FBR22)
Contact Material	Gold overlay silver, Gold overlay silver-palladium alloy (—P)
Contact Rating	24 VDC-1A, 120 VAC-0.5A (resistive load)
Maximum Carrying Current	2A
Maximum Switching Voltage	125 VDC, 125 VAC
Maximum Switching Power	24 WDC, 60 VA AC (resistive load)
Initial Contact Resistance	100mΩ max. (measured at 6V DC-0.1A)
Coil Power	0.3W (at rated voltage, 20°C)
Coil Temperature Rise	45°C (at rated voltage, 20°C)
Insulation Resistance	1,000MΩ min. (at 500 VDC)
Withstanding Voltage	Between contacts: 500 VAC for 1 minute Between contact and coil: 750 VAC for 1 minute
Vibration	20G, 10 ~ 300 Hz (dual amplitude, maximum 3.0 mm). No contact chatter longer than 1.0 ms.
Shock	Operation error: 50G (sine half-wave of 11 ms). No contact chatter longer than 1.0 ms.
Operate Time	5 ms max. (at rated voltage)
Release Time	3 ms max. (after rated operation)
Life Expectancy	Mechanical: 5 x 10^6 ops. min. Electrical: Gold-overlay silver contacts: 100 x 10^3 ops. min. Gold-overlay silver-palladium alloy contacts: 200 x 10^3 ops. min. (at rated contact load)
Maximum Switching Frequency	Mechanical: 18,000 operations/hour Electrical: 1,800 operations/hour (at contact rated load)
Ambient Temperature	—30°C ~ +65°C (at rated operation)
Ambient Humidity	45 ~ 85% RH
Weight	1.7 g (approx.)

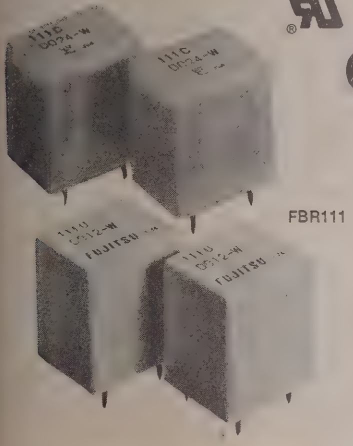
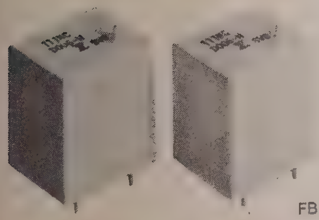
MINIATURE RELAYS FOR P.C. BOARDS

FBR111 AND FBR111N SERIES

SPDT 3A-28V DC/120V AC, 6A-28V DC/120V AC



FBR111



FBR111N

The Fujitsu FBR111 and FBR111N Series are low cost SPDT relays with a versatile switching capability. The contact is rated 3A, 28V DC; 3A 120V AC for standard contact, or up to 6A, 28V DC; 6A, 120V AC for special heavy duty contact.

These small size, sensitive relays, designed to be mounted on printed circuit boards, feature simplified construction and a low power dissipation.

It is ideal for use in audio equipment, business machines, vending machines, security systems, game machines and automotive applications.

The FBR111N Series is the immersion cleanable version where printed circuit board cleaning is required.

The relay specified FBR111U is UL recognized for office equipment and business machines. (File No. E63615.) CSA certified.

DIMENSIONS Unit: mm (inch)

FBR111

SCHEMATICS

Notes:
1. Cut-off nib must be removed after relay soldering and board cleaning.
2. Although the plastic cover is bonded to the relay base, it is not hermetically sealed. Therefore, when the board on which the relay is soldered is cleaned by immersion, cleaning time must not exceed 2 minutes. Please use alcohol, freon or water for cleaning (water temperature is less than 50°C).

Note 1. 48V rated voltage relays are available on special order.
2. Each product bears its own designation on the top of the cover, but initial code 'FBR' is omitted.
* Add $0.14 to price for —K, $0.28 for —M, $0.14 for —W.
For CSA certified relays, —CSA suffix must be added to part number of UL type. Price is same as UL type.

FUJITSU

RELAYS

SMALL CONTROL RELAYS FOR P.C. BOARDS

FBR160 SERIES

Fujitsu FBR160 series small control relays are PC board mounted and have excellent cost performance.

FEATURES

- **Same terminal array as FBR100**
  These relays have the same foot print as Fujitsu's conventional FBR100 series.
- **Lower profile**
  Since their profile is 7 mm lower than that of the FBR100 series relays, they can be used in smaller equipment.
- **Flux-prevention structure**
  The contacts are located on the top of the relay to protect them from solder flux from the terminals.
- **Meets major safety standards**
  The relays structure is designed to meet the Japan Electric Appliance Control Law (150V or less) and UL standards (114).
- **Choices of contact materials**
  Two different kinds of contact materials can be specified according to the load.

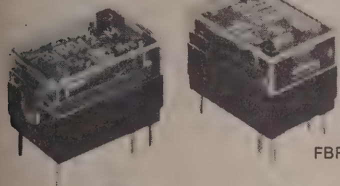
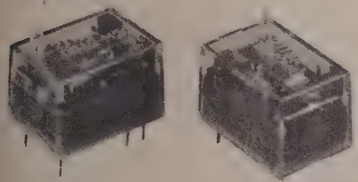
ULTRA-MINIATURE RELAYS FOR P.C. BOARDS

FBR211 AND FBR211N SERIES

SPDT 1A-28V DC, 0.5A-120V AC



FBR211



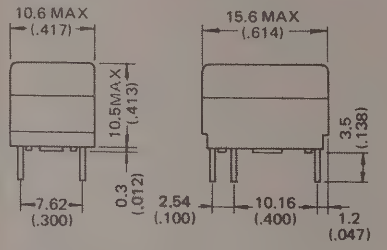
FBR211N

The FBR211 and FBR211N Series of ultra-miniature relays allow high component densities for savings in both equipment size and cost for the printed circuit board. The FBR-211N Series is suitable for immersion cleaning in freon and aqueous systems.

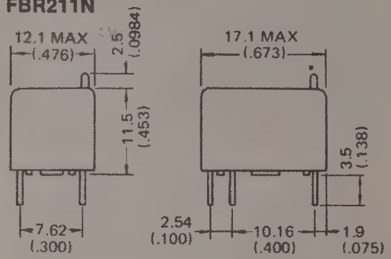
These highly sensitive relays with gold-clad SPDT contact arrangements are ingeniously designed so as to offer flux-contamination-immunity and load handling capabilities of 1A at 28V DC or 0.5A at 120V AC under a resistive load. The 0.1″ grid spacing of terminals makes these relays ideally suited for printed circuit board applications requiring high density mounting and for use in audio and wireless communications, office and vending machines, automobiles and various control applications.

DIMENSIONS Unit: mm (inch)

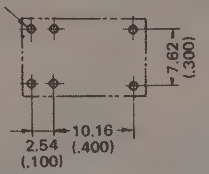
FBR211



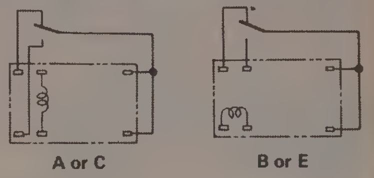
FBR211N



FBR211, FBR211N MOUNTING HOLE LAYOUT



SCHEMATICS (BOTTOM VIEWS)



Notes:
1. For low level or dry circuit switching, use of gold thick-overlay silver-palladium alloy contact relays are recommended.
2. *Cut off nib must be removed after relay soldering and board cleaning.
3. Although the plastic cover is bonded to the relay board, it is not hermetically sealed. Therefore when the board on which the relay is soldered is cleaned by immersion, cleaning time must not exceed 2 minutes. Please use alcohol, freon or water for cleaning.

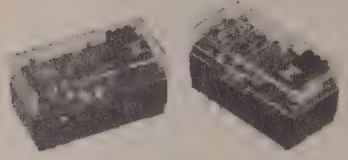
RELAYS

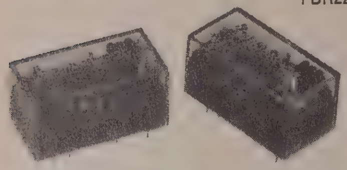
ULTRA-MINIATURE RELAYS FOR P.C. BOARDS

FBR221 AND FBR221N SERIES

DPDT 1A-28V DC, 0.5A-120V AC



FBR221



FBR221N

The FBR221 and FBR221N Series of ultra-miniature relays are designed to provide high component densities for savings in both equipment size and cost.

These highly sensitive relays with gold-clad DPDT contact arrangements can switch loads up to 1A at 28V DC or 0.5A at 120V AC.

The .1″ grid spacing of terminals makes these relays ideally suited for printed circuit board applications requiring high density mounting—and for use in audio and wireless communications, office machines, various control applications and automobiles.

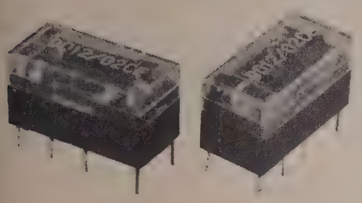
LOW PROFILE RELAYS FOR P.C. BOARDS

FBR244 AND FBR244N SERIES



FBR244 and FBR244N Series Relays are low profile, P.C. board relays with 2 Form C (DPDT) contact arrangements in D.I.P.-compatible plastic housing and have a 2.54mm pinout grid spacing to provide 16-pin-DIP-socket compatibility. Watertight terminal sealing prevents relay from contamination by soldering flux and N type allows automatic wave soldering and board washing without relay damage. Single or bifurcated contacts switch 1A at 28V DC or 0.5A at 120V AC and have a rated-load life-time of 5x10^5 operations. These relays are suitable for telecommunication equipment, audio equipment and business machines.

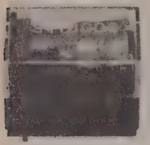
FUJITSU

RELAYS

MINIATURE RELAYS FOR P.C. BOARDS

FBR311 (SPDT) AND FBR321 (DPDT) SERIES

3A-28V DC, 3A-120V AC



FBR311

FBR321

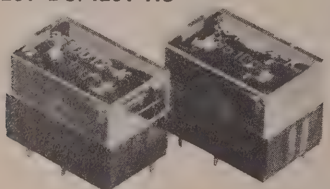
The FBR311 (SPDT) and FBR321 (DPDT) Series miniature relays were designed to provide 3 amps ratings contacts, accommodated in truly compact packages for P.C. boards.

These sensitive miniature relays, featuring high density mounting, flux-contamination immunity, versatile switching performance from signal level to handling 3 amps, are ideally suited for such applications as audio equipment, office machines, vending machines and automotive or other control application. These relays are UL Recognized (E63615) and CSA Certified (add —CSA suffix to P/N).

MINIATURE RELAYS FOR P.C. BOARDS

FBR351 SERIES

SPDT 3A-28V DC/120V AC, 6A-28V DC/120V AC



FBR351

FBR351 Series miniature relays are 1 Form C compact relays which can be used for a wide range of current switching from low levels to heavy loads. Two types are available: gold overlay contacts with contact ratings of 3A, 28V DC or 120V AC, and silver cadmium oxide contacts in 6A, 28V DC or 120V AC. These relays can be easily mounted on a PC board and use 3 pitch (7.62mm) pin arrangements. What's more, FBR351 Series relays endure 6KV at 40μ second in lightening. They are ideal for use in audio equipment, business machines, game machines and automotive applications.

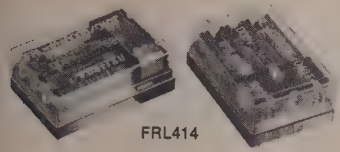
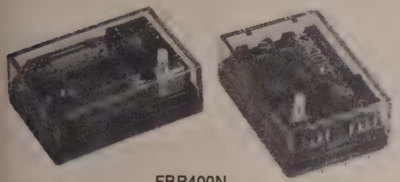
FLAT PACKAGE RELAYS

FRL-414 AND FBR400N SERIES

4PDT, DPDT 1A-30V DC, 1A-120V AC



FRL414



FBR400N

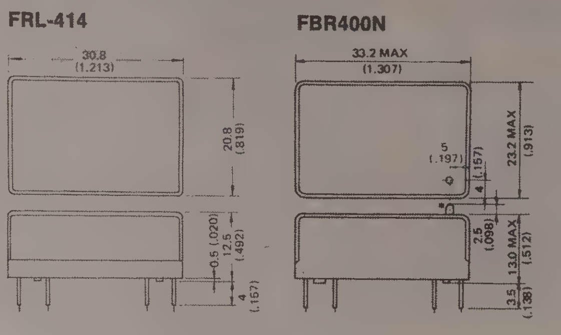
The Fujitsu FRL-414 and FBR400N (immersion cleanable) Series Flat Package Relays have been designed for P.C. board mounting and are ingeniously constructed so as to offer the advantages of flux-contamination-immunity.

The low power consumption relays are available in both DPDT and 4PDT contact arrangements and in coil voltage ratings to 48V DC. The wide selection is useful for numerous demanding applications, including communications, data processing and controls.

Bifurcated contacts assure high reliability. These relays are capable of handling resistive loads of up to 1A at 30V DC or 120V AC.

A low level load version with gold overlay silver-palladium alloy contacts is also available. Electrical life expectancy is more than three million operations at 1A-50V DC resistive load.

DIMENSIONS Unit: mm (inch)



Notes:
1. For low level or dry circuit switching, use of gold overlay silver-palladium alloy contact relays is recommended.
2. *Cut-off nib must be removed after relay soldering and board cleaning.
3. Although the plastic cover is bonded to the relay base, it is not hermetically sealed. Therefore when the board on which the relay is soldered is cleaned by immersion, cleaning time must not exceed 2 minutes. Please use alcohol, freon or water for cleaning.

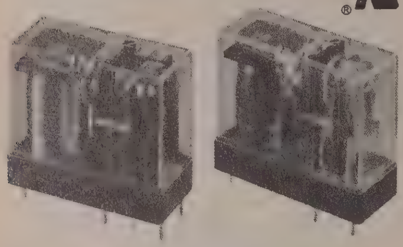
FUJITSU

RELAYS

MINIATURE HIGH-POWER RELAYS

FBR600 SERIES



The FBR600 Series are miniature high-power relays with a switching capability of 10A, 30V DC or 240V AC for 1 Form C contact; and 5A, 30V DC or 240V AC for 2 Form C contacts. These relays, conforming to VDE, UL and CSA standards, are designed for mounting on printed circuit boards. Dielectric withstanding voltage is 500V AC for 1 minute and creeping distance is 8mm. These FBR600 Series relays are ideal for use in audio equipment, TV, vending machines, control machines, etc.

UL recognized (E63615) for industrial control equipment per UL508.

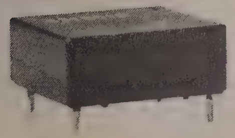
LOW PROFILE RELAYS FOR P.C. BOARDS
FBR630 SERIES



Fujitsu's compact FBR630-series relays are only 10 mm in height, but they provide a remarkable contact rating of 10A.

Compactness and high capacity make these low-profile power relays ideally suited to mounting on PC boards.

FEATURES

- Low profile — only 10 mm high
- 5 kV minimum lightning surge (between coil and contact)
- 2.5 kV minimum dielectric withstanding voltage (between coil and contact)
- Sealed terminals to protect against flux
- Input/output isolated terminal arrangement for easy pattern design
- Wide operating temperature range— −30°C to +70°C
- Maximum contact rating: 10A (30 VDC/120 VAC)
- High-reliability design meeting various safety standards:
  - Japan Electric Appliance Control Law UL508 Standard
  - CSA-Class 3211 Standard
  - FCC 68-302 Standard

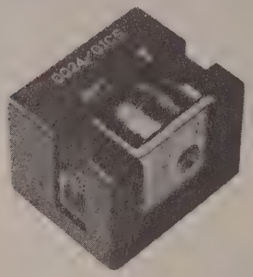
FUJITSU

RELAYS

P.C. BOARD RELAYS FOR AUTOMOTIVE APPLICATIONS
FRL270 SERIES



Fujitsu FRL270 series power relays are for PC board mounting and are designed especially for automotive applications.

FEATURES

- **Maximum current: 30A**
  The relays are designed for high ambient and storage temperatures to ensure the contacts will endure continuous current of up to 30A.
- **Rigid, shock-resistant construction**
- **1 mm-gap contacts**
  1 mm-gap contacts are also available for controlling 24V motors in trucks and other large vehicles.
- **Welding resistant contact materials**
  Three types of welding resistant contact materials are available as standard.
- Choice of wide terminal model (−01 and −11 suffix) for maximum heat/power transfer or standard terminal model (no suffix or −10) for conventional hole/conductor sizes, at no extra charge.
- Available with case as shown (no suffix and −01) or without case (−10 and −11 suffix).

Main Uses

- **Engine control**
  Electronic fuel injection units
- **Lamp control**
  Flasher control units
  Headlight control units
- **Motor, solenoid, and heater controls**
  Windshield wiper control units for trucks
  Automatic door-lock control units
  Defogger control units
  Other various control units

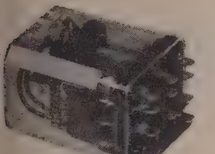
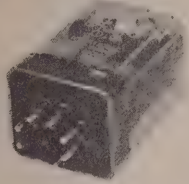
HEAVY DUTY GENERAL PURPOSE RELAYS

FRL-250 AND FRL-256 SERIES

SPDT, DPDT, 3PDT 10A-30V DC, 10A-240V AC



FRL-250



FRL-256

The FRL-250 Series Relays have been designed with particular attention to reliability, cost performance and versatility of application. These heavy duty general purpose relays provide SPDT, DPDT or 3PDT contacts with switching ability of 10A at 30V DC or 240V AC. The FRL-250 Series Relays provide various mounting styles such as plug-in, bracket case, tapped core, stud or P.C. board, and their terminals are convenient quick-connect/solder or P.C. board. The optional features are with or without test button for manual circuit checking and indicator lamp to indicate whether power is reaching relay.

These relays are particularly desirable for use in automation control, communication circuit and many other applications where high power switching and rugged construction are required.

The FRL-250 Series relays are UL recognized (File No. E63614) and C.S.A. certified (File No. LR40304).

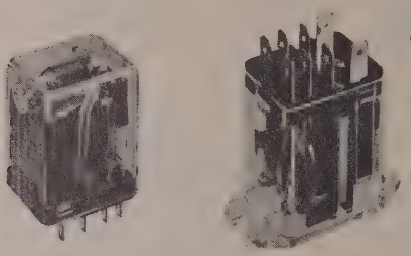
RELAYS

GENERAL PURPOSE RELAYS

FRL-260 SERIES

4PDT-3A, 3PDT-5A, DPDT-10A, SPDT-15A



The FRL-260 series relays with proven performance and top quality have been designed with emphasis on reliability, safety, cost performance and applicability to a wide range of uses.

These relays provide SPDT to 4PDT contacts, which are offered for contact ratings from 1 amp to 15 amps at 30V DC or 240V AC, resistive. Moreover, they are also available with 4 transfer bifurcated contacts that enable them to meet signal level or other light loads.

The FRL-260 series relays are available in both DC- and AC-rated coils, and with a selection of mountings, such as solder, plug-in, P.C. boards and quick connect terminals.

The FRL-260 series is UL recognized (File No. E63614/E63615) and C.S.A. certified.

ENGINEERING DATA

Item	Specifications
Contact Ratings (Resistive Load).	As per SELECTION TABLE
Initial Contact Resistance	General (S, K, V Contact): 100mΩ max. (at 6V DC, 1A) Low Level (T, L Contact): 50mΩ max. (at 6V DC, 0.1A)
Operate Time Release Time	25 ms max. (at rated coil voltage) 25 ms max.
Coil Power Dissipation	DC: 0.9W (at rated coil voltage) AC: 1.2 VA (120V max.) at rated coil voltage of 60 Hz 1.4 VA (200V min.) at rated coil voltage of 60 Hz
Coil Temperature Rise	DC: 50° max. AC: 60°C max.
Life Expectancy — Mechanical	50 x 10^6 ops. min.
Electrical	(at rated load) Medium Load SPDT: 500 x 10^3 ops. min. DPDT: 500 x 10^3 ops. min. 3PDT: 500 x 10^3 ops. min. 4PDT: 200 x 10^3 ops. min. 4PST: 100 x 10^3 ops. min. Heavy Load SPDT: 200 x 10^3 ops. min. SPST: 200 x 10^3 ops. min. DPDT: 500 x 10^3 ops. min.
Insulation Resistance	100MΩ min. (at 500V DC)
Dielectric Withstanding Voltage	1500V AC (1000V AC between open contacts) for 1 minute
Vibration	50 Hz (Dual Amplitude: 0.5mm)
Shock	10G (11 ms)
Temperature Range	−30°C to +55°C
Weight	35 gr. approx.

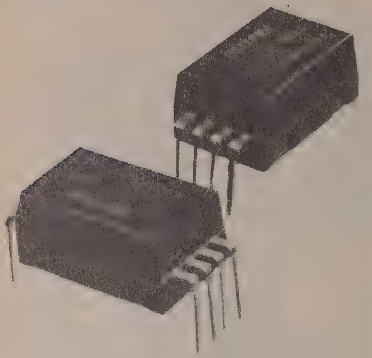
RELAYS

MICRO REED RELAYS FOR P.C. BOARDS

FRL-648 SERIES



The FRL-648 Series Micro Reed Relays offer a wide selection and outstanding performance to meet those demanding on-board switching requirements and high density packaging applications.

These relays, available in 1 Form A/B and 2 Form A/B, feature a standard contact rating of 50VA/10W for S type/K type, compact size with a mounting height of only 9mm (.354″), epoxy-molded construction for immersion cleaning safety, low power consumption, and the option of magnetic shielding for isolation from the effects of adjacent relays.

These relays are ideally used for various applications for audio equipment, data processing systems, communications, measuring and control equipment.

Fujitsu field proven dry reed switches are employed as the switching element in the relays in order to offer an excellent low resistance contact and low noise characteristics.

ENGINEERING DATA

Item	Characteristics
Contact Arrangement	1 Form A/B, 2 Form A/B
Contact Rating	Type K: 50VA max. (100V AC, 0.5A max.) 30W max. (100V DC, 0.7A max.) Type S: 10W max. (100V DC, 0.5A max.)
Initial Contact Resistance	150mΩ max. at rated voltage
Contact Materials	Rhodium
Rated Coil Voltage	5, 6, 12, 24V DC
Coil Temperature Rise	20°C max.
Insulation Resistance	100MΩ min. at 100V DC
Dielectric Withstanding Voltage	500V DC (200V DC between open contacts)
Operate Time	1.0 ms max. including bounce time
Release Time	Form A: 0.1 ms max. including bounce time Form B: 1.0 ms max. including bounce time
Life Expectancy	K type 1 x 10^6 min at rated load S type: 5 x 10^6 min. at rated load
Vibration	10 to 55Hz (Dual amplitude: 1.5mm)
Shock	30G
Temperature Range	Form A: −10°C to +70°C Form B: −10°C to +50°C
Weight	6 gr. approx.

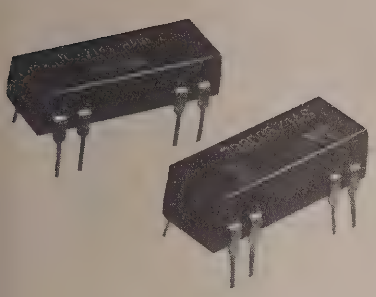
D.I.P. REED RELAYS
RL-730 SERIES



he FRL-730 Series D.I.P. Reed Relays are vailable in 1 Form A contact with contact ating capability of up to 10VA.

These relays can be mounted in the standrd 14-pin dual-in-line package with epoxyolded construction for safe immersion leaning. Models with diode and/or electrotatic shield are available.

These FRL-730 D.I.P. reed relays are ideal or use in data processing systems and comunications, measuring and control equipent.

ENGINEERING DATA

Item	Characteristics
Contact Arrangement	1 Form A
Contact Rating	10 VA max. (100V DC or peak AC max., 0.5A max.) 2.0A max. carry only
Initial Contact Resistance	150mΩ max.
Contact Material	Rhodium
Rated Coil Voltage	5, 6, 12V DC
Coil Temperature Rise	20°C max.
Insulation Resistance	$10^{10}\Omega$ min. at 100V DC, +20°C, 40% RH
Dielectric Withstanding Voltage	250V DC min. across open contacts 500V DC min. (between other mutually insulated terminals)
Operate Time	1.0 ms max. including bounce time
Release Time	0.1 ms max.
Life Expectancy	1 x 10^6 min. at rated load (resistive)
Vibration	10 to 55 Hz (Dual amplitude: 1.5mm)
Shock	50G
Temperature Range	−10°C to +70°C
Weight	4 gr. approx.

FUJITSU

RELAYS

MICRO REED RELAYS FOR P.C. BOARDS

FRL-764 and 768 SERIES

FRL-764 and 768 Series Micro Reed Relays offer excellent operating characteristics such as fast operating time, high reliability and long life. Available in a choice of contact arrangements (1 Form A, 2 Form A and 4 Form A) and contact rating capabilities (10W for standard type and 30W DC, 50VA AC for heavy load type), they are potted by polyurethane resin. These low-profile relays are compatible with 1 x .1 inch grid spacing for P.C. board mounting. These micro reed relays are ideal for use in telecommunications, audio equipment, process control systems and vending machines.

DIMENSIONS Unit: mm (inch)

RELAYS

MERCURY WETTED CONTACT RELAYS

FMR-800 SERIES

Fujitsu FMR-800 Series mercury wetted contact relays are compact for P.C. board mounting.

Highly stable, they can be used for a wide range of current switching from very low levels to heavy loads. Conventional flux cleaning can be used after P.C. board mounting as these relays are potted with polyurethane resin. The mercury switching gives these relays a bounce-free contact and an extremely long operating life. Therefore, Fujitsu mercury wetted contact relays are ideal for use in measuring equipment, communications systems, computer systems, automatic control systems etc.

FEATURES

- Extremely long life expectancy (10 x 10^9 operations)
- Short operate/release time (2 ms) and no contact bounce
- Stable, low contact resistance
- Available for wide current range switching from low level signals to 2 amps
- Contacts are independent from atmospheric conditions

AC SOLID STATE RELAYS
(photo isolation — Back-to-Back SCR)

G SERIES

BACK-TO-BACK SCR
AC SOLID STATE RELAYS

- Back-to-back (dual) SCR output for switching highly inductive AC loads
- Superior turn-on immunity and positive turn-off ability at high dv/dt
- Optical coupling
- Zero-voltage turn-on
- 10 to 45 Arms current ratings
- Output RC network
- 3-32 VDC and 90-280 VAC input ratings
- 24 to 480 VAC line voltages
- UL recognized. CSA certified
- Some models optionally available in compliance with VDE specs 0730, 0730 part 2P, 0806, and IEC Specs 380 and 435. (Consult factory for details)

GORDOS ARKANSAS

AC SOLID STATE RELAYS
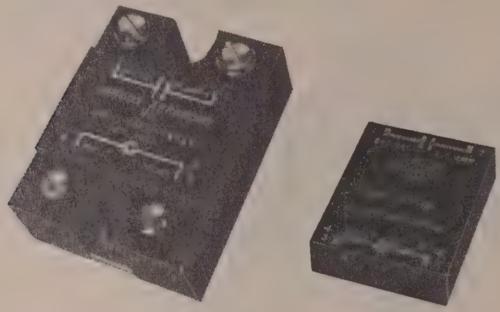
(photo isolation — triac)

GA SERIES

GENERAL PURPOSE



The Gordos GA Series of SSRs has been specifically designed and marketed to meet your commercial requirements.

Whether your application is gas pumps or copiers, computer peripherals or process controllers, study the GA specs carefully. Then let Gordos handle your high-volume needs from this versatile, in-stock line.

GA Series relays get a minimum of 200% testing — multiple component and functional tests that make Gordos the reliability standard in SSRs.

HEAT SINKING/DERATING OF SOLID STATE RELAYS

The voltage drop across the thyristor, when the relay is in its conducting state, causes heat to be generated. This condition is one of the operating characteristics inherent with semiconductor components. To insure the junction temperature of the SSR remains within its design parameters, it may be necessary to heat sink the relay and/or derate the amperage rating. Please consult temperature derating charts for relays with baseplates; use derating factor for PC mounted relays.

NOTES:
1. To specify diode, add "D" after part number.
2. Magnetic shielding is standard.
3. Consult factory for electrostatic shielding.
4. Orientation arrow appears on all mercury wetted models. These These relays must be mounted ±30° from vertical.
5. Excessive voltage (maximum of 7.0 VDC for 5 VDC model, 15.0 VDC for 12 VDC model, and 30.0 VDC for 24 VDC model) may cause contact reclosure on form B models.

GORDOS CORPORATION

76 SERIES

MOLDED EPOXY

GORDOS
761A 05 1

- Low Cost
- Dry Reed, Power and Sensitive Versions
- Designed to meet various packaging requirements
- Popular PCB grid patterns
- Environmental immunity assured
- Logic compatible
- Resistant to board cleaning solvents
- Power series offers tough tungsten contacts capable of handling high inrush inductive and capacitive loads without contact protection in most applications.

REED RELAY SELECTION CHART

Contact Form	Nominal Coil Voltage (VDC)	Coil Resistance Ohms (±10%)	Part Number	
			End Termination	Side Termination
1A	5	225	761A051-1	761A052-1

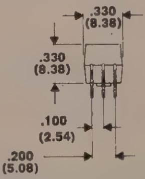
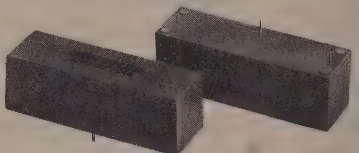
TYPICAL FOR ALL 76-SERIES



KD SERIES

HIGH VOLTAGE REED RELAY
Up To 14kV Dielectric Strength



TYPE 1270 AND 1280

The Reed Relay types 1270 and 1280 are a special high voltage relay with solder and plug-in terminals for pcb-mounting. These relays withstand a test voltage of 25 kV minimum between coil and contact. Hermetical potting with epoxy material in plastic housing prevents both reed switch and coil from mechanical damage.

A modern and cost-saving High Voltage Relay for fast mounting!

RELAY

Nominal voltage VDC	Must operate voltage VDC	Must release voltage VDC	Max. voltage VDC	Coil resistance Ω ±15%	Must operate power mW	Part number designation
5	4	1	7	35	460	33 .... 1270 056
12	10	2	16	200	500	33 .... 1270 126
24	20	4	30	720	575	33 .... 1270/1280 246

CONTACTS FOR 1270 AND 1280

Contact Code	Contact form		Contact material	Switching voltage Vrms	Switching current A	Limiting cont. current* A	Switching Power		Max. contact resistance mΩ**	Dielectric strength V***	Mech. life expectancy
	DIN	ASA					W	VA			
90	1	A	W	5000	3	5	50	—	250	7000	10^9
91	1	A	W	7500	3	5	50	—	250	10000	10^9
92	1	A	W	10000	3	5	50	—	250	14000	10^9

* must not be switched ** typical initial value *** during 1 sec.

ASSEMBLY FOR 1270 AND 1280

Contact arrangement	Min. insulating resistance (Coil/Contact)	Mounting position	Ambient temperature
1 FORM A	1 x 10^9 Ohm	any	−20 .... +70°C

TEST VOLTAGE

Coil/Contact 25,000 Vrms, 1 min.

REMARKS

Contact resistance measured at 2V/100 mA with four-wire method. All data for contact rating valid for resistive load only.

Allied Control Relays

General Purpose Relays

CRADLE® SERIES T154/163

DC Relays — Current and Voltage Adjusted

AC Relays — Voltage Adjusted

FEATURES

- **T154 Single-Point Contacts**
- **T163 Bifurcated Contacts**
- **Proven Cradle® reliability**
- **100 million mechanical operations**
- **Contact selection to match application**
- **Contact configuration:**
  DC Voltage: up to 8 Form C
  AC Voltage: up to 4 Form C
- **Input voltages:**
  DC Voltage: from 3 VDC to 115 VDC
  AC Voltage: from 6 VAC to 220 VAC 50/60 Hz
- **Sensitivity as low as 20 MW/pole** (DC Voltage only)
- **Low-priced relays**
- **Versatile mounting configurations**
- **High density packaging**
- **UL File E20604 / CSA File 34171**

TYPICAL OPERATING CONDITIONS @ 25°C

ELECTRICAL

Minimum drop-out (DC voltage):
10% of maximum pick-up value (5% for single and double-pole relays)

Dielectric Strength:
1000 VRMS, coil to contacts and between gaps on standard T154 series 500 VRMS, between contact gaps on sensitive, ultrasensitive relays and on all relays with bifurcated contacts

Insulation resistance:
10,000 megohms minimum

Capacitance, DC Voltage:
Closed contacts to frame 3.0 pf
Open contacts to frame 3.0 pf
Between open contacts 3.0 pf (energized or de-energized)

Capacitance, AC Voltage:
Contact to contact 3.0 pf
Coil to contact 3.0 pf
Coil to frame 30 pf

Operate time, DC Voltage:
15 MS max. at nominal voltage

Operate time, AC Voltage: 25 MS

Release time, DC Voltage:
8 MS max. at nominal voltage

Release time, AC Voltage: 25 MS

ENVIRONMENTAL

Ambient temperature: −55°C to 71°C

T154-4C-220VAC	15,000Ω	220V	170.0V	4PDT	2 Amp

NOTES:

1. Single-point contacts shown as standard; for bifurcated contacts, substitute "163" for "154".
2. Solder lug terminals shown as standard; for printed circuit mounts, add "P" after "T", "TS" or "TSS".

Note: Solder Lug terminals not supplied on printed circuit mount relays.

3. Form C contact arrangement shown as standard; for Form A, B or D, substitute appropriate letter.
4. 5-amp and 10-amp contacts are also available for Standard DC and AC single-point-contact relays; if desired, add "F" after "T" for 5-amp; and add "Y" after "T" for 10-amp.

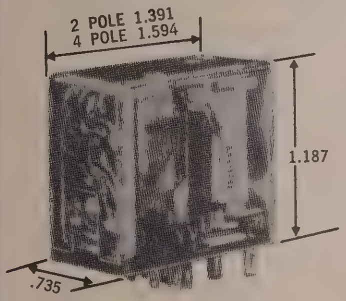
TIMERS, DPDT 5 AMP — Series TD10



The TD10 utilizes the service proved T154 Cradle® relay with a solid state timing circuit to provide timing from 0.1 to 100 seconds with +2% repeat accuracy.

Available as "time delay to make" or "interval" timing models with optional operating and mounting features.

Catalog Number	Time Range (in seconds)	Input Volt

GOULD
Electronics

Allied Control Relays

General Purpose Relays (cont'd)

Industrial Sockets — Class 50
Slimline Design — Self-lifting Wire Clips
Compact Construction — Unbreakable Polycarbonate Body

APPLICATIONS

- Electro-mechanical relays
- Thermal timers
- Solid state and hybrid time delay relays
- Solid state controls for liquid level sensing and other processes

FEATURES

- **UL Recognized File No. 48784. CSA Certified File No. 28098.**
- UL rated for flammability to 94V2 with high-voltage arc track characteristics.
- Screw terminals and captive self-lifting wire clips for reliable and easy wire insertion.*
- Patented design assures positive connection that exceeds UL486 requirements for wire pull-out specifications, including heat and security standards.
- Dielectric strength: 2000V.
- Contrasting all-black bodies and accessories with nickel color terminals that facilitate easy wiring and/or trouble shooting.
- Integral molded barrier construction. Durable polycarbonate body. Back plate ultrasonically welded to body, eliminating need for additional panel insulation.
- Choice of mountings: direct panel or track.
- Track: strong, lightweight aluminum; standard length 3 feet.

* Combination slot/Phillips head screw available on request.

Octal Sockets for Cradle Relay

Catalog No.	Contact Arrangement
H50SL608	8 pin — 2 pole double throw

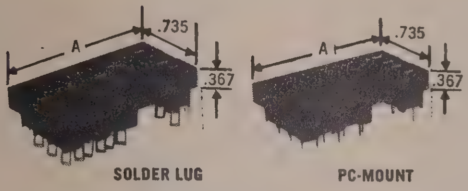
CRADLE® SOCKETS AND HARDWARE



Dimensions			
Poles	**A**	**Poles**	**A**
2-Pole	1.000″	6-Pole	1.430″
4-Pole	1.205″	8-Pole	1.645″

T-Series Cradle® Relay Sockets

Redesigned, improved, and directly interchangeable with other Cradle® type sockets.

FEATURES

- Body molded of glass filled flame retardant Polyester (PBT).

  Can be wave soldered and cleaned with commercial solvents without degradation.

  Meets U.L. 94VO and is fungus resistant.
- Wider contact mating surface.

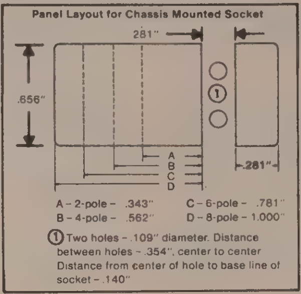
  Provides for higher reliability of relay terminal mating.
- One piece contact/terminal construction of beryllium copper.

  More conductive, greater strength higher spring rate.
- Selectively plated gold over nickel on contact area–60/40 Brite-Tin on terminal area.
- Low insertion and high withdrawal forces of relay to socket.

  Assures maximum retention.
- Captive ground spring.

  Once inserted, not easily dislodged.
- Provision for either end or side retainer/bale.
- U.L. E-20604.
- C.S.A. LR34171.

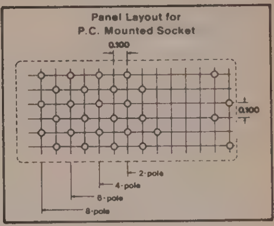
Panel Layout for Chassis Mounted Socket



A – 2-pole – .343″
B – 4-pole – .562″
C – 6-pole – .781″
D – 8-pole – 1.000″

① Two holes – .109″ diameter. Distance between holes – .354″, center to center Distance from center of hole to base line of socket – .140″

Panel Layout for P.C. Mounted Socket



Ordering Information and Available Options

T-Series relay sockets accommodate Gould Cradle® relay models: T154/T163, T351/T362, and TD10 timers, as well as equivalent competitive models. Order sockets with the mounting configuration required by your application and the number of poles required by the relay, using the guidelines below.

CRADLE® SOCKET ORDERING INFORMATION

T- ☐ ☐ ☐ ☐☐
① ② ③ ④

① Number of Poles
  2=2-pole socket
  4=4-pole socket
  6=6-pole socket
  8=8-pole socket

② Type of Terminal
  1=Solder lug/chassis mounted
  3=Standard PC in-line mounting
  5=PC mounting, .100″ × .100″ grid throughout
  7=PC mounting, .100″ × .100″ grid in contact terminal area
  .100″ × .150″ grid in coil terminal area

③ Contact Finish*
  1=10 to 12 microinch gold over nickel contact area

④ Socket Assemblies*
  10=Socket only
  11=Socket with ground spring installed
  12=Socket with ground spring installed and retainer
  13=Socket with retainer

Examples:
T-21110: 2-pole, solder/lug chassis mount, standard gold contact plating, socket only.
T-43112: 4-pole, PC in-line mounting, standard gold contact plating, with ground spring and standard retainer.

* Consult factory for additional variations

Allied Control Relays

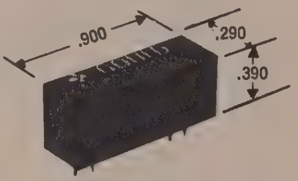
Low Profile Relays

SERIES SR SIP RELAYS

FEATURES:

- Superior switching – 2 ampere Bifurcated contacts, handles (6) times the inductive load of a standard size Form "A" contact Reed Relay.
- Small space – ¼ in² PCB space with .390″ max. height.
- Easy mounting, symmetrical, eliminates installation errors. Mounts in PCB or on strip or in DIP sockets.
- Fast response – 2 ms typical at rated pull in voltage, 1 ms release.
- 420-SEO Valox Housing meets UL 94V-0 flammability requirement.
- Housing resists fluorocarbon, aqueous detergent and chlorinated commercial solvents.

NEW! SERIES SR– SINGLE-IN-LINE



Catalog No.	Coil Res.	Input	Pull-in	Drop-out	Pick-up Power	Contact Rating
SPST-NO[1]						
SR-1A-3VDC	38Ω	3V	2.3V	0.13V	125mW	2 Amp
SR-1A-5VDC	95Ω	5V	3.7V	0.19V	125mW	2 Amp

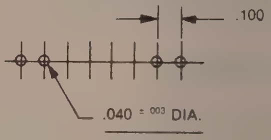
1 FORM B CONTACTS

PC LAYOUT GRID

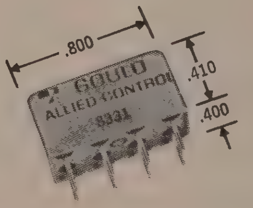


ORDER DATA
EXAMPLE: SR-1A-12 VDC

MILITARY TYPE RELAY-MODEL ST

DC 2 Pole Double Throw (2 Amperes)

PART NUMBER ST 6A1-26.5VDC



FEATURES:

- Reliability By Design.
- Complete Welded Construction.
- Bifurcated Contacts.
- High Contact Force.
- Balanced Armature.
- Low Profile, High Density Package.
- Mounting Versatility.
- 2 Form C Contact Configuration.

Contact Rating†: (at nominal coil voltage)
Contact Bounce — 5 MS Maximum
Non-inductive —
2 ampere at 28 volts d-c, 0.3 ampere at 115 volts a-c 60 to 400 cps.
Inductive: 0.75 ampere at 28 volts d-c.

Initial Contact Resistance:
0.100 ohms maximum

Contact Arrangement:
Double pole double throw

Ambient Temperature:
−55°C to +85°C

Dielectric Strength:
1000 volts rms at sea level
500 volts rms between open contacts and between coil terminals and case,
350 volts rms at 80,000 feet

Coil Data Operating Conditions at 25°C

Nominal Voltage VDC	Pick-Up VDC Max.	Drop-Out VDC Min.	Coil Resistance Ohms ±20%
26.5	16	0.5	770

Vibration:
5 to 28 cps at .5 inch double amplitude
28 to 2000 cps at a constant 20g

Shock:
50g operational

Operate Time: (at +25 C)
4 milliseconds maximum at nominal coil voltage

Release Time: (at +25 C)
4 milliseconds maximum at nominal coil voltage

Enclosure:
Hermetically sealed by welding

Terminals:
Plug-in, printed circuit, and hook type

Weight:
0.3 ounce maximum

† AC ratings are for single phase case grounded

Allied Control Relays

Low Profile Relays

SERIES MPC MINIATURE RELAYS

Series MPC – Miniature PC, Standard
Series MPCS – Miniature PC, Sensitive
Series MPCL – Miniature PC, Latching

FEATURES:

LOW PROFILE – miniature dc operated relay offers space savings comparable to reed relay

LONG LIFE – patented hingeless armature construction insures long mechanical life

POWER SWITCHING – using standard gold plated silver contact material, MPC Relay has power handling capability of 50 watts per pole

HIGH RELIABILITY – interlocking housing to base minimizes contaminants affecting performance

MULTI-POLE CONTACTS – one form C to four form C available in two basic case sizes

SENSITIVE VERSION – operates from TTL – Driver circuits, available in one form C and two form C within same package size

SERIES MPC – STANDARD VERSION

4A

Relays are shown at 50% actual size.

Miniature But Mighty

.680 Square Inch Area

Use Style V

1/2 The Size Of Hockey Pucks

Replace With S and N

- CMOS and TTL Compatible
- Excellent Transient Protection
- High Blocking Voltage
- High Surge Current Rating
- Minimal RFI And EMI
- Zero Voltage Turn-On
- UL And CSA Certified
- 100% Tested
- Loads Up To 25 Amps

Dimensions

Body length, width, and height in inches.

B = 2.1 x 1.1 x 1.0
D* = 1.8 x 1.5 x 1.0
F = 1.2 x 1.0 x 0.9
H = 1.2 x 1.0 x 0.5
K = 1.2 x 1.0 x 0.9
L* = 1.2 x 1.0 x 0.5
M* = 1.2 x 1.0 x 0.9
N* = 1.2 x 1.0 x 0.9
S* = 1.2 x 1.0 x 0.9
V = 1.7 x 0.4 x 1.0

*For styles L, M, N and S, heat sink extends the length to 2.2″; for style D, extended length is 2.8″.

Specifications

	24 Vac Load	120 Vac Load	240 Vac Load
Blocking Voltage:	200V	400V	600V
Zero Voltage & Offset:	6V	8V	18V

Transient Protection: (Relay does not turn on):
3000 Volts per microsecond for the 2.5, 3, 4, and 25 Amp relays.
4000 Volts per microsecond for the 6, 10, 12, and 15 Amp relays.

Surge Current Rating (At 1 full cycle duration):
60 Amps for the 2.5, 3, 4, and 6 Amp relays.
110 Amps for the 10 Amp relay.
150 Amps for the 12 and 15 Amp relays.
250 Amps for the 25 Amp relay.

Input Impedance: Average 2000 Ohms for control ranges of 3-30 Vdc and 3-32 Vdc. Average 6000 Ohms for control ranges of 6-30 Vdc and 6-32 Vdc.

Mounting: Panel mount styles are rated as if 6 x 6 x ⅛″ Aluminum plate, or as if they had an equivalent heat sink attached. Styles L, M, N, and S mount on Hockey Puck relay centers.

UL Recognition and CSA Certification: UL file number E58632 and CSA file number 38763 apply to all relays shown here.

Grayhill, Inc. / 561 Hillgrove Ave. / P.O. Box 10373 / La Grange, IL 60525 / (312) 354-1040

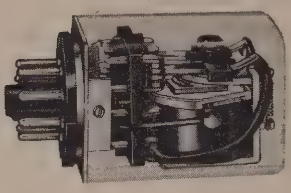
ENCLOSED RELAYS

1210/1215/1210N

- **Contacts rated 10 amps at 120VAC**
- A.C. coil voltages (1210) 24, 10, 240
- D.C. coil voltages (1215) 12, 24
- DPDT termination 8 pin octal
- 3 PDT termination 11 pin octal style
- Neon test available (1210N)
- Polycarbonate cover
- Weight 3.5 oz (99 grams)
- L—1.375″, W—1.375″, H—2.187″
- Sockets available see page **1B** • 1422

(5 amps only)

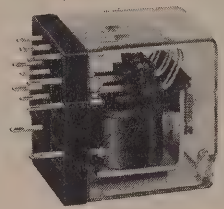
SERIES 1210/1215/1210N



1220/1225

- **Contacts rated 10 amps at 120VAC**
- A.C. coil voltages (1220) 24, 120
- D.C. coil voltages (1225) 12, 24, 110D
- Contact arrangements DPDT (2C) 3 PDT (3C)
- Terminal for solder or socket application
- Polycarbonate cover
- Weight 3 oz. (85 grams)
- L—1.703″, W—1.578″, H—1.687″
- Sockets available see page **1B** • 1422

SERIES 1220/1225



1310/1315/ 1310P/1315P-4C

- **Contacts rated 5 amps at 30VDC and 120 VAC resistive**
- 3 amps inductive, and 1/8 H.P. at 120VAC
- A.C. coil voltages (1310) 12, 24, 48, 120
- D.C. coil voltages (1315) 12, 24, 48, 90, 110
- Contact arrangements DPDT (2C), 4PDT (4C)
- Test lamp available 1310N, 1315N
- 1310, 1315 termination socket or solder lug
- 1310P, 1315P termination printed circuit solder
- 1310S/1315S/1310PS/1315PS environmental seal
- 1310PVS/1315PVS processing seal (must be vented)
- Polycarbonate cover

ENCLOSED RELAYS

1330/1335

- **Contacts rated 5 amps resistive at 30VDC and 120VAC 3 amps inductive, 1/8 H.P. at 120VAC**
- A.C. coil voltages (1330) 12, 24, 48, 120
- D.C. coil voltages (1335) 12, 24, 48
- Contact arrangement DPDT (2C)
- 1330/1335 termination solder lug or socket
- 1330P/1335P termination printed circuit solder
- 1330PS/1335PS processing seal (must be vented)
- Polycarbonate cover
- Weight .75 oz (21 grams)
- L—0.89", W—0.750", H—1.093"
- Sockets available see page **1B** • 1422

1330 1330S 1330 1330S pending

1345

- **1345 contacts rated 10 amps at 12VDC, 120VAC, 5 amps 30VDC, 240VAC**
- 1345T 5 amp tungsten lamp rating at 120VAC
- 1345J 15 amp rating at 120VAC
- 1345S processing seal (must be vented)
- D.C. coil voltages 6, 12, 24
- Contact arrangement SPST N.O. (1A), SPST N.C. (1B), SPDT (1C)
- Termination printed circuit
- Weight 1.0 oz. (28 grams)
- L—1.22", W—0.766", H—1.188"

1345 1345T 1345S 1345J
1345

1360PC/1365PC

- **Contacts rated 5 amps at 30VDC and 120 VAC**
- A.C. coil voltages (1360) 24, 120
- D.C. coil voltages (1365) 12, 24,
- Contact arrangement DPDT (2C)
- Termination suitable for socket or printed circuit
- Nylon cover
- Sockets available see page **1B** • 1422
- Weight 1 oz. (28 grams)
- L—1.093", W—1.093", H—1.00"

1380/1385

- **Contacts rated 7.5 amps at 120VAC, 5 amps at 240VAC, 10 amps at 30VDC 1/3 H.P. at 120VAC**
- A.C. coil voltages (1380) 12, 24, 48, 120, 240
- D.C. coil voltages (1385) 12, 24, 48, 90, 110
- Contact arrangement 4DPT (4C)
- 1380/1385 termination solder lug or socket
- 1380P/1385P termination printed circuit solder
- Polycarbonate cover
- Sockets available see page **1B** • 1423
- Weight 25 oz. (71 grams)
- L—1.614", W—1.11", H—1.381"

1390/1395

- **Contacts rated 13 amps at 30VDC, 120VAC, 240VAC, 1/3 H.P. at 120VAC, 240VAC**
- A.C. coil voltages (1390) 12, 24, 48, 120, 240
- D.C. coil voltages (1395) 12, 24, 48, 90, 110
- Contact arrangement DPDT (2C)
- 1390/1395 termination solder lug or socket
- 1390P/1395P termination printed circuit
- 1390F/1395F flange mount cover
- 1390S/1395S/1390PS/1395PS environmental seal
- 1390PVS/1395PVS processing seal (must be vented)
- Polycarbonate cover
- Sockets available see page **1B** • 1423
- Weight 1.25 oz. (35 grams)

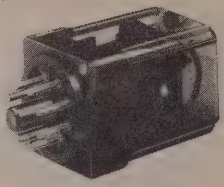
ENCLOSED RELAYS

1410

- **Contacts rated 10 amps at 120/240VAC 1/6 H.P. at 120VAC, 1/3 H.P. at 240VAC**
- A.C. coil voltages (1410) 12, 24, 120, 240
- D.C. coil voltages (1415) 12, 24, 110
- Contact arrangement SPDT (1C) DPDT (2C) 3PDT (3C)
- Neon test 1410N, 1415N
- Termination 1C and 2C 8 pin octal 3C 11 pin octal style
- Polycarbonate cover
- Weight 3.5 oz. (99 grams)
- L—1.375″, W—1.375″, H—2.187″
- Sockets available see page **1B** • 1423

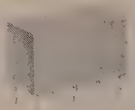
SERIES 1410

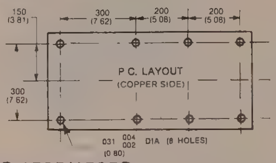


1495/1495S

- **Contacts rated 2 amps at 120VAC, lamp 30VDC**
- Designed to meet FCC part 68 1500 volt surge test
- DIP package
- 1495S processing seal (must be vented)
- D.C. coil voltages 3, 5, 6, 12, 24
- Polyester enclosure
- Weight .18 oz (5 grams)
- L—0.795″, W—0.386″, H—0.449″

SERIES 1495/1495S

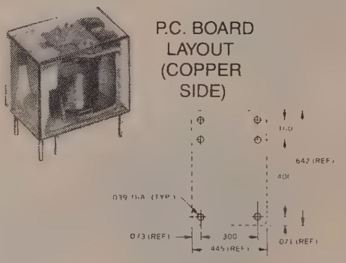




1505/1505S

- **Contacts rated 1 amp at 30VDC 0.5 amps at 120VAC**
- D.C. coil voltages 5, 6, 12, 24
- Contact arrangement SPDT (1C)
- 1505S processing seal (must be vented)
- Termination printed circuit solder .100″ grid pattern
- Polycarbonate cover
- Weight .13 oz. (3.7 grams)
- L—.642″, W—.445″, H—.465″

SERIES 1505/1505S



1510/1515

- **Contacts rated 12 amps at 120VAC and 30VDC, 1/3 H.P. at 120VAC, 1/2 H.P. at 120/240VAC, 1/2 H.P. or 3VA at 600VAC**
- A.C. coil voltages (1510) 6, 12, 24, 48, 120
- D.C. coil voltages (1515) 6, 12, 24, 48, 90, 110
- Contact arrangements SPDT (1C), DPDT (2C), 3PDT (3C)
- 1510/1515 termination solder lug or socket
- 1510P/1515P termination printed circuit
- 1510F/1515F flange mount cover
- Neon light 1510N, 1515N
- Polycarbonate cover
- Sockets available see page **1B** • 1423
- Weight 3 oz. (85 grams)
- L—1.531″, W—1.406″, H—1.906″

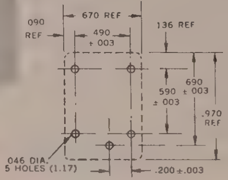
ENCLOSED RELAYS

1565

- **Contacts rated 6 amps at 120VAC 3 amps at 30VDC and 240VAC 1/3HP at 120VAC**
- D.C. coil voltages 3, 6, 12, 24
- Contact arrangements SPST N O (1A), SPDT (1C)
- Termination printed circuit
- Nylon cover
- Weight .42 oz (12 grams)
- L—0.970″, W—0.678″, H—0.810″

SERIES 1565



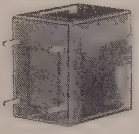
1575

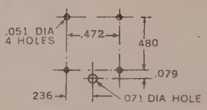
- **Contacts ratings 5 amps at 30VDC and 120VAC**
- 1575S processing seal (must be vented)
- 1575T 5 amp tungsten lamp rating at 120VAC
- D.C. coil voltages 5, 6, 12, 24, 48
- Contact arrangements SPST N.O. (1A), SPDT (1C)
- Termination printed circuit
- Polypropylene cover
- Weight .5 oz. (14 grams)
- L—0.850″, W—0.614″, H—0.882″

Open & Sealed

Sealed only

SERIES 1575



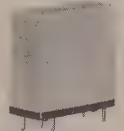


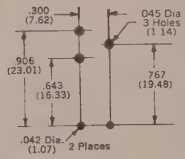
P.C. LAYOUT
(COPPER SIDE)

1655

- **Contacts rated 10 amps 30VDC and 120VAC**
- 1655S processing seal (must be vented)
- D.C. coil voltages 3, 5, 6, 12, 24, 48 VDC
- Contact arrangments SPST NO (1A), SPST NC (1B), SPDT (1C)
- Termination printed circuit
- Polypropylene cover
- Weight .53 oz. (15 grams)
- L—1.157″, W—.500″, H-1.125″

SERIES 1655

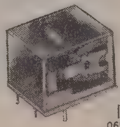


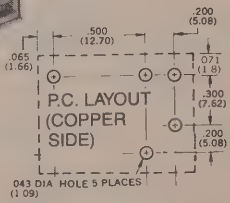


1675

- **Contacts rated 5 amps at 30VDC and 120VAC**
- 1675S processing seal (must be vented)
- D.C. coil voltages 3, 5, 6, 12, 24
- Contact arrangement SPDT (1C)
- Termination printed circuit
- Polycarbonate plastic cover
- Weight .27 oz. (8 grams)
- L—0.831″, W—0.642″, H—0.547″

SERIES 1675





1690

- **Contacts rated at 120/240VAC and 30VDC, 15A at 30VDC/120VAC/240VAC**
- A.C. coil voltages (1690) 24, 120, 240
- D.C. coil voltages (1695) 12, 24, 110
- Contact arrangement SPDT (1C)
- Termination solder lug or socket
- 1690F/1695F flange mount cover
- Polycarbonate cover
- Sockets available see page
- Weight 1.5 oz. (43 grams)
- L—1.110″, W—0.831″, H—1.629″

USE .070 DIA. HOLES FOR TERMINALS
1360-1

Socket may be soldered directly to PC board (O/A height = 1.320") or snapped through underside of chassis (O/A height = 1.208" when using recommended .062" chassis thickness). Connections by soldering may be made before or after insertion of socket into chassis.

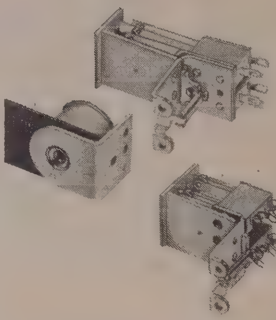
- Match coil and contact switch assemblies to build the relay you need
- Contact assemblies in standard and midget sizes
- Coil: L—1.750″, W—1.125″, H—.890″
- Standard contacts L—2.625″, W—1.031″, H—1.843″
- Midget contacts L—1.812″, W—1.093″, H—1.781″

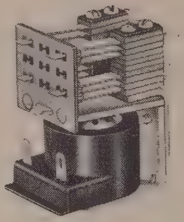
SERIES 200



640/645V

- **Contacts rated 10 amps at 120VAC**
- A.C. coil voltages (640) 24, 120, 240
- D.C. coil voltages (645) 12, 24, 110
- Termination solder lugs
- Contact configuration SPDT (1C), DPDT (2C), 4PDT (4C)
- Weight 3.5 oz (99 grams)
- L—1.875″, W—1.093″, H—2.156″

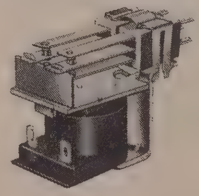
SERIES 640U/645U



900/905/910/915

- **Contacts rated 10 amps at 120VAC**
- A.C. coil voltages (900/910) 24, 120, 240
- D.C. coil voltages (905/915) 12, 24
- 900/905 termination solder lug
- 910/915 termination .187″ quick connect
- Contact configuration DPDT (2C)
- Weight 6 oz. (170 grams)
- L—2.687″, W—1.078″, H—1.781″

SERIES 900/905/910/915



1240/1245

- **Contacts rated 10 amps at 120VAC**
- A.C. coil voltages (1240) 24, 120
- D.C. coil voltages (1245) 12, 24
- Termination solder lug
- Contact configurations DPDT (2C), 3PDT (3C)
- Weight 2.5 oz. (71 grams)
- L—1.734″, W—1.031″, H—1.250″

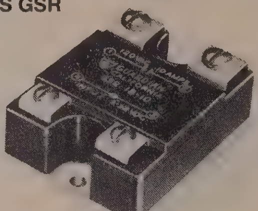
SOLID STATE

10, 25, 40 Amp SPNO—
GSR Series

Standard size, industiral relay with photo isolated input, "zero voltage" turn-on and internal snubber. Fully encapsulated for general purpose use. Termination: 6-32 screws (2) and 8-32 screws (2). Mounting: 2 holes on 1.87" centers. Shipping weight: 4 oz. L—2.25", W—1.75", H—0.88".

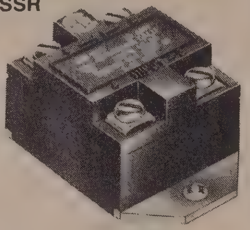
SERIES GSR



10 Amp SPNO Miniature—
MSSR Series

High performance, miniature relay offers 50% reduced weight and size. Photo isolated, "zero voltage" switching. Snubbered triac output. Optional 1mA microprocessor input. Termination: 6-32 screws. Mounting: 2 holes on 1.87" centers. Shipping weight: 2 oz.
L—2.25", W—1.25", H—0.81".

SERIES MSSR



2.5, 10, 20, 30 Amp SPNO—
TSSR Series

High performance, economical relay in miniature size. Photo isolated, "zero voltage" switching. Snubbered triac output. Optional 1mA microprocessor input. Termination: 0.187" QC (2) and 0.25" QC (2). Mounting: 2 holes on 0.187" centers. Shipping weight: 2 oz.
L—2.25", W—1.25", H—0.81".

5 Amp SPDT—LCT Series

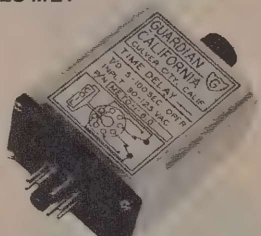
Low cost C-MOS timer. AC/DC input 1% repeatability. .187" tab terminal base. Delays from .5-2650 secs. Shipping weight: 3 oz.
LCT 1XX Series: Delay on Operate
LCT 2XX Series: Delay on Release
LCT 3XX Series: Interval On

SERIES LCT

10 Amp DPDT—MET Series

Low cost, excellent repeatability. AC or DC inputs available. 10 A output rating at 120VAC, 50-60 Hz resistive. Three standard delay ranges: 0.5-15, 0.5-100, 100-300 sec. Accuracy: 10% of nominal setting. Repeatability: 1% within fixed conditions. MET-O Series: Delay on operate. MET-R Series: Delay on release. Termination: Radio type plug. Shipping weight: 6 oz.
L—2.4", W—1.9", H—2.9".

SERIES MET



10 Amp DPDT—PET Series

Field programmable from 5 operating modes with selectable delays from .3 sec. to 2.2 hrs. Double pole double throw 10 amp contacts. High accuracy P-MOS Digital timing network, with outstanding repeatability. Standard 11 pin radio type pin. Shipping weight: 5 oz. L—2.4", W—1.9", H—4.0".

5 Operating Modes

1. Delay-on operate
2. Delay-on release
3. Delay-on both operate and release
4. Interval on
5. One shot

-$3\frac{3}{8}$″—W-$3\frac{7}{16}$″—H-$3\frac{1}{32}$″.

MER—Electrical Reset

Will control a sequence of operations and then reset automatically to zero or home from any desired position by energizing the reset magnet. Frequently used to count by various mechanical groups and then reset automatically. Positive interlock assures reset on a pulse as short as $\frac{1}{100}$ of a second. By interconnecting two or more, total may be increased, counting by tens or other convenient multiple. 24 contacts.
L-$3\frac{5}{16}$″—W-$3\frac{3}{8}$″—H-$2\frac{3}{16}$″.

PC—Continuous Rotation

40 contacts. Wiper moves in one direction only. Self-stepping speeds up to 20 steps per second.
Mechanical life expectancy up to 4 million steps.
L-$3\frac{3}{8}$″—W-$3\frac{7}{16}$″—H-$3\frac{1}{32}$″.

PAS—Add and Subtract

Bi-directional stepper supplied with 0.058″ AMP QC terminals in circle on deck Includes form "C" cam switch.
L-$3\frac{1}{2}$″—W-$3\frac{9}{16}$″—H-$3\frac{1}{2}$″.

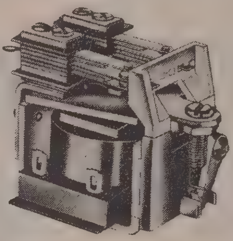
¶ Listings are for stepping coil and reset coil, respectively.
+ Includes Zero (0) position.
All coils intermittant duty.

840LS/845LS—

On/Off Mechanical Latching Relay



Compact relay for positive on/off control. Impulse as short as 20ms reverses switch position. Holds last position even with coil de-energized. 1 to 4 poles. Contacts rated 10A at 120VAC, 60 Hz, non-inductive. Power requirement: AC-22VA, DC-10W. Duty cycle: Intermittent. Termination: Solder lug. Mounting: 8-32 single tapped hole. Shipping weight: 5.2 oz.
L-$2\frac{1}{4}$″—W-$1\frac{29}{64}$″—H-$2\frac{7}{32}$″.

705—Rotomite

Maximum control in minimum space. High contact rating of 3A resistive, 1A inductive (50% PF) @ 120VAC, 60Hz. Continuous duty life over 1 million steps. Geared for continuous rotation hrough 12 positions. Applications include computers, business machines, lighting and vending controls, counting and sorting devices. L-3″—H-$1\frac{17}{64}$″ (includes mounting plate)—D-$1\frac{13}{64}$″.

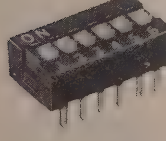
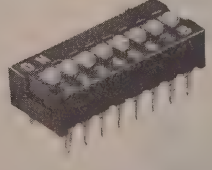
Recessed Slide DNE Series



Standard Slide DNS Series



Light Touch Slide DNF Series

4, 6 and 8 Pole PC Board Switches

Mount directly to PC board for quick and easy circuit changes. Ideal for computers, vending machines, meters. Solvent resistant case. PC termination similar to IC and LSI packages with 0.1″ grid spacing. Variety of case and actuator styles. Gold plated contacts rated 50VDC at 100mA without switching, 5VDC at 100mA with switching, 25VDC at 25mA with switching. Electrical life: 10,000 operations minimum. Dimensions: See ordering chart.

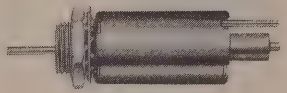
QUICK CONNECT LEADS

Lead wire adapters specifically designed for Guardians's Uni-Guard® II coil construction. Minimum overall length 6″, 22 gauge wire (U/L style 1015, temperature rating 105°C). Termination: 0.187″ or 0.110″ insulated female QC lug. Opposite end stripped 1/4″ minimum. 2 required for each solenoid.

Guardian No.	Lug Size
LW-22.187	0.187″
LW-22.110	0.110″

TUBULAR SOLENOIDS

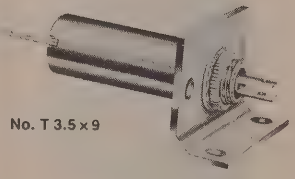
Tubular solenoids are available in either pull (T series) or push (TP series). TP series dimensions are identical to T series. Notched assembly of shell and bushing permits tightening of mounting nut without damaging coil. Insulation material: Class "A" (110°C). Termination: 6″ leads. Mounting hardware included. T and TP series recognized under the Component Program of Underwriters' Laboratories, Inc. Long life versions (LT series) available with same dimensions as T series. LT series expected life rating: 100 million operations.



Typical Push Type Solenoid

No. T 3.5×9

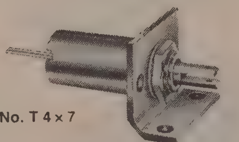
L—1 1/8″, D—7/16″. Mounting thread size: 5/16-32 UNEF. Bracket: W—1 1/8″, holes on 13/16″ centers. TP pushrod: L—1/2″, D—1/16″.



No. T 3.5×9

No. T 4×7

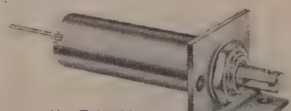
L—7/8″, D—1/2″. Mounting thread size: 3/8-32 UNEF. Bracket: W—1 1/8″, holes on 13/16″ centers. TP pushrod: L—.23/64″, D—1/16″.



No. T 4×7

No. T 4×12

L—1 1/2″, D—1/2″. Mounting thread size: 3/8-32 UNEF. Bracket: W—1 1/8″, holes on 13/16″ centers. TP pushrod: L—1 15/64″, D—1/16″.



No. T 4×12

No. T 4×16

L—2″, D—1/2″. Mounting thread size: 3/8-32 UNEF. Bracket: W—1 1/8″, holes on 13/16″ centers. TP pushrod: L—1 15/64″, D—1/16″.

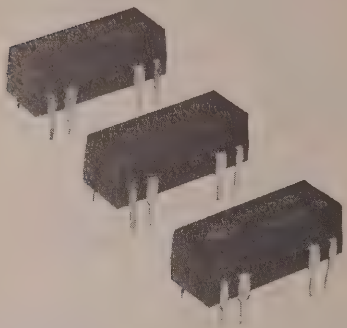
EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

HASCO COMPONENTS INC. / **REED RELAYS**

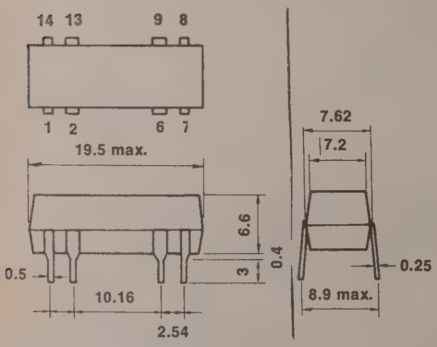
OKI
electric
industry
company, ltd.



FEATURES

- De-activated rhodium contacts. for stable contact resistance.
- Standard TO-116 Terminal Grid fits all standard DIP sockets.
- Interface directly with RTL, DTL, TTL, HTL logic.
- Molded epoxy package for environmental immunity.
- Automatic insertion compatible.
- Relay testing services test report available.

STRUCTURE (Unit in mm)



D SERIES DIP REED RELAYS

Hasco Components, Inc. is the exclusive agent for OKI's reed switches and reed relays. We also carry a wide range of Hasco electromechanical relays. If you need additional information on high quality, low priced products, please contact us.

CHARACTERISTICS

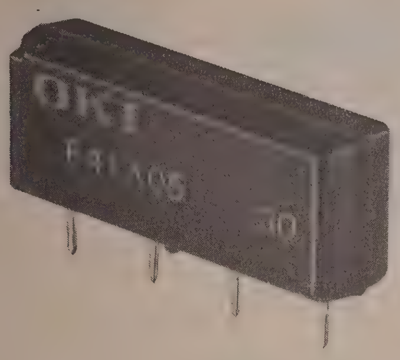
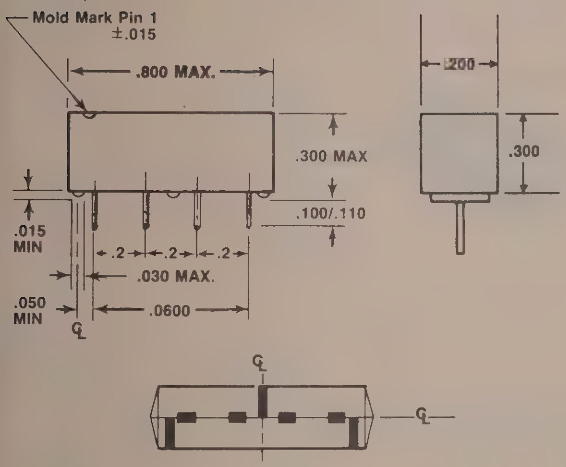
"HI-REL" SIP REED RELAY F41A SERIES

OKI
electric
industry
company, ltd.



SIP REED RELAY



FEATURES

- New small SIP configuration
- High quality — low price
- Resistance to cleaning solvents
- Automatic insertion compatible
- Relay testing services test report available

CONTACTS

Form: 1A
Current: 0.5 amps DC max.
Voltage: 100V DC max.
Power: 10 watts max.
Contact Resistance: 0.10Ω max.
Breakdown Voltage
(one minute between open contacts): 200V DC min.
Operations: 200 x 10^{6} Low Level
Contact Resistance Stability Delta: 0.005Ω max.
Magnetostrictive Twist: 0.12Ω max.
Average Number of Bounces: 10 max.

INSULATION RESISTANCE

10^{11}Ω min. at 25°C, 85% R.H., 100V DC (contact to contact, coil to contacts for 5 seconds).

10^{11}Ω min. at 25°C, 50% R.H., 100V DC (contact to contact, coil to contacts for 5 seconds) 4 hrs. after aqueous cleaning cycle.

LIFE

Low Level: 2 x 10^{8} operations, min. at 30 millivolts DC, 10 milliamps resistive load switched hot.

Low Intermediate Level: 5 x 10^{7} operations at 10V DC, 4 milliamps resistive load switched hot.

End Points: 1 failure to operate or 1 failure to release, (Operate/Release time $>$ 2 msec) or contact resistance $>$ 0.5 ohm, 5 msec after energizing coil.

RESISTANCE TO CLEANING SOLVENTS

Withstand without detriment to performance and marking, immersion in Freon TMC for 2 cycles. Each cycle 2 minutes in vapor @ 97°F plus 2 minutes spray, with 2 minutes in air between cycles.

Withstand without detriment to performance and marking aqueous cleaning with Kester 5779 Bio-Kleen 5% solution for 2 minutes and hot-air drying (200°F) for 4 minutes.

SPEED

Operate Time (Incl. Bounce): 500 µsec max.
Release Time (Incl. Bounce) (Diode Suppressed): 500 µsec max.

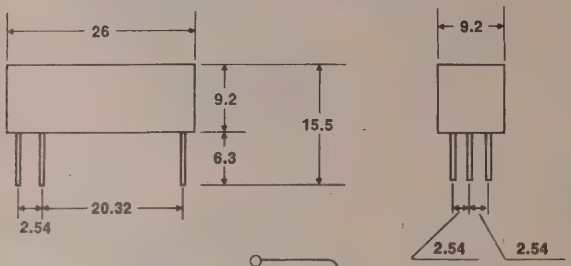
COIL

Resistance: 450Ω min.
Nominal Voltage: 5V DC and 12V DC.
Pickup Voltage: 3.8V DC max.
Dropout Voltage: 0.5V DC min.

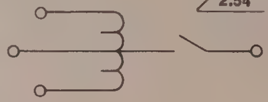
HASCO COMPONENTS INC. / REED RELAYS

FORM 1A LOW COST RRB SERIES REED RELAYS

STRUCTURE (Unit in mm)



CIRCUIT SCHEMATIC



ENGINEERING DATA

Operate Time: 8.8 ms max. (Rated voltage operation)
Release Time: 4.1 ms max. (Rated voltage operation)
Bounce Time: 0.5 ms max. (Rated voltage operation)
Contact Resistance: 150 mΩ max. (Initial value)
Breakdown Voltage: Between open contacts DC 250V min.
Between coil and contact DC 3000V min.
Insulation Resistance: 10^9 Ω min. (DC 100V)
Contact Ratings: DC 10W AC 10VA
DC 100V max. AC 100V max.
0.3A max. (switched), 1.0A max. (carry only)
Life Expectancy: 1 x 10^6 min. (Mechanical operations)
5 x 10^6 min. (24V, 50 mA resistance load)
1 x 10^6 min. (48V, 120 mA induction load)
Vibration: 20G (10 ~ 2000 Hz)
Shock Resistance: 50G (11 ms)
Operating Temperature: −20 ~ 60°C
Storage Temperature: −30 ~ 80°C

SPECIFICATIONS

Contact Form	1A
Part Number	**RRB61A08S**
Nominal Voltage (V) (at 20°C)	8
Must Operate (V) (at 20°C)	5.6
Continuous Voltage (Max. V)	12
Must Release (V)	1.0
Coil Resistance (Ω) = 10% (at 20°C)	700

Other coil voltages available.

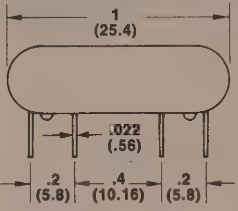
$.78 each at 1K & up

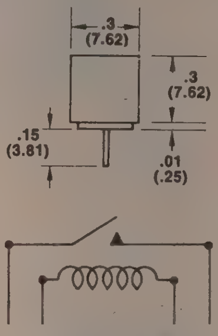
DRY CONTACT REED RELAYS 700 SIP/800 SERIES

FEATURES

- Choice or normal, heavy duty or hi voltage
- Epoxy sealed

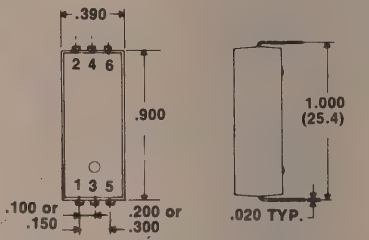
SERIES 700

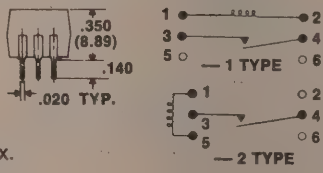




( ) Indicates Millimeters

SERIES 800





ENGINEERING DATA

Operate Time: 0.5 mSec max.
Release Time: 0.2 mSec max.
Bounce Time: 0.5 mSec max.
Contact Resistance: 150 mΩ max. (initial)
Life Expectancy: 50 x 10^6 operations at signal level
3 x 10^6 at full rated load
Insulation Resistance: 10^{9}Ω min.
Vibration: 20G (10-2000 Hz)
Thermal Shock: −55~105°C
Moisture Resistance: 60°C - 90% 240 hours
Terminal Strength: 225g
Operating Temperature: −40~85°C
Storage Temperature: −55~105°C

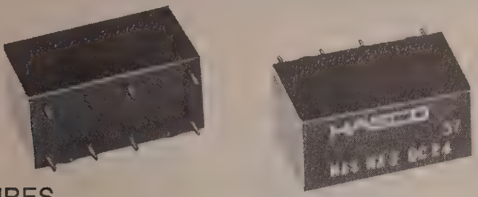
HASCO COMPONENTS INC. RELAYS

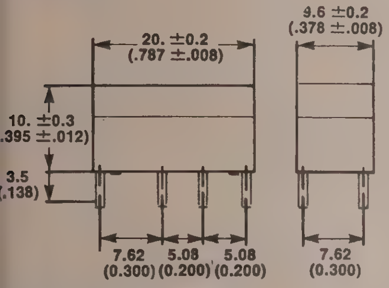
DPDT - 2 AMP DIP OR PC RELAY HAS 112



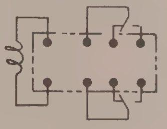
FEATURES

- Available fully sealed or "semi" sealed.
- Employing 16 pin, IC spacing.
- Low profile for tight spacing.
- Coil voltages: 5, 6, 9, 12, 24 & 48.
- Compatible and competitive!

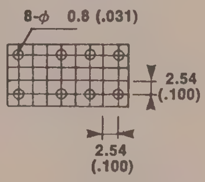
DIMENSIONS Unit: mm (inch)



SCHEMATICS



MOUNTING HOLE LAYOUT



For sealed unit specify "S"

COIL RATING

Type	Rated Voltage	Coil Resistance	Pull-in Voltage	Drop-out Voltage
HAS 112	5V DC	45 ohms	Less than 75% of rated voltage	Less than 10% of rated voltage
HAS 112	6V DC	60 ohms		
HAS 112	9V DC	140 ohms		
HAS 112	12V DC	280 ohms		
HAS 112	24V DC	1,070 ohms		
HAS 112	48V DC	4,000 ohms		

As for the resistance value, pull-in voltage and drop-out voltage, they show the value at ambient temperature, 20°C, and the tolerance is ±10%.

RATING — PERFORMANCE

Applicable Voltage: ±15% of rated voltage

Ambient Temperature: −25°C to +50°C (But not to be frozen)

Contact Specification:
- Contact Arrangement: DPDT
- Max. Switching Wattage: 60VA/30W (Max. voltage 125V AC or DC, Max. current 1.25 Amp)
- Material: Silver alloy (Gold clad contact is also available upon request)
- Contact Resistance: Less than 100 milliohms (Initial value)

Operating Time: Approx. 6 ms

Release Time: Approx. 5 ms

Anti-shock: False operation Approx. 20G — Endurance 100 G

Anti-vibration: False operation 10 to 55 Hz 1.5 mm—Endurance 10 to 55 Hz 1.5 mm

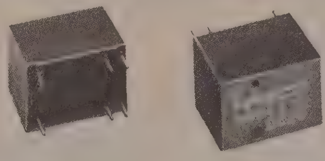
Insulation Resistance: More than 100 Meg. ohms at 500V DC

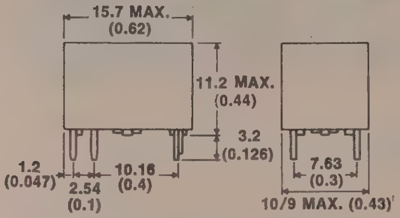
Dielectric Strength: 1,000V AC 1 minute (Contact to coil) — 500V AC 1 minute (Contact to contact)

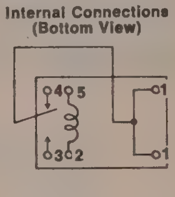
Life Expectancy: Mechanical 10 million times — Electrical more than 200 thousand at resistive load (110V AC 0.3 Amp, 24V DC 1.25 Amp)

Weight: Approx. 4.5 g

SPDT - 1 AMP DIP OR PC RELAY HAS 111



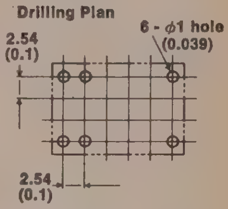




Specifications subject to change without notice.

Unit: mm (inch)

For sealed unit specify "S"



FEATURES

- Small size 1A switching capacity.
- Available semi or fully sealed.
- Voltages 1.5-48 volts available.
- Hi-quality, yet inexpensive.

Type	Contact Arrangement	Nom. Volt. (V)	Coil Resist. (Ω) ±10%)	Nom. Curr. (mA)	Pick-Up Volt. (V)	Drop-Out Volt. (V)	Max. Volt. (V)*	Nom. Pwr (W) Cons'ption

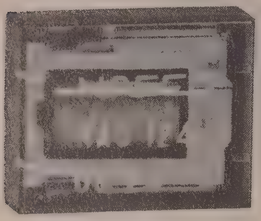
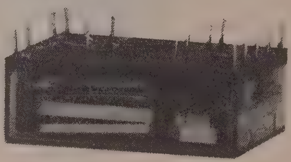
RELAYS

LOW PROFILE RELAYS - HAS 122, 124, & 116 FLATPACKS





FEATURES

- Available in 2, 4 or 6 poles.
- Voltages - 5, 6, 12, 24 and 48.
- Bifurcated contacts.
- Fully sealed versions are in stock.
- Form D available.
- Latching available.
- Nitrogen filled.

COMPATIBLE AND COMPETITIVE!

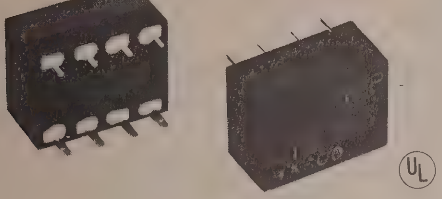
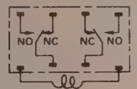
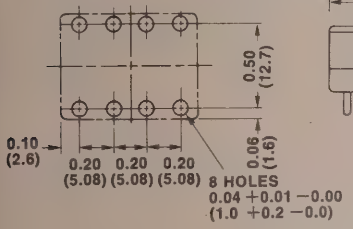
DPDT MINI 3 OR 5 AMP RELAY SSD203P RELAY SERIES

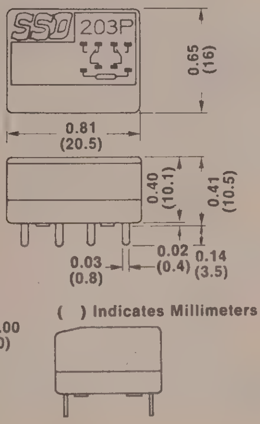


WIRING DIAGRAM



MOUNTING DIMENSIONS





MAXIMUM LOAD RATING:
125V AC 3A, 250V AC 2.5A, 30V DC 3A and 5A

This double pole, double throw miniature relay gives **3** Amp or **5** Amp switching in a **small package** only .81″ x .65″ x .41″ (20.5 x 16 x 10.5mm) at low cost. It's the perfect answer for applications in Industrial Controls, Computer Peripherals and a wide range of others.

FEATURES

- Miniature Size: .81″ x .65″ x .41″, 20.5 x 16 x 10.5mm
- Printed circuit terminals
- Double pole, double throw
- Low cost
- Can be flow soldered
- Fully sealed nitrogen filled option

SPECIFICATIONS

Maximum Voltage: 120% of rated voltage at 20°C
Must Operate Voltage: 75% of rated voltage at 20°C
Operate Time: 5 ms
Coil Temperature Rise: 65°C max. at rated voltage
Insulation Resistance: 100M ohm min. at 500V DC
Dielectric Strength:
2000V AC 1 minute between coil and terminal
750V AC 1 minute between contacts
Electric Life: 100,000 operations
Mechanical Life: 10 million operations
Contact Material: Silver alloy
Contact Resistance: 100m ohm max. (4 to 6V DC, 1A)
Operating Temperature Range: −10°C to +65°C

Rated Voltage (V)	5 DC	6 DC	12 DC	24 DC
Rated Current (mA)	120	100	50	25

MAXIMUM LOAD RATING:
125V AC 3A, 250V AC 2.5A, 30V DC 3A SSD105P (125V AC 5A type) also available

This single pole, double throw miniature relay gives **3** or **5** Amp switching in a **small package** only .83″ x .63″ x .57″ (21 x 16 x 14.4mm) at low cost. It is ideal for use in Computer Peripherals, Industrial Controls and a wide range of other applications.

FEATURES

- Miniature Size: .83″ x .63″ x .57″, 21 x 16 x 14.4mm
- Printed circuit terminals
- Single pole, double throw
- Can be flow soldered
- Fully sealed nitrogen filled option

SPECIFICATIONS

Maximum Load Voltage: 150% of rated voltage at 20°C
Must Operate Voltage: 65% of rated voltage at 20°C
Operate Time: 5 ms
Coil Temperature Rise: 50°C max. at rated voltage
Insulation Resistance: 250 ohm min. at 500V DC
Dielectric Strength:
2000V AC 1 minute between coil and terminal
750V AC 1 minute between contacts
Surge Voltage Resistance: 7000V DC min. between coil and terminals at 20°C 65% RH, 40 sec., 3 times
Electric Life: 100,000 operations
Mechanical Life: 20 million operations
Contact Material: Silver alloy
Contact Resistance: 70m ohm max. (4 to 6V DC, 1A)
Operating Temperature Range: −30°C to +70°C

Rated Voltage (V)	6 DC	9 DC	12 DC	24 DC
Rated Current (mA)	75	50	37	18.5
Coil Resistance (Ω)	80	180	320	1280
Rated Current Tolerance: ±15%-20% at 20°C

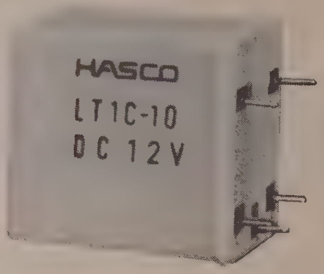
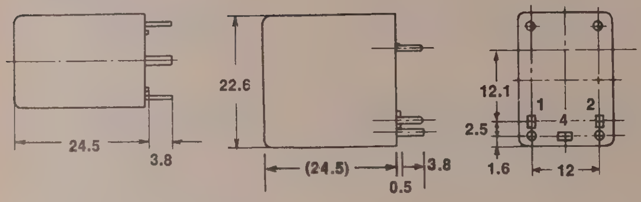
RELAYS

LT MINIATURE POWER RELAYS SPDT 3, 5 & 10 AMP

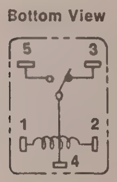
508/TV-5

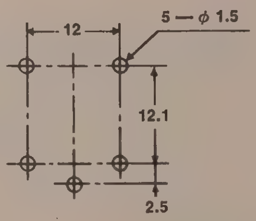


LT DIMENSIONS



CIRCUIT DIAGRAM AND MOUNTING





FEATURES

- Miniature, lightweight relay which requires less mounting space.
- UL 508/TV-5 available.
- High reliable relay with dielectric strength, 2000V which employs the specific construction.
- Economical and favorable price for simple construction.
- Fully sealed.

GENERAL CHARACTERISTICS

Contact Material: Gold plated on silver for 2A — Silver cadmium oxide for 5A.

Ambient Temperature: −20 to +60°C (not to freeze).

Ambient Humidity: 45 to 85% (not to be dewy).

Operating Time: Less than 20 mS.

Release Time: Less than 20 mS.

Contact Resistance (at initial): Less than 100 milliohms at 6V DC, 1A.

Insulation Resistance: 500V DC, more than 100M Ohms.

Dielectric Strength: Between contacts: 500V AC (50/60 Hz) 1 minute — Between coil and contact; 2,000V AC (50/60 Hz) 1 minute.

Vibration: 6G (10 to 55 Hz).

Shock: 10G.

(The above mentioned values are at normal temperature and humidity.)

CHARACTERISTICS

Contact Arrangement: SPDT (Form C).

Power Consumption: Approx. 0.36W to approx. 0.5W.

Temperature Rise: Less than 40 deg. after applied max. continuous voltage.

COIL RATINGS

Rated Voltage (V)	DC6	DC9	DC12	DC24
Rated Current (mA)	60	40	30	15
Coil Resistance (Ω)	100	225	400	1600

* Coil rated current tolerance is +15%, −20% at ambient temp. of 20°C.

MAXIMUM LOAD RATINGS

Type	Load	Voltage	AC 125V	DC 24V
3A	Resistive	(cos ϕ = 1)	3A	3A
	Inductive	(cos ϕ = 0.4 T = 7 ms)	1.2A	1.2A
5A	Resistive	(cos ϕ = 1)	5A	5A
	Inductive	(cos ϕ = 0.4 T = 7 ms)	2A	2A
10A	Resistive	(cos ϕ = 1)	10A	10A
	Inductive	(cos ϕ = 0.4 T = 7 ms)	4A	4A

SPECIFICATIONS

Maximum Continuous Voltage: 115% of rated voltage at 20°C.

Operating Voltage: Less than 80% of rated voltage at 20°C.

Opening Voltage: More than 10% of rated voltage at 20°C.

Coil Temperature Rise: LT 1C 3/LT 1C 5—Less than 50°C at rated voltage. LT 1C 10—Less than 60°C at rated voltage.

Initial Contact Resistance: Less than 100 mΩ (1A 6V DC).

Insulation Resistance: More than 100 MΩ (500V DC).

Dielectric Strength: Between coil and contact — AC 1500V for 1 minute. Between contacts — AC 750V for 1 minute

Electrical Life: More than 100,000 operations at rated voltage.

Mechanical Life: More than 5,000,000 operations.

Contact Material: LT 1C 3 — Gold plated over silver
LT 1C 5 and LT 1C 10 — Silver alloy.

Operating Temperature: LT 1C 3/LT 1C 5 — 30°C ~ +20°C.
LT 1C 10 — 30°C ~ +50°C.

Contact Form: Form C (SPDT).
Form A (SPST)
Form B (SPNC)

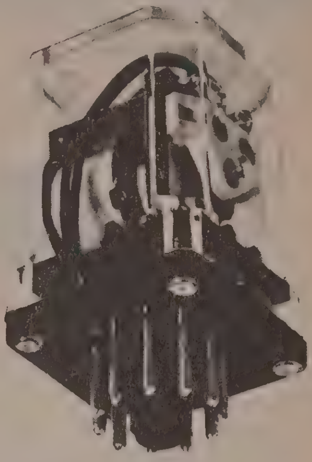
GENERAL PURPOSE RELAYS

ECONOMY PLUG-IN TYPE — SERIES PR



General purpose relay enclosed in a clear polycarbonate dust cover. The PR Relay is a ruggedly constructed, UL recognized relay; available in contact arrangements up through 3 form C (3PDT) and with a mechanical life of 10 million operations, minimum. Approximate weight: 3 oz. (85 g). Other features include:

- Manual test access standard
- Anti-shock base construction
- Indicator lamp available
- Extremely low priced

Technical Specifications

GENERAL:

OPERATE TIME
15 ms. max. @ nominal voltage

RELEASE TIME
10 ms max.

LIFE EXPECTANCY

Mechanical: 10 million operations

DIELECTRIC STRENGTH
1500 VRMS 60 Hz Hipot test between all elements

INSULATION RESISTANCE
100 M Ω minimum

TEMPERATURE RANGE
PR relays will operate continuously in ambient temperatures of −45° to 75° C for D.C. coils and −45° to 55° C for A.C. coils.

CONTACTS:

CONTACT RATING/MATERIAL

Contact material	Ag-CdO (other materials on request)
Contact rating (Resistive)	10 A @ 240 VAC max.
Contact rating (Inductive)	¼ H.P. @ 240 VAC - 1 phase.

CONTACT ARRANGEMENTS
All types of the Series PR are available in standard contact arrangements up to 3PDT.

AGENCY APPROVALS:

U.L. recognized

COIL DATA:

COIL VOLTAGE/RESISTANCE

	D.C. COILS		A.C. COILS
VOLTS	D.C. RESISTANCE	VOLTS	D.C. RESISTANCE
6	29	6	4.2
12	105	12	17
24	420	24	70
110	8400	120	1300
220	8400 *	240	6700

COIL RESISTANCE
Standard coils are available with a tolerance of plus or minus 10% measured in an ambient of 20°C.

* Coils for DC versions may be supplied only for voltages not exceeding 110V. In the event of 220V. 10kOhm/2 W series resistors are supplied along with the relays, to be connected in series with the energizing winding.

PULL-IN VOLTAGE
80% of nominal

POWER CONSUMPTION

Rated voltage	DC relays	AC relays
6— 48V	1.3 W approx.	2 VA (50 Hz) approx.
60—110V	1.5 W approx.	
220 V	2.5 W approx. with series resistor	1.8 VA (60 Hz) approx.

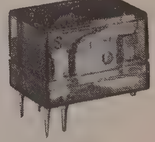
MZ RELAY



1 Amp SPDT
L — 0.606″,
W — 0.449,
H — 0.433″

CONTACT DATA

Arrangement — 1 Form C

Material — Gold overlay silver-palladium alloy

Resistance — 100 milliohms maximum (initial value)

Ratings — 50μ amps to 1 amp at 30V DC or 120V AC, resistive

Life Expectancy — Mechanical: 20 million operations
Electrical: 500,000 operations minimum at 1 amp 24V DC resistive load
200,000 operations minimum at 0.5 amps 120V AC resistive load

COIL DATA

Voltages — 1.5 to 24 volts DC

Power (at 20°C) —
Standard type: Operate—0.22 watt, Nominal—0.45 watt, Maximum—1 watt
High sensitive type: Operate—0.1 watt, Nominal—0.2 watt, Maximum—1 watt

Operate (at 20°C) — 70% of nominal voltage

Duty — Continuous

GENERAL DATA

Insulation Resistance — 100 megohms minimum at 500V DC

Dielectric Strength — 500V AC (50/60 Hz), between all insulated elements

Temperature Range — Standard type: −40°C to +55°C
(at nominal voltage) High sensitive type: −30°C to +75°C

Time Values — Operate <3 ms standard, <6 ms sensitive; release <1 ms

Mounting — For direct printed circuit mounting on grid spacing of 2.54 mm (0.1 in.) up to board thickness of 2.5 mm (0.98 in.)

Approximate Weight — 3.5 gr. (0.12 oz.)

Enclosure — Polycarbonate

Sub Miniature Printed Circuit Board Relays

VG RELAY

L — 0.925″,
W — 0.386″,
H — 0.984″

CONTACT DATA

Arrangement — 1 Form C (SPDT)

Material & Rating —
VG-( )H, — Silver alloy 5A 24V DC or 120V AC resistive
VG-( ), VG-( )S — Silver alloy 3A 30V DC or 120V AC resistive
VG-( )L, VG-( )LS — Gold overlaid silver alloy 1A 30V DC or 120V AC resistive

Life Expectancy — Mechanical: 10 million operations
Electrical: 100,000 operations at rated load
30,000 operations at TV Rating

COIL DATA

Voltage — 5 to 48V DC (High sensitive type — to 24V DC)

Power (at 20°C) — Standard type: operate 0.18 ~ 0.2W
nominal 0.36 ~ 0.4W
High sensitive type: operate 0.1 ~ 0.13W
nominal 0.2 ~ 0.26W

Max. Operate (at 20°C) — 70% of nominal voltage

Duty — Continuous

GENERAL DATA

Insulation Resistance — Min. 1000 MΩ at 500V DC

Dielectric Strength — 750V AC (50/60 Hz) between open contacts
4000V AC (50/60 Hz) between coil and contacts

Surge Strength — 7000V (1 × 40 μs)

Temperature Range (at Nominal voltage) —
Standard type −40°C to +75°C } Non-carrying condition of contacts
High sensitive type −40°C to +85°C }

Time Value (at Nominal voltage) — Operate Max. 8 ms
Release Max. 5 ms

Mounting — For direct printed circuit mounting on grid spacing of 2.54 mm (0.1 in.) up to board thickness of 2 mm (0.08 in.)

Weight — 12 gr (Approx.)

COIL DATA

Nominal Voltage — 3 to 60V DC
Power (at 20°C) — Nominal: 1.2W
Operate: 0.59W
Maximum: 3.0W

GENERAL DATA

Dielectric Strength — 1200V AC between open contacts
4000V AC between all other conductors
Insulation Resistance — 1000MΩ (min.) at 500V DC
Surge Voltage — 10,000V
Timing (approx.) — Operate: 15ms at nominal
Release: 3ms at nominal
Weight — 55 gr
Vibration — 10 - 55Hz
Shock — 20G

ITT Components

A Unit of ITT Corporation

Solid-State Relays

ITT Components offers a full line of Solid-State Relays to cover a wide range of switching and isolation applications where long life, environmental ruggedness, low RFI, no contact bouncing and logic circuitry compatibility are prime requisites.

These SSRs feature:

- Photo-transistor or reed relay coupling.
- Various chassis mounting or printed circuit board mounting housings.
- AC switching.
- Zero-crossing or random switching.

AC output models can switch:

- Voltages of 120, 240, 330, 480V AC.
- Currents of 0.5, 2, 3, 7, 10, 25 or 30A AC.

A full line of input-output modules (DC and AC input as well as DC and AC output) to fit microprocessor based controls is also available.
Do not hesitate to call us for any additional information you might need.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

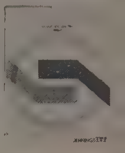
vacuum relays

ITT Jennings manufactures Vacuum and Gas Relays to exacting standards for use in transferring high voltage circuits. They are available in voltage ranges up to 30 KVAC, with up to 75 A. current ratings, and with operating frequencies through the VHF band. These relays are widely used in airborne, mobile and marine communications where their characteristics are particularly desirable. They have high operating speeds, withstand high voltages and carry heavy currents with high reliability . . . without developing high contact resistance or generating electrical noise. The majority of applications for these relays includes the switching of antennas, frequency bands, transmit/receive modes, power circuits and elements in pulse forming networks.

ITT Jennings also produces a line of defibrillator (or capacitance discharge) vacuum relays used in medical defibrillation units, or any application that calls for a capacitor discharge circuit — research lasers and communications power supplies for example. Operating characteristics are shown under relay type RGD1 through 9.



Relay Type	Contact Configuration	KV Peak Rated Operating Voltage			Continuous Current Amps, RMS			Contact Capacitance

vacuum coaxial relays

ITT Jennings manufactures a broad line of coaxial relays for use where circuit currents must be contained completely within a coax system. Vacuum coaxial relays have high power handling capabilities at frequencies up to 600 MHz.

These relays and switches have characteristics that are well suited to airborne, marine and mobile communication systems, as well as fixed installations. Characteristics include: • Low insertion loss and VSWR • High RF power capability • High isolation • Fast operation • Low, stable contact resistance • No noise generation or IM distortion • Extreme high reliability combined with ruggedness for high altitude or heavy vibration environments • Small size and lightweight for their power handling capacity • Wide band-pass characteristics. Typical applications for these units might include multiple antenna-transmit switching systems such as high speed switching from omnidirectional to directional antennas, transmit-receive switching, and where elements are to be switched in transmitter and receivers. Other applications include crossbar matrices and switching trees.

G

GaAsFET gallium arsenide field effect transistor
GPIB general purpose interface bus

H

HF high frequency (3 to 30 MHz)
HIPOT test, measurement and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I

IC integrated circuit
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared

J

JFET junction field effect transistor
JMOS junction metal oxide semiconductor

K

kHz kilohertz (10^3 hertz)
KSR keyboard send receive

L

LC inductance capacitance
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LSI large scale integration
LVDT linear velocity displacement transformer

M

MATV master antenna television
μF microforad
MHz megahertz
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor field effect transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N

NBS National Bureau of Standards
NIM nuclear instrumentation module
NOR not OR

O

OEM original equipment manufacturer
OR a logical operator

P

pF picofarad
PC printed circuit
PCB printed circuit board
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PPI plan position indicator
PROM programmable read only memory
PUT programmable unijunction transistor

Q

QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R

RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S

SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SIP single in-line package
SSI small scale integration
SSR solid state relay
STL Schottky transistor logic

T

TC temperature coefficient
TCXO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL transistor-transistor logic
TTY teletypewriter

U

UHF ultra high frequency (300 MHz to 3 GHz)
UL Underwriters Laboratory
UPS uninterruptible power supply

V

VAC volts (of) alternating current
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W

WPS word processing software

Y

YIG yttrium iron garnet

High Voltage Relays

Applications

The capability to rapidly switch high voltages in a small package makes Kilovac® relays especially well suited for applications in ECM, communications, sonar and radar pulse forming networks, heart defibrillators and other capacitive discharge circuits, electrostatic coating equipment, laser and x-ray power supplies, digital antenna couplers (tuners), automatic dielectric-strength test equipment, and other high voltage equipment, or low voltage applications where extreme reliability is required.

Vacuum as a Dielectric

Since most high voltage arcs are initiated by ionization of the insulating medium, absence of any such medium (i.e., a hard vacuum) produces the greatest possible isolation between contact electrodes. In a vacuum of 10^{-8}mm of mercury, dielectric strengths can be achieved on the order of 2000 V/mil. A vacuum dielectric has the additional advantage of providing an inert (i.e., nonoxidizing) atmosphere in which high voltage contacts operate.

Low Contact Resistance

In conventional relays, contact resistance is variable from cycle to cycle. In Kilovac vacuum relays, it remains low and stable over the life of a relay (.015 ohms typical). Stability and low resistance are attributable to uniform cleanliness of parts, lack of oxidation or contamination, and use of only pure metals in the contact areas. Contact maintenance is never required.

High Voltage Relays

Small Size and Weight
The small contact gap and short contact travel possible with a vacuum dielectric result in minimal package size and weight.

Safety
Because contacts are sealed within the high voltage envelope, switching may be safely accomplished in explosive atmospheres.

Fast Switching Time
10 ms typical, due to small contact gap and short armature travel.

Electronegative Gas as a Dielectric
Kilovac gas-filled relays are pressurized with an electronegative gas mixture. This insulating medium offers several advantages, including high voltage isolation capability in a compact package. The primary advantage is its ability to suppress arcing in heart defibrillator and other capacitive discharge circuits.

Kilovac Medical Relays
Since 1964 Kilovac has produced and delivered thousands of high voltage relays especially designed for heart defibrillators. Kilovac produces several models of patient relays, safety discharge relays, and ECG relays, as well as a multifunction relay capable of performing all of these switching functions in a defibrillator.

ELECTRONIC TIME DELAYS AND SENSORS

To simplify systems interfacing and integration, we have a complete custom facility for the design and production of timing and sensing systems.

They are available with Leach MIL-Standard relays or special solid state outputs, manufactured with discrete circuitry or thick film hybrids manufactured to MIL-STD-883, Class B requirements.

In addition to the standard products shown below, we can provide:

- —Combinations of voltage, frequency and phase sequence detection with built-in time delays for systems monitoring.
- —Solid state relays with up to 3PNO contacts and ratings up to 25 amperes to MIL-STD-704 power requirements.
- —Relay drivers for multiplex interface and isolation, conforming to MIL-R-28776.
- —Solid state switching devices, ac and dc motor controllers, circuit breakers, current sensors and remote power controllers.
- —Build to print hybrid, discrete /hybrid, and discrete designs available.

QUICK REFERENCE GUIDE SUBMINIATURE RELAYS

LEACH®

Leach subminiature relays have set the industry standards for technology and reliability for decades. With their proven high performance in the most demanding applications, they are ideal for your critical subsea, shipboard, ground-based and aerospace applications.

Our Balanced Force™ subminiature relays are rugged, high-environment relays for applications where size, weight and reliability are important. For systems where size and weight are critical, our Series III subminiature relays are the smallest, lightest aircraft relays made with their contact ratings, and are 40% the size and weight of our J and K Series relays, yet offer the same high performance. Both relay types are available in a variety of termination, mounting and operating configurations.

POWER AND CONTROL RELAYS

Leach power and control relays have been used for decades in commercial and military aircraft, trucks and buses, ships and tanks—any application that calls for proven durability, high performance and long life.

To ensure that you get the right relay for your application, our power and control relays are available in a broad range of configurations. You can choose from various terminal and mounting styles, dust and moisture resistant and hermetically-sealed enclosures, and a variety of operating ratings and characteristics.

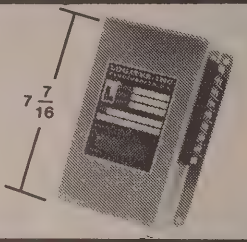
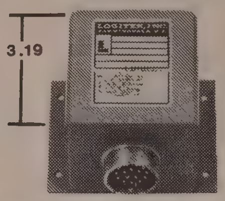
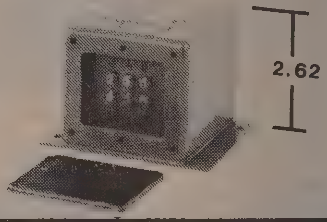
ELECTRONIC MONITORS & CONTROLS

POWER MONITORS • AC & DC VOLTAGE MONITORS • FREQUENCY MONITORS • PHASE MONITORS







APPLICATIONS

Logitek power monitoring equipment is used to continuously monitor the characteristics of AC and DC electric power systems for conformance to their design acceptable limits. This type of continuous surveillance is of particular importance in such systems where undetected power line malfunctions could cause major system failure, utilization equipment malfunction, or erroneous operation. Without continuous monitoring, utilization equipment operators are often unaware that their equipment is malfunctioning or of its slow degradation until functional failure.

EQUIPMENT TYPES

Individual units are available to monitor AC or DC voltage, line frequency, phase to phase voltage unbalance and phase angle unbalance, each for both high and low limits, or to monitor for phase loss and/or reversal. "Power Monitors" are also available incorporating any combination of these monitoring functions within a single unit. Units generally fail into two categories: those in which the limits of high and low voltage, frequency and pick-up and drop-out time delay are factory pre-set, and those in which the limits are factory set, but field adjustable. Models are also available with two limit sets, one set for abnormal condition limits and a second set of limits for emergency conditions.

OPERATING CHARACTERISTICS

The equipment is connected to the power line to be monitored where it continuously measures the desired characteristics. Should any one of these characteristics exceed the pre-set acceptable limits, the drop-out time delay will begin. If the condition persists for a time longer than the drop-out time delay, the output control circuit will de-energize. Once the control circuit de-energizes, the power line must return to normal for a time exceeding the pick-up time delay before the control circuit will re-energize. In the case of phase loss or reversal, however, the control circuit will de-energize immediately bypassing the time delay circuits. Control circuits normally consist of relay contacts, but various logic levels can also be provided. Standard units are generally supplied with a single control circuit responsive to any type anomaly, however, equipment providing many variations can be specified for particular applications. Examples of variations include control circuits which provide a logic level output, a separate output for each characteristic being monitored, both real time and delayed time signal outputs and manual reset or override capabilty.

SPECIFICATIONS

ELECTRICAL

Input Voltage	28 VDC, 120/208, 120/240, 277/480 VAC
Input Frequency	50/60/400 HZ
Sense Voltage	As Required
Sense Frequency	As Required
Accuracy	± 1%, ± 5%
Phase Sequence	A + B + C
Phase to Phase Voltage Unbalance/Phase Angle Shift	5-10%
Time Delay (Pick-Up and Drop Out)	250 Milliseconds to 10 Seconds, factory set or field adjustable
Relay Contacts	DPDT, 3PDT
Contact Rating	2 Amp, 10 Amp

PHYSICAL

Finish	Gloss Blue #15177, FED-STD-595, Meet or exceed MIL-E-5556 or 5557
Connector	Glass to Metal Seal Solder Hooks, MS3113H-20-16PN Connector, Barrier Strip

ENVIRONMENTAL

Temperature	− 55 °C to + 125 °C, − 40 °C to + 85 °C, − 10 °C to + 70 °C
Vibration	Per MIL-E-5272, Procedure II, 10 - 80 HZ @ .06″ D.A. 80 - 2000 HZ 20g's
Shock	Per MIL-E-5272, Procedure V, 50g's 11 ± 1 Millisecond, any axis
Acceleration	Per MIL-E-5272, Procedure I, 20g's Steady state, any axis
Humidity	Per MIL-E-5272, Procedure I
Altitude	Per MIL-E-5272, Procedure IV, Condition F, 100,000 Feet
General	Per MIL-E-5400R, Class 4 except Paragraph 3.1.29

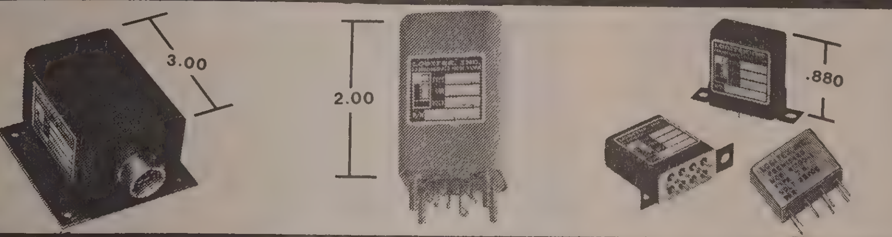
ELECTRONIC MONITORS & CONTROLS

TIME DELAY RELAYS • SOLID STATE FLASHERS • REPEAT CYCLE & INTERVAL TIMERS



APPLICATIONS

The design of complex electrical distribution systems often requires that certain operations be delayed or sustained for a precise interval of time from occurrence of a control or initializing signal. Combinations of various timing devices can be used for sequential startup or shutdown programs, load transfer or shedding, or delayed transfer to avoid race conditions. In addition, pulsers, interval timers, and flashers are used in applications such as operating instrument panel warning lights or other annunciator devices, landing gear, door open indicators and navigation lights.

EQUIPMENT TYPES

Several timing functions are available to facilitate the different timing and sequencing requirements ordinarily required. These include "delay on make," providing a time delay from application of the control signal to output circuit energization; "delay on break," providing immediate energization which sustains for a timed interval; "delayed interval," providing a delay on make followed by a timed "energized" interval and then return to the de-energized state. "Controlled" timers generally fall into two categories: timers which produce an immediate transfer of the control circuit upon application of a control signal and then a time delayed release after removal of the control signal and "true delay on break" timers which generate a timed interval and relay transfer after removal of all operating power.

OPERATING CHARACTERISTICS

Logitek timing devices are generally CMOS integrated circuits appropriately protected from line transients and other line perturbations and either a solid state or electromechanical relay output circuit. Since there are no large capacitive timing or storage elements in these devices, recycle times (the time after control removal which will cause a new timing cycle within specified accuracy) are very short. In addition, the use of CMOS IC digital counting circuits allows the use of very stable timing elements resulting in excellent stability through wide temperature ranges.

SPECIFICATIONS

ELECTRICAL

Input Voltage	28, 115, 120, 220 VAC/DC
Timing Range	50 Milliseconds to 1000 seconds
Accuracy	± 10%, ± 5%, ± 2%
Contacts	
Relay	DPDT, 3PDT; 2 AMP, 10 AMP
Solid State	.5 AMP, 2 AMP, 2.5 AMP, 4 AMP, 5 AMP
Radio Interference	MIL-1-6181D, MIL-1-26600

PHYSICAL

Finish	Gloss Blue #15177, FED-STD-595, meet or exceed MIL-E-5556 or 5557, Flat Black per MIL-E-5556

General	Per MIL-E-5400R, Class 4 except Paragraph 3.1.29

• QUALITY ASSURANCE

Logitek equipment is manufactured in accordance with

- MIL-Q-9858A
- MIL-I-45208

All production equipment undergoes a 100 hour burn-in schedule to insure in-service reliability.

• APPLICATIONS

- Aircraft, Electrical Systems
- Mobile Radar Systems
- Equipment Test Stations
- Tanks
- Mobile Missile Launchers
- Offshore Drilling Rigs
- Computer Systems
- Shipboard Electrical Systems
- Hospital Auxiliary Power Systems

• SPECIAL PRODUCTS

Logitek's engineering department is available to discuss your application of our product or to design special equipment to satisfy your system requirements.

EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

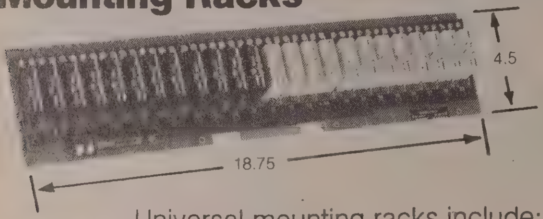
Power I/O Systems

The most versatile I/O system available – also the most complete; Choices of 4, 8, 16, 24 or 32 module mounting racks; three logic voltages; 120 VAC, 240 VAC, 60 VDC, or 200 VDC load voltages; allow maximum flexibility in system design. The first true plug-in system per NEMA ICS2-230.02 simplifies maintenance, installation and modification. Provides power interface & optical isolation between the μP (or other logic) & industrial power.

Mounting Racks



Universal mounting racks include:

- ☐ LED status indicator
- ☐ Plug connection for logic signals
- ☐ UL Recognized, CSA Certified

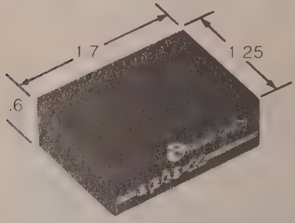
CONTROL VIA BARRIER STRIP

PB4	**4 MODULE POSITIONS**
PB4R	**4 MODULE POSITIONS (ISOLATED CONTROL)**
PB16T	**16 MODULE POSITIONS**

CONTROL VIA EDGE CONNECTOR

PB8	**8 MODULE POSITIONS**
PB16A	**16 MODULE POSITIONS**
PB16C	**16 MODULE POSITIONS-EXTRA BARRIER STRIP**
PB24	**24 MODULE POSITIONS**
PB24Q	**24 MODULE POSITIONS**
PB32DEC	**32 MODULE POSITIONS-CONNECTS TO DEC LSI 11**

I/O Modules



- ☐ 4000 V Optical Isolation
- ☐ Built-in Snubbers on AC output
- ☐ Zero Cross Switching on AC output
- ☐ UL Recognized, CSA Certified
- ☐ High Transient Immunity

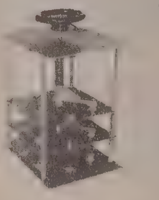
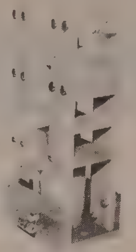
SAFETY AND ACCESSORIES

HV ROTARY SWITCHES



Ratings from 5 to 150KV, 1 to 200 amps. Either manual or electrical operators, depending upon requirements. Position detents and interlocks to prevent opening under load.

HIGH CURRENT SWITCHES



Models are available up to 20,000 amps continuous, and over 500,000 amps pulse, with voltage ratings of 6 volts to 300 KV peak test. Many are air cylinder or motor operated for high contact force.

HV RELAYS

HV relays of the air insulated type both for low and high current. This series has ratings from 1 to 200 amps continuous, 100 to 100,000 amps momentary and capacitor discharge. Peak test voltages from 5 to 300KV. Single or Multipole. NO, NC, and DT. Auxiliary contacts optional on all types. Extended life and tungsten contacts also available for high current closing. Usable in oil.

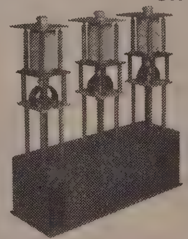
HV-RF SWITCHES

For RF applications, low loss G-7 Silicone glass insulation and non-magnetic materials are used. Switches available up to 50 MHz. 1 to 50 KV, 1 to 800 amps. Air or hydraulic, and spring actuated.

HV GROUNDING RELAYS

Extra high voltage low corona grounding relays of the air insulated type. Ratings up to 600 KV peak at 100 amps continuous. Solenoid, motor or air cylinder operated and spring or gravity return.

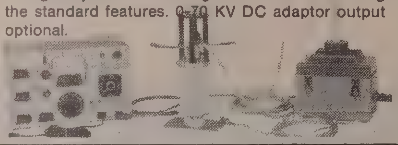
HIGH SPEED VACUUM CONTACTORS
(One Cycle) CIRCUIT BREAKERS



Vacuum switches, single phase, three phase, upright or low profile, for high reliability sealed arc interrupting or crobar shorting. 208V to 200 KV RMS operate. 50 to 4,000 amps continuous, 2,000 to 35,000 amps AC, 10 to 20,000 amps DC interrupt, 5,000 to 100,000 amps momentary and capacitor discharge.

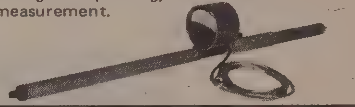
Hi-Pot TEST SETS
0-50 KV RMS, 0-50 KV DC

Specifically designed for testing HV Vacuum Devices as well as HV equipment and insulation. A built-in X-Radiation Monitor, Audible and Visible Breakdown Indicator, Breakdown Counter, and a 0-50 KV RMS Voltage Adjustment with large scale meter are among the standard features. 0-70 KV DC adaptor output optional.

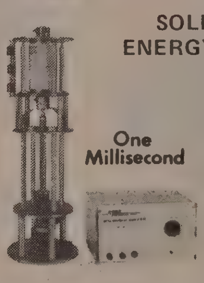


Hi-Z T.M. HV VOLTMETERS
SAFE POWER LINE USE AC - DC

Fully safe portable, all solid state, 2% to 5% accuracy. Taut band shielded high voltage measurement with minimum circuit loading. 0.0001 V to 50 KV AC and DC. Ideal for use with Elbow capacitance tap voltage test points. For cable test point or direct line voltage and phasing, or differential measurement.



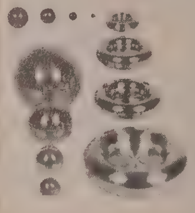
SOLENOID DRIVERS
ENERGY STORAGE UNITS



One Millisecond

For high speed or loss of power automatic circuit breaker trip and for high speed activation of contactor or circuit breaker solenoids. Energy storage up to 400 joules or more at 150 to 700 volts or more, 100 to 4,000 microfarad or more. Instantaneous SCR control available.

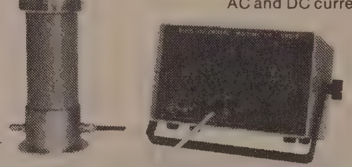
TOROIDS, SPHERES, CORONA SHIELDS



Geometrically designed to avoid excessive voltage gradients at connecting points and other areas needing shielding or balancing of electrostatic fields to increase withstand voltage and minimize corona. Diameters are to international standard metric sizes.

HV DIGITAL MULTIMETERS

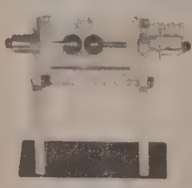
Easy to read, 4½-digit display; 0.05% basic accuracy. 0.0001 volt to 900 KV. Battery/AC with charger. Recorder and scope outputs. DC, AC RMS average, AC RMS true, ohms, megohms, AC and DC current.



WIDE BAND HV VOLTAGE DIVIDERS

Precision compensated resistance-capacitance voltage dividers for 15KV to 900KV, DC to 10MHz or to 0.02μ Sec rise time pulse. 1,000/1 ratio matched to 1 megohm, 20 to 50 pf display or recorder, or as required. Accuracy and stability 0.1% to 3%.

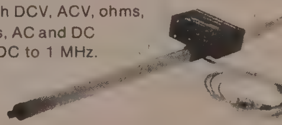
HV ADJUSTABLE SPARK GAPS



Non-melting carbon spheres, 1 cm to 10 cm and heavy wall aluminum spheres, 10 cm and above. Dust tight transparent covers used 1 KV to 88 KV. Open style to 670 KV. Direct reading micrometer type calibrating device.

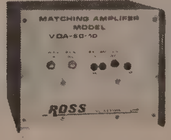
HV DIGITAL PROBES

HV DC, AC, & Wideband DC-1 MHz Safety Probes for any digital display or VTVM. Also available complete with large 4½-digit display 0.1% to 5% AC/DC accuracy, safety handle digital voltmeter. Battery/AC with charger. Removable Digital Display or Multimeter. 0.0001 volt to 200 KV. 0.05% accuracy basic, with DCV, ACV, ohms, megohms, AC and DC current. DC to 1 MHz.



WIDE BAND MATCHING AMPLIFIERS

NEW! Fiber Optics Transmission



AC or rechargable battery/AC operated. DC to 1 MHz. 1 megohm or higher input to 50 ohm load. Cable driver has a maximum output to 10V PK (20V PK to PK) and maximum input of 10V to 1,000V PK direct from signal source. With Ross wide band HV dividers useful from 0.1V to over 900KV.

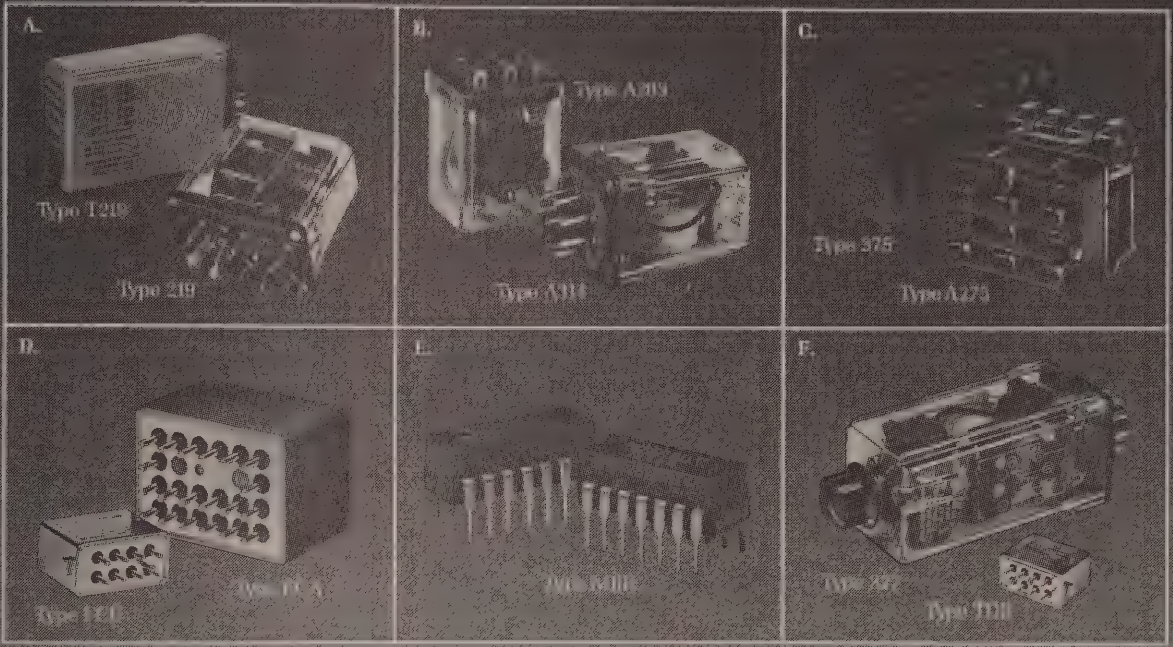
Right relay, right price, right on time.

No sooner said than Struthers-Dunn.



And that's not just a slick slogan — it's an iron-clad promise. You'll get exactly the relay you need at a tough-to-beat price. And you'll get it when or even before you need it. Time after time. You can count on it.

Because nobody can match Struthers-Dunn for relay experience and capability. And nobody will give you a broader choice of relays to match your every cost/performance objective. From low cost commercial/industrial relays to hi-rel military/aerospace relays. And everything in between. Here's the proof:

A. Hi-Rel Industrial Relays. A complete line from 1 to 100 amp for general purpose timing, latching, sequencing and over and under-voltage switching. Open and closed types. Contact arrangements to 6 poles. Plus compact 300-V and 600-V relays, including modular and field convertible relays.

B. Compact, General Purpose Plug-In Relays. Quality, cost-efficient plug-in relays with rectangular or octal base; 1, 2 or 3 poles; 10 amp; AC or DC coils; in open or enclosed styles.

C. Reversing Contactors. Compact, multipurpose contactors and starters for OEM applications. Sizes through 4. Open or enclosed types, with or without overloads.

D. Aerospace/Military Relays. Hermetically sealed relays in both miniature and power types to meet most applicable Mil specs. Low level to 25 amp; 1 to 6 PDT; AC or DC operation.

E. Reed Relays. Miniature and standard size dry reed relays for fast, light load service; plus mercury-wetted contact relays for long-life, no-bounce switching in PC and plug-in mounting models. Built to industrial or Mil specs.

F. Timers. A full range of time-delay relays for industrial or military applications. Range includes on and off delay, square or octal base, fixed or adjustable timing, monitor or repeat cycle, AC or DC input and miniature types. Plus motor, inertial and thermal timers.

Solid State, Hybrid and Special Relays. A wide variety of solid state and hybrid relays, plus custom-designed or modified relays to meet your most specialized application needs.

Available Locally from Your Nearby S-D Distributor. All of the most popular S-D relays are available immediately from the well-stocked shelves of our more than 100 distributor branches. When it comes to relays, no sooner said than Struthers-Dunn. For a copy of our comprehensive catalog and the name and number of your S-D representative or distributor, just give us a call or write Struthers-Dunn, Inc., Lambs Road, Pitman, NJ 08071. (609) 589-7500.

The 815 Series, with a profile slightly higher than the 814, offers increased versatility while maintaining the DIP package approach to hi-density printed circuit applications. Standard part numbers listed are subject to specifications shown for the 814 Series, however, the 815 has the capacity to offer dry reed switches to ½ Amp rating plus up to a 200 VDC max. switching voltage. Optional features include diode suppression, magnetic shielding and electrostatic shielding.

The 816 Series SIP (Single-Inline Package) provides the power handling capabilities of the 815 DIP while taking up less printed circuit board space. Standard part numbers listed are subject to specifications shown for the 814 Series; however, the 816 has the capacity to offer dry reed switches with ratings to 0.5 amps and 200 VDC. Optional features include diode suppression and magnetic shielding.

SPECIFICATIONS — Contact Ratings: 400 VDC, 250 VAC, 1.5 Amp (switching) 6 Amp (carry), 25 Watts, 40 V-A (AC suppressed) 75 milliohm max. initial contact resistance 500 volts peak breakdown. **Temperature:** −55°C to +105°C. **Shock:** 30 G max., 11 ±1 mSec. **Vibration:** 10 G max. @ 0-1700 Hz. **Insulation Resistance:** 10^9 Ohms min. **Capacitance:** 1.5 pf. **Life Expectancy:** Dry ckt., 100 x 10^6 ops; signal level, 50 x 10^6 ops; rated power, 20 x 10^6 ops.
True form C also available.

The relays shown here are just a sampling of the many designs and configurations manufactured by Wabash Relay & Electronics as standard products. We also offer design assistance and custom designed relays through our fully staffed engineering department. Should you require a custom designed relay, here are some parameters to consider:

U.L. and C.S.A. Recognition

Several relay series are recognized under the Component Program of Underwriters' Laboratories. Most of these relays also have C.S.A. recognition. Regardless of which series you are interested in, Wabash Relay can help you obtain the U.L. or C.S.A. recognition your design requires.

Wabash Relay & Electronics Division

1st & Weber Streets, Wabash, Indiana 46992
(219) 563-2191 TWX: 810-290-2722

Prints and specifications, if available, are the best design tool. The minimum information required for Wabash Relay to design a relay is:

Mechanical Specifications

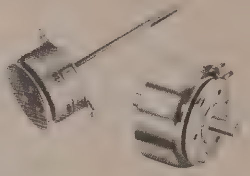
- Maximum length
- Maximum width
- Maximum height above P.C. board
- Pin configuration
- Open or covered
- Type of environment relay will be exposed to
- End Use

Electrical Specifications

- Switch configuration
- Nominal voltage
- Must operate voltage or current
- Must release voltage or current
- Coil resistance
- Switching current
- Contact resistance
- Carry current
- U.L. recognition required
- Special considerations (ESS, low thermal, high insulation resistance, etc.)

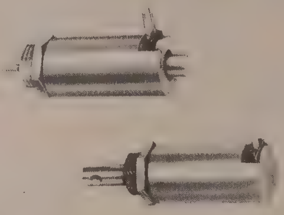
LEDEX® Solenoids

Over 300 choices of standard solenoid designs are available off-the-shelf from Ledex. But, if none of these meet your unique requirements, we'll provide you with custom engineered prototypes. Either way, Ledex offers you the widest variety of solenoids for your design.

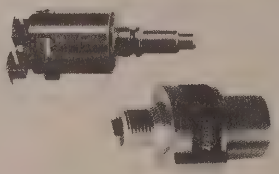


Rotary Solenoids
Step-turn-index-lock-punch-lift. For millisecond fast torque and endurance, specify a Ledex rotary solenoid.

Eight basic sizes, right or lefthand strokes from 10 to 110 degrees. Torque output to 117 pound-inches. Life of over 100 million cycles with endurance engineered models.



Linear Solenoids
Short-medium-long strokes are all available from one source – Ledex. Choose our low profile flat face push/pull for high force/short stroke; our low profile conical face push/pull for medium force/stroke and our tubular solenoids for long strokes. New Series 20 tubular solenoids provide 100 million actuations, quiet operation, push or pull, and economy – from stock. Rugged construction provides accurate repeatability after long usage. Our tubular solenoids have built-in impact cushions to absorb energy at the end of the stroke and electroless nickel plated plungers for longer life.



Custom Designed Solenoids
The Ledex Model 515 Dot Matrix solenoid has a special patented construction to control bounce, is easy to mount, uses standard terminals, operates at 1300 Hz., and has a life of 300 million actuations. Our printhammer solenoid was specially designed for quiet actuation to interface with plastic or metal daisy wheels while delivering variable force depending on the character.

Stepping Solenoids
Step 10-15-20 or 30 degrees with the highest torque a stepping solenoid makes – the Ledex Series 50-L. Square wave pulse drives either the unidirectional or bidirectional model for 10,000,000 steps with a non-accumulative accuracy of ±1°. Direct couple for mechanical ease and avoid linkages. Can be manually overridden in case of power failure.

Proportional Solenoids
Open loop/closed loop, variable position sensing is now possible by using the Ledex proportional solenoid with the Ledex controller for smooth, accurate response. Hydraulic systems can use our wet plunger type which requires no dynamic seals and provides up to 50 pounds force. Do away with pilot stages and expensive servo valves.

D-Frame Solenoids
Ledex D-Frame solenoids offer economical, long term service for users whose needs must be matched by a dependable product and reliable source. Eight standard models are available from stock with strokes up to 1.25". Quick connect terminals and class "B" coils are standard.

SHINDENGEN SOLENOIDS

ROTARY ▪ PUSH/PULL ▪ TUBULAR ▪ HAMMER ▪ OPEN FRAME ▪ PERMANENT MAGNET ▪ LATCHING

STANDARD SOLENOID CONFIGURATIONS

Shindengen's affordable, high performance product offering includes a wide variety of standard solenoids such as rotary, push/pull and tubular types. The rotary solenoids are available with torque output from .12 kg-cm to 113 kg-cm and rotation in 25°, 35°, 45°, 67.5° and 95°. The push/pull types offer short linear strokes with high force capability from 3mm stroke with 450 grams starting force up to 6mm stroke with 45 kg starting force. The tubular line is for longer linear strokes from 12mm stroke with 50 grams starting force to 18mm stroke with 1.75 kg starting force.

marketed in the USA by

DENSITRON CORPORATION

SPECIAL SOLENOID CONFIGURATIONS

These solenoids can be made with Shindengen's technical/manufacturing capabilities to design, develop and produce custom designs to meet your specific performance, quality and price requirements. Some of the many options are: special armature plates, lengthened, flatted and tapped shafts.

SPECIALS

ELECTRO-MECHANISMS, INC., is completely equipped, both engineering and production wise, to supply you with variations of our solenoids that you might need for your application. We are also capable of designing special types that you might need within the size range of our products. We would appreciate the opportunity to help you solve design and application problems you may have in the area of miniature solenoid actuators.

The force charts below represent three different duty cycles.

Nominal voltage represents continuous duty.

2X Nominal voltage represents a 25%, intermittent duty cycle 4X Nominal voltage represents a 6% intermittent duty cycle.

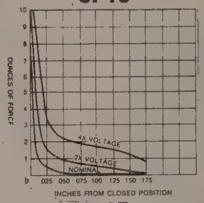
The duty cycle consists of two factors:

1. Percentage of time solenoid is energized in one complete operating cycle.

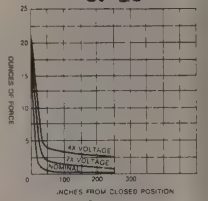
$$\text{(Ref: DUTY CYCLE} = \frac{\text{Time On}}{\text{Time On} + \text{Time Off}} \text{ X 100)}$$

2. Length of time of the longest single energization in one complete operating cycle.

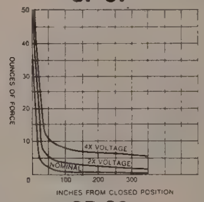
SP18



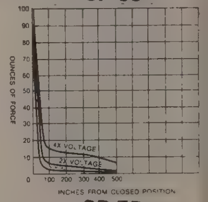
SP-25



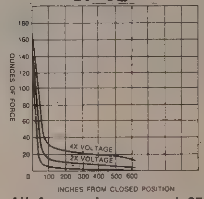
SP-37



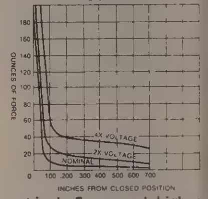
SP-50



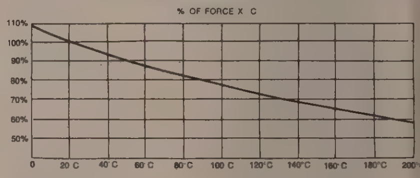
SP-62



SP-75



All forces shown are at 25° ambient. For use at higher ambient temperatures use the chart below to determine force at any given temperature.



FEATURES

ELECTRO-MECHANISMS micro-miniature solenoids offer you static and impact forces equal to standard solenoids 2 to 3 times the size of these units.

Because of their small size, they have extremely fast reaction time. As fast as 2 msec at 4x nominal voltage.

The unique design of PUSH or PULL action, offers many applications beyond the conventional pull type solenoid.

A complete line of 15 solenoids from 3/16″ O.D. to 1.250″ O.D. allows you to choose the correct solenoid with the force you require, from stock items.

The units are highly reliable with life of many millions of operations.

The solenoids are also available with coils in Class F and Class H for high temperature requirements.

Simplicity of design helps keep the costs down and allows us to pass these savings on to you, our customer.

TYPICAL APPLICATIONS

- Hammers for high speed printers
- Camera shutter actuators
- Locking mechanisms for switches, adding machines and typewriters
- Interpossers for card punching and tape perforation
- Cam actuation
- Pen lifters for plotters
- Event markers for chart recorders
- Key actuators for numerical readouts on typewriters and adding machines
- For life testing different devices
- For indicator flags
- Sensing devices
- Remote switching and actuation

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

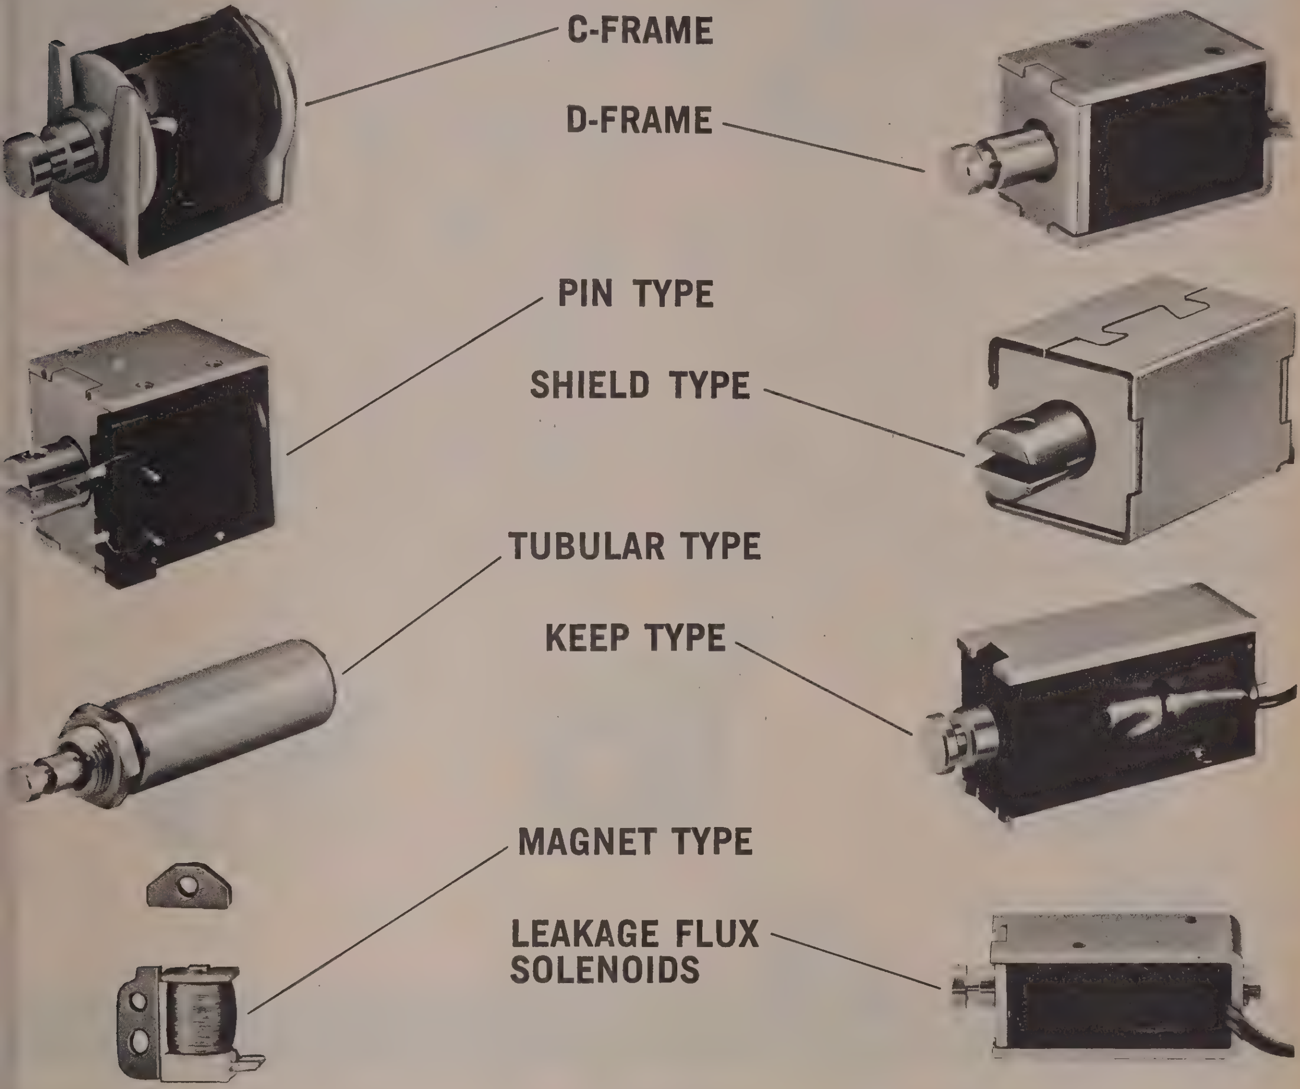
Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

ITT Components

A Unit of ITT Corporation

General Purpose Solenoids Push & Pull Types



FEATURES

- High pull efficiency — 20% greater than conventional electromagnets.
- Enclosed design for increased safety.
- Outstanding reliability — a life exceeding 500,000 cycles of operation.
- Conforms to UL requirements.
- Free from a magnetic leakage, contributing to your compact and high-density set design and planning.
- A wide selection in total travel and width offers move design possibilities.

For more information please write or call and receive a comprehensive catalog.

SPECIFICATIONS

A wide choice of optional features are available to meet varying individual needs.

- COIL FINISH
- COIL RESISTANCE
- CURRENT DRAIN
- DIMENSION
- DUTY CYCLE
- ENVIRONMENTAL PROTECTION
- FORCE
- TERMINATIONS
- TWO COILS
- VOLTAGE
- DC SOLENOIDS
- DIELECTRIC STRENGTH
- INSULATING MATERIALS
- INSULATION RESISTANCE
- KEEP SOLENOIDS
- LEAKAGE FLUX SOLENOIDS
- LIFE
- LINKAGE

Ledex Solenoids & Switches

Solenoids and switches—Ledex has both the products and the people to help you with the quickest and best solutions to your design problems. Our wide selection of stock models lets you get a fast start on your prototype, and our expert engineering staff will work closely with you on custom designs. Ledex is where you'll find helpful solenoid and switch technology.

Solenoids

Rotary solenoids—choose from 250 standard stock models for prototype work. Shipped within 48 hours.

Series 20 tubular push or pull solenoids have life expectancies in excess of 100 million actuations.

Low profile push/pull, flat face, or conical solenoids are built for high force to size, and fast response.

Stepping solenoids—highest torque solenoid available. Extended life up to 10 million cycles minimum on unidirectional models or each direction on bidirectional models.

D-frame solenoids—eight standard models offer economical long term service.

Custom-designed solenoids feature unique construction and designs for special applications.

Pushbutton switches—All models stocked. Individual pushbuttons, flat panel pushbuttons, low profile rotary, binary selector, and keylock switches. Ganged and panel mounted switches with the look and feel of quality, by Rafi of West Germany.

Rotary manual switches provide economy by simplifying circuitry, eliminating auxiliary circuit components and minimizing wiring. Reliable for military and commercial uses.

Stepping switches operate in −55°C to +80°C and switch 1A @ 120 VAC or 2A @ 28 VDC. More switching—less space.

Packaged switches handle high density transfer switching without relays in extreme environments. Meet relevant MIL specs.

Lucas surge suppressors provide sharp breakdown, low slope resistance, and long term voltage stability. They operate between −55°C and +175°C with response times as fast as 1 x 10^{-12} seconds. They feature improved energy ratings over standard zener diodes, and fail safe to short circuit.

Size	½" x 1"	1½" x ¾"	2" x 1"
Force .25 Stroke	1 oz. to 8½ oz.	¼ to 2½ lb.	¾ to 5½ lb.
Shaft diameter, push	.062"	.31"	.44"
Mounting	Thr'd Bushing	Thr'd Bushing	Thr'd Bushing
Weight	.84 oz.	2.6 oz.	6 oz.

For detailed performance curves, write for Series 20 literature.
Stock models available both push and pull, ½", ¾" and 1".

The new Ledex Series 20 offers the economical solution to your long life actuating needs. The solenoid is designed to operate quietly enough for an office environment, with reliability suited to very demanding applications.

A low friction nylon bushing and bobbin assembly provides for a life expectancy which can exceed 100 million actuations. And it sells for less than you would expect to pay. The problem of powdered metal flaking is eliminated through the metal-to-plastic bearing surface construction. The terminal version mates with standard connectors such as Berg Electronics. A special mounting nut is supplied, packed loose.

The Ledex Series 20 is ideal for applications where field servicing is prohibitive. Its high reliability provides definite advantages in applications involving computer peripheral equipment, business machine mechanisms, door interlocks, interposers, and gate releases.

Custom Solenoids—Capability

	Dot Matrix Print Solenoid	Printhammer Solenoid
Force	3 lb. (1.36 kg) min. first pulse	.011 to .019 joules @ 5A typ.
Stroke	.018″ (.5 mm) min. stroke	.150″-.250″ travel
Insulation resistance	1000 megohms min.	1000 megohms
Dielectric	500 VDC min.	500 VDC min.
Coil resistance	5.3 to 5.9 ohms @ 25°C ±2°	1.9 ohm ±1 ohm @ +20°C
Weight	.33 oz. (9.1 gr)	1.14 oz (32 gr)
Life	300 million actuations	200 million actuations
Operating temperature	−10°C to 105°C	+70°C typ.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

- **AC** alternating current
- **A/D** analog to digital
- **ADC** analog to digital converter
- **ADP** automatic data processing
- **AF** audio frequency
- **AFC** automatic frequency control
- **ALGOL** algorithmic language
- **AM** amplitude modulation
- **AND** a logical operator
- **AQL** acceptable quality level
- **ASCII** American national standard code for information interchange
- **AWG** American wire guage

B

- **BALUN** balanced to unbalanced
- **BASIC** beginners' all-purpose symbolic instruction code
- **BCD** binary-coded decimal
- **BNC** baby "N" connector
- **BUS** basic utility system

C

- **CAD** computer aided design
- **CAM** computer aided manufacture
- **CATV** cable television or community antenna television
- **CERMET** ceramic metal element
- **Comm.** communications
- **CMOS** complementary metal-oxide semiconductor
- **CPS** characters per second
- **CPU** central processing unit

D

- **D/A** digital to analog
- **DAC** digital to analog converter
- **DC** direct curent
- **DIL** dual in-line
- **DIP** dual in-line package
- **DPM** digital panel meter
- **DTL** diode transistor logic

E

- **EDP** electronic data processing
- **EBCDIC** extended binary coded decimal interchange code
- **EEPROM** electrically erasable PROM
- **EMC** electromagnetic compatibility
- **EMI** electromagnetic interference
- **EPROM** electrically programmable ROM
- **ESR** equivalent series resistance

F

- **FEP** fluorinated ethylene propylene Copolymar, 200° Teflon
- **FET** field-effect transistor
- **FM** frequency modulation
- **FORTRAN** formula translator

G

- **GaAsFET** gallium arsenide field effect transistor
- **GPIB** general purpose interface bus

H

- **HF** high frequency (3 to 30 MHz)
- **HIPOT** test, measurement and diagnostic equipment
- **HLL** high level language
- **HV** high voltage
- **Hz** Hertz

I

- **IC** integrated circuit
- **IF** intermediate frequency
- **IO** input/output (devices)
- **IR** insulation resistance (or) infrared

J

- **JFET** junction field effect transistor
- **JMOS** junction metal oxide semiconductor

K

- **kHz** kilohertz (10^3 hertz)
- **KSR** keyboard send receive

L

- **LC** inductance capacitance
- **LCD** liquid crystal display
- **LED** light-emitting diode
- **LF** low frequency (30 to 300 kHz)
- **LSI** large scale integration
- **LVDT** linear velocity displacement transformer

M

- **MATV** master antenna television
- **μF** microforad
- **MHz** megahertz
- **MOS** metal oxide semiconductor
- **MOSFET** metal oxide semiconductor field effect transistor
- **MOV** metal oxide varistor
- **MPU** microprocessor unit
- **MSI** medium scale integration

N

- **NBS** National Bureau of Standards
- **NIM** nuclear instrumentation module
- **NOR** not OR

O

- **OEM** original equipment manufacturer
- **OR** a logical operator

P

- **pF** picofarad
- **PC** printed circuit
- **PCB** printed circuit board
- **PIN** positive-intrinsic-negative (transistor)
- **PLA** programmable logic array
- **PPI** plan position indicator
- **PROM** programmable read only memory
- **PUT** programmable unijunction transistor

Q

- **QAM** quadrature amplitude modulation
- **Q (meter)** quality-factor meter

R

- **RAM** random access memory
- **RC** resistance-capacitance
- **RFI** radio frequency interference
- **RMS** root mean square
- **ROM** read only memory
- **RF** radio frequency
- **RFC** radio-frequency choke
- **RFI** radio-frequency interference
- **RTD** resistance-temperature detector
- **RTL** resistor transistor logic
- **RTV** room temperature vulcanizing
- **RW** read/write

S

- **SAS** silicon asymmetrical switch
- **SBC** single board (micro) computer
- **SBS** silicon bilateral switch
- **SCR** silicon-controlled rectifier
- **SIP** single in-line package
- **SSI** small scale integration
- **SSR** solid state relay
- **STL** Schottky transistor logic

T

- **TC** temperature coefficient
- **TCXO** temperature compensated crystal oscillator
- **TFE** tetrafluoride ethylene propylene Copolymer, 250° Teflon
- **TTL** transistor-transistor logic
- **TTY** teletypewriter

U

- **UHF** ultra high frequency (300 MHz to 3 GHz)
- **UL** Underwriters Laboratory
- **UPS** uninterruptible power supply

V

- **VAC** volts (of) alternating current
- **VAR** volt-ampere reactive
- **VCR** video cassette recorder
- **VDC** volts (of) direct current
- **VHF** very high frequency
- **VHSIC** very high speed integrated circuit
- **VLF** very low frequency (3 to 30 kHz)
- **VLSI** very large scale integration
- **VRM** voice recognition module
- **VTVM** vacuum tube volt meter
- **VU** volume unit
- **VSWR** voltage standing wave ratio

W

- **WPS** word processing software

Y

- **YIG** yttrium iron garnet

Two Port Switches

ASCI has peripheral switches that allow any two peripherals to communicate with the same input device. Our 20 models are differentiated by the type of transmission desired (serial or parallel), number of lines switched per connector, and the method of control (manual, in-line data, master port, back-up through handshaking or data and remote control).

ASCI SWITCH
Advanced Systems Concepts, Inc

Four Port Switches

ASCI offers a complete line of four port switches for all kinds of peripherals. Current models include four output port expanders and four input sharers for serial or parallel transmission. We have models for intelligent handshaking, software controllable selection, and manual switching of devices.

ASCI SWITCH
Advanced Systems Concepts, Inc

Multiport Switches

ASCI's multiport switches allow anywhere from one to 32 inputs to communicate with one to 32 outputs. Devices supported range from printers and plotters up to mag tape drives. Control can either be using the in-line data stream, manual operation, remote control signals, handshaking or through a master port. Over 32 models are available.

ASCI SWITCH

Rack Mounted Switches

Any of our two or four port switches can be placed in rack mountable enclosures. Our standard racks can hold 4 of the four port modules or 8 of our two port modules. In addition, configurations are available that allow bank control of all modules in the same enclosure simultaneously.

ASCI SWITCH

Custom Configurations

In addition to our standard line ASCI also designs custom units. These units can consist of simply one of our standard products with special connectors or cabling or a complete configuration with special protocol and handshaking requirements. Since our specialty is peripheral interfacing we're sure to be able to provide the unit that will satisfy your needs.

ASCI can also satisfy your data transmission needs. Call us for information on cabling, line drivers and protocol converters.

For more information call TOLL FREE 1-800-824-7080, TELEX 701-215 (ASCI)

Infra-Ready.

The new Vivisun 20/20 switches are ready for anything, including ANVIS night vision goggles or direct sunlight. A unique optics system eliminates the veiling glare and halo effect of conventional displays. So there is no interference with infra-red imaging. When voltages are trimmed to night vision goggle flying levels, Vivisun 20/20 switches can still be read with the unaided eye.

During the day, Vivisun 20/20 switches are readable in direct sunlight and deadface when not energized. They are also easy to install and have the lowest touch temperature and widest viewing angle in the industry. Clearly, no other Mil-Spec switch can match it. And you can specify your Vivisun 20/20 switches with these options: Dustproof/Dripproof • Split Ground • P.C. Termination • EMI. For more information, write, phone or telex today.

AUGAT® ALCOSWITCH®

Quality and Innovation

DIP SERIES • AUTO-INSERTABLE

- Unique ceramic substrate allows soldering temperatures of 245°C for up to 30 seconds.
- Auto-Insertable using standard TO-116 IC insertion equipment from Amistar, Dynapert, Panasert & Universal. (ADF/ARF Series).
- Gas tight contacts (280,000 PSI).
- Allows wave soldering & aqueous or solvent cleaning without the use of tape seals.
- 2 through 10 poles.
- Matching extended and piano style actuators.
- AR Series features integral thick film pull-up resistors.
- ATT digital attenuator offers 2, 3, 4 or 5 BIT, 50, 75, 150, 500 or 600Ω unbalanced T network.

SPECIFICATIONS

Base: PBT encapsulated ceramic.
Cover and Actuator: PBT 94V-0.
Moving Contact: Gold flashed beryllium copper.
Fixed Contact & Terminal: (AD/AR), Solder coated brass
(ATT), Gold flashed brass.
Operating Force: Less than 800 grams.
Life Expectancy: 5,000 cycles.
Contact Rating: .4VA @ 20 VDC (Max).
Initial Contact Resistance: 50 milliohms maximum.
Insulation Resistance: 100 megohms min. @ 100 VDC.
Dielectric Strength: 500 VAC RMS at sea level.
Operating Temperature: −30°C to +85°C.
Storage Temperature: −45°C to +100°C.
Solder Heat Resistance: 245°C ± 5°C for 30 seconds when mounted on a .060" thick PCB.
Cleaning: Aqueous solution or solvent.

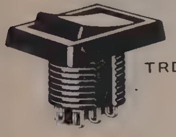
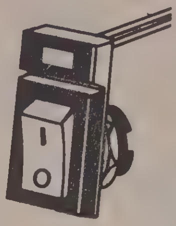
AUGAT® ALCOSWITCH®

Quality and Innovation



TRD23N-1

TRD23P-2



TRD13D-1
(Lighted)

The TRD Series of Rocker/Paddle Switches is the latest in subminiaturization from ALCOSWITCH. Featuring all-plastic construction, 15/32" diameter mounting and all around low profile, the 3 amp @ 120VAC rated switch is ideal for portable and hand held applications.

SPECIFICATIONS: Contact Rating: 3A @ 120VAC (Silver), 0.4VA @ 20VDC (Gold); **Initial Contact Resistance:** 20 milliohms max. **Insulation Resistance:** 1,000 megohms min.; **Dielectric Strength:** 600 volts.; **Life Expectancy:** 100,000 cycles mechanical, 25,000 cycles at full rated load.; **Seal:** Terminals are epoxy sealed.

Rotary Switches

Quality and Innovation

MRS SERIES MINIATURE ROTARY SWITCHES

MRS Series 30° and 36° miniature rotary switches are rated 150 ma @ 115 VAC. Terminals are permanently molded into DAP base. A choice of 1, 2, or 3 poles with adjustable stops up to twelve positions. The MRSE is nonadjustable with an internal O-ring shaft-to-bushing seal and also an outer seal for protection in wet environments. The suffix "S" indicates long shaft and the suffix "PC" indicates printed circuit mounting. Suffix "C" indicates continuous rotation. Suffix "X" indicates shorting (make-before-break) contacts.

DR SERIES ENCODED ROTARY DIP SWITCHES

Rotary DIP switches have internal sealing to allow wave soldering and immersion cleaning. Screwdriver, knob, and shaft types are available in both upright and right angle versions. Contact Rating: 0.4 VA at 20 VDC. Initial Contact Resistance: 50 milliohms max. at 2 VDC. Insulation Resistance: 1000 megohms min. at 100 VDC. Life Expectancy: 20,000 cycles min.

MRSB SERIES PROGRAMMABLE

These 30° and 36° rotary switches are rated 150 ma @ 115 VAC. All models in this series are completely sealed, allowing flow soldering and submersible defluxing without the need for caps, disposable covers, etc. Standard MRSB switches have screwdriver adjust; "K" and "U" versions have built-on aluminum knobs for compactness and ease of operation. The "U" version also allows switching position to be read from edge of PC board. MRSB switches are identical to the standard MRS Series in size and operational features. Models with an "X" suffix have shorting (make-before-break) contacts. All models in this series are non-adjustable.

DIP SERIES DUAL IN-LINE MOUNTING

DIP switches provide high reliability at reasonable cost. All models are designed for soldering onto PC boards or may be optionally used with standard DIP sockets. Terminals and contacts are beryllium copper with gold plated over nickel to assure dependable service for low-energy level use. The low-profile DLS and DLS-SD models have molded-in terminals; all other types have epoxy sealed bases for protection during the soldering operation. The DLS and DLS-SD models are supplied with a protective cover having an "actuator lock" feature that prevents accidental operation and protects the inner mechanism during cleaning cycles. These covers are also available as an option for the DSS models.

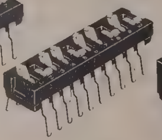
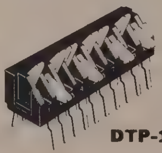
DIP SWITCHES FOR WAVE SOLDERING AND AUTO-CLEANING

DT-02



DT-10

DTP-02



DTP-10

No tape seal required—allows extended actuators. Self-cleaning design allows exposure to dirt and contaminants without failing. Contact Rating: 1 amp at 24 VDC without switching, 100 mA at 5 VDC with switching. Initial Contact Resistance: 30 milli-ohms, max. Operating Temperature Range: −30° C to +85° C. Life Expectancy: 10,000 cycles.

SL SERIES MULTI-POSITION SLIDE SWITCH WITH PC TERMINALS

Designed specifically for PC applications. Save space, installation time and wiring errors. Substitute for rotary switches and other ideal uses. Feature a ball detent for positive tactile feel. Contacts are self-cleaning and terminals are sealed for added protection. Internal construction is similar to the MSS Series.

MSPF SERIES MOMENTARY PUSHBUTTON

Series features large button and 15-32 body. Allows choice of front or rear panel mounting. Unique contact design allows self-leveling, assuring minimum contact resistance. All models have epoxy seals on terminals. Choice of button color.

*Specify color: 0—Black; 2—Red; 6—Blue; 9—White.

MAGNETIC REED PUSHBUTTON SWITCHES

SPST momentary for data processing equipment; ceramic magnets eliminate springs. Contacts are glass-encapsulated reeds for long life; plunger is keyed and non-rotating; metal case withstands abuse. Rated 100 mA at 50 VDC; resistance, 100 milliohms. Contact bounce, 1 msec; plunger travel, ⁵⁄₆₄". Oper. force, 2 oz. Life, 10 million cycles.

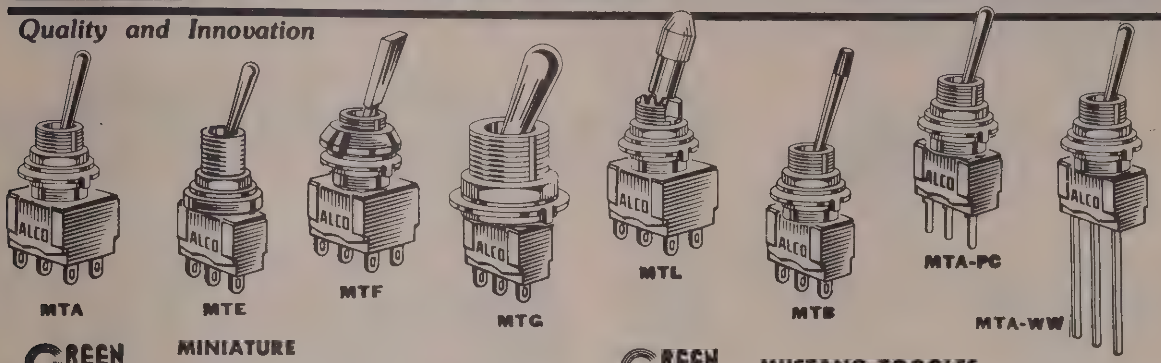
SUBMINIATURE TOGGLE SWITCHES

Quality and Innovation



GREEN SERIES

MINIATURE TOGGLE SWITCHES

All ALCO Green Series miniature switches have molded-in terminals which prevent solder, flux and other contaminants from entering the contact area. All contacts are fine silver. Contacts and terminals have gold finish to inhibit oxidation, prolong shelf life, and facilitate soldering. Green diallyl phthalate case withstands high temperatures. All toggle types are U.L. listed and have anti-push-in lever captivation to prevent accidental damage. All types have ¼"-40 high torque bushings, except MTG series; MTG types have ¹⁵⁄₃₂"-32 bushings. Rated 6 amps at 125 VAC, 3 amps at 250 VAC.

SERIES TT AND TTE 3A SUBMINIATURE TOGGLE SWITCHES WITH LUG TERMINALS

Series TT and **TTE** subminiature toggle switches with silver contacts; rated 3 A @ 125 VAC or 28 VDC; gold flashed solder lug terminals. Choice of ¼-40 or 10-48 threaded bushings. These tiny instrument grade toggle switches can be mounted only ⅜″ apart on panel. Uniform 0.1″ spacing between all terminals and mounting studs permits mounting on standard "perf" boards. **TTE** models have watertight bushings and panel seals.

MST MINIATURE TOGGLE SWITCHES

Slim, bat handle toggle switches for miniature applications with limited back-of-panel clearance. Terminals and contacts are solid silver (center terminal, copper with silver plate). Case material, black phenolic resin; ¼-40 threaded bushing. Rated 6 amps at 125 VAC. Offering high capacity for small size, SPDT and DPDT types have life cycle of over 80,000 on-off operations; 3PDT and 4PDT, over 20,000. High voltage barriers between terminals and contacts; 1 piece body.

POWER ROCKER SWITCHES & PUSHBUTTON SWITCHES

Quality and Innovation

BI-DIRECTIONAL PUSHBUTTON CODE SWITCHES

PICO, SMC and DPS families of bi-directional pushbutton code switches feature instrument grade design. All have heavy gold contacts and life expectancies in excess of one million operations. Mounting clips are integral parts of the end plates. Panel area per switch: PICO, 0.3″W × 0.59″H; SMC, 0.3″W × 0.95″H; DPS8, 0.315″W × 0.95″H; DPS9, 0.35″W × 1.3″H; DPS10, 0.393″W × 1.3″H. Matte black housing, black wheels with white numerals.

Model	Description
PICO-111-AL	Decimal Code (1-of-10)
PICO-131-AK	1-2-4-8 BCD Code
PICO-137-AK	BCD Complement Code
PICO-301-AK	Hexadecimal
PICO-400-AK	SPDT 2-Position Repeating
PICO-A	.100″ Spacer
PICO-P	End Mounting Plates, Molded Clip
B5LS	Connector, 5 contacts
SMC-111-AK	Decimal Code, (1-of-10)
SMC-131-AK	1-2-4-8 BCD Code
SMC-131-AL-AL/D	BCD, Extended PCB for diodes
SMC-137-AK	1-2-4-8 BCD Complement Codes
SMC-137-AL/D	BCD Complement, Ext. PCT
SMC-301-AK	Hexadecimal (16 Positions)
SMC-400-AK	SPDT 2-Positions Repeating
SMC-A	.100″ Spacer, with Mounting Clips
SMC-P/K	End Mounting Plates, Molded Clips
B9LS	Connector, 9 contacts, PC Terminals
B11LS	Connector, 11 contacts, PC Terminals
DPS8-111-AK	Decimal Code (1-of10)
DPS8-131-AK	1-2-4-8 BCD Code
DPS8-137-AK	BCD Complement Code
DPS8-301-AK	Hexadecimal (16 Positions)
DPS8-400-AK	SPDT, Repeating
DPS8-P/W	End Mounting Plate, Flanged
B-9LS	Connector, 9 Contacts, PC Terminals
B-11LS	Connector, 11 Contacts, PC Term.
DPS9-111-AK	Decimal Code (1-of-10)
DPS9-131-AK	1-2-4-8 BCD Code
DPS9-137-AK	BCD Complement Code
DPS9-301-AK	Hexadecimal (16 Positions)
DPS9-400-AK	SPDT, Repeating
DPS9/10-P	End Mounting Plate, Molded Clips
B12LS	Connector, 12 Contacts, PC Term.
DPS10-111-AK	Decimal Code (1-of-10)
DPS10-131-AK	1-2-4-8 BCD Code
DPS10-137-AK	BCD Complement Code
DPS10-301-AK	Hexadecimal (16 Positions)
DPS10-400-AK	SPDT, Repeating
DPS9/10-P	End Mounting Plate, Molded Clip

XRM-210N-09

XRM Series switches snap-mount into rectangular panel holes measuring 0.51″ × 0.76″. Bezels & rockers have matte finish. Contact rating: 10A @ 125VAC, 5A @ 250VAC, 28VDC. UL Listed, VDE approved. Specify 2-digit color code: bezel, then rocker: 0 = Black, 9 = White. (e.g. -0.9 = black bezel with white rocker). Suffix -01 = bar and circle imprint on rocker to indicate ON and OFF positions.

AME SWITCH SEALS

Backed by over 25 years of engineering solutions — for an ever-changing and demanding market.

The wide demand for custom-molded panel and switch seals, threaded inserts bonded to rubber, O-rings, boots and seals, etc., translated is really a demand for talent and know-how to handle the engineering and molding of particularly thorny or unusual custom requirements that frequently plague industry. AME meets the demand. . . with experience, service and unique production techniques.

CUSTOM ENGINEERED PRECISION MOLDED ELASTOMERS

- Color filters for incandescent lamps
- Rubber to metal bonding
- Clear silicone products
- Self-sealing hex nuts
- Self-sealing washers
- Extrusions
- O-rings
- Boots
- Gaskets
- Seals
- Conductive rubber
- Die cutting

MANY OTHER SIZES AND TYPES AVAILABLE

ressure capabilities: Internal Pressure
1 Atmosphere, 15 psi (103.4 kPa)
External Pressure
2 Atmospheres, 30 psi (206.8 kPa)

or Part #1106 — Internal pressure
.7 Atmosphere, 10 psi (69 kPa)
External pressure
1.4 Atmospheres, 20 psi (138 kPa)

ndurance: Exceeds 100,000 actuations (depending on environment).

Jseful life: 20 years to unlimited (depending on nvironment).

witch Seals are designed and manufactured to neet or exceed applicable military specifications.

Switch Seals

An elastomeric boot which seals, thus protecting a switch and internal components against hazardous foreign elements. AME's one piece switch seal is constructed of a flexible rubber boot element bonded during molding to a threaded metal insert that fully encapsulates the switch and bushing to the panel.

This assembly replaces the panel mounting nut and seals the mounting hole making it watertight. It protects against moisture, oil, dirt, dust, most solvents, many acids (see elastomer selection guide).

Switch seals provide vibration resistant mounting and act as double insulation with no interference to switch movement.

CAST URETHANE & SILICONE

AME supplies cast urethane and silicone products precision engineered to meet your most demanding requirements.

If you need high tensile/tear strength, excellent resistance to abrasion and high impact capability, our cast urethane is ideally suited for the job. Superb temperature resistance to the damaging sub-zero cold or searing heat extremes is found in the cast silicone custom engineered by AME Corporation.

Leads	Available in Solder Plating or Gold Flash Plating
Slide Contacts	Beryllium Copper, 10 Microinch Gold Over 100 Microinch Nickel

Note: Certified test reports are available. Ask your K40 contact person for a copy.

CONSTRUCTION DETAILS

Lowest profile dip switch in the world! Same size as a standard integrated circuit package, allowing _automatic insertion_ with existing equipment.

The lead frame is molded into the housing to provide a one piece, no-leak construction. The cover is ultrasonically welded to the housing after the switch is assembled. The top is sealed with easily removable tape.

Slides are bifurcated, lowering contact resistance and improving contact reliability since there are *two independent,* gold plated, *contacts at each switch point.*

Slides are also available in a non-bifurcated, cross-bar contact configuration, providing the same low contact resistance as the bifurcated version.

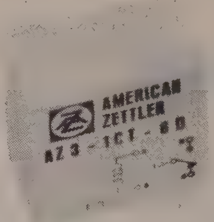
SERIES AZ 3

SPDT Contacts to 10 Amps

L: 1.21″
W: 0.75″
H: 1.19″



FEATURES

- Compact Size
- Coils to 48 VDC
- Contacts Rated at 3, 5, or 10 Amps
- Life Expectancy 200,000 Operations
- PC Board Mounting
- UL File #E43203; CSA File #LR 36664

Contact Arrangement:	SPDT (1 Form C)
Contact Rating:	Noninductive load
Light Duty:	Max. switched power: 90 W or 360 VA Max. switched current: 3 Amps Max. switched voltage: 150 VDC or VAC
Medium Duty:	Max. switched power: 150 W or 600 VA Max. switched current: 5 Amps Max. switched voltage: 150 VDC or VAC
Heavy Duty:	Max. switched power: 280 W or 1200 VA Max. switched current: 10 Amps Max. switched voltage: 150 VDC or VAC
Contact Material:	Light Duty: Silver-Nickel, gold plated Medium Duty: Silver-Nickel alloy Heavy Duty: Silver-Nickel alloy
Operate Time:	20 ms at nominal coil voltage (typical)
Release Time:	20 ms at nominal coil voltage (typical)
Dielectric Strength:	1500 Vrms; 750 Vrms contact to contact
Coil Power	
At Pick Up Voltage (typical):	Light and Medium Duty: 70 mW Heavy Duty: 150 mW
Max. Continuous Dissipation:	2 W at 20°C (68°F) ambient
Life Expectancy:	Mechanical: 5 million operation Electrical: Light Duty: 2x10⁵ @ 3 A, 28 VDC/120 VAC Medium Duty: 2x10⁵ @ 5 A, 28 VDC/120 VAC Heavy Duty: 2x10⁵ @ 10 A, 28 VDC/120 VAC

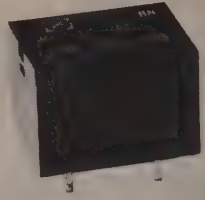
SERIES AZ 4

SPDT Up to 5 Amp Contacts

L: 0.866″
W: 0.635″
H: 0.640″



FEATURES

- Subminiature Size
- DC Coils to 48 VDC
- PC Board Terminals
- Extremely Low Cost
- 3 and 5 Amp Contacts
- Rugged Construction for High Reliability
- UL File #E43203.
- Epoxy Sealed for Automatic Wave Soldering

Contact Arrangement:	SPDT (1 Form C)
Contact Rating:	Noninductive load
Light Duty:	Max. switched power: 90 W or 360 VA Max. switched current: 3 Amps Max. switched voltage: 60 VDC or 250 VAC
Heavy Duty:	Max. switched power: 150 W or 600 VA Max. switched current: 5 Amps Max. switched voltage: 60 VDC or 250 VAC
Contact Material:	Light Duty: Silver Alloy Heavy Duty: Silver cadmium oxide
Life Expectancy:	Mechanical: 10 million operations Electrical: 10⁵ operations at rated load
Contact Resistance (typical):	50 milliohms initially
Operate Time:	6 ms at nominal coil voltage (typical)
Release Time:	2 ms at nominal coil voltage (typical)
Dielectric Strength:	Contact to contact: 750 Vrms Contact to coil: 1500 Vrms
Coil Power	
At Pick Up Voltage (typical):	230 mW
Max. Continuous Dissipation:	1.6 W @ 20°C (68°F) ambient

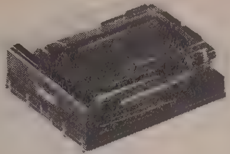
DPDT, 4PDT Dry Circuit to 2 Amp Contacts

UL CSA



2 POLE	4 POLE
L: 1.200″	L: 1.200″
W: 0.826″	W: 0.965″
H: 0.458″	H: 0.458″

FEATURES

- Low Profile For Compact Board Spacing
- DC Coils to 48 VDC
- Life Expectancy to 100 Million Operations
- Standard PC 0.2″ Grid Spacing
- Contact Resistance Less Than 50 Millioms
- Welded Bifurcated Contacts
- Both Form C and Form D Contacts Available
- Epoxy Sealed "Process-Proof" Version Available
- UL File #E43203; CSA File #LR36664
- Meets FCC 1500V Surge Requirement

Contact Arrangement: DPDT (2 Form C) bifurcated
4PDT (4 Form C) bifurcated
Form D also available

Contact Rating: Noninductive load — Form C contact
2 Amp @ 30 VDC
0.5 Amp @ 125 VAC

Contact Material: Fine silver, gold clad
Other material available upon request

Life Expectancy: Mechanical: 100 million operations

Electrical:	Unsealed	Sealed
1 A @ 26 VDC	5x10⁶ ops	10⁶ ops
2 A @ 26 VDC	10⁶ ops	2x10⁵ ops

Contact Resistance: 50 milliohms initially
200 milliohms at end of life

Operate Time: 10 ms at nominal coil voltage (typical)

Release Time: 4 ms at nominal coil voltage (typical)

Dielectric Strength (initial): 1000 Vrms; 1000 Vrms across contact gap; 1500 Vrms contact to coil

Coil Power
At Pick Up Voltage (typical): 2 pole: 190 mW
4 pole: 310 mW
Max. Continuous Dissipation: 1.6 W @ 20°C (68°F) ambient
1.2 W @ 40°C (105°F) ambient

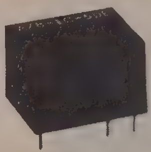
Epoxy Sealed SPDT Up to 6 Amps

UL CSA

L: 0.83″
W: 0.63″
H: 0.56″



FEATURES

- Subminiature Size
- Coils to 48 VDC
- Epoxy Sealed for Automatic Wave Soldering
- Contacts Rated at 3 or 6 Amps
- Life Expectancy to 20 Million Operations
- Extremely Low Cost
- UL File #E44211; CSA File #LR36664
- Suitable for Class B Applications

Contact Arrangement: SPDT (1 Form C)

Contact Rating: Noninductive load
Light Duty: Max. switched power: 100 W or 600 VA
Max. switched current: 3 Amps
Max. switched voltage: 30 VDC/300 VAC
U.L. Rating: 2 A @ 28 VDC or 120/300 VAC; ⅛ HP @ 120 VAC; Standard Pilot Duty @ 120/240 VAC
Heavy Duty: Max. switched power: 170 W or 1800 VA
Max. switched current: 6 amps
Max. switched voltage: 30 VDC/300 VAC
U.L. Rating: 6 A @ 28 VDC or 120/300 VAC; ⅛ HP @ 120 VAC; Standard Pilot Duty @ 120/240 VAC

Contact Material: Light Duty: Fine silver, gold plated
Heavy Duty: Silver nickel, gold plated

Life Expectancy: Mechanical: 20 million operations
Electrical:
Light Duty: 1x10⁵ — 3 A 120 VAC
5x10⁵ — 3 A 24 VDC
Heavy Duty: 1x10⁵ — 6 A 24 VDC or 120 VAC

Operate Time: 5 ms at nominal coil voltage (typical)

Release Time: 3 ms at nominal coil voltage (typical with no coil suppression)

Dielectric Strength: 750 Vrms contact to contact
2000 Vrms contact to coil

Coil Power
At Pick Up Voltage (typical): Standard version: 210 mW
Sensitive version: 110 mW
Max. Continuous Dissipation: 1.5 W @ 20°C (68°F) ambient
Temperature Rise: 75°C per Watt (typical)

- Current and Voltage Sensitive Coils Available
- Dry Circuit, 2 Amp, 5 Amp, or 10 Amp Contacts
- Form A, B, C and D Contacts Available
- Solder/plug in or PC Terminals
- Hydrogen Annealed Iron Magnetic Circuit
- Molded Comb Eliminates Phenolic Dust Inside Relay
- Balanced Spring-held Armature Allows Dependable Operation in Any Position
- Round Core and Larger Coil Volume Provide More Pull Force
- UL File #E43203; CSA File #LR36664; VDE 0110 Gr. A

Contact Arrangement:	2, 4, or 6 Form C; 6 or 8 Form A or B; 2 or 4 Form D available
Contact Rating:	Noninductive load — U.L. Rating
Code: WL	Fine silver, gold plated 3 Amp at 26 VDC or 115 VAC
Code: WH	Silver cadmium oxide, gold plated 7.5 Amp at 26 VDC or 115 VAC
Code: 10L, 40L	Fine silver, gold plated 2 Amp at 26 VDC; 1 Amp at 115 VAC
Life Expectancy:	Mechanical operations: 100 million Electrical: 1x10^6 at 2 A, 30 VDC or 120 VAC (Code WL) 1x10^5 at 5 A, 30 VDC or 120 VAC (Code WH)
Contact Resistance:	50 milliohms initially (typical)
Operate Time (typical):	10 ms at nom. coil voltage
Release Time (typical):	3 ms at nom. coil voltage with no coil suppression
Dielectric Strength (initial):	1000 Vrms between all points 1500 Vrms versions available
Coil Power	
At Pick Up Power (typical):	40 mW per pole (sensitive version) 25 mW per pole available
Max. Continuous Dissipation:	2.6 W @ 20°C (68°F) ambient 2.0 W @ 40°C (105°F) ambient
Temperature Rise:	30°C (86°F) per Watt (typical)

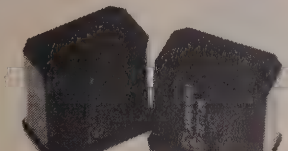
"It's a better relay"

AMERICAN ZETTLER, INC.

16881 Hale Avenue, Irvine, California 92714 (714) 660-1670 • Telex 67-8472

SERIES AZ 2420

DPDT or 4PDT
Dry Circuit to 7.5 Amp Contacts



2 POLE
L: 0.980″
W: 0.750″
H: 1.200″

4 POLE
L: 1.210″
W: 0.750″
H: 1.200″

FEATURES

- Epoxy Sealed for Automatic Wave Soldering and Cleaning
- Life Expectancy to 100 million operations
- Current and Voltage Sensitive Coils available
- Dry Circuit, 3 Amp, or 7.5 Amp Contacts
- UL File #E43203; CSA File #LR 36664

Contact Arrangement: DPDT (2 Form C)
4PDT (4 Form C)

Contact Rating: Noninductive Load — U.L. Rating
Dry Circuit Version: 2 A @ 28 VDC or 115 VAC
Light Duty Version: 3 A @ 28 VDC or 115 VAC
Heavy Duty Version: 7.5 A @ 28 VDC or 115 VAC

Contact Materials: Dry Circuit: Fine silver, gold plated
Light Duty: Fine silver, gold plated
Heavy Duty: SCO, gold plated

Contact Resistance: 50 milliohms max. initially

Life Expectancy: Mechanical: 500 million operations
Electrical:
Standard coils: 1.5 x 10^6 @ 2 A, 28 VDC or 115 VAC for light duty versions
2 x 10^5 @ 5 A, 28 VDC or 115 VAC for heavy duty versions

Operate Time: (typical) 10 ms at nominal coil voltage

Release Time: (typical) 3 ms at nominal coil voltage with no coil suppression

Dielectric Strength: 1500 Vrms coil to contact
1000 Vrms all other points

Coil Power: (typical) At Pick Up Power
Standard Version: 450 mW
Sensitive Version: 80 mW @ 2 pole;
180 mW @ 4 pole

Max. Continuous Dissipation: 2.6 W @ 20°C (68°F) ambient
2.0 W @ 40°C (105°F) ambient

Temperature Rise: 30°C (86°F per watt (typical)

Coil Temperature: Max. 105°C (220°F)

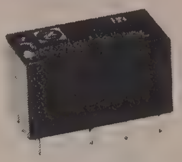
SERIES AZ 820

DPDT, Up to 2 Amps Bifurcated Contact



DIP PACKAGE
L: 0.820″
W: 0.420″
H: 0.455″

FEATURES

- Low Profile for Compact Board Spacing
- DC Coils to 48 VDC
- Life Expectancy to 10 Million Operations
- Standard PC 0.1″ Grid Terminal Spacing
- Fits Standard 16 Pin IC Socket
- Epoxy Sealed for Automatic Wave Soldering and Cleaning
- Meets FCC Requirements for Open Contacts
- UL File #E43203; CSA File #LR 36664

Contact Arrangement:	DPDT (2 Form C) Bifurcated Contact
Contact Rating:	Noninductive load Max. switched power: 30 W or 60 VA Max. switched current: 2 Amps Max. switched voltage: 150 VDC or VAC
Contact Material:	Silver palladium, gold plated
Life Expectancy:	Mechanical: 10 million operations Electrical: 5x10^5 @ 1 A, 30 VDC 2x10^5 @ 0.5 A, 120 VAC
Dielectric Strength (initial):	1200 Vrms; 500 Vrms between open contacts
Contact Resistance (typical):	50 milliohms initially 200 milliohms at end of life
Operate Time:	5 ms at nominal coil voltage (typical)
Release Time:	2 ms at nominal coil voltage (typical with no coil suppression)
Coil Power	
At Pick Up Voltage (typical):	250 mW
Max. Continuous Dissipation:	1.05 mW @ 20°C (68°F) ambient 0.84 W @ 40°C (105°F) ambient
Temperature Rise:	95°C per Watt (typical)

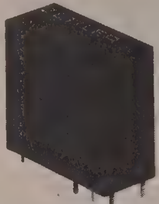
Double Pole — 8 Amp
High Dielectric — 4000 Vrms
Complete International Approvals



L: 1.110″
W: 0.496″
H: 1.030″

FEATURES

- Dielectric Strength 4000 Vrms Coil to Contact
- Isolation Spacing Greater Than 8mm
- Approvals/Standards Include UL, CSA, VDE, IEC, CEE, SEMKO
- Double Pole — Forms A, B, C Available
- 8 Amp Switching
- Life Expectancy to 30 Million Operations
- Slimpak™ Version Saves Board Space
- Epoxy Sealed Version for Automatic Wave Soldering and cleaning
- UL File #E44211; CSA File #LR36664; VDE4120-4940-4002/A1

Contact Arrangement:	DPDT (2 Form C); other forms optional
Contact Rating:	Noninductive load Max. switched power: 240 W or 1500 VA Max. switched current: 8 Amp, 51 Amp for 2 ms Max. switched voltage: 150 VDC or 250 VAC U.L. Rating: 8 Amp @ 24 VDC or 115 VAC 1/8 HP 120 VAC Motor Load
Contact Material:	Silver cadmium oxide
Life Expectancy:	Mechanical: 30 million operations Electrical: 10^5 @ 8 Amp 30 VDC $2x10^5$ @ 8 Amp 115 VAC or 6 Amp 220 VAC
Contact Resistance:	100 milliohms max. initially 200 milliohms at end of life
Operate Time:	8 ms at nominal coil voltage (typical)
Release Time:	4 ms at nominal coil voltage (typical with no coil suppression)
Dielectric Strength:	4000 Vrms contacts to coil 2500 Vrms contact to contact 1000 Vrms between open contact
Coil Power:	
At Pick Up Voltage (typical):	Standard Coil: 350 mW Sensitive Coil: 250 mW
Max. Continuous Dissipation:	1.9 W @ 20°C (68°F) ambient 1.45 W @ 40°C (105°F) ambient
Temperature Rise:	42°C (108°F) per Watt (typical)
Coil Temperature:	Max. 105°C (220°F)

SERIES 10

DIP REED RELAY
SPST, SPDT, DPST
3W & 10W Contacts

L: 0.750″
W: 0.310″
H: 0.275″

FEATURES

- 8 Pin Dual-in-line Package
- Form A and C Contacts
- DC Coils to 24 VDC
- Available with or without diode

Contact Rating: (Resistive Load)	**1 Form A (SPST-NO)** 10 W DC max. switched power 0.5 A max. switched current 1.5 A max. carrying current 100 VDC max. switched voltage
	2 Form A (DPST-NO) 3 W DC max. switched power 0.2 A max. switched current 0.5 A max. carrying current 28 VDC max. switched voltage
	1 Form C (SPDT) 3 W DC max. switched power 0.25 A max. switched current 0.5 A max. carrying current 28 VDC max. switched voltage
Life Expectancy: (Resistive Load)	**Form A Contacts** 10 x 10⁶ at rated load 200 x 10⁶ at low level
	Form C Contacts 5 x 10⁶ at rated load 50 x 10⁶ at low level
Contact Resistance:	200 milliohms max. initially
Dielectric Strength:	200 VDC across open contact 1000 VDC coil to contact
Operate Time: (typical)	0.25 ms at nom. coil voltage
Release Time: (typical)	0.25 ms at nom. coil voltage
Coil Temperature:	105°C (220°F) max.

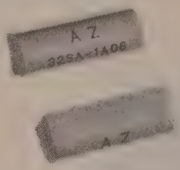
SERIES 30

REED RELAY
SPST, SPDT
3W and 10W Contacts



L: 1.000″
W: 0.340″
H: 0.375″

FEATURES

- SIP — .200″ Grid
- Form A and Form C Contacts
- Contacts Rated at 3W and 10W
- DC Coils to 48 VDC
- Rugged Molded Case
- Epoxy Encpsulated Package
- Maximum Performance at Minimum Cost
- High Quality Switch Insures Stable Contact Resistance

Contact Rating: (Resistive Load)	**1 Form A (SPST — NO)** 10 W DC Max. switched power 0.5 A Max. switched current 1 A Max. carrying current 200 VDC Max. switched voltage
	1 Form C (SPDT) 3 W DC Max. switched power 0.25 A Max. switched current 0.5 A Max. carrying current 28 VDC Max. switched voltage
Life Expectancy: (Resistive Load)	**Form A Contact** 10 x 10⁶ at rated load 100 x 10⁶ at low level
	Form C Contact 5 x 10⁶ at rated load 50 x 10⁶ at low level
Contact Resistance:	200 milliohms max. initially
Dielectric Strength:	500 VDC across open contact 1000 VRMS coil to contact
Operate Time: (Typical)	Form A: 0.5 ms at nom. coil voltage Form C: 0.5 ms at nom. coil voltage
Release Time: (Typical)	Form A: 0.1 ms at nom. coil voltage Form C: 0.5 ms at nom. coil voltage
Coil Temperature:	105°C (220°F) max.

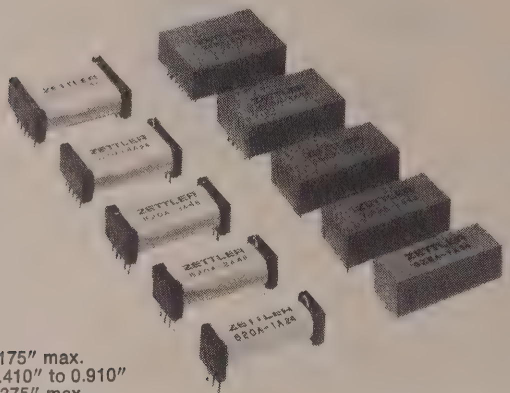
SERIES 60

REED RELAY
Contacts to 6 Form A, 4 Form C
3W & 10W Contacts



L: 1.175″ max.
W: 0.410″ to 0.910″
H: 0.375″ max.

FEATURES

- Form A and Form C Contacts
- Contcts Rated at 3W and 10W
- DC Coils to 48 VDC
- Unsealed or Epoxy Encapsulated Versions Available
- Maximum Performance at Minimum Cost
- High Quality Switch Insures Stable Contact Resistance

Contact Rating: (Resistive Load)	**Form A (1, 2, 3, 4, 6 poles)** 10 W DC max. switched power 0.5 A max. switched current 2 A max. carrying current 200 VDC max. switched voltage
	Form C (1, 2, 3, 4 poles) 3 W DC max. switched power 0.25 A max. switched current 1 A max. carrying current 28 VDC max. switched voltage
Life Expectancy: (Resistive Load)	**Form A Contact** 10 x 10^6 at rated load 200 x 10^6 at low level
	Form C Contact 5 x 10^6 at rated load 50 x 10^6 at low level
Contact Resistance:	200 milliohms max. initially
Dielectric Strength:	300 VDC across contact gap 500 VDC all other points
Operate Time: (typical)	**Form A:** 0.5 ms at nominal coil voltage **Form C:** 0.5 ms at nominal coil voltage
Release Time: (typical)	**Form A:** 0.1 ms at nominal coil voltage **Form C:** 0.5 ms at nominal coil voltage
Coil Temperature:	Max. 120°C (249°F)

AMP Dual In-Line Package Switches

Features: ■ High Density — Low profile, compact design requires a minimum of pc board area ■ Available in standard, low profile, right angle, multipole and LED versions ■ Simple Operation — Rocker actuators instantly change program ■ Easy Mounting — Switches can be flow-soldered directly to pc board or simply inserted into DIP headers or IC packaging receptacles ■ Low profile switches available with sealing tape to keep out contaminants during assembly operations ■ Economical — Board mounted switches eliminate the need for interconnection wiring to perform switching functions ■ High Reliability — Fully enclosed design protects contact surfaces from environmental hazards. Optional transparent cover is also available ■ Versatile Application — Switches furnished in various sizes, ranging from 2 to 12 positions

AMP Programmable Dual-in-Line (DIP) Shunt

Features: ■ Very low profile — .079 above board ■ Low cost tamper-proof programming ■ Housings made of UL recognized, 94V-0 rated, glass-filled thermoplastic polyester ■ Large current capacity — 5 amperes (one conductor) ■ Hand tool available for programming shunts ■ Cut straps can be reconnected; by solder bridging, then reopened; by use of solder wick ■ No extra space required for end-to-end mounting ■ Ideal for volume requirements of similar programs ■ Can be supplied pre-programmed

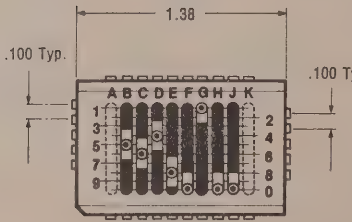
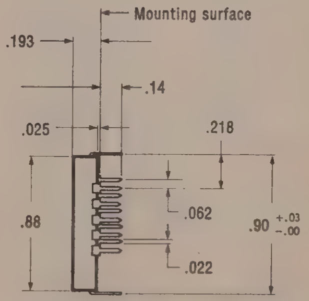
Mini-Matrix Slide Switch

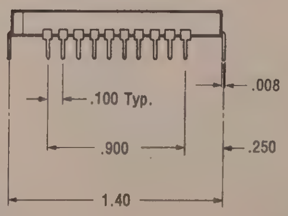
Specifications

Electrical Specifications
Contact Current Rating: Switching — 100 mA at 28 VDC, max.; 0.5 mA at 50 mVDC, min. Non-switching — 500 mA at 28 VDC, max.
Contact Resistance (Dry Circuit): Less than 100 mOhm
Insulation Resistance: 1 x 10^{10} Ohms min. at 100 VDC
Dielectric Withstanding Voltage: 300 VDC, min.
Cycle Life: 5000 detents/slide, min.

Material Specifications
Structural Plastic: UL recognized, 94V-0 rated, glass-filled thermoplastic
Column and Row Buses: Copper alloy, contact areas gold plated
Slide Springs and Contacts: Beryllium copper, gold plated







Switch Configuration	Slots Omitted*	Switch Part Number
10 x 10	—	436270-1
9 x 10	A	436270-2
8 x 10	A, K	436270-3
7 x 10	A, B, K	436270-4
6 x 10	A, B, J, K	436270-5
5 x 10	A, B, C, J, K	436270-6
4 x 10	A, B, C, H, J, K	436270-7

*Slots are omitted for unused slide locations.

Note: An 8 x 10 switch is shown here. Other Mini-Matrix Slide Switches have the same dimensions, but fewer or more slides.

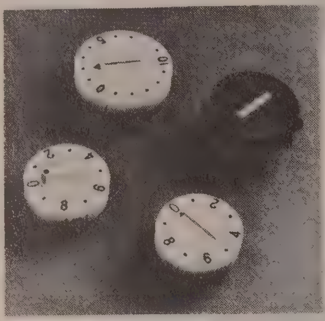
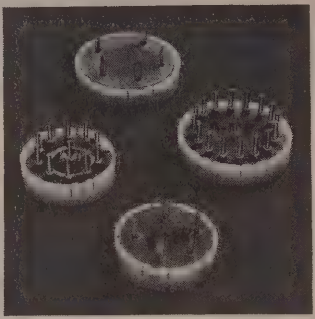
Printed Circuit Board Rotary Switches

6000 Series With Screw Driver Slot, Bar Type Knob, Thumb-wheel Actuation





■ Compact Design — Small diameter, low profile switches are ideal for pc board mounting ■ Wide Choice of Outputs — 8 position binary coded octal, 10 position binary coded decimal, 16 position hexadecimal and 8, 10 or 16 position single pole ■ Versatile Application — Available styles include slotted version for screwdriver or coin actuation, plus bar-type knob and thumbwheel versions for hand rotation ■ Economical — Board mounting eliminates need for input/output wiring to perform switching functions ■ Positive Switching — Contacts have positive detent action; all switch positions easily identified by large readable numerals ■ Optimum Reliability — Fully enclosed design protects contact surfaces from dust, dirt and other environmental contaminants

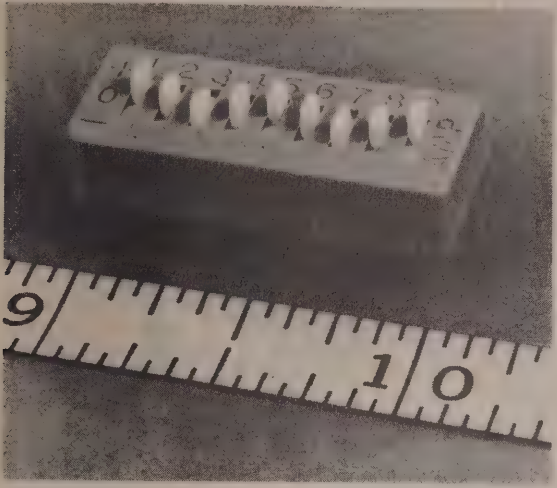
3 x 9 Slide Switch 7800 Series



Part No. 436172-2

Features

- 9-pole, double throw configuration
- Used for logic level applications or for controlling AC/DC circuits
- Nine separate 3 position slide switches
- Fits .100 x .300 [2.54 x 7.62] centerline standard DIP headers
- Can be soldered directly to pc board
- 19,683 code variations

Electrical Characteristics

Current Rating:
Nonswitching — 1.5 amperes, max. @ 50 VDC (resistive load), 40°C rise
Switching — 100 milliamperes, max. @ 5 VDC (resistive load); 25 milliamperes, max. @ 24 VDC (resistive load)

Contact Resistance, Dry Circuit:
50 milliohms, max. initial 100 milliohms, max. at end of durability

Temperature Rise (Nonswitching):
40°C, max. from ambient

Insulation Resistance:
1 x 10^{11}, min. initial
1 x 10^{9}, min. after environmental testing

Dielectric Withstanding Voltage:
500 VAC, min. @ standard atmospheric conditions

Capacitance:
5 picofarads, max.

Mechanical/Environmental Characteristics

Actuation Force:
10-40 ounces [2.78-5.56 N]

Solderability:
AMP Spec. 109-11-5

Vibration:
10-2000-10 Hz traversed in 20 minutes at .06 inch [1.52 mm] total excursion; AMP Spec. 109-21, Cond. E with 0.1 ampere applied

Shock:
50 G's @ 11 milliseconds AMP Spec. 109-26, Cond. A

Durability:
100 cycles

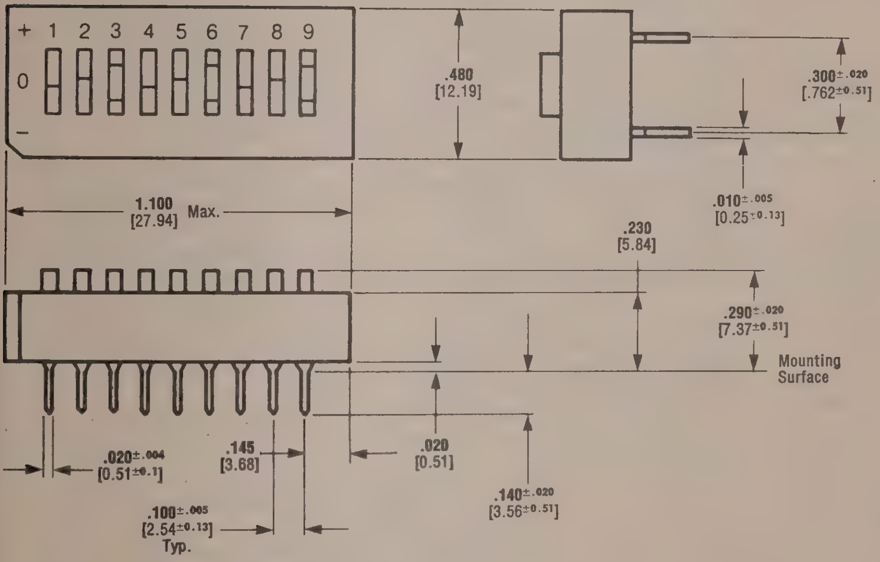
Terminal Strength:
Pull — 2 lb. [8.9 N] axial
Bend — Two 45° bend cycles

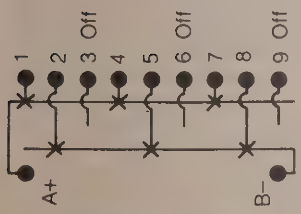
Thermal Shock:
5 nonoperating cycles @ −67°F to +225F° [−55°C to 107°C]

Humidity:
40°C and 95% RH for 96 hr.

Operating Temperature:
−40°F to +190°F
[−40°C to +88°C]

Nonoperating Temperature:
−100°F to +275°F
[−73°C to +135°C]





Contact Arrangement

Materials

Case and Base:
Polyester, glass filled

Slide:
Polyester

Spring contacts and Leads:
Copper alloy; plating in accordance with AMP Product Specification 108-7047

Request Catalog No. 80-592

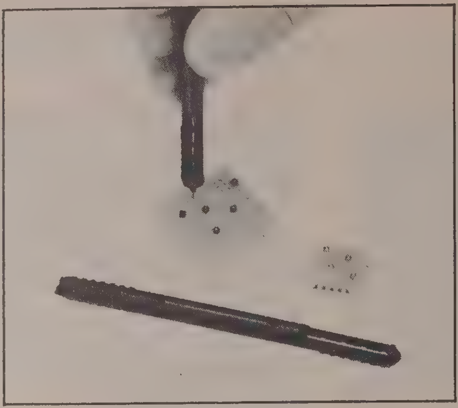
AMP Miniature Pinboards



Features: ■ Provides up to 100 crosspoints in a minimum space ■ Can be machine soldered to pc boards ■ Contact terminals and programming holes on .100 [2.54] centerlines ■ Very low profile — extends only .230 [5.84] above pc board ■ Pin program is easily discernable for rapid program checking ■ Available in 10 x 10 and 5 x 5 sizes ■ Inexpensive insertion tool makes shorting pin insertion simple and economical

Request Catalog No. 80-561

Specifications:

Electrical Characteristics

Current/Voltage (non-switching): 125 VAC or DC at 2.0 amperes, max.
Contact Resistance: 20 milliohms, max.
Insulation Resistance: 1 x 10^6 ohms, min.
Dielectric Withstanding Voltage: 500 VAC (RMS), 200 VDC
Capacitance: 10 picofarads, max.

Mechanical Characteristics

Insertion Force (shorting pins): 10 lb. max.
Extraction Force (shorting pins): 16 oz. min.

Environmental Characteristics

Operating Temperature: −32° to +158°F [−35.6° to +70°C]
Storage Temperature: −55 to +105°C

Materials

Panel: Thermoplastic Urethane
Lead Frame: Phosphor Bronze, gold over nickel plated
Shorting Pin Bodies: Brass, gold over nickel plated
Shorting Pin Insulating Caps: Glass Filled PBT

Hand Tool with Program Pins (Disposable)

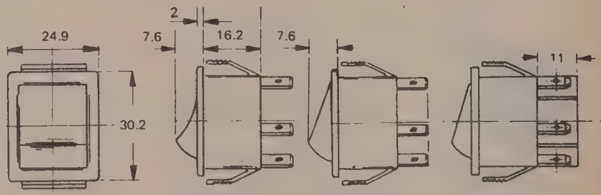
Panel thickness between .75 and 3.3mm.

Curved Rocker
'V'

Flat Rocker
'F'



Curved Rocker Flat Rocker With M441 Terminal Barrier

Standard rocker and body colors black, white and red.
Models 1453 and 1553 lens colors red, amber or green — voltages 125V or 250V.
For other cut-out sizes, consult factory.

SEE OTHER "EEM" PAGES 1B•1026 - 1B•1028 FOR INDICATOR LIGHTS.

ARCOLECTRIC CORPORATION

1800 SERIES LEVER SWITCHES

SINGLE POLE 10(3)A 250V ~

Switch Type			Cat. No.
C1800N		ON/OFF	**1800**
		ON/OFF Momen. on	**1801**
C1810H		2-Position	**1810**
		3-Position centre off	**1820**

DOUBLE POLE 10(3)A 250V ~

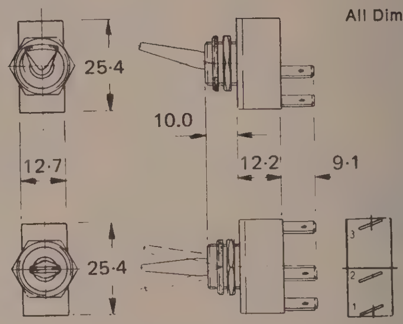
Switch Type			Cat No.
 C1850G		ON/OFF	**1850**
		2-Position	**1860**
C1860H		3-Position centre off	**1870**

The following data applies to 1800 single and double range switches:

Initial Contact Resistance: Generally less than 5 milliohms.
Insulation Resistance: Greater than 100 megohms.
Voltage Withstand: Greater than 1.5 KV.
Life Expectancy: In excess of 10,000 cycles at rated current.
For other approvals and 15 AMP version — contact factory.

DIMENSIONS

All Dimensions in mm.



Fixing necks screwed:

$\frac{11.79}{11.68}$ mm dia. x 32 TPI Whit.
and will fit a 12.7mm dia. panel hole.

Max. panel thickness: 3.5mm. This may be increased by omitting back nut.

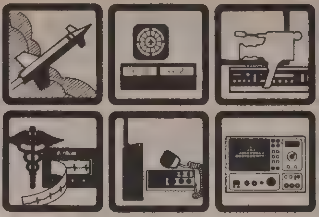
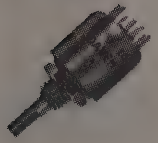
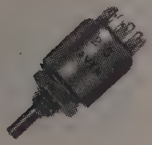
Miniature Switches



NEW!



C, G/K & 126/127 Series



NEW!

P Series

½ Inch C Series (Die Cast)

Competitively Priced

Subminiature C Series rotary switches are available in one pole, (2- to 12-position) through four pole, (2- and 3-position) types.

- ☐ Internal construction identical to military switches for long life
- ☐ Indexing: 30°, 36°, 45°, 60°
- ☐ Shorting or non-shorting
- ☐ Pin compatible with other major manufacturers

Ask for Bulletin 14/C-STD

½ Inch G/K Series

Military Approved

Subminiature G Series (sealed) and K Series (unsealed) rotary switches are available in one-pole (2- to 12-position) through four-pole (2- and 3- position) types.

- ☐ Shorting or non-shorting
- ☐ Switching capacity: up to 1 Amp
- ☐ Indexing: 30°, 36°, 45°, 60°
- ☐ QPL per MIL-S-3786/20E
- ☐ Ideally suited for high shock and vibration applications

Ask for Bulletin 14/G-K

½ Inch BCD
126/127 Series

Coded Outputs

The Series 126 is available with up to 12 positions fixed stop or continuous rotation binary coded decimal (BCD) with 30° indexing. Its complement, the Series 127, is also furnished with up to 12 positions $\overline{\text{BCD}}$.

- ☐ Gold plated contacts and terminals
- ☐ P/C and standard solder terminals
- ☐ Pin compatible with other major manufacturers
- ☐ One piece bushing and housing

Ask for Bulletin 14/126 BCD

P Series

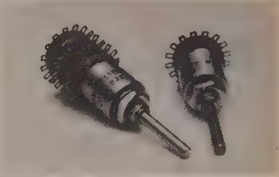
Subminiature P Series rotary switches are available in one-pole (up to 10 positions) and two-pole (up to 5 positions) types.

- ☐ Shorting or non-shorting
- ☐ Switching capacity: up to ½ Amp
- ☐ Indexing: 36°
- ☐ Printed circuit terminals
- ☐ Life: 25,000 cycles
- ☐ Sealed for wave soldering

S Series

The S Series provides up to 10 decks, 20 positions per deck (200 poles), in a miniature (¾" over terminals) bushing mounted rotary switch. Coded outputs.

Ask for Bulletins 14/S STD, 14/S BCD



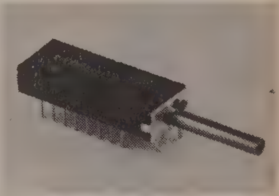
S Series

16-Pin DIPSWITCH®

Versatile 8-pole rotary switch. Application oriented features are:

- ☐ Any combination up to 8 contact closures in any shaft position
- ☐ Coded outputs
- ☐ 1.125 L x .440 W x .232 H
- ☐ 60°, 45°, 36° indexing

Also available is a 14-pin DIPSWITCH with any combination up to 6 contact closures in any shaft position.



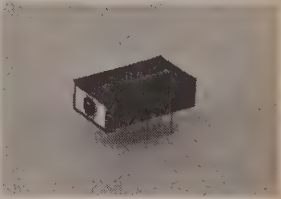
16-pin 12300 Series

8-Pin DIPSWITCH®

Versatile 4-pole, 8-pin rotary switch. Application oriented features are:

- ☐ Any combination up to 4 contact closures in any shaft position
- ☐ Coded outputs
- ☐ 35,000 cycle life @ .250 Amp
- ☐ .730 L x .440 W x .232 H
- ☐ 60°, 45°, 36° indexing

The 16, 14 and 8 pin switches are available with a bushing mounted front panel adapter.



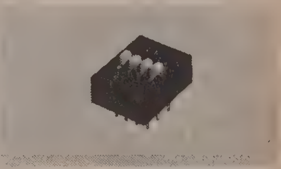
8-pin 12100 Series

Center-Off DIPSWITCH®

This 12-pin center-off DIPSWITCH provides four electrically isolated switches, each with distinct center-off positions. Switches may be simultaneously operated with our optional adapter. Low contact capacitance. Less than .5 pf.

Ask for Bulletin 18/DIP

(Covers all DIPSWITCHES including the 14-pin 11700 series not shown above.)



Center-off 12000 Series

For More Information

Many standard switches and accessories are available for immediate delivery from stock. Standard switches can be modified quickly and economically by our custom design service to meet special application requirements. Contact our sales department, or your local representative, for application assistance and prices. Detailed information is available in free bulletins as noted.

F1T8Y1

F1T8YR1

ULTRA MINIATURE MICRO SWITCHES
F1 SERIES

Low profile switches with side-protruding, gold-flashed terminals for printed circuit boards. Mounting by terminals assisted by moulded spigot. Low and standard force, changeover switching mechanisms. Contacts normally silver; add '-GP' to reference for gold. Plunger, plain lever or roller-lever may be depressed to case in overtravel.

Ordering Reference	Actuator	Dimensions L	B	H	Actuating Force N	Ozf	Rec. max. Rating 125/250 VAC

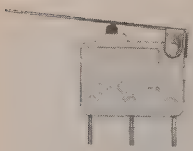
F1T8

F4T6



F4T7Y1

F4 SERIES

Similar to F5 Series but provided with side mounting holes. Changeover mechanism, recommended maximum rating 7 Amperes at 125/250 volts AC. Silver or gold contacts — add '-GP' to reference for the latter. Plunger, plain lever or cam-following lever actuators, all may be depressed to case in overtravel. 2 mm quick connect tab (QC in table) or solder tag terminals.

F5T8YC

F5 SERIES

One of the world's smallest precision switches with power capabilities, the F5T8 has no mounting holes and may be mounted on a printed circuit board by means of its 5.08 mm pitched, gold-flashed, base-protruding terminal tags. Also available with plain or cam-following lever actuators. Changeover switching mechanism, recommended maximum rating 7 amperes at 125/250 volts AC resistive load. Silver contacts or add '-GP' to reference for gold. Actuators may be depressed to case in overtravel.

SUB-MINIATURE MICRO SWITCHES
V4 SERIES

Popular sub-miniature, changeover Micro Switches. Standard and low-force mechanisms; plunger, plain lever and roller-lever actuators all capable of being depressed to the case in over-travel; four types of terminals. Contacts normally silver, but models marked * also available with gold contacts; add '-GP' to reference.

Ordering Reference	Actuator	Terminals	Dimensions L	B	H	Actuating Force N	Ozf	Rec. Max. Rating 125/250 VAC

A variety of different lever lengths (to 2¼″) and shapes are available including cam-followers.

HIGH TEMPERATURE MODEL
Suitable for continuous service in temperatures up to 150°C. Otherwise as V4T7. Ordering reference: SV4T7

DOUBLE-POLE MODEL
Six solder tag terminals. Mounts by one M2 screw and spigot. 5 amperes max. rating. LBH = 20, 14, 24. AF = 2.2N, 8 Ozf. Ordering reference: V24T7.

TELECOMMUNICATION SWITCHES
Burgess offers an unrivaled range of gravity, add-on and other switching assemblies for the telecommunication industry. Many are based on designs featured on this page. Please apply for details.

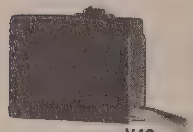
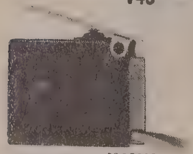
SEALED MINIATURE MICRO SWITCHES FOR DIFFICULT ENVIRONMENTS

A range of single and multi-pole miniature and sub-miniature Micro Switches with mechanisms totally enclosed to the standard indicated by IEC Code IP67 and NEMA Type 6. Efficient sealing is proved by a pressure test. Explosion-proof models are included in the range. Single-pole switches have plunger actuators which may be used alone or with plain lever or roller-lever auxiliary actuators. Multi-pole models are available with either plunger or integral lever actuators (plain or with roller). With one exception, all models are supplied with factory fitted, PVC insulated wires.

V4SYR1



V4S



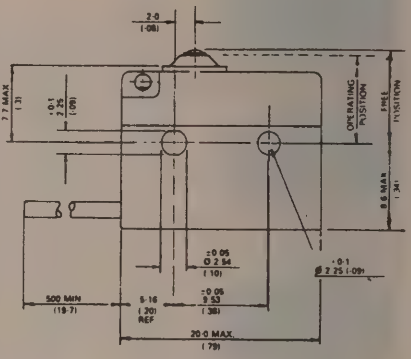
V4SY1

SINGLE POLE SUB-MINIATURE SWITCHES V4S MODELS

Glass-loaded nylon case and lid; acetal plunger; a neoprene cowl is fitted around the plunger and bonded to the lid. The well-proven Burgess V4 changeover mechanism is fitted within the enclosure. Three 16/0.2 mm p.v.c. insulated wires are potted in position. Silver contacts are standard. Temperature range −10° to +70°C and recommended maximum rating 3 amperes, 125/250 VAC. Silicone cowl/lead versions available for −50°C operation.

Ordering Reference	Actuator	Dimensions L	B	H	Actuating Force N	Ozf
V4S	Plunger	22*	7	18	2.5	9.0
V4SY1	Plain lever	22	7	23	0.9	3.2
V4SYR1	Roller lever	22	7	26	0.9	3.2

A variety of different lever lengths (to 2¼″) and shapes are available; also auxiliary actuators in single and double pole configuration. (See page 2).
* excluding cables.



V4S

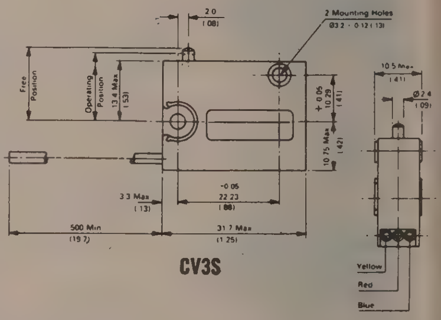
SINGLE POLE MINIATURE SWITCH CV3S MODELS

CV3S

The CV3S Micro Switch is encapsulated in a glass-loaded nylon case and provided with three cables of approximately 0.5m length. It has a protected, stainless steel plunger and will interchange with standard V3 Series Switches. All of the auxiliary actuators designed for the V3 Series may be used with the CV3S (contact Burgess for full details). The CV3S9 is a similarly constructed sealed unit but instead of cables it is fitted with open 2.8 mm quick-connect tab terminals. Recommended maximum rating 5 amperes, 125/250 VAC.

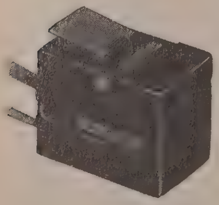
Ordering Reference	Dimensions L	B	H	Overtravel	Actuating Force N	Ozf
CV3S	32*	10	26	Depress to case	3.9	14
CV3S9	32	10	28	Depress to case	3.9	14

Integral actuators similar to those on the multiple versions also available.
* excluding cables



CV3S

MULTI-POLE MINIATURE SWITCHES 272- & 372-MODELS



272F5Y1

Twice as wide but otherwise physically similar to single-pole switch CV3S, these multi-pole models use two or three F5T8 Ultra Miniature Micro Switches (see page 1) as their switching elements. They are adjusted individually during assembly to ensure that all operate within 0.8 mm of plunger travel. The complete units are sealed and six or nine cables approximately 0.5m in length are provided. Available actuators are plunger, wide plain lever and wide roller and lever; all may be depressed to case in overtravel. Recommended maximum rating is 5 amperes, 125/250 VAC.

Ordering Reference	Poles	Actuator	Dimensions L*	B	H	Actuating Force N	Ozf
272F5	2	Plunger	32	21	26	4.0	14.5
272F5Y1	2	Plain lever	32	21	27	4.0	14.5
272F5YR1	2	Roller lever	32	21	34	4.0	14.5
372F5	3	Plunger	32	21	26	4.5	16.0
372F5Y1	3	Plain lever	32	21	27	4.5	16.0
372F5YR1	3	Roller lever	32	21	34	4.5	16.0

Similar models approved by BASEEFA as components with 'Type of Protection N' to BS4683, Part 3, 1972—a requirement for usage in Zone 2 hazardous areas—may be ordered by adding the prefix 'E2' to the above V3S and Multi-pole ordering references.
* excluding cables

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

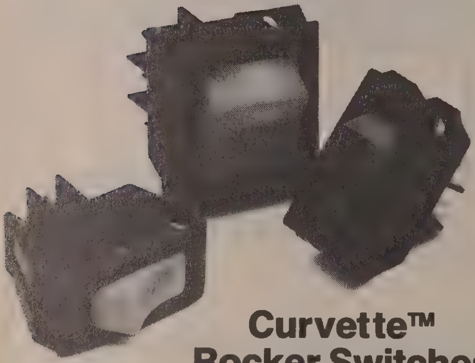
The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

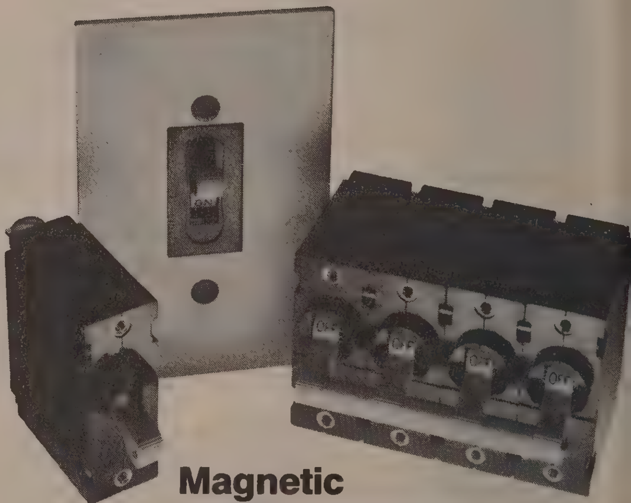
CARLINGSWITCH OFFERS CUSTOM QUALITY AT CATALOG PRICES.

Solving your design problems with quality "standard" and "custom" switching devices is our specialty. We continually lead the industry with new product innovations which incorporate modern materials, innovative styling, patented and patent pending switching mechanisms—all at competitive catalog prices.



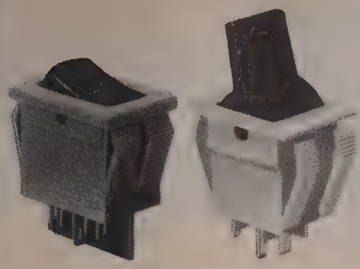
Curvette™ Rocker Switches

Our new compound curve rocker switch offers more performance and protection for the lowest cost than you'll find anywhere. Outside, Curvette's smooth compound curve bezel and glare-free matte finish blend into the panel. Inside, Curvette's switching mechanism is the toughest we've ever designed. It handles detrimental high inrush current surges without expensive silver alloy butt contacts. It's been tested successfully up to 75 amps inrush. And in most applications, Curvette's new switching mechanism also stops arcing before it starts — without expensive arc-suppressing fibre. Curvette withstands 50,000 actuations, minimum, at maximum load in high ambient temperatures. Curvette's slightly smaller size and patent pending mounting ear design let it fit snugly into any opening from .48" x 1.072" to .55" x 1.125". Curvette is UL listed and CSA approved for 16AMP 125VAC and 10AMP 250VAC; VDE approvable for 12(6) AMP 250VAC. Curvette is available in one-color, two-color and lighted (AC or DC) versions. Curvette VisiRocker™ has a second color molded in for low cost "on" indication. Also available with custom legends and in double-pole configurations.



Magnetic Circuit Breakers

Industry standard magnetic circuit breakers are available in single or multi-pole configurations, with single or multiple actuators. Available with instantaneous, ultra short, short, medium and long time delays. In series, shunt and relay trip circuits in popular ratings up to 50 amp. They're UL recognized and CSA certified. Our B Series meets the spacing requirements of VDE and IEC. Compact design uses less mounting space. With snap-on adapter, our breakers also fit larger, "standard" frame size openings. Special caps available in eight attractive colors. Well-suited for new designs or as direct replacements for competitive products.

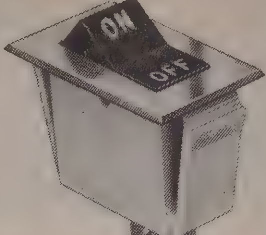


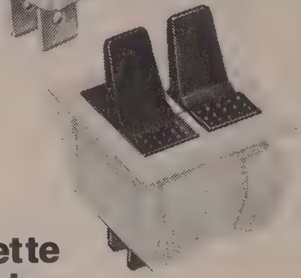
Miniature All-nylon Power Rocker/Paddle Switches

All-nylon miniature rocker and paddle switches offer high reliability, low cost, snap-in mounting, multiple circuit choices, plus ratings for power switching or low level dry circuit switching applications. These attractive switches are available in a wide variety of standard and custom-matched colors. They feature our patented self-cleaning wiping action contacts and are designed to meet European standards.

Full Size Tippette® Rocker Switches

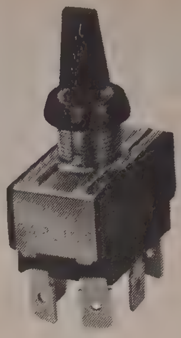
Tippette rocker switches are available in an almost endless variety of circuits, current ratings, actuator and bezel styles, mounting brackets and termination types. Other options include legend imprinting, standard or custom-matched bezel and actuator colors. Plus, our patented "Drip Dry" option is an inexpensive way of protecting switch from dirt, moisture and other contaminants. Lighted versions feature single or multiple indicator lights — available with voltages from 6VDC to 240VAC. Will be available in European-approved versions, consult factory.





Mini Tippette Switches

All-nylon low cost insulated switches are tested at full load for 100,000+ cycles. Single or double pole versions offered. All feature convenient snap-in mounting, paddle or rocker actuation. Choose from various current ratings, circuit designs, termination types, colors (standard or custom matches) and legend imprinting. Lighted versions with lamp voltages from 6VDC to 240VAC. Will be available in European-approved versions, consult factory.



Full Size Toggle Switches

These toggle switches are available in one through four poles in ratings up to 20 amps. Single and double pole switches are available with a variety of circuit, termination and actuator variations including an insulated all-nylon model. New lighted versions utilize a translucent actuator which displays three colors to indicate switch positions. Add a neoprene bushing seal that protects against dust and moisture and you have the right switch combination for marine and automotive applications. Will be available in European-approved versions, consult factory.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC	alternating current
A/D	analog to digital
ADC	analog to digital converter
ADP	automatic data processing
AF	audio frequency
AFC	automatic frequency control
ALGOL	algorithmic language
AM	amplitude modulation
AND	a logical operator
AQL	acceptable quality level
ASCII	American national standard code for information interchange
AWG	American wire guage

B

BALUN	balanced to unbalanced
BASIC	beginners' all-purpose symbolic instruction code
BCD	binary-coded decimal
BNC	baby "N" connector
BUS	basic utility system

C

CAD	computer aided design
CAM	computer aided manufacture
CATV	cable television or community antenna television
CERMET	ceramic metal element
Comm.	communications
CMOS	complementary metal-oxide semiconductor
CPS	characters per second
CPU	central processing unit

D

D/A	digital to analog
DAC	digital to analog converter
DC	direct curent
DIL	dual in-line
DIP	dual in-line package
DPM	digital panel meter
DTL	diode transistor logic

E

EDP	electronic data processing
EBCDIC	extended binary coded decimal interchange code
EEPROM	electrically erasable PROM
EMC	electromagnetic compatibility
EMI	electromagnetic interference
EPROM	electrically programmable ROM
ESR	equivalent series resistance

F

FEP	fluorinated ethylene propylene Copolymar, 200° Teflon
FET	field-effect transistor
FM	frequency modulation
FORTRAN	formula translator

G

GaAsFET	gallium arsenide field effect transistor
GPIB	general purpose interface bus

H

HF	high frequency (3 to 30 MHz)
HIPOT	test, measurement and diagnostic equipment
HLL	high level language
HV	high voltage
Hz	Hertz

I

IC	integrated circuit
IF	intermediate frequency
IO	input/output (devices)
IR	insulation resistance (or) infrared

J

JFET	junction field effect transistor
JMOS	junction metal oxide semiconductor

K

kHz	kilohertz (10^3 hertz)
KSR	keyboard send receive

L

LC	inductance capacitance
LCD	liquid crystal display
LED	light-emitting diode
LF	low frequency (30 to 300 kHz)
LSI	large scale integration
LVDT	linear velocity displacement transformer

M

MATV	master antenna television
μF	microforad
MHz	megahertz
MOS	metal oxide semiconductor
MOSFET	metal oxide semiconductor field effect transistor
MOV	metal oxide varistor
MPU	microprocessor unit
MSI	medium scale integration

N

NBS	National Bureau of Standards
NIM	nuclear instrumentation module
NOR	not OR

O

OEM	original equipment manufacturer
OR	a logical operator

P

pF	picofarad
PC	printed circuit
PCB	printed circuit board
PIN	positive-intrinsic-negative (transistor)
PLA	programmable logic array
PPI	plan position indicator
PROM	programmable read only memory
PUT	programmable unijunction transistor

Q

QAM	quadrature amplitude modulation
Q (meter)	quality-factor meter

R

RAM	random access memory
RC	resistance-capacitance
RFI	radio frequency interference
RMS	root mean square
ROM	read only memory
RF	radio frequency
RFC	radio-frequency choke
RFI	radio-frequency interference
RTD	resistance-temperature detector
RTL	resistor transistor logic
RTV	room temperature vulcanizing
RW	read/write

S

SAS	silicon asymmetrical switch
SBC	single board (micro) computer
SBS	silicon bilateral switch
SCR	silicon-controlled rectifier
SIP	single in-line package
SSI	small scale integration
SSR	solid state relay
STL	Schottky transistor logic

T

TC	temperature coefficient
TCXO	temperature compensated crystal oscillator
TFE	tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL	transistor-transistor logic
TTY	teletypewriter

U

UHF	ultra high frequency (300 MHz to 3 GHz)
UL	Underwriters Laboratory
UPS	uninterruptible power supply

V

VAC	volts (of) alternating current
VAR	volt-ampere reactive
VCR	video cassette recorder
VDC	volts (of) direct current
VHF	very high frequency
VHSIC	very high speed integrated circuit
VLF	very low frequency (3 to 30 kHz)
VLSI	very large scale integration
VRM	voice recognition module
VTVM	vacuum tube volt meter
VU	volume unit
VSWR	voltage standing wave ratio

W

WPS	word processing software

Y

YIG	yttrium iron garnet

1. FOREIGN APPROVED VERSIONS

Designations:
Standard Force: Series D413, D423, D433, D443 and D453
Light Force: Series D419, D429, D439, D449 and D459

These D4 switches have foreign as well as UL/CSA approvals. They have .250″ (6.35mm) x .032″ (0.81 mm) thick "offset" terminals and metric mounting holes. They are also available with English (U.S.) mounting holes. (See drawings.)

2. U.S. VERSIONS

Designations:
Standard Force: Series D41C, D42C, D43C, D44C and D45C
Light Force: Series D41L, D42L, D43L, D44L and D45L

These are D4 switches with UL and CSA approvals for domestic use only. Terminals are "straight" and measure .187″ (4.75 mm) x .020″ (0.50 mm) thick. (See drawings.)

ACTUATORS: Standard type integral hinged lever and roller actuators are available in choice of 2 pivot positions. Actuator lengths are dimensioned from centerline of switch upper mounting hole as shown here. Other actuators available on request.

Cherry put a switch inside a switch . . . so it's water-resistant and weatherproof!

Cherry's basic E72-40A is moisture resistant. It comes with insulated, 10 inch, 16 gauge leads attached. The E72-40A is rated at 10.1 Amps., ¼ H.P. and 125/250 VAC. Listed by Underwriters' Laboratories, Inc.

The E72 series is also available with hinged external actuators, Cherry part number E72-40H.

GOLD "CROSSPOINT" CONTACT SWITCHES FOR LOW ENERGY CIRCUITS

Engineers can now take a completely new approach to switching of low energy circuits. The Gold "Crosspoint" Contact switch design provides reed switch reliability, with snap action switch precision and utility. No need for magnets and installation adjustments. The result is much lower installed cost.

Positive Snap-Action Switching of Low Energy Solid State Circuits

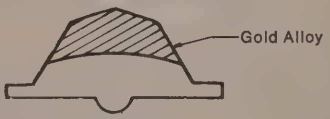
- High reliability in low level switching applications from 4 to 100 milliamperes at 4 to 30 volts
- Long Life . . . measured in millions of operations
- Initial insertion resistance far below 50 milliohms (lower than reed switches)
- Very high force per unit area (contact pressures)
- Reduced susceptibility to contact closure interference from foreign particles

RATING: 0.1 Amp, 125 VAC
Und. Lab. Inc. listed, and CSA approved.

VERSATILITY IN APPLICATION

Cherry Gold "Crosspoint" Contact switches are available in a wide variety of switch types, sizes, and mountings for a broad range of electronic applications. In addition, many other configurations are available with gold crosspoint contacts.

CONTACT CROSS SECTION



The contacts in these switches are W/E Alloy # . . .

Designed for worldwide safety specifications these line interrupt switches incorporate direct action, double make/double break shorting bars and 3 mm minimum contact gap. Two parallel return springs, either of which could safely break the circuit alone, give added protection. UL listed and CSA approved. Meets other international requirements.

CONTACT ARRANGEMENT

Choice of Form X, Form Y or Form Z contact arrangement is basic (A1) case or (B1) case with barrier. Form X (SPST NO DB), Form Y (SPST NC DB), Form Z (SPDT DB).

CONTACT RATINGS

F81: rated 10 Amps at 125 or 250 VAC (¾ HP at 125 VAC, 1½ HP at 250 VAC).

F82: rated 16 Amps at 125 or 250 VAC (¾ HP at 125 VAC, 1½ HP at 250 VAC).

F83: gold crosspoint contacts for low energy switching. Rated 0.1 Amp at 1250 or 250 VAC.

F84: combines two different ratings in a single switch.

TERMINALS

Either 3⁄16″ (10) or ¼″ (20) male push-on terminals are standard. Others can be tooled. In most cases terminal sizes may be mixed on a switch to help minimize wiring errors.

The Series P1: An entirely new kind of pushbutton switch . . . from Cherry. Pushbutton housing holds one — or two — famous Cherry series E62 or E63 subminiature snap action switches. E62 switches are rated 10.1 Amps, 125/250 VAC — ¼ H.P., 125 VAC. E63 switches are gold crosspoint contact rated 0.1 Amp, 125 VAC for your low energy circuits. Because the P1 houses one **or** two switches, you have your choice of 10.1 Amp, 0.1 Amp — or both! — in the same pushbutton switch.

P41A-621C	Silver	Momentary	.110 QC	1 Form C
P41B-621C	Gold	Alt. Act.	.110 QC	1 Form C
P4 Series Square One 14V Incandescent Lamp Installed				
P41A-722C	Silver	Momentary	.110 QC	1 Form C
P41B-721C	Gold	Alt. Act.	.110 QC	1 Form C
P4 Series Square One 28V Incandescent Lamp Installed				
P41A-821C	Silver	Momentary	.110 QC	1 Form C
. P41B-821C	Gold	Alt. Act.	.110 QC	1 Form C

Silver Rating: 3A @ 125 VAC/2A @ 250 VAC

Gold Rating: 0.1A @ 24 VDC

- Three button styles
- Snaps into industry standard mounting hole from front of panel

Mixed ratings can be provided. P4 switches may be specified with or without lamp sockets. Sockets mate with widely accepted wedge-base T 1¾ incandescent lamps.

P4 SERIES

EXPLANATION OF PART NUMBER

1 — A — 0 — 3 — 1C

Rating
1 = 3A @ 125 VAC
2A @ 250 VAC
3 = 0.1A @ 24 VAC

Contact Action
A = Alternate Action
B = Momentary Action

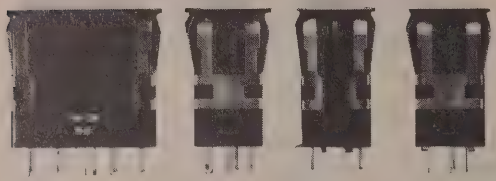
Temperature
0 = No lamp
1 = 1 lamp socket
6 = 6.3V lamp installed
7 = 14V lamp installed
8 = 28V lamp installed

Terminal
2 = .110 QC terminal
3 = .020 pin terminal

Contact Configuration
1 C = 1 Form C contact
2 C = 2 Form C contact
4 A = 4 Form A contact
8 A = 8 Form A contact

CHERRY Pushbutton and Thumbwheel

CHERRY 3-BIT ENCODER



- Up to 8 different 3-bit codes, single common
- Choice of termination
- Base keyed for foolproof P.C. board orientation
- All industry-standard available from stock

P4 Series Square 3 Bit Encoder
P43C-124A
P43C-134A

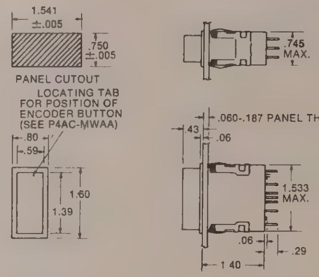
P4 Series Encoder Button Square — 3 Bit Button Only

P4AC-B3SO	.43 High Translucent

P4 Series Switch Button — Blank White

P4AB-C1WN	.19″ high
P4AB-B1WN	.43″ high
P4AB-A1WN	.32″ high

CHERRY 8-BIT ENCODER



- Up to 256 different 8-bit codes
- Dual commons for convenience on printed circuit board
- User-programmable: set code yourself for the ultimate in flexibility. Encoding instructions are supplied with 1 x 2 encoder buttons.
- Choice of termination — PCB or .110 Q.C.

P4 Standard 8-Bit Encoders

P44H-138A	8-Bit encoder body, .020 x .025 PCB terminals, empty lamp socket

P4 Series Rectangular — 8 Bit Encoder

P44H-138A	Coded (Gold) 1 lamp socket — 8 Form A .020″ pin term.

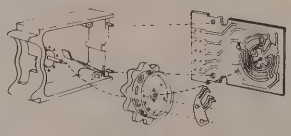
P4 Series Encoder Buttons Rectangular — Button Only

P4AC-XWAA	8 bit

THUMBWHEEL, LEVERWHEEL, PUSHWHEEL

BASIC OPERATING PRINCIPLE

A set of comb-like wiping contacts, rotated manually, shorts together predetermined combinations of traces on a stationary printed circuit board. These same traces also serve as electrical input/output lines. Here's a simplified diagram of the mechanism:



ACTUATION

Cherry offers three kinds of actuation for these rotary multi-position switches. Thumbwheel, Leverwheel and Pushwheel.

Thumbwheel
Rotate the dial directly

Leverwheel
Drive the dial by means of a lever. Convenient for fast resetting to zero position.

Pushwheel
Push one button to index the dial up . . . the other to index down.

MOUNTING

Cherry provides you with 3 mounting styles and choices. Back mount, front mount, and snap in mount.

TERMINATION

Cherry is tooled to supply terminals just right for your application.

PC BOARD

Parallel rows of holes approximately .040″ diameter.

F-PINS

Specify F-pin termination for direct mating with motherboard.

J-PINS

Specify J-pins for wire-wrap applications. More economical than F-pins.

LIGHTED SWITCHES

Cherry's T20 thumbwheel can be supplied with a socketed, replaceable lamp that requires no tools or soldering.

Cherry's T56 pushwheel is available with a permanently installed grain-of-wheat lamp. Also available with LED illumination.

COLOR

In high volume applications Cherry can provide switches in any color. Black is standard.

FINISH

Choice of glass or matte.

LEGENDS

Standard legends are spelled out in the product selection charts accompanying each catalog family.

Standard character color is white on black dial. For lighted versions, standard is black on transluscent white dial.

CLEAR PLASTIC WINDOW

DUSTPROOF THUMBWHEELS

A clear plastic window covers dial character opening for resistance to dust, dirt and moisture. Available on Cherry's T24 series and T38 series.

ASSEMBLIES AND COMBINATIONS

Within a given family size, you may gang into multi-digit assemblies, specifying any combination of standard-window switches, and spacers. Simply specify exactly the combination that fits your application. Your local distributor is available to assemble these switches.

STOPS

Cherry provides many standard combinations of rotation-limiting stops to help tailor our switches exactly to your application needs.

A seven segment LED indicating unit in a thumbwheel type package. Features bright red, .362″ high digit that operates at logic level voltages. Can be used with any BDC type coded thumbwheel and is also available with supplementary inputs of the ripple-blanking input and blanking input/ripple blanking output type with an automatic zero blanking feature. Additional lamp test input renders possible functional control of the indicating segments. Recommended panel cutout, endcaps and spacers are the same as Series T50.

CHERRY Thumbwheel, Leverwheel, Pushwheel

COMPLETE PRODUCT LISTING

The example at left calls out a **T-35 Series** backmount Thumbwheel, with **J-pin terminations**, **10 position decimal** code, **black gloss finish**, in a **three switch assembly.**

AVAILABLE PC BOARD TERMINATIONS

All PC boards have a .040″ diameter hole to accommodate a wire for each output. Pin terminations for mother-board insertion or for wire-wrap capabilities can be applied upon request. Two types of pin terminations are available:

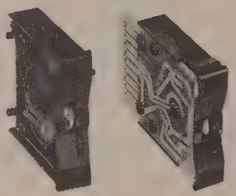
A = (n × .315) +.433
B = (n × .315) +.315
C = (n × .315) +.335
For assemblies of more than 10 modules, contact factory.

Available in 8, 10, 12 and 16 positions and a wide variety of output codes. Can be furnished with extended PC board to provide mounting of other components. Stops may be inserted at factory or in the field to control dial rotation.

SERIES T64

Also available as Circuit Board Mount

Wheel and detent spring are mounted in case so as to elevate the contact wiper set. This permits direct mounting on PC board without modifying the board to recess into switch housing. Typically, the circuit board plugs into a chassis and the thumbwheel switch is mounted to permit presetting to circuit functions. Available in 8, 10, 12 and 16 positions. Dimensions are the same as Series T65.



SWITCH CHARACTERISTICS:

Dielectric Strength .... 500 VAC

Temperature .... −40°C to +70°C

Note: Applies to all thumbwheel switches

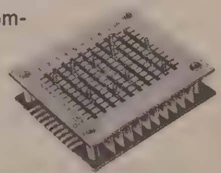
MATRIX TYPE SELECTOR SWITCHES

Manual programming and switching for complex control equipment. Each of two standard types is expandable up to five modules, providing 500 to 1,000 crosspoints. Custom design available up to 2,784 crosspoints.



Electrical Capacity:

1. Make and break 48 volts DC at 0.50 Amp, 125 Volts AC at 0.15 Amp.
2. Current carrying only (no make and break) 2 Amp. AC or DC.

Insertion Resistances:

50 milliohms plus 6 milliohms per inch of printed circuit.

Note: Overall width of basic 10 x 10 and 20 x 10 Selector Switch is 3½ inches. For each 10 sliders added to the basic unit add 3 inches to overall width. A 20 slider unit measures 6½ inches wide; a 30 slider unit measures 9½ inches wide; a 40 slider unit measures 12½ inches wide and a 50 slider unit measures 15½ inches wide.

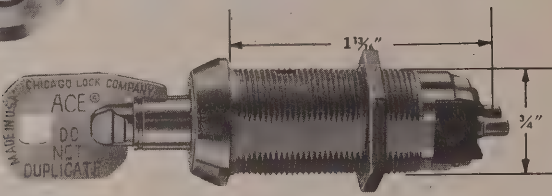
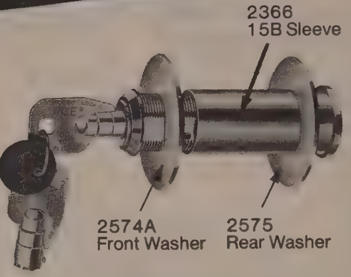
Maximum Security Switch Locks for every application!

Write or call for Switch Lock brochure.

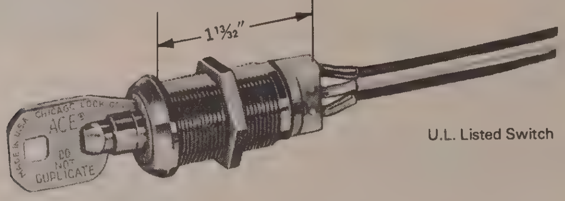
Switch Locks



No. 4073—Maintaining contact switch. Key removable "off," "on" or "off-on". Also available as 4073-70 with momentary contact switch. All brass construction. Also offered with die cast outer barrel. No. 2274-80 same as 4073 except with double bitted lock.



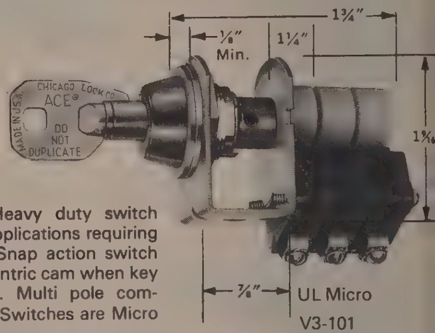
No. 3039 - SPST switc with adjustable sleev and washers; dependable wiping contacts Solder terminals. Loc all brass constructio polished chrome finis Key removable "off,' "on" or "off-on." Als available in die cas outer barrel.



U.L. Listed Switch

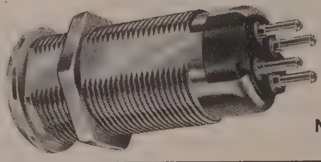
No. 4235 — Easy to mount, UL Listed switch SPDT, available with silver plated contacts and 10" wire leads. Offered without 10" leads at reduced cost. Furnished with micro-switch 1SX1-H58.

U.L. Listed Switch



No. EXA-112-3—Heavy duty switch lock designed for applications requiring UL Listed switch. Snap action switch actuated by an eccentric cam when key turned 90 degrees. Multi pole combinations available. Switches are Micro No. V3-101.

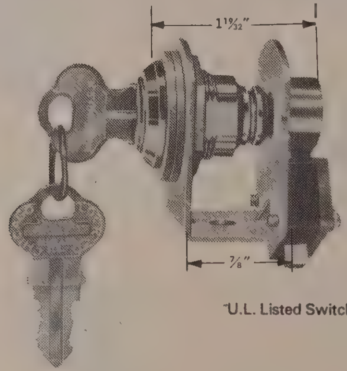
SPECIAL APPLICATION — TWO SEPARATE SPST CIRCUITS



No. 4074

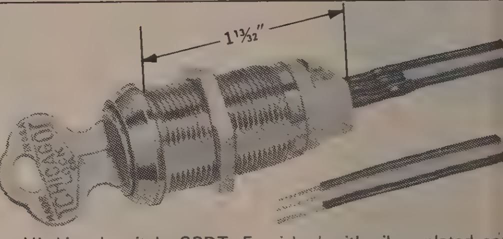
7 Pin Tumbler
ACE Ⅱ™ Mechanism.
Same as 4073 lock
except with two circuits.

Chicago double bitted switch locks



No. EXD-98
Same as EXA-112, except with double bitted cylinder. Designed for high current applications. Multiple pole combinations available. Furnished with micro-switch V3-101.

U.L. Listed Switch



No. 3535 — UL Listed switch, SPDT. Furnished with silver plated co tacts and 10" wire leads. Same as 4235 except has double bitte cylinder. Available without 10" leads at reduced cost. Furnished wi micro-switch 1SX1-H58.

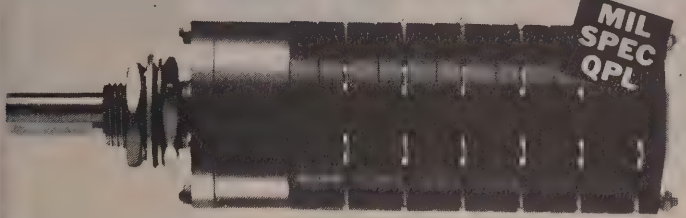
COLE ROTARY SWITCHES



3600 SERIES Miniature Enclosed Rotary Switches

A new custom quality rotary switch. The 1-inch 3600 series enclosed miniature; meets MIL-S-3786. A 6 amp. switch for high-rel use in aircraft controls, electronic test equipment in harsh environments.

Quality? Roller bearing silver contacts. Custom quality? Up to 12 decks, 1 to 6 poles per deck; 30, 36, 45 deg. (8, 10 or 12 position). Options like hermetic enclosure; pre-wired to connector.

TECHNICAL DATA

Listed on QPL to MIL-S-3786, Style SR04.
Certified test reports available

Electrical

Contact Rating
Current carrying: 10 amps @ 28 VDC
Make & Break: 6 amp resistive @ 115 VAC
6 amp resistive @ 28 VDC
3 amp inductive @ 28 VDC
Dielectric Strength: 1500V RMS
Contact Resistance:
Initial .005 ohms max.
Insulation Resistance:
10^5 meg ohms min.

Mechanical

Rotational Torque: 5 in. lbs. max.
Weight: 1.7 ounces + .3 ounces/deck
Life: 100,000 cycles min. mechanical
25,000 cycle min. switching 5 amps @ 120 VAC

1800 SERIES Half-Inch Enclosed Rotary Switches

The ultimate in a one half-inch rotary selector switch, the Cole Series 1800 is engineered to meet or exceed applicable MIL-S-3786, Style SR20 requirements.

The Series 1800 enclosed switch was designed for critical ordnance applications, and demanding usage in aircraft, medical and industrial controls and instrumentation, as well as electronic equipment.

This switch is available with 1 pole, 2 to 10 positions, and 2 pole, 2 to 5 positions.

Quality construction, including materials that meet the strictest standards, allows these subminiature switches to combine high current switching capacity with constant low contact resistance. Long life and high reliability are assured by exceedingly stringent inspection and testing procedures.

Available in standard solder lug or printed circuit terminations, the Cole Series 1800 can be furnished with an internal seal. This unique Cole design option renders the switch impervious to water, contaminants and most solvents.

1800 - HEX
COLE

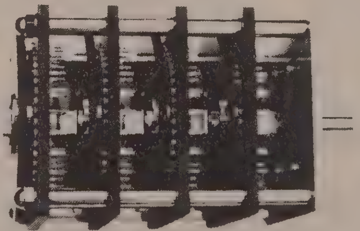
YOUR SOURCE FOR SPECIAL PURPOSE ROTARY SWITCHES

Coded Switches, for direct logic level interfacing
HALF-INCH rotaries, Hexadecimal and BCD code standard, custom codes to your requirements. These are also HI-REL switches, MIL-S-3786 performance.



Instrument Grade, Open Frame Rotary Switches

For heavier current requirements (15 amp continuous; 3 to 5 amp switching.) One MILLION cycles or better life expectancy.

ARROW HART WASHABLE MINIATURE SWITCHES

Electrical Specifications

Class	Minimum	Maximum	Contact Option	With Approval Code 1
Low-level	10mA, 50mVAC or DC 10μA, 5VAC or DC	.4VA, 20VAC or DC	"B" Gold	Not applicable
Power	100mA, 10VAC or DC	5A, 125VAC 2A, 250VAC	"Q" Silver	UL, CSA pending
Low-level or Power (See Note below)	10mA, 50mVAC or DC 10μA, 5VAC or DC OR 100mA, 10VAC or DC	.4VA, 20VAC or DC OR 5A, 125VAC 2A, 250VAC	"G" Gold over silver	UL, CSA pending

All loads resistive	
Life:	Circuit 01: 100,000 switch operations. All other circuits: 50,000 switch operations
Initial Contact Resistance:	10 milliohms maximum @ 50 millivolts, 10 milliamps
Dielectric Strength:	1000 VRMS minimum
Insulation Strength:	1000 megohms minimum

NOTE: The advantage of gold plate on silver is that the switch can be used in low-level circuits with loads of 0.4 VA and below as well as in circuits with a maximum load of 5 amps at 125VAC. If the low-level rating is exceeded, the gold plating is removed from the contact, rendering the switch unusable at low-levels.

Mechanical Specifications

Temperature Range:	
Operating:	−20°C to +85°C (−4°F to +185°F)
Storage:	−40°C to +85°C (−40°F to +185°F)
Materials:	
Contacts:	Brass with gold (B) or silver (Q) or both (G)
Terminals:	Brass with gold (B) and (G) or silver (Q) (tin-plate available on special basis)
Housing:	Thermoplastic, high temperature UL 94VO
Bracket/Support:	Tin-plated steel
Toggle:	Chrome-plated brass
Rocker:	Nylon 6/6
Approximate Net Weight:	SP: 2.50 grams (.09 oz) DP: 3.70 grams (.13 oz)

CROSSPOINT

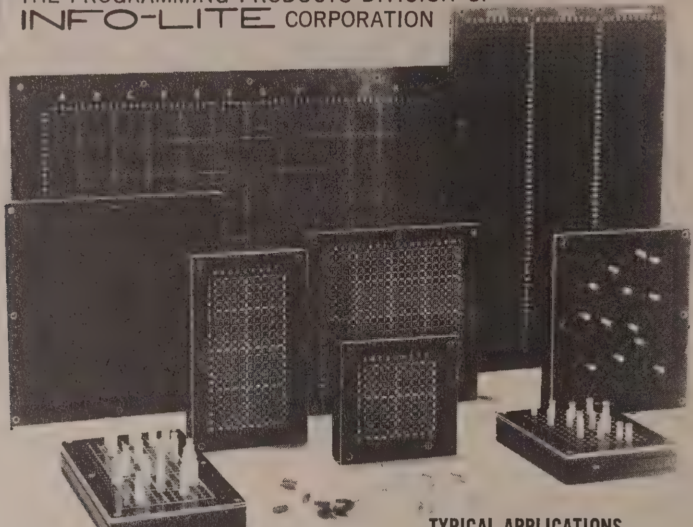
THE PROGRAMMING PRODUCTS DIVISION OF
INFO-LITE CORPORATION

PROGRAMMING PRODUCTS

MATRIX PINBOARDS

INFO-LITE has developed a most convenient, compact and economical system for reliable programming and switching • The Matrix Program Board allows a wide variety of switching/programming functions to be performed by simply inserting programming pins (shorting or diode type) into a 2 to 10 deck contact matrix • No accessorise such as "read" "write" equipment are required • Matrix Board features have lead them to be favored over such devices at patchboards, card readers, toggle and thumbwheel switches, mag/punched tape and electronic memories • The two basic uses for Matrix Program Boards are: (1) Cordless patching (input-output switching), using shorting pins; (2) Programmable diode matrices (logic memories), using diode pins • Units with up to 100 x 100 crosspoints can be supplied to meet your requirements, whether for prototype or production quantities.

See Data Sheet MB3 for detailed specifications.



FEATURES

- Reliable closed entry contacts
- Rugged programming pins that will not beind
- Rapid and convenient method of programming/switching
- Permits insertion of components into network without soldering
- Replaces costly complex switching hardware
- Attractive and compact package
- Low capacitance for high frequency applications
- Ease of visual program checking

TYPICAL APPLICATIONS

Numeric Controlled Equipment
Logic Memories
Power Distributors
Circuit/Component Test Programmers
Lighting Systems
Code Generators
Programmable Diode Matrices
Communications Distributors
Status Indicators
Data Logging
Vending Machine Control
Thermo-Couple Selectors
Batching Programmers
Function Generators
Sequence Programmers
Pulse Code Programmers

STANDARD SPECIFICATIONS

1 — Contact Type: Closed Entry
2 — Contact Material: Be-Cu, Alloy 25
3 — Contact Finish: a - .0002" Ag over Cu Flash
b - .00002" Min. Au over Ni Flash
4 — Contact Support Material: Silicone Rubber
5 — Contact Resistance: .040 Ohm, typ.
6 — Contact Capacitance: 1 uuf [2 uuf]/in. at 1 MHz, typ.
7 — Bussing: 1st (top) Deck Vertical; 2nd Deck Horizontal
8 — Breakdown Voltage: 1000 VRMS
9 — Current Rating: 5 [2] Amps standard; 10 [4] Amps available
10 — Terminals: Combination Taper Pin Socket/Solder Cup [Solder Cup]
11 — Panel Material: Black XX Grade Phenolic
12 — Panel Marking: Alpha-Numeric/Grid, White Epoxy Ink Screened

NOTE: Values in brackets [ ] are for 1000 Series if two values are given.

A Fully Modular System

1. **Basic Module:** Enables data input in coded form.
2. **End Caps:** Snap into place to complete module assembly. Complete with 4 panel clips.
3. **Separator:** Used to fit 2 switch assemblies into one unit. They come with 2 clips.
4. **Spacer:** Blank module used to replace a module assembly.
5. **Encoded "Dummy" Module:** Enables a simultaneous switching to two circuits from one digital switch. It is driven by the adjacent module via a coupling shaft.
6. **End Caps:** For rear mounting of module assembly. They come in pairs.

LED Readouts

- Compatible with Crouzet Rocker* and Thumbwheel† switches
- Easy to assemble snap-on modules
- With or without decoding/memory
- Two sizes available

CTS® CORPORATION*

PASO ROBLES DIVISION

CTS SERIES 207 AUTO-DIP™ SWITCH

AUTOMATICALLY INSERTABLE, WAVE SOLDERABLE, BOARD WASHABLE DIP SWITCH

FEATURES

Optimized Contact System

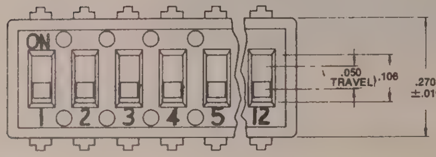
- Redundant, wiping contacts
- Contactor does not rub on plastic or deflect during actuation

Optimized Mechanical Features

- Fully sealed to withstand insertion shock, wave solder temperatures, board washing
- Positive detent separate from contactor
- Closed windows prevent particle contamination
- .050″ actuator travel
- Molded .300″ integrated circuit package outline

Premium Materials

- Inlaid gold contacts, solder coated terminals
- Beryllium copper contactor
- 260°C housing heat deflection temperature assures contact and seal integrity after wave soldering
- All plastics rated UL 94 V-0
- Permanent laser marking



"A" Overall Dim.	No. of Switch Sections	Part No.

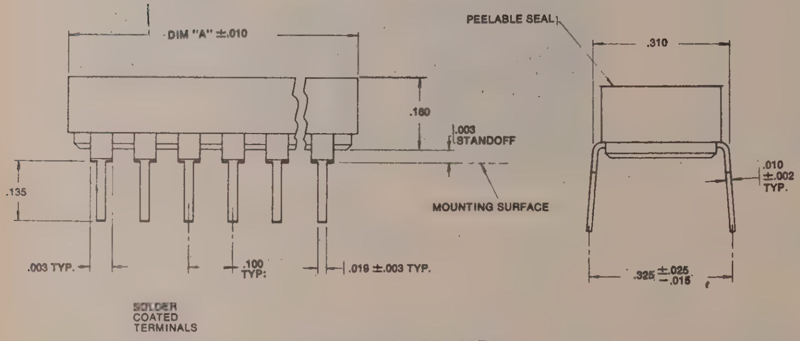
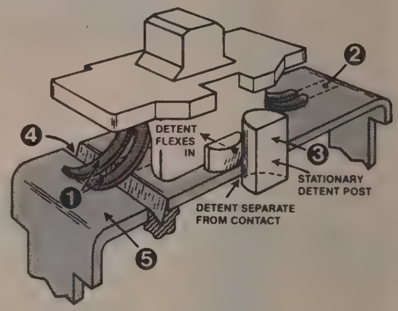
1.258	12	207-12LPST



GENERAL TOLERANCES:
Decimal dimensions ±.005″

Switch reliability that is the best ever!



1. Redundant gold inlaid contacts dramatically enhance contact reliability.
2. Positive wiping contacts assure low and consistent contact resistance. (.050″ travel)
3. Detent function separated from contacts to optimize both designs.
4. Gold contacts never abraded or contaminated by sliding over polymer surfaces. Contacts never touch a nongold surface.
5. No contactor deflection for the life of the switch. Constant contact force eliminates overstressing of contacts for greater reliability.

ELECTRICAL AND MECHANICAL SPECIFICATIONS

Contact Resistance
25 milliohms maximum initial
50 milliohms maximum at end of life

Actuation Life
2000 cycles switching
50 mA @ 6 VDC or 2 mA @ 50 mVDC

Nonswitching Rating
100 mA or 50 VDC

Insulation Resistance
1 x $10^9\Omega$ minimum between insulated terminals

Dielectric Strength
200 VAC minimum

Switch Capacitance
5 pF maximum between adjacent closed switches

Temperature Range
0 to 70°C operating
−40 to 70°C storage

Allowable Wave Solder Time
Up to 4 seconds with 260°C solder

Shock
No mechanical damage or changes of switch settings with 25 G applied for 6 milliseconds

Vibration
No mechanical damage or changes of switch settings during or after testing, when tested in 3 mutually perpendicular planes at 10-50 Hz sweep or at 60 Hz constant vibration. Amplitude .06″

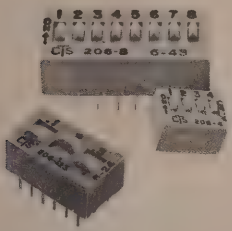
PASO ROBLES DIVISION

CTS SERIES 206

CTS DIP PROGRAMMABLE SWITCHES



1 2 3 4 5 6 7 8
CTS 206-8 6-43
206-4

FEATURES

- Contact wiping on make and break
- Suitable for flow soldering on PC board or mounting with standard DIP sockets
- Long term contact corrosion resistance provided by gold plated contact arms
- All U.L 94V-O plastic used
- Integral terminal and contact locked into plastic base rails
- Crisp, positive slide actuators
- Types 206-02 through -10 approved to MIL-S-83504/4 upon request
- Available with flush (low profile) actuators — SPST styles

Description

From 2 thru 12 SPST; 1 thru 6 SPDT; 1 thru 6 DPST; 1, 2 or 3 DPDT and 1, 2 or 3 4PST slide switches per switch package on .100″ x .300″ DIP centers

Initial Contact Resistance

50 miliohms

Maximum Contact Resistance

100 milliohms after 10,000 cycles switching 50 mA @ 24 VDC

Maximum Non-Switching Rating

100 mA or 50 VDC

Insulation Resistance

Across open switch and between adjacent closed switches: 1 x 10⁹ ohms

Dielectric Breakdown

Between adjacent switches minimum: 500 VDC

Switch Capacitance

Between adjacent switches maximum: 5.0 pF

CTS SERIES 194

CTS DIP SWITCHES

1 2 3 4 5 6 7 8
ON CTS 194-8 8221

FEATURES

- Electrical switching occurs at 50% of actuator rotation angle
- Contact wiping on make and break
- Enclosed actuators shield contacts from foreign particles throughout life of switch
- The gold plated, over-center design provides positive detent action
- Reliable tape top seal optional/ bottom epoxy seal standard
- Insert molded base halves of thermoset material ensure mechanical integrity of contacts and terminals through soldering operations
- All U.L. 94 V-O plastics used

.886	8	194-8S	194-8ST
1.086	10	194-10S	194-10ST

Description

Side actuated 4, 8 or 10 section SPST switching functions per package on .100" x .300" DIP centers

Initial Contact Resistance

50 milliohms maximum

Maximum Contact Resistance

100 milliohms after 7000 cycles switching 50 mA @ 24 VDC

Insulation Resistance

Across open switch and between adjacent closed switches: 1 x 10^9 ohms minimum

Dielectric Breakdown

Between adjacent switches minimum 500 VDC

Switch Capacitance

Between adjacent switches maximum: 5.0 pF

CTS SERIES 197

FEATURES

- Designed for automatic insertion
- Integral terminal and contact locked into thermoset base rails
- Contact wiping on make and break
- Break before make contacts
- Useful in "service/operate" applications, low level signal routing, digital circuit programming, etc.
- Long term contact corrosion provided by gold plated/inlaid contacts
- All U.L. 94 V-O plastics used

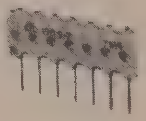
CTS SERIES 198

CTS PROGRAMMABLE DIP/SIP SHUNT NETWORKS



Description

Low cost matrix programming. DIPs offered in 4-24 terminal configurations: SIP's in 2-12 terminal packages

Current Rating

1.0 amp maximum

Insulation Resistance

1 x 10^{11} ohms minimum between any 2 electrically isolated terminals

Dielectric Breakdown Voltage

500 VDC minimum between any 2 electrically isolated terminals

Insulation

UL recognized 94 V-O rated high temperature thermoplastic

Metal Parts

Solder plated copper alloy. (Gold plated terminals optional)

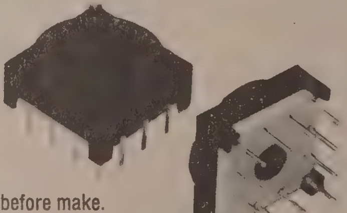
SERIES 235
Enclosed Miniature .500" Square Rotary Switches



Switch Functions:

1. Single pole, 11 positions, break before make.
2. Single pole, 11 positions, make before break.
3. Binary up to hexadecimal (0-15).
4. Other functions and combinations are available with special tooling.

Electrical and Mechanical Specifications:

1. Contact resistance varies with switch style: Typical values for 11 positions break before make. 0.1 ohm initial contact resistance, 0.15 ohm after 1000 cycles of 360° rotation.
2. Standard operating temperature range: −55°C to +85°C.
3. Rotational life: 1000 cycles of 360° rotation.
4. Wiping action on contact.
5. 360° rotation.
6. Small size: .5" x .5" square.
7. 250" profile from mounting plane to top of package.
8. Enclosed construction excludes dust and foreign material.
9. Terminal pull strength: 5 lbs. minimum.

SERIES 196
Switchable DIP Attenuator

- Reliable replacement for thumbwheel switch-type attenuators (at substantial savings)
- 75 ohm and 600 ohm unbalanced PI or T configuration networks
- .100" x .300" DIP packages
- Standard thick film ceramic modules; custom thin film modules available upon request
- Sealed bottom or top/bottom versions optional; assures contaminate-free switch operation after flow soldering and cleaning
- Standard values from .1 dB to 16 dB in increments of .1 dB to 2 dB

Electrical and Environmental Specifications
(all are absolute maximum ratings)

Electrical:	
Impedance Tolerance	±2%
Power Rating (maximum input signal)	20 dBm
Insertion Loss	.02 dB
Environmental:	
Storage Temperature	−40°C to +85°C
Operating Ambient Temperature	0°C to +70°C
Lead Temperature (soldering 10 seconds)	300°C maximum

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC	alternating current
A/D	analog to digital
ADC	analog to digital converter
ADP	automatic data processing
AF	audio frequency
AFC	automatic frequency control
ALGOL	algorithmic language
AM	amplitude modulation
AND	a logical operator
AQL	acceptable quality level
ASCII	American national standard code for information interchange
AWG	American wire guage

B

BALUN	balanced to unbalanced
BASIC	beginners' all-purpose symbolic instruction code
BCD	binary-coded decimal
BNC	baby "N" connector
BUS	basic utility system

C

CAD	computer aided design
CAM	computer aided manufacture
CATV	cable television or community antenna television
CERMET	ceramic metal element
Comm.	communications
CMOS	complementary metal-oxide semiconductor
CPS	characters per second
CPU	central processing unit

D

D/A	digital to analog
DAC	digital to analog converter
DC	direct curent
DIL	dual in-line
DIP	dual in-line package
DPM	digital panel meter
DTL	diode transistor logic

E

EDP	electronic data processing
EBCDIC	extended binary coded decimal interchange code
EEPROM	electrically erasable PROM
EMC	electromagnetic compatibility
EMI	electromagnetic interference
EPROM	electrically programmable ROM
ESR	equivalent series resistance

F

FEP	fluorinated ethylene propylene Copolymar, 200° Teflon
FET	field-effect transistor
FM	frequency modulation
FORTRAN	formula translator

G

GaAsFET	gallium arsenide field effect transistor
GPIB	general purpose interface bus

H

HF	high frequency (3 to 30 MHz)
HIPOT	test, measurement and diagnostic equipment
HLL	high level language
HV	high voltage
Hz	Hertz

I

IC	integrated circuit
IF	intermediate frequency
IO	input/output (devices)
IR	insulation resistance (or) infrared

J

JFET	junction field effect transistor
JMOS	junction metal oxide semiconductor

K

kHz	kilohertz (10^3 hertz)
KSR	keyboard send receive

L

LC	inductance capacitance
LCD	liquid crystal display
LED	light-emitting diode
LF	low frequency (30 to 300 kHz)
LSI	large scale integration
LVDT	linear velocity displacement transformer

M

MATV	master antenna television
μF	microforad
MHz	megahertz
MOS	metal oxide semiconductor
MOSFET	metal oxide semiconductor field effect transistor
MOV	metal oxide varistor
MPU	microprocessor unit
MSI	medium scale integration

N

NBS	National Bureau of Standards
NIM	nuclear instrumentation module
NOR	not OR

O

OEM	original equipment manufacturer
OR	a logical operator

P

pF	picofarad
PC	printed circuit
PCB	printed circuit board
PIN	positive-intrinsic-negative (transistor)
PLA	programmable logic array
PPI	plan position indicator
PROM	programmable read only memory
PUT	programmable unijunction transistor

Q

QAM	quadrature amplitude modulation
Q (meter)	quality-factor meter

R

RAM	random access memory
RC	resistance-capacitance
RFI	radio frequency interference
RMS	root mean square
ROM	read only memory
RF	radio frequency
RFC	radio-frequency choke
RFI	radio-frequency interference
RTD	resistance-temperature detector
RTL	resistor transistor logic
RTV	room temperature vulcanizing
RW	read/write

S

SAS	silicon asymmetrical switch
SBC	single board (micro) computer
SBS	silicon bilateral switch
SCR	silicon-controlled rectifier
SIP	single in-line package
SSI	small scale integration
SSR	solid state relay
STL	Schottky transistor logic

T

TC	temperature coefficient
TCXO	temperature compensated crystal oscillator
TFE	tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL	transistor-transistor logic
TTY	teletypewriter

U

UHF	ultra high frequency (300 MHz to 3 GHz)
UL	Underwriters Laboratory
UPS	uninterruptible power supply

V

VAC	volts (of) alternating current
VAR	volt-ampere reactive
VCR	video cassette recorder
VDC	volts (of) direct current
VHF	very high frequency
VHSIC	very high speed integrated circuit
VLF	very low frequency (3 to 30 kHz
VLSI	very large scale integration
VRM	voice recognition module
VTVM	vacuum tube volt meter
VU	volume unit
VSWR	voltage standing wave ratio

W

WPS	word processing software

Y

YIG	yttrium iron garnet

Dreefs

ROCKER SWITCHES

STANDARD FEATURES:

- All rocker switches rated at 16 amps @ 125/250VAC
- Includes dry circuit or high-inrush
- Maintained or momentary action
- Welded solid silver contacts
- Wide range of colors available
- VDE and other international approvals
- Body material: Nylon Type 6/6.(rated at 105°C)
- 2500V RMS Dielectric strength (Minimum)
- Greater than 3mm gap between contacts
- Greater than 4mm over-surface clearance
- Snap-in installation
- Single or Double Pole; single or double throw
- Molded or printed legends
- Illuminated or non-illuminated (Neon or incandescent)
- High-brightness, long-life neon
- Matching panel indicator styles
- Spade, solder lug or screw type terminals

When Dreefs says "standard", that's exactly what we mean. Standard features like switch ratings which give you an enormous degree of freedom when designing your product--and for not a penny more! Like a range of North American and European approvals unmatched by any other American switch manufacturer. Because we know that in your business, the ability of products to travel without hassle is important. And we know that one size--or color--or style does not fit all. When it comes to quality, reliability and performance, you'll find more choices at **Dreefs Switch** than anywhere else--because your special requirements are our standards.

Designed to provide users of the Carlingswitch Mini-Tippettes® with a high-quality second source product, the Wi26 series is fully compatible with the standard 1.0" X 1.125" panel cutout. Highly legible "1" and "0" numerals are molded directly into the bezel.

SERIES WiXII ROCKER SWITCHES
STANDARD SWITCH STYLES

1-WiXII STANDARD

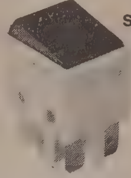
The Dreefs Series WiXII rocker switches are available in several different mounting, bezel, and rocker styles, as follows:

Standard. The Standard housing is characterized by a square-cornered bezel design and positive-grip mounting ears for snap-in mounting. These mounting ears provide a snug, wiggle-free installation in a wide range of panel thicknesses. Proper fit is assured by specifying panel thickness when ordering from the factory. Matching indicator housings and lenses are available in all colors. Paddle and splashguard version (not shown) are also available.

1-WiXII SOFTFORM

2-WiXII STANDARD

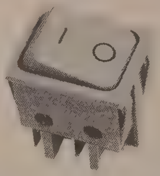
Softform.® The Softform housing features bezel contours which are slightly rounded on the top edge and at the corners. Serrated clips provide snap-in mounting and minimize lateral movement in the panel cutout. This bezel design gives a "softer" appearance to the mounted switch; while the serrated clip type of snap-in mounting provides easier switch removal from the panel when it is desired to gain access to the switch terminals. Matching indicator housings and lenses are available in all colors.



2-WiXII SERRATED CLIP

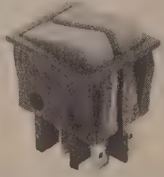
2-WiXII SOFTFORM

Hi-Tek. The new Hi-Tek housing incorporates variations of the features of the Standard and Softform versions, while displaying unique design characteristics of its own. The outside contours of the bezel are not so square as the Standard, nor as rounded as the Softform, however, the **inside** corners of the bezel have been rounded, to accomodate the rounded corners of the rocker design. Also, all edges of the rocker have been slightly rounded, to provide a clean, instrument-type appearance to the mounted switch. Serrated clips on each side of the switch body provide snap-in mounting and easy removal.



2-WiXII HI-TEK

2-WiXII STD DUAL



2-WiXII DUAL W/CLIPS

Dual. The Dual housing features a compartmentalized body which is designed to accomodate either: two individual switches, two individual indicators, or a combination switch and indicator. This housing is available in either the Standard or Softform design.

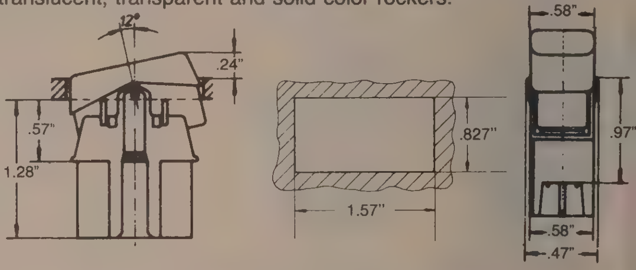
2-WiXII SOFTFORM DUAL

STANDARD FEATURES:

- All rocker switches rated at 16 Amps @ 125/250VAC
- Includes dry circuit or high-inrush
- Maintained or momentary action
- Welded solid silver contacts
- Wide range of colors available
- VDE and other international approvals
- Body material: Nylon Type 6/6.(rated at 105°C)
- 2500V RMS Dielectric strength (Minimum)
- Greater than 3mm gap between contacts
- Greater than 4mm over-surface clearance
- Snap-in installation
- Single or Double Pole; Single or Double Throw
- Molded or printed legends
- Illuminated or non-illuminated (Neon or incandescent)
- High-brightness, long-life neon
- Matching panel indicator styles
- Spade, solder lug or screw type terminals

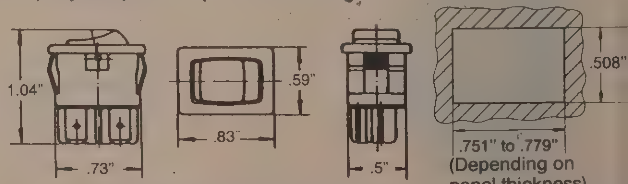
Wi23

These splashproof rocker switches offer a unique capability for contiguous mounting in a single panel cutout, so design freedom is built-in while fluids are sealed out. And you can select from translucent, transparent and solid color rockers.



Wi32

Subminiature rocker rated at 16 amps @ 125VAC or 10 amps @ 250VAC. Available in SPST, SPDT, and DPST. Uniquely adapted for power switching where size is a factor.



.751" to .779"
(Depending on
panel thickness)

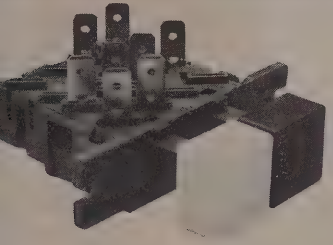
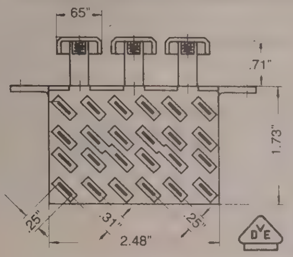
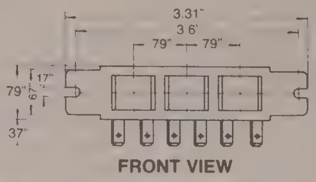
DPS PUSHBUTTONS The unique terminal arrangement and building block technique used in the design of this ushbutton allows great versatility in combining switching functions along a single shaft. For instance, power control as well as logic level witching are easily accomodated within one switch housing. The standard heavy-duty, heat resistant thermoplastic housing material llows this switch to be used in adverse temperature environments. Applications include computerized equipment, industrial controls, ppliances, office machines and instrumentation.

STANDARD FEATURES: DPS PUSHBUTTONS

- 1 to 8 pushbutton stations
- Rated at 16 Amp @ 125/250VAC
- Momentary or push-push action
- Wide variety of pushbutton styles
- Dry switching types available
- VDE and other International approvals
- Welded solid silver contacts
- Spade terminals
- Standard legends



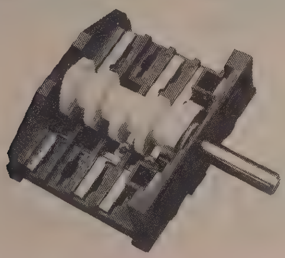


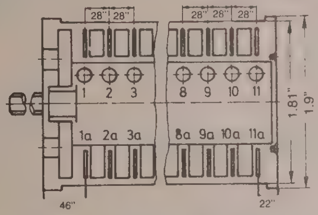


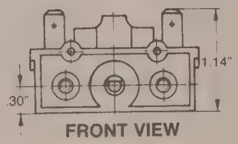
CH ROTARY SWITCH Featuring the capability of stacking up to 23 poles, each rated at 16 amp @ 125/250VAC, the elegantly simple design and rugged construction of this switch make it the designer's choice for long life and trouble-free operation. The standard solid silver contacts add a further dimension of reliability for thousands of power switching operations. The cam-action switching mechanism imparts a crisp, tactile feedback for positive detent.

STANDARD FEATURES: CH ROTARY

- 1 to 23 poles; 1 to 12 positions
- Flat or back-to-back construction
- Rated at 16 Amp @ 125/250VAC
- Variable shaft lengths and diameters
- Housing rated to withstand 85 C or 125 C
- VDE and other International approvals
- Available with matching thermostat attached
- Straight, angular or spur gear drive.
- Spade or solder lug terminals.







RTXI THERMOSTAT Designed to provide maximum reliability, repeatability and long life using time-proven materials and techniques, this thermostat utilizes a combination of a bi-metallic regulator with a snap-action switch mechanism, mounted on a ceramic base. Precise construction specifications permit factory adjustment within close tolerences, repeatable over at least 100,000 cyles. Various shaft lengths and diameters are standard. Spade or screw terminals in various configurations are available.

STANDARD FEATURES

- Rated at 16 amp @ 380VAC
- Available in either the 30° Series or the 50° Series, as follows:
- Temperature Differential: 1.0° C to 3° C (1.8° F to 5.4° F) within each temperature range.

SERIES	TEMPERATURE RANGE	
30° C (54° F)	5° C to 35° C	(41° F to 95° F)
	10° C to 40° C	(50° F to 104° F)
	15° C to 45° C	(59° F to 113° F)
	20° C to 50° C	(68° F to 122° F)

SERIES	TEMPERATURE RANGE	
50° C (90° F)	0° C to 50° C	(32° F to 122° F)
	5° C to 55° C	(41° F to 122° F)
	10° C to 60° C	(50° F to 140° F)
	15° C to 65° C	(59° F to 149° F)

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

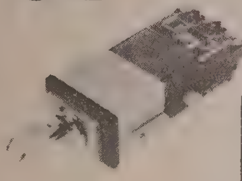
EAO SWITCHES

The World's Finest Switching Products

SERIES 01

- Round, Square, and Rectangular bezel-front panel mount
- All types mount in a round hole
- 1-4 poles
- Momentary or maintained action
- Maintained action is position indicating
- 2 piece lens cap. Can be separated for insertion of film
- 3 Switching elements—Snap, Low Level, Electronic
- 9 Lens colors
- Front panel replacement of lamps
- Lamps do not travel when the switch is actuated

SERIES 02

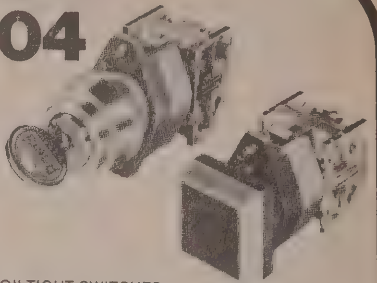


- Double pole, Double throw Momentary or Maintained action on both 380 Volt 10 Amp contacts
- Rectangular lens cap—9 colors
- Key Lock available

SERIES 03

- Full or split display—2 lamp
- Double pole, single or 2 button action
- Momentary, Maintained or combination
- Independent or Interlocked
- Key Switches available

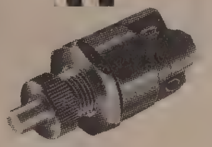
SERIES 04



OILTIGHT SWITCHES

- Round or Square panel front
- Snap together modular design
- Up to 8 pole switching
- Lighted and unlighted pushbuttons
- Mounts in 890" round hole
- Lever, Key-Lock, Emergency Stop actuators

SERIES 11

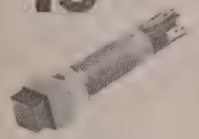


- Round lens cap—6 colors
- Mount from rear of panel
- 1-3 pole switching elements
- Momentary or maintained action
- Lamps replaceable from front
- LED available

SERIES 14

- Combines the rugged design of the 04 oiltight panel seal and the choice of switching elements
  - 5 Amps 250 volt
  - Low level or electronic elements
- Specifically designed for machine tool applications where low level or computer switching is required
- High-Security Key Lock available

SERIES 19

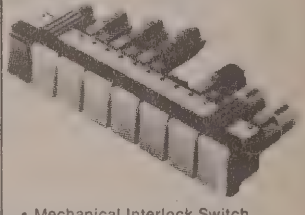


- Miniature lighted pushbuttons & indicators
- 9 mm (.354") centers.
- Round or square bezel
- Low level switching: μV up to 60V; μA up to 100 mA
- Momentary or maintained action (position indicating)

SERIES 21

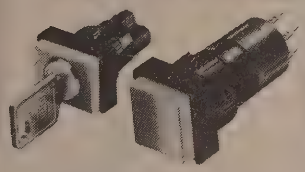
- Non illuminated version of the Series 11 with 6 different colored actuator button.
- Switching Elements
  - 5 Amp 240 volt 1 to 3 poles
  - Low level switch
  - Electronic switch Hall effect
- Momentary and maintained (position indicating) action

SERIES 30



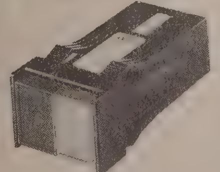
- Mechanical Interlock Switch
- 2—12 Switch units
- 5 different interlock combinations
- Slide Mechanism—All metal construction
- 3 Switching elements—Snap, Low Level, Electronic

SERIES 31/31LL



- Square or Rectangular bezel
- Flat or Concave lens
- 1–4 pole snap acting switch, Low Level or Electronic
- Lamp T-1 ¾ groove base
- Key Lock—round, square, rectangular with 3 levels of security: Low-Cost, Standard and High-Security

SERIES 41



- 2 lamp switch
- Full or split screen
- Same panel dimensions as 31 Series
- Soft mount—from front of panel
- Switching elements same as 31 Series

SERIES 51

- Combines style of Series 31 with oil and water tight features of Series 14.
- Integral 'O' ring seal; one-piece actuator; conforms to IP65 requirements
- 1-4 pole, snap-acting contacts, low level or electronic switching.
- Round, square and rectangular panel fronts; choice of 8 lens colors.

SERIES 98

- Oil/Watertight seal; built to IP67 standards
- 3 sizes; non-illuminated or illuminated (1 or 2 LED)
- Momentary or maintained action, SPDT, (Form C)
- Rated at 50 VAC/72 VDC
- Gold plated contacts; over 5 million operations

SERIES 99

LIGHTED KEYBOARD SWITCH

- Momentary and maintained action
- Gold contacts
- Long life—5 million operation minimum
- Low level switching —dry circuit
- Low constance resistance— 10 milli-ohms
- Low contact bounce, < 100μ sec

EAO Switch. You can feel the difference.

U.L. & C.S.A. APPROVAL NUMBERS

U.L. Where switches are U.L. Listed, approval is listed under file number E52533, Guide WOYR. The Series 775 Indicator is U.L. Recognized under File Number E73960, Volume 1.

C.S.A. Where switches are C.S.A. Certified, Approval number is 41964, Guide 184-N-90, Class 3211.

EATON

CUTLER-HAMMER
ILLUMINATED PUSHBUTTON SWITCHES

GENERAL INFORMATION & TECHNICAL DISCUSSION

Three major terms designate a switch's function — POLE, THROW and BREAK. The term POLE refers to the number of conductors that can be controlled by the switch. A single-pole switch is capable of interrupting the current in a single conductor of the circuit. A double-pole switch is capable of simultaneously interrupting the current in two separate conductors. The term THROW indicates the number of circuits the switch can control. The moving contact member of a single-throw switch completes only one circuit. A double-throw switch permits its moving contact element to alternately complete two extreme positions. The term BREAK refers to the breaking or opening of a circuit. Single-break means that the contacts are separated at only one place. A double-break switch has two pairs of contacts that open the circuit at two places. A double-break switch provides greater volume of contact material, permitting greater heat dissipation and thereby longer switch life. A double-break switch also has twice the voltage breaking capacity, a desirable feature for DC circuit applications. **ALL CUTLER-HAMMER SINGLE-THROW SWITCHES ARE DOUBLE-BREAK.**

NORMALLY-OPEN OR NORMALLY-CLOSED?

The terms normally-open and normally-closed refer to the physical position of the contacts in reference to each other. In a normally-open switch, the contacts are separated or open; thus the circuit is open and no current can flow through the switch. Typical is a pushbutton switch where depressing the pushbutton causes the contact element to move to the other of its extreme positions and close the circuit. In a normally-closed switch, the contacts are closed, thereby making electrical contact and electrical circuit. Operation of the switch causes the contact element to move and open the circuit.

CIRCUITRY ILLUSTRATIONS

Below are illustrated the most common circuits found in pushbutton switches. The "FORM" designations are the old relay circuit terminology still used today by some switch manufacturers.

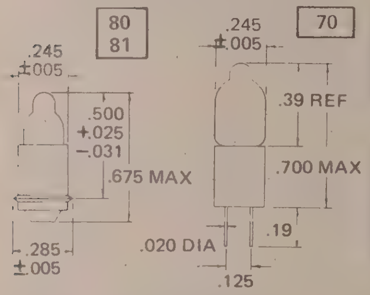
37	28-3158-8	17	28	.06	.65	5,000

*Use this two digit number for installation in switches and indicators

NEON LAMPS

Miniature Neon glow lamps are characterized by a rare combination of brightness, long life, dependability, and extremely low cost. Lamps requiring external resistance are available with either T 1¾ midget flange base or Bi-Pin Base. Lamps with built-in ballast resistors are available in T 1¾ Midget Flange Base only. All lamps listed are recommended for use with red, yellow, white or orange filters and lens caps only. Based neon lamps may also be ordered as part of Cutler-Hammer illuminated pushbutton switches and indicator assemblies, or with use in Cutler-Hammer Bi-Pin Lamp Sockets.



IV. T 1¾ Bi-Pin Base Neon Lamp for all 800 Series "Shorty" Switches and Indicators

Item No.*	To order lamp separately	CLC Lamp Number	Circuit Volts A.C.	Circuit Volts D.C.	Nominal Current MA	Average Useful Life (hrs.)	External Resistance Required	Ignition Voltage A.C.	Ignition Voltage D.C.	Bulb Size	Lamp Length	Lead Length

94	ESBR 5531	20	8	1.7	Diffused

*Use this two digit number for installation in switches and indicators.

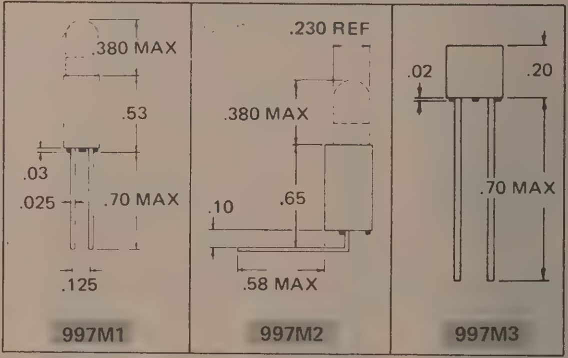
VII. LED Lamps for Series 231 thru 235 Switches and Indicators

Color	Voltage	W/O Diode Protection	With Diode Protection
		Item No.	Item No.
Red	VDC ❷ 5 VDC 15 VDC	01 02 03	11 12 13
Yellow	VDC ❷ 5 VDC 15 VDC	04 05 06	14 15 16
Green	VDC ❷ 5 VDC 15 VDC	07 08 09	17 18 19

❷ Lamps without internal current limiting resistor. User must include in his circuit — to give current of 20mA to LED.

Note: LEDs are sold installed only

BI-PIN LAMP SOCKETS



Cutler-Hammer Bi-Pin Lamp Sockets are the lowest cost units on the market today. Designed for mounting directly on Printed Circuit Boards, these lamp sockets accept T 1¾ Bi-Pin Incandescent, Neon or LED lamps. All plastic parts are high impact polyester, while termination material is gold plated Grade A, spring temper phosphor bronze. Sleeved versions mount either parallel or perpendicular to the Printed Circuit Board, and all versions are suitable for flow solder or wire wrap. The standard configurations are as illustrated, and the Factory will be glad to assist as far as possible with special requirements.

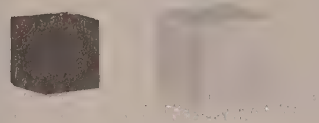
CUTLER-HAMMER
ILLUMINATED PUSHBUTTON SWITCHES

PUSHBUTTON STYLES AND INFORMATION
FULL LEGEND PUSHBUTTON STYLES

STYLES "T" & "M"

Style "T" - Glossy Finish
Style "M" – Matte Finish
Translucent Colors: Orange, White, Red, Yellow, Blue and Green

Available on all 400, 500, 600, 800 and 900 Series Switches and Indicators.



STYLE "F"

White pushbutton with colored filter insert Filter colors: Orange, Red, Yellow, Blue or Green. Outer White Shell may be engraved with black letters (see Engraving and Hot Stamping information below).

Not available on Series 880, 881, 882, 883, 886, 887, 850, 854, 856 or 857 pushbutton switches and indicators.

STYLE "C"

Clear pushbutton with colored filter insert. Filter colors: Orange White, Red, Yellow, Blue or Green. The filter insert may be removed to insert or change film, with engraved legend held captive between the clear shell and filter insert.

Not available on Series 880, 881, 882, 883, 886, 887, 850, 854, 856 or 857 pushbutton switches and indicators.

HORIZONTAL SPLIT LEGEND PUSHBUTTON STYLES

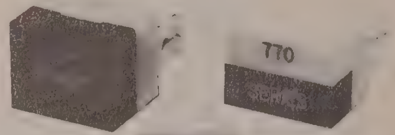
EXPLODED VIEW SERIES 728

STYLE "F"

Outer white pushbutton with two filter inserts and a metal divider for horizontal split legend. Filter Colors: Orange, Red, Yellow, Blue, Green or White.

STYLE "C"

Outer clear pushbutton with two filter inserts and a metal divider for horizontal split legend. Filter colors same as for Style "F".

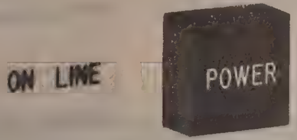


SERIES 770

Full color or horizontal split color pushbuttons with metal divider. Matte Finish only on pushbutton. Translucent Colors: Orange, White, Red, Yellow, Blue and Green.

NOTE: THE FILTER INSERTS FOR STYLES F & C FOR THE SERIES 611 & 728 PUSHBUTTONS ARE NOT REMOVABLE

ENGRAVING AND HOT STAMPING



All legend markings are engraved or hot stamped in accordance with the limitations below. Standard markings are of condensed gothic type, 1/8" high characters, with white letters on blue, red and green translucent pushbuttons, and black letters on white, yellow, orange and all filtered pushbuttons. Our Sales Offices will be glad to assist with any special requirements as to customized symbols, type styles, and character size.

PUSHBUTTON SIZE

2 lines, 8 characters per line

REAR PROJECTION INDICATORS

Cutler-Hammer's rear projection indicators are unique products for use behind plastic translucent or dead front panels for simple, inexpensive, multiple-message display.

Self-contained "egg-crate" dividers available.

Direct Printed Circuit Board Mounting or Snap-in Mounting to sub-panel. Can be used as individual or multiple egg-crate assemblies.

Units accept 1, 2, or 3 T. 1¾ Bi-Pin incandescent, neon or LED lamps.

Plastic casing is manufactured in white polyster for excellent light reflection.

094M2

BARRIERS

Barriers may be used to prevent accidental switch operation or to protect panel mounted switches from objects dropped on to the panel. Cutler-Hammer barriers are an integral part of the switch housing and do not require modified panel cut-outs or stocking of any accessory parts. To order a barrier mount pushbutton switch simply insert the proper number as shown on the applicable ordering chart on the preceding pages.

NEW MASTER CATALOG DESCRIBING COMPLETE LINE OF CUTLER-HAMMER COMMERCIAL MINIATURE SWITCHES

The complete line of Cutler-Hammer miniature switches is included in a just published 64 page catalog. Electrical and material specifications, product photographs, dimension drawings, construction details and wiring diagrams provide a thorough description for the variety which includes miniature toggle, rocker, illuminated rocker, keylite, and pushbutton switches. Also included are product summary charts for quick selection of standard switches and a section devoted to custom designed miniature switches. Not happy with your present source? Our catalog even includes complete cross references to our competition.

COMPREHENSIVE PRODUCT BROCHURE

Describing Cutler-Hammer's new Econoswitch line of cost efficient sealed switches.

From rocker action to lever-locks, we have it all, and can provide as standard, many combinations of configurations including:

- One, two and four pole switching
- 16 circuit combinations
- Solder, screw or spade type terminations
- Five actuator styles
- Four mounting methods to suit your application

We call it the Econoswitch line. If your application calls for a switch that's dust proof and water/moisture resistant — but the price of a MIL SPEC switch is prohibitive for you — we have a new answer for you.

Write for this complete brochure NU-161.

EECO® THUMBWHEEL SWITCHES

1000 Series Thumbwheel Switch

The .236 wide 1000 Series switch provides reliability and compact size for applications where space is limited. Available in standard thumbwheel adjust, or in safety-lock Push-Set and Pen-Set.

Number of Positions	10
Life	300,000 Detents
Electrical Rating	
Non-Switching Load	0.500 Amps
Switching Load	0.100 Amps
Contact Resistance	0.200 Ohms
Dielectric Withstanding V.	500 VDC
Seal	Dust
Panel Mount	Rear
Dimensions, Module	
Height	0.551 (14.0)
Width	0.236 (5.99)
Depth, Behind Panel	0.865 (21.97)
Actuation Method	
Thumbwheel/Push/Pen-Set	Std.

1100 Series Thumbwheel Switch

With the same narrow .236 width design as the 1000 Series switch, but with front mount configuration; the 1100 Series switch offers space saving dimensions in an attractive black matte finish.

Number of Positions	10
Life	300,000 Detents
Electrical Rating	
Non-Switching Load	0.500 Amps
Switching Load	0.100 Amps
Contact Resistance	0.200 Ohms
Dielectric Withstanding V.	500 VDC
Seal	Dust
Panel Mount	Front
Dimensions, Module	
Height	0.708 (17.98)
Width	0.236 (5.99)
Depth, Behind Panel	0.905 (22.99)
Actuation Method	
Thumbwheel/Push/Pen/Lock-Set	Std.

1200 Series Thumbwheel Switch

This .300 wide single pole decimal or binary coded switch offers long life and reliability in a snap-together Push-Set panel switch. With small size and easily read characters, the 1200 Series switch provides 10 positions.

Number of Positions	10
Life	300,000 Detents
Electrical Rating	
Non-Switching Load	0.500 Amps
Switching Load	0.100 Amps
Contact Resistance	0.200 Ohms
Dielectric Withstanding V.	500 VDC
Seal	Dust
Panel Mount	Front
Dimensions, Module	
Height	0.708 (17.98)
Width	0.300 (7.62)
Length	0.905 (22.99)
Actuation Method	Push-Set

1300 Series Thumbwheel Switch

With .300 width, snap-together assembly, front snap-in mounting and large characters, this 10- or 16-position switch is the perfect choice for users that require high reliability and compactness.

Number of Positions	10 and 16
Life	1,000,000 Detents
Electrical Rating	
Non-Switching Load	1.000 Amps
Switching Load	0.100 Amps
Contact Resistance	0.200 Ohms
Dielectric Withstanding V.	500 VDC
Seal	Dust
Panel Mount	Front
Dimensions, Module	
Height	0.945 (24.00)
Width	0.300 (7.62)
Depth, Behind Panel	1.338 (33.99)
Actuation Method	Push-Set

1400 Series Thumbwheel Switch

Thumbwheel, Push-Set or Lock-Set, the 1400 Series switch with its high reliability, easy snap-together assembly and variety of binary or decimal codes gives design flexibility to the user.

Number of Positions	10 and 16
Life	1,000,000 Detents
Electrical Rating	
Non-Switching Load	1.000 Amps
Switching Load	0.100 Amps
Contact Resistance	0.200 Ohms
Dielectric Withstanding V.	500 VDC
Seal	Dust
Panel Mount	Front
Dimensions, Module	
Height	0.945 (24.00)
Width	0.315 (8.00)
Depth, Behind Panel	1.338 (33.99)
Actuation Method	
Thumbwheel/Push/Lock-Set	Std.

1600 Series Thumbwheel Switch

Low cost and small size, combined with front snap-in mounting make this 10-position thumbwheel actuated switch ideal for applications where panel space is limited. Snap-together modules eliminate tools.

Number of Positions	10
Life	100,000 Detents
Electrical Rating	
Non-Switching Load	1.000 Amps
Switching Load	0.100 Amps
Contact Resistance	0.150 Ohms
Dielectric Withstanding V.	500 V rms
Seal	None
Panel Mount	Front
Dimensions, Module	
Height	0.945 (24.00)
Width	0.295 (7.49)
Depth, Behind Panel	1.110 (28.19)
Actuation Method	Thumbwheel

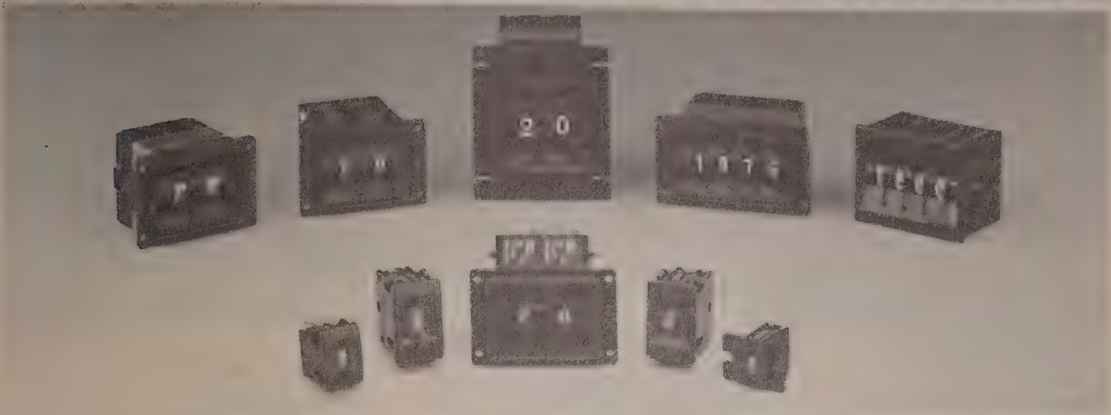
EECO® THUMBWHEEL SWITCHES



1776/1976 Series Thumbwheel Switch

Revolutionary in design, the 1776 Series .500 wide thumbwheel switch, and the slimmer (.350) 1976 Series switch, offer optional notched terminals for mounting directly to motherboards.

Number of Positions	8, 10, 12, and 16
Life	1,000,000 Detents
Electrical Rating	
Non-Switching Load	3.000 Amps
Switching Load	0.125 Amps
Contact Resistance	0.100 Ohms
Dielectric Withstanding V.	1000 V rms
Seal	Dust
Panel Mount	Rear
Dimensions, Module	
Height	1.200 (30.48)
Width	0.500 (12.70),0.350 (8.89)
Depth, Behind Panel	1.508 (38.30)
Actuation Method	Thumbwheel

1800 Series Thumbwheel Switch

A reliable, low cost snap-in mount switch available in gray, beige or black in gloss or molded matte finish. The 1800 Series switch has PCB termination and is a slim .315 wide.

Number of Positions	10
Life	500,000 Detents
Electrical Rating	
Non-Switching Load	1.000 Amps
Switching Load	0.100 Amps
Contact Resistance	0.100 Ohms
Dielectric Withstanding V.	1000 V rms
Seal	None
Panel Mount	Front
Dimensions, Module	
Height	1.240 (31.50)
Width	0.315 (8.00)
Depth, Behind Panel	1.417 (35.99)
Actuation Method	Thumbwheel

2000 Series Thumbwheel Switch

A general purpose, large industrial-type switch, the 2000 Series offers over 50 codes in 8-, 10-, 12-, and 16-positions. Available with an unsealed and sealed option, plus extra large legend.

Number of Positions	8, 10, 12, and 16
Life	1,000,000 Detents
Electrical Rating	
Non-Switching Load	3.000 Amps
Switching Load	0.125 Amps
Contact Resistance	0.100 Ohms
Dielectric Withstanding V.	1,000 V rms
Seal	Optional
Panel Mount	Rear
Dimensions, Module	
Height	2.100 (53.34)
Width	0.500 (12.70)
Depth, Behind Panel	2.030 (51.56)
Actuation Method	Thumbwheel

6000 Series Thumbwheel Switch

Designed to Military standards and field-proven, the 6000 Series switch is sealed to protect the contact area from dust, moisture and salt spray. Offered in 8-, 10-, and 12-positions, and with 3 types of term.

Number of Positions	8, 10, and 12
Life	1,000,000 Detents
Electrical Rating	
Non-Switching Load	3.000 Amps
Switching Load	0.125 Amps
Contact Resistance	0.100 Ohms
Dielectric Withstanding V.	1,000 V rms
Seal	Environmental
Panel Mount	Rear
Dimensions, Module	
Height	1.150 (29.21)
Width	0.500 (12.70)
Depth, Behind Panel	1.560 (39.62)
Actuation Method	Thumbwheel

7000 Series Military Thumbwheel Switch

Qualified to the rigid standards of MIL-S-22710/15, this Military-grade switch offers a completely sealed contact area, impervious to dust, high humidity and salt spray. Can be used safely in explosive environments.

Number of Positions	8, 10, and 12
Life	1,000,000 Detents
Electrical Rating	
Non-Switching Load	3.000 Amps
Switching Load	0.125 Amps
Contact Resistance	0.100 Ohms
Dielectric Withstanding V.	1,000 V rms
Seal	Environmental
Panel Mount	Rear
Dimensions, Module	
Height	1.150 (28.07)
Width	0.500 (12.70)
Depth, Behind Panel	1.570 (39.88)
Actuation Method	Thumbwheel

Thumbpot™ Digital Voltage Divider

This unit is available in .500 or .350 wide models and electrically divides the input voltage into precise, incremental voltage output values. The major feature of the unit is exacting repeatability.

Number of Positions	10
Life	1,000,000 Detents
Electrical Rating	
Std. Res. Range	100-100K Ohms
Std. Res. Tolerance	+ 1%

Actuation Method	
Screwdriver	Standard
Shaft	Available
Binary Coded Output	Standard

2400 Series
MINI-DIP®

With exclusive gold-on-gold cleaning/wiping action contacts, this series of switches assures low contact resistance while the unique locking rod design prevents accidental actuation.

Number of Positions	2 to 10
Life	2,000 Detents
Electrical Rating	
Non-Switching Load	1.000 Amps
Switching Load	0.125 Amps
Contact Resistance	0.050 Ohms
Dielectric Withstanding V.	500 V rms
Full Environmental Seal	Optional
Dimensions	
Height	0.375 (9.52)
Width	0.385 (9.78)
Length	0.200 - 1.000 (5.08 - 25.4)
Actuation Method	Rocker
Standard Options	
Special Marking	Yes
Seal	Yes

2100 Series
STRIPSWITCH®

The most economical method of handsetting coded values. Requires a minimum of space, no mounting hardware, and can be "ganged" up to four stations in a strip. Two legend locations provide readability.

Number of Positions	10 and 16
Life	250,000 Detents
Electrical Rating	
Non-Switching Load	3.000 Amps
Switching Load	0.125 Amps
Contact Resistance	0.100 Ohms
Dielectric Withstanding V.	500 V rms
Dimensions	
Height	0.430 (10.92)
Width	0.775 (19.68)
Length	0.800 (20.32)
Actuation Method	
Thumbwheel	Standard
Screwdriver	Standard
Binary Coded Output	Standard

2200 Series
STRIPSWITCH®

This switch offers all of the features of the proven 2100 Series STRIPSWITCH in a low-profile, fully-sealed unit. The easy-to-read thumbwheel has a built-in screwdriver slot.

Number of Positions	10 and 16
Life	100,000 Detents
Electrical Rating	
Non-Switching Load	3.000 Amps
Switching Load	0.125 Amps
Contact Resistance	0.100 Ohms
Dielectric Withstanding V.	500 V rms
Full Environmental Seal	Standard
Dimensions	
Height	0.360 (9.14)
Width	0.790 (20.07)
Length	0.790 (20.07)
Actuation Method	
Thumbwheel	Standard
Screwdriver	Standard
Binary Coded Output	Standard

2600 Series
STRIPSWITCH®

This is a 10 position low profile switch with a standard bottom seal to prevent solder wicking and flux migration. Horizontally or vertically mounted, with thumbwheel and screwdriver slots.

Number of Positions	10
Life	250,000 Detents
Electrical Rating	
Non-Switching Load	3.000 Amps
Switching Load	0.125 Amps
Contact Resistance	0.100 Ohms
Dielectric Withstanding V.	500 V rms

EEČO®
MEMBRANE SWITCHES

A UNION OF GRAPHICS EXCELLENCE AND ELECTROMECHANICAL EXPERTISE.

The Membrane Switch Operations of EECO Incorporated provides high quality switches to customers requiring absolute reliability combined with faultless graphics.

EECO membrane switches integrate SPST, momentary, normally open switches into control panels which include exceptional graphic features. Circuitry is screen-printed on polyester substrates and conductors carry low voltage DC logic signals. Construction methods provide totally-sealed panels capable of withstanding harsh environmental conditions. Mechanical designs minimize the effect of normal handling during the assembly process and use of the finest available materials ensures quality.

Typical applications include:
- Medical products and instrumentation.
- Depth-finders and radar systems for marine use.
- Heat and humidity intensive products such as handheld military radios.
- Office products.
- Point-of-Sale terminals.

Vertical Integration

EECO ensures quality and efficiency by exercising careful control over processes and materials. EECO in-house capabilities include:
- Computer Assisted Design to ensure documentation quality.
- Design engineering and art layout.
- Photographic reproduction.
- One of the finest technical graphics capabilities in the country.
- Circuit printing and a comprehensive testing program for the electronic component portion of all EECO membrane switches.
- A graphic ink laboratory for production and matching of high quality inks.
- Fabrication of steel rule dies.
- Production of stainless steel and polyester mesh screens in humidity-controlled environment.
- Die cutting.
- Assembly.

Features

- Embossed graphics provide tactile location and enhance the user interface.
- Selective texturing adds chemical resistance and allows a transparent readout area in a matte background without a die-cut opening.
- Connectors are installed and tested to met specific circuit configurations.
- Standard aluminum or plastic support panels can be provided with mounting hardware.
- PCB's with components and connectors are available for integration of LED backlighting.
- Graphic interchangeability permits cosmetic changes to control panels for private labeling.
- Backlit switch functions are available.
- "Deadfront" legends allow selective display of instructions.
- Lenses for LED, Vacuum Fluorescent, Liquid Crystal, and CRT displays are available.
- Polyester or stainless steel domes provide tactile feedback which adds mechanical resistance and travel.
- ESD/EMI shielding provided with aluminum or copper foils, or a variety of cost-effective printed conductive materials.

Quality & Reliability

The EECO quality system is organized to provide reliable membrane switch products that you can count on—every time!
- All aspects of a proposed design are reviewed prior to production.
- Training programs for the entire manufacturing force assure quality at every phase of production.
- All component materials are selected, qualified and inspected with quality standards prior to release to manufacturing.
- Die cutting, color matching, printing and assemblies are all first-article inspected before continued manufacture.
- Continuous monitoring of operations assures adherence to strict quality standards.
- Circuits and connectors are fully electrically inspected before final assembly.
- Conductors are fully tested for electrical conformance, proper substrate adhesion, hardness and proper curing.
- Each switch function is thoroughly tested for design compliance, continuity and electrical specifications.
- Final inspection is 100%, plus a simulated customers' incoming inspection program sampling.
- A thoroughly documented Quality Assurance Program assures that only top quality products are shipped.

LIGHTED PUSH-BUTTON SWITCHES

**DISPLAY ASSEMBLIES/
INTERLOCK SWITCH ASSEMBLIES/INDICATORS**

ELECTRO-MECH provides a perfect blend of quality standard products with in-depth experience in answering unique requirements. Proven engineering designs are illustrated by the excellent performance characteristics of each ELECTRO-MECH lighted push-button switch, indicator, and display assembly. Low-bounce, long-life contacts, new innovations in legends, displays, field-service, packaging—all standard features. Whatever your applications, ELECTRO-MECH is prepared to answer your specific needs. Choose from any of the most popular models.

Technical specifications apply to all ELECTRO-MECH Switch models unless otherwise specified:

- **Ratings: 30 Volts DC or 115 Volts AC; 2 amps resistive, 1 amp inductive**
- **Weight: 0.8 oz. (approx.)**
- **Operating Pressure: 2 lbs. + 1 lb.**
- **Plunger Travel: 3/16" (approx.)**
- **Actuations: 100,000**
- **Accommodates all "switchlines" standard lenses. Uses one T1-3/4, AN3140-327, 328, 330 bulb or neon lamp, 3 actuation modes standard**
- **Lenses: Available in ½" to 1" round and square, plus various rectangular sizes.**

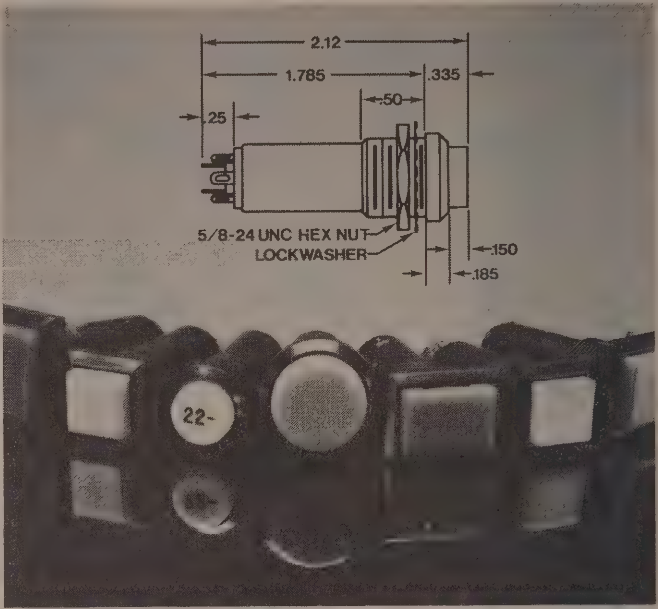
SERIES 20
A NEW CONCEPT OF FAST EASY SWITCH INSTALLATION AND DISPLAY DESIGN VERSATILITY



FEATURES:

- **Momentary or alternate action**
- **Mounts in a ⅝" dia. round hole**
- **High density mounting ability—less than ¾" centers**
- **Low profile appearance in one unitized housing**

ELECTRO-MECH's Series 20 Switches are provided in display configurations.

These low profile units are available in any switching mode with independent circuitry from SPST to DPDT including a separate indicator circuit. The all plastic, unitized housing assures ease in handling (no adapters, clamps or brackets). Just drop in round hole and secure with a nut from behind panel.

Series 20 Switches have the same internal parts as the all metal 6100 Series Switches including positive action, reliable circuitry and proven low bounce characteristics made possible by our unique design concept of silver slide bar action.

Available options include gold plating for dry circuit applications. Round slotted nuts for mounting switches on close centers.

SERIES 400
MULTI-STATION SUB-PANEL ASSEMBLIES

Multi-station switch assemblies designed for sub-panel mounting by means of a flanged "U" channel. All standard ELECTRO-MECH switches can be incorporated with several types of mechanical interlocking/lockout actions between stations. Up to 12 stations in one or two row configurations. The standard center distance between switches is ⅝", ¾", ⅞" and 1".

SERIES 500
INTERLOCKING SWITCH ASSEMBLIES

Added beauty and long-lasting appearance with handsome chrome barriers between each switch or indicator. Independent or interlocking action. Ten types of tracking action and switching sequences. Up to 12 switches in single or dual row, ⅞" or 1" centers.

Illuminated Pushbutton switches with an integral hold-down coil which is activated with switch. Holds the push-button in the depressed position until coil is de-energized returning it to relaxed position. Available in all circuit configurations up to 6 PDT. Same specifications as standard model.

SERIES 6100

High-density packaging requirements are answered with this shorter, front panel mount, providing the same quality design as standard ELECTRO-MECH model sizes.

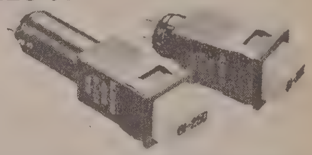
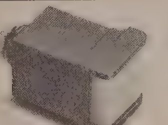
SERIES 61



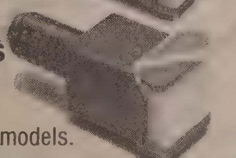
ELECTRO-MECH's Series 61 switches are provided in ½-inch square, snap-in or hardmount configurations. Each low-profile unit is available in any function from SPST to 2PDT, each controlled with an independent circuit. The all plastic, unitized housing, helps insulate switch from other surrounding components. The 61 Series is also available in a standard PC Board mounting configuration.

SERIES 60
MOMENTARY SWITCH



Rear mounted "U" bracket accepts switch installation from front of panel.

LG SERIES SAFETY LENS



Available on all 67-single-station, double-barrier lighted push-button bezel switch models.

EL SERIES FLUSH MOUNTING

Available in round, square or rectangular styles. Specify switch model desired with "EL" suffix (i.e. 73 EL-2654).

SERIES 150
INTERCHANGABLE LENSES/FILTERS

Displays may be changed or buttons replaced. Non-wearing, clear-acrylic lens and filter buttons. Available in standard, Opaque or Contour.

FIFTH DIMENSION, INC.

Tilt Switches

Fifth Dimension tilt switches are small, precision-made, omnidirectional devices which trigger at a predetermined angle. The operating mechanism in each of these reliable switches is a free mass of mercury enclosed in a rugged welded steel, hermetically sealed case containing an oxygen-free atmosphere. Jitter switches are actuated by vibration, acceleration or movement.

	Normally Closed	Normally Open	Jitter	Low-Cost Jitter	Normally Closed

*Viscosity of damping fluids changes with temperature. Switch is slower at cold extreme and faster at higher temperature.

Custom-Designed Tilt Switches and Tilt-Switch Packages

Tell us about your application and we'll develop a special tilt switch or tilt-switch package that will enhance your product's performance or marketability. We can design tilt switches that will trigger at specified angles, that will detect the direction of an impulse, the direction and amplitude of acceleration or of tilt; switches that will respond to shock, vibration and, in fact, to virtually any kind of motion.

Then, if you require, we will incorporate the switch into a pc board, add other components, provide a special connector, encapsulate the assembly in a potting material...all with the objective of ensuring that the package will meet the special precision, configuration, reliability and repeatability specifications of your industrial, commercial or military application.

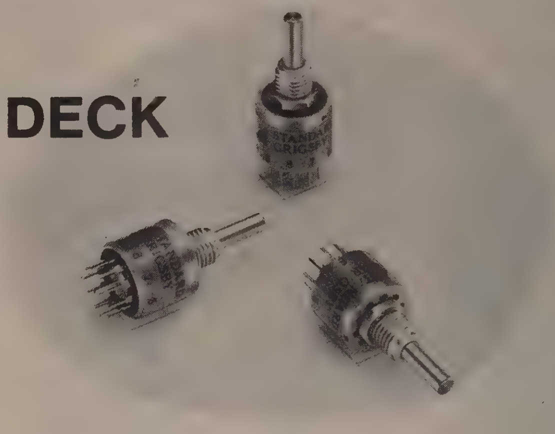
STANDARD GRIGSBY

SG SERIES – SD

A GORDOS INTERNATIONAL Company

S.G. SERIES – SD
1/2" ROTARY – SINGLE DECK



- .500" approximate size.
- P.C. or solder lug available.
- 30°, 36° indexing angles.
- 25,000 cycles.
- Adjustable stops.

ELECTRICAL CHARACTERISTICS

Current and Voltage Ratings — 200 MA. at 28 VDC resistive; 150 MA. at 115 VAC resistive.
Current Carrying Capacity — 6 amps.
Dielectric Strength — 600 VAC min.
Insulation Resistance — 50,000 megohms.

MECHANICAL SPECIFICATIONS

Life — 25,000 cycles.
Rotational Torque — 8 to 24 oz./in. at ambient conditions.
Stops — Adjustable stops supplied.

MATERIAL AND FINISHES

Switch Base — Diallyl Phthalate, MIL-M-14.
Shaft — Stainless steel passivated.
Index Housing — Zamak with chromate finish.
Rotor Contacts — Coin silver alloy.
Common Ring — Gold plate.
Terminals — Gold plate.
Mounting Hardware — Mounting nut and lockwasher supplied unassembled.

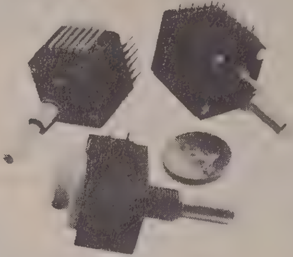
STANDARD GRIGSBY MICROMINIATURE P/REL A GORDOS INTERNATIONAL Company

MICROMINIATURE P/REL PROGRAMMABLE ROTARY ENCODED LOGIC SWITCH

DUAL FLEX™ DETENT

The Dual Flex detent has a dual ball starwheel drive to provide positive indexing and longer life, tactile feedback and resistance to teasing.



ELECTRICAL RATINGS

Switching Loads — 1.5 mA at 115 VAC, 150 mA at 14 VDC
Current Carrying Capacity — 250 milliamps at 28 VDC resistive load
Contact Resistance — 75 milliohms max. over lifetime
Codes — Hexidecimal, B.C.D., and others
Dielectric Strength — 500 volts min.
Contacts — Make before break

MECHANICAL SPECIFICATIONS

Life — 50,000 cycles at rated load
Operating Temperature Range — −55°C to +85°C
Shafts and Hardware — Shafts and hardware are steel, cadmium plated and chromate treated
Contacts — Gold plated
Anti-Rotation Device — Flatted mounting bushing. .375″ dia. x .320″, double "D"

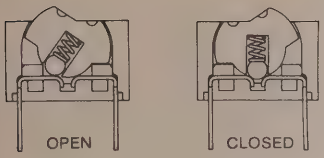
EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

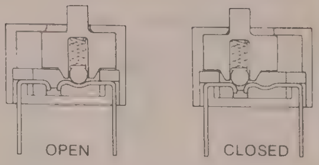
Grayhill INC

DIP Switches Features

Exclusive Contact System



- Now available in Rockers *AND* Slide Actuators



Unique spring-loaded ball contact system provides high contact pressure for reliable contact and shock and vibration immunity. It also provides exceptional mechanical and electrical life.

Complete Seal

After being wave soldered, your printed circuit boards can be vapor, spray or immersion cleaned without damaging switch contacts.

- Epoxy Potted Bottom Is Standard
- Top Seal Available At Minimum Additional Price

A top tape seal is a standard feature that can be added to all Series 76 and Series 78 GRAYHILL DIP switches with the exception of toggle actuators. Adding the letter S as a suffix to the part number orders the top tape seal.

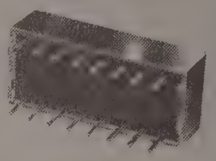
Military Qualification

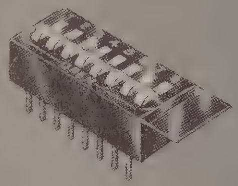
Another difference from the different DIP Switch Company . . . Grayhill SPST Rocker DIP Switches are qualified to MIL-S-83504/01 and MIL-S-83504/02 and MIL-S-83505/04.

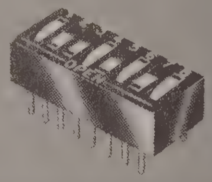
And More . . .

Grayhill can print your own part number or wording on the switch. We can also provide position location markings, rigid protective covers, and cards of tape seal. Contact Grayhill.

Another Difference from the Different DIP Switch Company . . .







Specifications—Series 76 and 78, Standard and Military

For Series 79 Specifications, see the Linear Action DIP Switch pages.

Ratings

	Series 76	Series 78	Series 78SS
Mechanical Life: (Operations Per Position)	50,000	35,000	10,000
Make and Break Current Rating (Operations):			
At 50 mA, 30 Vdc	35,000	25,000	7,500
At 125 mA, 30 Vdc	25,000	15,000	No Rating

Contact Resistance: 100 milliohms maximum after life (30 milliohms initially), measured at 10 mA dc and 50 mV (open circuit).

Insulation Resistance: (at 100 Vdc); Between adjacent closed contacts: 1,000 megohms minimum after life, (5,000 megohms initially). Across open switch contacts: 1,000 megohms minimum after life, (5,000 megohms initially).

Dielectric Strength: Between adjacent closed contacts: 500 Vac after life (750 Vac initially). Across open switch contacts: 500 Vac after life (750 Vac initially).

Current Carry Rating: With a maximum contact temperature rise of 20°C: Series 76—5 Amps; Series 78—4 Amps.

Environmental

Refer to MIL-STD-202F Per MIL-S-83504.

Vibration: 10 to 2,000 Hz at 15g (or 0.060″ double amplitude); no damage and no contact openings exceeding 10 microseconds. (Method 204, Test Condition B)

Shock: 50g, 11 mS half sine; no damage and no openings exceeding 10 microseconds. (Method 213, Test Condition A)

Moisture Resistance: 240 hours with temperature cycling and polarization; pass insulation resistance and dielectric strength. (Method 106)

Thermal Shock: For 5 cycles (1 cycle: -55°C, +25°C, +85°C, +25°C); no failures; passes contact resistance.

Thermal Aging: 1,000 hours at 85°C; no failures.

Machine Soldering

The sealed recessed rocker switches have been tested to EIA Standard RS-448-2, "Environment Effects of Machine Soldering," with the results listed below. Similar performance can be expected from sealed switches with other means of actuation.

Fluxing: Passes test with flux touching the switch body.

Cleaning: Passes immersion test (and is therefore also suitable for spray and vapor/spray cleaning).

Soldering: Passes two, four and six seconds soldering time.

Cleaning Solution: 1-1-1 trichlorethane, Freon (TF or TE), isopropyl alcohol and water/detergent.

Materials and Finishes

— For Part Numbers Beginning 78SS —

Shorting Bar (Ball), Base Contacts, and Terminals: Copper Alloy, Silver plated .00003″ minimum over Nickel.

— For All Other Series 76 and 78 Switches —

Shorting Bar (Ball): Brass, Gold plated .00001″ minimum over Nickel plate.

Base Contacts: Copper Alloy, Gold plated .00001″ minimum over Nickel plate.

Terminals: Copper Alloy, Tin plated .00005″ minimum over Nickel plate. Gold plate over Nickel also available.

— For All Series 76 and 78 Switches —

Switch Cover, Rocker and Base: Polyester UL94 VO type.

Potting Material: Epoxy.

Protective Cover: Polycarbonate.

Top Seal: Polyester film.

Optional Contact Plating: Gold thicknesses of .00003″ and .0001″ are also available. Contact GRAYHILL.

Double Throw Circuitry

All Series 78 double throw switches have alternately opposed circuits which are actually 2 completely separate circuit paths. A single slide actuates both circuits thus providing double throw. True double-throw circuitry is achieved by tying selected terminals on the PC board for a common. The "on" position of each circuit is indicated by a dot on the cover.

Specifications

Ratings

Mechanical Life: 4,000 cycles minimum. Note: A cycle is one complete operation, back and forth thru all switch positions.

Make and Break Current Rating: 2,000 cycles at 10 mA, 30 mV dc; 2,000 cycles at 125 mA, 6 Vdc; 2,000 cycles at 50 mA, 30 Vdc.

Contact Resistance: 100 milliohms maximum after life, measured at 10 mA dc and 50 mV (open circuit). Initial values are 60 milliohms maximum for coded switches, and 50 milliohms for other Linear Action Switches.

Insulation Resistance (At 100 Vdc): Between adjacent isolated contacts—1,000 Megohms minimum after life; (5,000 Megohms initially). Across open contacts 1,000 Megohms minimum after life. (5,000 Megohms initially).

Dielectric Strength: Between adjacent isolated contacts: 500 Vac after life, (750 Vac initially). Across open contacts: 500 Vac after life, (750 Vac initially).

Current Carry Rating: 2 Amps with a maximum contact temperature rise of 20°C.

Environmental Refer to MIL-STD-202F Per MIL-S-83504.

Vibration: 10 to 2,000 Hz at 15g (or 0.060″ double amplitude); no damage and no contact openings exceeding 10 microseconds. (Method 204, Test Condition B)

Shock: 50g, 11 mS half sine; no damage and no openings exceeding 10 microseconds. (Method 213, Test Condition A).

Materials and Finishes

Switch Cover, Slide, Base: Polyester, UL94 VO rating.

Shorting Arm: Phosphor Bronze, Gold plated .00001 minimum over Nickel plate .00002 minimum.

Base Contacts: Copper Alloy, Gold plated .00001 minimum over Nickel plate .00002 minimum.

Terminals: Copper Alloy, Tin plated .00005 minimum over Nickel plated .00002 minimum.

Potting Material: Epoxy.

Tape Seal: Polyester film.

Pushbutton Switches

All Switches on this page and page at left have these qualifications . . .

- **RATING CRITERIA:** See individual charts. 115 VAC resistive load.
- **CONTACT RESISTANCE:** 25 milliohms maximum on a new switch.
- **VOLTAGE BREAKDOWN:** 1,000 VAC between mutually insulated parts.
- **INSULATION RESISTANCE:** 1,000 megohms minimum.

½ Inch Diameter Single Deck

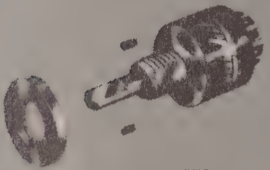
Outstanding Circuit Versatility And A Wide Range Of Options

The most popular Series 50 and 51 rotary switches are fixed stop, with or without panel seals, solder lug or PC terminals. The drawing below (Figures 1 thru 4) show these combinations. The chart below lists the switch style that describes the combination and the appropriate drawing that illustrates the combination. The Series 50 is 36° angle of throw and 0.500″ diameter. The Series 51 is 22½° or 30° angle of throw and 0.562″ diameter. Many other options are available as described below.

STANDARD FEATURES OR OPTIONS

—Screwdriver Slotted Shafts
—Coded Versions
—Spring Return (Momentary Positions)
—Push-To-Turn or Pull-To-Turn†
—Keylock (Key Operated)
—RFI Grounding†
—Electrostatic or Electromagnetic Shielding†
—Intermix of Shorting and Non-Shorting Contacts†

†Indicates not available through distributors



ADJUSTABLE STOPS

Military Style Rotary Switches

The Series 50 and 51 Rotary Switches are also available with military type switch materials. Many types of the Series 50 are fully qualified to MIL-S-3786/20. Many types of the Series 51 are fully qualified to MIL-S-3786/35. These documents as well as the QPL (Qualified Products List) should be consulted for complete specification and ordering information. Contact GRAYHILL for additional assistance in specifying military styles Series 50 and 51 Rotary Switches.

45°, 60° or 90° Angles of Throw

The Series 50 Rotary Switch is also available with 45° (8 position), 60° (6 position) or 90° (4 position) angles of throw. These angles of throw are available with 1 or 2 poles per deck, solder lug or PC mount terminals, with or without shaft and panel seal, fixed or adjustable stops and in standard or military types.

Adjustable Stops

Adjustable stop versions of the Series 50 and 51 Rotary Switches are readily available from local distributor stock. The adjustable stop versions are form, fit and function equivalents to their fixed stop counterparts. Adjustable stop Series 50 and 51 Rotary Switches can be provided in all angles of throw and with or without shaft and panel seal. Contact your local distributor or GRAYHILL for cross reference information between fixed and adjustable stop switches.

UNSEALED — FIXED STOPS

Shown on these two pages are the standard unsealed and sealed fixed stop version with solder lug or PC terminals.

SPECIFICATIONS

RATING:

Rated to make and break 200MA for 10,000 cycles of operation or 50MA for 25,000 cycles of operation, resistive load, 115VAC or 30VDC. For 22½° switch, rating is lower. For complete load life information, see GRAYHILL Rotary Switch catalog.

CONTACT RESISTANCE:

50 milliohms maximum (10 milliohms initially).

INSULATION RESISTANCE:

10,000 megohms minimum between mutually insulated parts (50,000 megohms initially).

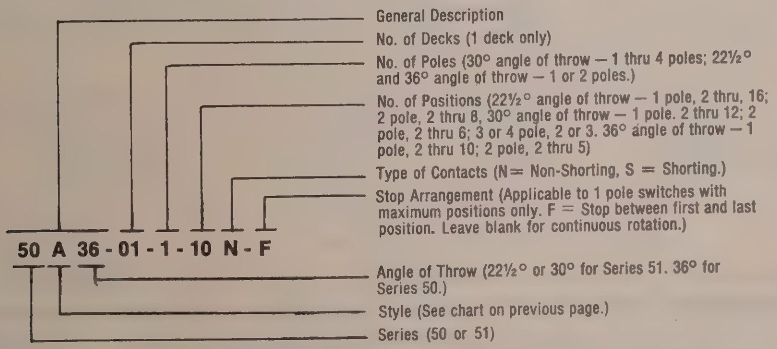
VOLTAGE BREAKDOWN:

600VAC between mutually insulated parts; 400VAC for 22½° switch.

CARRY CURRENT:

6 amperes with a maximum contact temperature rise of 20°C.

HOW TO ORDER



50 A 36 - 01 - 1 - 10 N - F

General Description

No. of Decks (1 deck only)

No. of Poles (30° angle of throw — 1 thru 4 poles; 22½° and 36° angle of throw — 1 or 2 poles.)

No. of Positions (22½° angle of throw — 1 pole, 2 thru, 16; 2 pole, 2 thru 8, 30° angle of throw — 1 pole. 2 thru 12; 2 pole, 2 thru 6; 3 or 4 pole, 2 or 3. 36° angle of throw — 1 pole, 2 thru 10; 2 pole, 2 thru 5)

Type of Contacts (N = Non-Shorting, S = Shorting.)

Stop Arrangement (Applicable to 1 pole switches with maximum positions only. F = Stop between first and last position. Leave blank for continuous rotation.)

Angle of Throw (22½° or 30° for Series 51. 36° for Series 50.)

Style (See chart on previous page.)

Specifications

RATING:

Rated to make and break 200 mA for 10,000 cycles of operation or 50 mA for 25,000 cycles of operation, resistive load, 115 VAC or 30 VDC. For complete load life information, see GRAYHILL Catalog Number One.

CONTACT RESISTANCE:

100 milliohms maximum (15 milliohms initially).

INSULATION RESISTANCE:

10,000 megohms minimum between mutually insulated parts (50,000 megohms initially).

VOLTAGE BREAKDOWN:

600VAC between mutually insulated parts.

CARRY CURRENT:

6 amperes with a maximum contact temperature rise of 20°C.

SHAFT AND PANEL SEAL

Panel is sealed by an "O" ring at the base of bushing. Shaft is sealed by an "O" ring inside the bushing. After the switch is mounted, seals do not alter the dimensions of the unsealed style.

ADJUSTABLE STOPS

Set and Reset Stops to Limit Rotation Form, Fit and Function Equivalent to Fixed Stop Counterparts

Adjustable Stop Switches: Two stop pins and an adhesive backed sticker or seal washer are provided. Stop pins can be located or reset as desired. Sticker or seal washer maintains stop pins in place. Sticker or seal washer can be removed to change stop pin location.

HOW TO ORDER

Part number is descriptive and formed in the following manner:

56 A 36—01—1—10 N—F

Series Number
Series 55 or Series 56 (Shorter Switch)
Style Letter(s). If it includes "D", see "Positions" note.
Angle of Throw (30° or 36°)
Stop Arrangement—The suffix C or F must be added to a one pole per deck, switch with the maximum number of positions to indicate continuous rotation (C) or fixed stops (F) between position 1 and the last position. Leave blank if not applicable.
Type of Contacts-N=Non-shorting, S=Shorting.
Positions per Pole-requires 02 positions as a minimum to maximum allowable dependent on the angle of throw and poles per deck. Use the letters AJ in this location if adjustable stop switch is required.
Poles per Deck (1 or 2)
Number of Decks (1 deck only)

ORDERING INFORMATION:

How to determine part number—Sample part number for a standard style, fixed stop, 2 deck, 1 pole per deck 12 positions per pole, 30° angle of throw rotary switch with non-shorting contacts.

44 A 30 - 02 - 1-12-N - F

General Description
Number of Decks (1 thru 3)
Number of Poles per Deck (1 or 2)
Number of Positions per Pole (AJ = Adjustable Stops)
Type of Contacts — N = Non-Shortning, S = Shorting
Add -F for Stop between First and Last Position of a 1 Pole/Deck Switch with Max. Positions. No Notation required for Continuous Rotation.
Angle of Throw (See Series)
Style — A = Standard, Solder Lug Terminals; D = Style A with Adjustable Stops
Series 42 (36°) or Series 44 (30°)

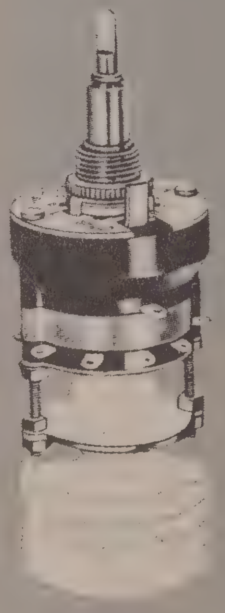
1 Inch, 1 Amp, Rotary Switch

With A Wide Range Of Variations And Options

- 30°, 36°, 45°, or 90° angle of throw
- 1 thru 6 poles/deck
- 1 thru 12 decks
- Non-shorting or shorting contacts
- Adjustable stops (see below)

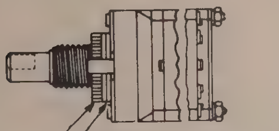
P.C. Mounting

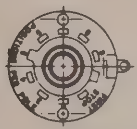


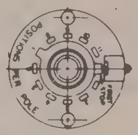
Add-A-Pot

ADJUSTABLE STOPS

Adjustable stop switches permit the user to externally set the switch stops which limit its rotation. Adjustment is accomplished by removing the stop washers and relocating them. The knurled nut or the panel can be used to hold-in the stop washers. All other dimensions are the same as the standard style.







Series 44 is available with adjustable stops in 30° angle of throw only.

SPECIFICATIONS

Rated: To make and break the following loads with 30° or 36° angle of throw: 1 amp., 115 VAC resistive; 1 amp., 6 to 28 VDC resistive; 0.25 amp., 115 VAC inductive; 0.02 amp., 115 VDC inductive; 0.10 amp., 6 to 28 VDC inductive; 0.10 amp., 115 VDC resistive. To carry 10 amps. continuously.

Contact Resistance: After 25,000 cycles of operation .020 ohms maximum.

Insulation Resistance: 50,000 megohms minimum (initially).

Voltage Breakdown: 1,000 VAC initially (500 VAC or better after most enviornmental tests).

Life Expectancy: 100,000 mechanical cycles of operation; details in catalog.

Stop Strength: 15 pound-inches standard, 12 pound-inches adjustable minimum.

Rotational Torque: 8-115 ounce-inches, depending on the number of poles per deck and the number of decks.

Contacts: Shorting or non-shorting wiping contacts with over 150 grams contact force.

Shaft Flat Orientation: Flat opposite contacting position of pole number one. (See circuit diagram.)

Specifications and circuit values for military styles along with additional characteristics available—contact Grayhill for complete engineering catalog.

RATING:
Rated to make and break 400MA for 10,000 cycles of operation or 200MA for 25,000 cycles of operation, resistive load, 115VAC or 30VDC. Rated to make and break 250MA for 10,000 cycles of operation or 100MA for 25,000 cycles of operation, inductive load (250 Millihenries), 30VDC.

For complete load life information, see GRAYHILL Engineering Catalog Number One.

CONTACT RESISTANCE:
50 milliohms maximum (10 milliohms initially).

VOLTAGE BREAKDOWN:
500 VAC minimum between mutually insulated parts.

CARRY CURRENT:
4 amperes with a maximum contact temperature rise of 20°C.

INSULATION RESISTANCE:
10,000 megohms minimum between mutually insulated parts (50,000 megohms initially).

HOW TO ORDER

71 A 30 - 02 - 1 - 12 N - C

- Series 71, Style (as described on these pages), Angle of Throw (30° or 36°)
- No. of Decks (12 decks max., also see poles per deck limitation in price table.)
- No. of Poles per Deck (See circuit diagram for style and angle of throw limitations. Also limited to a maximum of 16 total poles per switch.
- No. of Positions (30° angle of throw solder lug—1 pole, 2 thru 12; 2 pole, 2 thru 6; 3 pole, 2 thru 4; 4 pole, 2 or 3; 5 or 6 pole, 2 only. 30° angle of throw PC mount—1 pole, 2 thru 12; 2 pole, 2 thru 6. 36° angle of throw—1 pole, 2 thru 10; 2 pole, 2 thru 5.)
- Type of Contacts (N=Non-Shorting. S=Shorting)
- Stop Arrangement (Applicable to 1 pole switches with maximum positions only. C=Continuous, F=Stop between first and last position.)

Prices on following page.

SPECIFICATIONS

Voltage: 115 VAC or 30 VDC, resistive load; 30 VDC inductive load.

Contact Resistance: 50 milliohms maximum (15 milliohms initially).

Insulation Resistance: 10,000 megohms minimum between mutually insulated parts. (50,000 megohms initially.)

Voltage Breakdown: 500 VAC minimum between mutually insulated parts. These switches will carry 4 amperes with a maximum contact temperature rise of 20°C.

Life: 10,000 cycles at 500 mA; 30,000 cycles at 200 mA (resistive loads). Cycle is 360° in one direction and a 360° return. Life measured at sea level, 25°C and 68% relative humidity.

REED SWITCHES & SENSORS • REED, HG & MOS RELAYS • LIQUID CRYSTAL DISPLAYS

MAGNETIC REED SWITCHES

Dry and mercury wetted magnet switches are precision created for reliable operation under most critical conditions. They offer excellent flexibility in a broad range of applications. These switches are hermetically sealed for safe dependable use in any atmosphere - even under explosive conditions and are unaffected by high or low temperatures or pressure. They offer long life with high sensitivity and their rapid cycling rate make these ideal for a wide variety of uses.

For a comprehensive engineering Reed Switch Catalog, contact factory.

High Reliability Supported by Unique Technology

Flux Scanning Method:

In spite of severe control of the sealing process, there is a slight probability that foreign matter such as magnetic particles may enter the glass. After extensive study in the detection of micro impurities, OKI has adopted the highly reliable flux scanning method. In flux scanning, external magnetism is moved so that foreign matter near the reed is forced to jump to the contact part. The contact resistance then measured is used as the standard for the selection of characteristics. We have thus succeeded in remarkably improving the reliability of reed switches by replacing conventional visual checking with the latest flux scanning method.

THUMBWHEEL SWITCHES

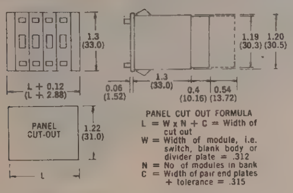
IMLEC

MODEL II IMLEC INDEXER PUSHBUTTON FRONT MOUNT

The Imlec Indexer is a bi-directional push indexing front mount switch, 5/16″ in width. Identical in size to our popular MF switches. With snap together banking and snap-in panel mounting. Pushbuttons above and below the legend allow the user to add or subtract from the count.

These 10 or 16-position switches are available in all popular codes.

DIMENSIONS IN INCHES (IN MILLIMETERS)



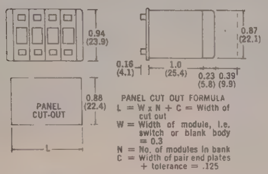
PANEL CUT OUT FORMULA
L = W x N + C = Width of cut out
W = Width of module, i.e. switch, blank body or divider plate = .312
N = No of modules in bank
C = Width of pair end plates + tolerance = .315

MODEL MI MINI INDEXER PUSHBUTTON FRONT MOUNT

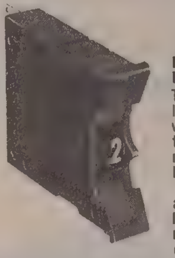
The Mini Indexer is a bi-directional push indexing front mount switch. 0.30″ in width. Similar to our Imlec Indexer but smaller in size. Features snap together banking and snap-in panel mounting. Pushbuttons above and below the legend allow the user to add or subtract from the count.

Available in most popular 10-position codes.

DIMENSIONS IN INCHES (IN MILLIMETERS)



PANEL CUT OUT FORMULA
L = W x N + C = Width of cut out
W = Width of module, i.e. switch or blank body = 0.3
N = No. of modules in bank
C = Width of pair end plates + tolerance = .125

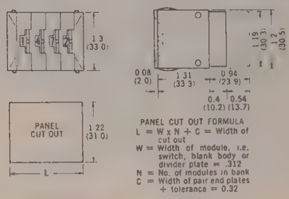


MODEL MF MINIATURE FRONT MOUNT

The MF is our most popular, low cost, 5/16″ wide Thumbwheel Switch. Slim, attractive, snap-in panel mounting requires no panel mounting hardware.

Available in all popular 10 and 16-position codes. Matte black finish on high impact moldings, with white legend on black wheel standard.

DIMENSIONS IN INCHES (IN MILLIMETERS)



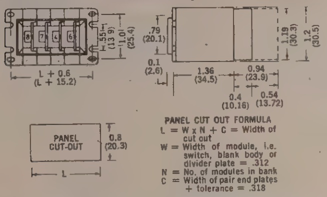
PANEL CUT OUT FORMULA
L = W x N + C = Width of cut out
W = Width of module, i.e. switch, blank body or divider plate = .312
N = No. of modules in bank
C = Width of pair end plates + tolerance = 0.32

MODEL TR THIN REAR MOUNT

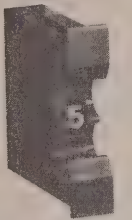
For applications that require a lot of switch in a small space, these 5/16″ wide TR switches are ideal. Rear mount counterpart to our popular MF front mount switches.

Available in most 10-position codes including Decimal, BCD, BCD plus Complement and Complement only.

DIMENSIONS IN INCHES (IN MILLIMETERS)



PANEL CUT OUT FORMULA
L = W x N + C = Width of cut out
W = Width of module, i.e. switch, blank body or divider plate = .312
N = No. of modules in bank
C = Width of pair end plates + tolerance = .318

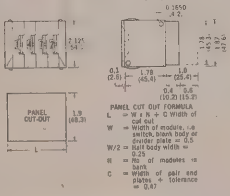


MODEL IF INTERMEDIATE FRONT MOUNT

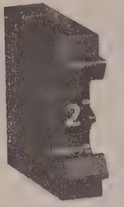
A rugged front mount switch with large digits, ½″ wide module. Snap-in front mounting hardware. Available in most popular 10 and 16-position codes.

Matte black finish with white legends on black wheel standard. Gloss fnish, other wheel colors and legends available.

DIMENSIONS IN INCHES (IN MILLIMETERS)



PANEL CUT OUT FORMULA
L = W x N + C Width of cut out
W = Width of module, i.e switch, blank body or divider plate = 0.5
W/2 = Half body width = 0.25
N = No of modules in bank
C = Width of pair end plates + tolerance = 0.47

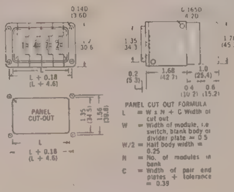


MODEL IR INTERMEDIATE REAR MOUNT

Rugged rear mount counterpart to our IF model, with large readable digits, ½″ wide module. Available in most popular 10 and 16-position codes.

Matte black finish with white legends on black wheel standard. Gray bodies, gloss finish, other wheel colors and legends available.

DIMENSIONS IN INCHES (IN MILLIMETERS)

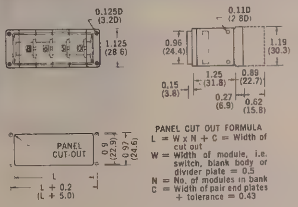


PANEL CUT OUT FORMULA
L = W x N + C Width of cut out
W = Width of module, i.e switch, blank body or divider plate = 0 5
W/2 = Half body width = 0.25
N = No. of modules in bank
C = Width of pair end plates + tolerance = 0.39

MODEL MR MINIATURE REAR MOUNT

Popular rear mount switch, ½″ wide module but lower profile than IR model. Available in matte black in most popular 10-position codes including Decimal, BCD, and BCD plus Complements.

DIMENSIONS IN INCHES (IN MILLIMETERS)



PANEL CUT OUT FORMULA
L = W x N + C = Width of cut out
W = Width of module, i.e. switch, blank body or divider plate = 0.5
N = No. of modules in bank
C = Width of pair end plates + tolerance = 0.43

SPECIFICATIONS
ALL MODELS

Contact Current: Contacts rated 2 amps @ 115 VAC or 28 VDC non-switching; 0.5 amps @ 28 VAC or DC switching. Minimum recommended switching current 10 microamps @ 20 millivolts.

Voltage: 200 volts max DC (within power rating) or RMS.

Power: 24 watts max per switch with 12 watts max per energized output.

Insulation Resistance: 1000 megohms between adjacent contacts at 25°C and 20% relative humidity.

Contact Resistance: 0.1 ohms initial and 0.2 ohms after life test at 25°C.

Dielectric Strength: 500 VAC.

Moldings: High impact acetate body in matte black, gloss black or gray finish; wheels are polycarbonate in black with white legends standard, white with black legends for lighted versions, other colors available.

Contact Material: Stator has 0.0001″ hard gold over 1 oz. copper on glass fibre as MIL-P-13949GF. Rotor has silver/gold alloy on beryllium copper.

Life: 1,000,000 detents minimum either direction.

Stops: Stops to limit switch to any position.

Panel Thickness: 1/16″ to 5/32″.

Operating Temperature: −20°C to 70°C. Storage temperature: −40°C to 70°C.

Shock: 100 G's, 6 MS.

Vibration: 15 G's to 70-2000 Hz.

Humidity: 96 HRS, 95% relative.

Options and Accessories Available: Extended Boards for diode suppression; Termination Pins; Stopping; Blank Bodies, Half Bodies; End Plates Divider Plates; Connectors; External LED Lighting; Sealing, etc.

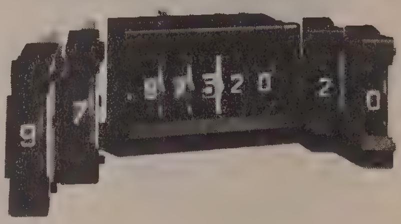
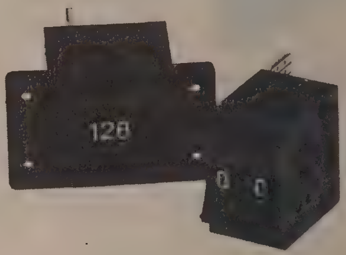
Type U



Type E



THUMBWHEEL SWITCHES

Our thumbwheel switches are designed to give the logic and package designer maximum flexibility through an almost unlimited choice of electrical/mechanical configurations, switching logic, terminations, and circuit capacity. Interswitch offers more than 25 different codes including decimal, BCD, hexadecimal, seven segment code, voltage dividers, and resistance decades. Numerous options are available such as long PC boards (for mounting components), colored wheels, stops, and custom markings on housings, spacers and thumbwheels.

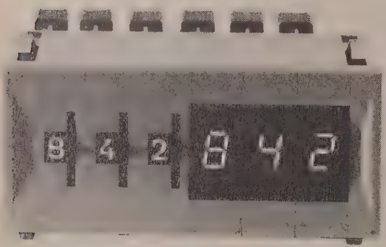
CODICOUNT DISPLAYS

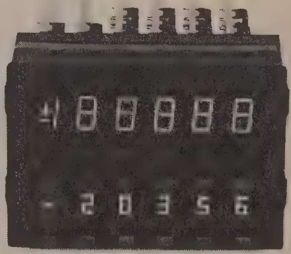


Our highly reliable, compact Codicount LED display modules are easily assembled into multi-decade blocks incorporating the Interswitch thumbwheel series, or used by themselves as output devices.

General Information

- 8 series over 50 modules
- TTL or CMOS logic
- 5 to 24V supply voltage
- 9 to 45 mm digit heights
- red or green LED's
- seven segment and sign/overflow displays
- modules are available with direct, decimal, BCD, inverted or counter inputs, memory, and BCD outputs

MULTICOUNT SWITCHES



The versatile Multicount modules contain a presetable decade switch operated by pushbuttons and a red 7-segment LED numerical display with decoder-latch. Additional functions such as counting and comparing can be integrated into the elements.

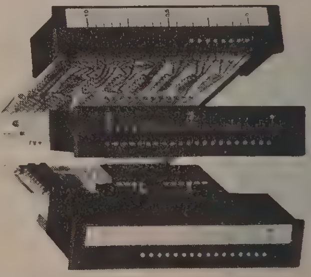
By combining the switch and display within one single housing, the following features are achievable:

- reduced panel space
- easy mounting
- simplified wiring

General Information

- 6 types
- TTL or CMOS logic
- 5V (TTL) or 12V (CMOS) supply voltage
- 9 mm character height

LED-LINE DISPLAY



LED-Line is a modern analog panel display for electrical inputs. The signal value and its trend can be seen at a glance.

LED-Line instruments have many advantages and can be used as replacements for pointer instruments or as a supplement to digital meters.

LED-Line displays are compact and can be mounted horizontally or vertically. For comparison of different signals the units can be mounted adjacent to each other.

General Information

- 4 types
- 21 or 51 dots
- dot or bar display
- completely solid state

PLEASE CALL OR WRITE FOR COMPLETE ENGINEERING BULLETINS

vacuum contactors

Vacuum Contactors are used to control large amounts of DC power and RF currents with ratings up to 50 kv and currents up to 600 Amperes continuous. These contactors are recommended wherever high voltage capability, small size, and high speed operation with a long and low maintenance life are important. Applications include primary control of power supplies, industrial motors, and induction heating equipment, RF system tap changing, and fault protection of high power transmitters. The 16 page catalog provides complete specifications with a variety of specific applications for 3-pole, high voltage AC and DC, RF contactors and overcurrent relays actuated by solenoid, air or motor drives.

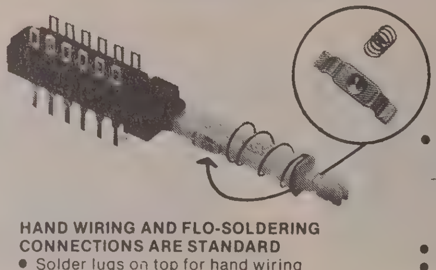
DIVISION OF ITT CORPORATION

MODULAR PUSH BUTTON SWITCHES

"Creative Switchmakers" for Home Entertainment Products and Test Equipment

If it's a better switch you need . . . better switch to Schadow!

better switch...here's why...

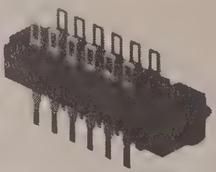


HAND WIRING AND FLO-SOLDERING CONNECTIONS ARE STANDARD

- Solder lugs on top for hand wiring
- PC spikes at bottom for flo-soldering

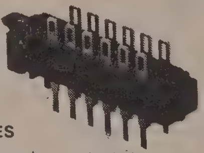
INDIVIDUAL COIL SPRING LOADED MOVING CONTACTS

- The coil spring-loaded contoured moving contacts have been designed to provide balanced contact pressure for optimum surface to surface interface with the fixed contacts . . . assuring reliable performance in low voltage (dry circuit) applications
- Long term low contact resistance
- Constant coil spring tension at the contact points provides positive self-cleaning action



SUPERIOR MODULAR CONSTRUCTION

- Ease of maintenance . . . switch plunger with sliding contacts is removable from the front without disturbing electrical connections



MODULE ADVANTAGES

- Enclosed housing protects inner contact area from dust and foreign intrusions
- Fixed terminals are "staked" in position, providing an extra seal to help prevent wicking of solder or flux
- Molded PC Board Standoffs, front and back, on bottom side, assure parallel mounting

TECHNICAL DATA

Contact Resistance ....4-6 mOhms
after 25,000 cycles ....6-20 mOhms
Lifetime Expectation Interlocked (50,000)
Momentary, Push Push (100,000) cycles
Material of Construction
Fixed contact. Brass/Silver Plated ....0002"
Moving contact ....Bimetal Brass/Silver .0004"
Plunger Material....Polycarbonate V-0 rated or Delrin
Contacts ....Non-shorting
Housing Material.........Polycarbonate V-0 rated or Glass Reinforced Nylon
Terminal Board Material ....High Grade Paper Phenolic or V-0 rated material......Series F
Key pressure with 2PDT ....28 oz.
Key pressure with 4PDT ....32 oz.
Key pressure with 6PDT ....35 oz.
Key pressure with 8PDT ....42 oz.
Key pressure with 10PDT ....46 oz.
Key pressure with Power Switch ....42 oz.

NOTE: Lighter key pressures available, contact factory for details.

NOTE: For switching applications requiring flame retardant materials, contact factory.

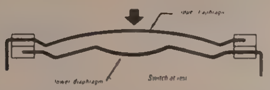
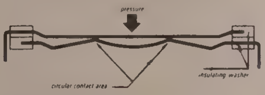
DISC SWITCH

Modular Electronic Components

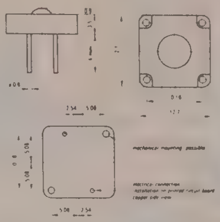


The Disc switch is built around two contact diaphragms separated by an insulating material. The profile of each of these two diaphragms is such that, under the action of applied pressure on the upper dome, it is momentarily collapsed, making instant positive, 3 point contact with the lower diaphragm.

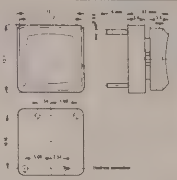


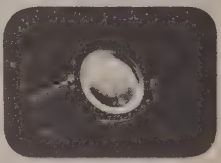
- High Reliability...10 X 10^6
- Self Cleaning
- Broad Range of Switching Power...from a few milliwatts to 30 watts.
- Low Bounce (less than 100 microseconds)

MD Disc module: Extra-flat momentary contact module. Shorter stroke configuration installable directly on printed circuit board. Enables you to design your own keyboard adapted to your own specific needs.

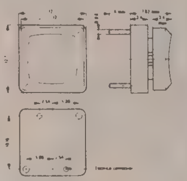


ED Push button switch assembly with a momentary action contact and incorporating the unique design disc switch. The switch is designed for direct insertion into printed circuit boards. Two principal advantages of the MDP switch are the short stroke (only 0.5 mm) and the crisp tactile feel.





MDP Push button switch assembly with a momentary action contact and incorporating the unique design disc switch. The switch is designed for direct insertion into printed circuit boards. Two principal advantages of the MDP switch are the short stroke (only 0.5mm) and the crisp tactile feel. Contact arrangement: single, normally open contact with momentary action. TERMINALS: tinned terminals — 0.8mm dia. x 4mm long. SOLDERING: since the disc switch is completely sealed, it can be flow soldered. PUSH BUTTONS AND KEYS: dimensions (mm) 12.7 x 12.7 x 3.4 (7.62 with key). STANDARD COLORS: red, blue, light grey, dark grey.



D6 SERIES KEY SWITCHES

The D6 is a single pole, single throw normally open keyswitch specially designed for digital electronic control. Its small size enables keyboard design with minimum center spacing of .500 (12.70 mm). The commoned terminals offer the possibility of X. Y coding by using a single sided printed Circuit Board.

Built-in buttons (square or round) are available in several colors and have been designed to fit directly onto front panels.

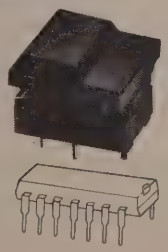
The total travel of .031 (0.80 mm) combined with the snap effect provide the user with a smooth, gentle yet positive tactile feedback.

- Tactile feedback
- Three package styles
- Eight colors
- Commoned terminals
- Small size .500 (12.70 mm)
- Low cost

ELECTRICAL DATA

Electrical diagram SPST NO	
Contact resistance	≤20 mΩ
Breaking capacity	10 mA/35 VDC
Insulation resistance	100,000 MΩ
Dielectric Strength	500 V
Inter-terminal capacity	1 pF
Contact bounce	3 ms
Life (nominal current and voltage)	500,000 Cycles
Temperature range	– 20°C to + 65°C (– 4°F to + 149°F)
Climatic category	21 days
Solder ability	235°C during 5 seconds

DIGITAST



digitast

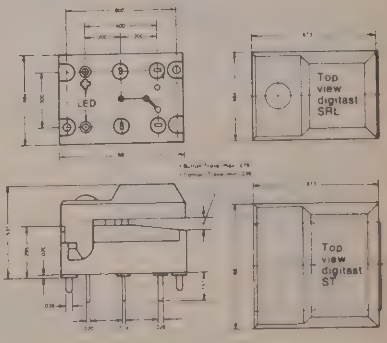
ST 17.3mm wide x 17.1mm (pictured)

digitast

SRL (LED factory or customer installed) 12.3mm wide x 17.1mm (pictured)

STL (LED factory or customer installed) 17.3mm wide x 17.1mm

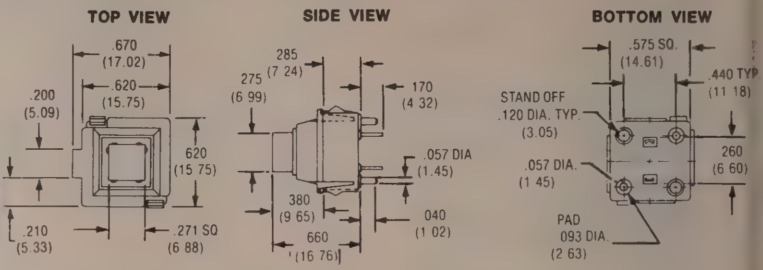
Digitast for use with DIP packages, consistent tactile feel, SPDT momentary spring loaded contact, less than 1 ms contact bounce, 24v 10ma or 60v 100ma ratings. Mechanical life greater than 1 million operations. Available with built in LED. PCB mounting. Hot stamped graphics available.



DC-60 SERIES

Full Travel Keyboard Switch

(DC61-01 EXAMPLE)



The ITT Schadow DC60 Series Key Switches are value engineered to achieve the highest possible performance at a much lower cost than conventional mechanical switches.

- Choice of 3 low profile
- Trifurcated gold-inlayed contacts
- Snap fit sub panel mounting
- Tactile feedback
- Variety of actuation forces
- Momentary or push push action
- 61-01 complies with European D.I.N. specifications
- Modular construction

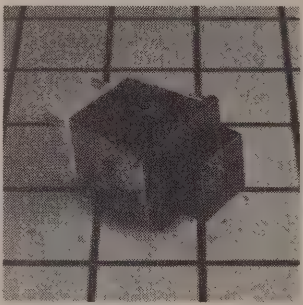
D.I.N. Compliance

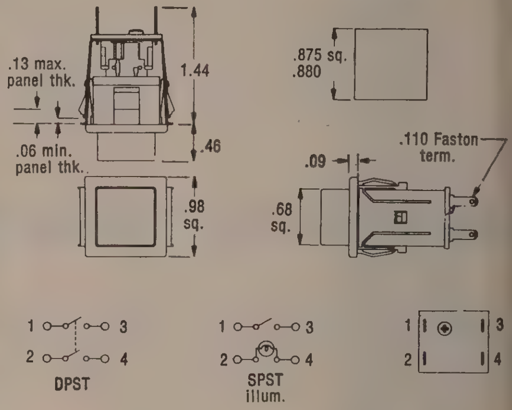
ITT Schadow's DC61-01 and DC61-02 Full Travel Key Switches are among the lowest profile module Key Switches ever built. This low profile conforms to strict European health and safety regulations by complying to their D.I.N. standard. So if you are now selling or ever plan to sell to the European market, you owe it to yourself to take a look at these low profile switches.

ML SERIES

ITT Schadow's ML Series offers the Design Engineer the latest in high tech front panel appearance with a wide variety of switching capabilities. Features Include:

- Front Panel Mount
- Sub-Chassis Mount
- Up to 20 Million Cycle life
- Incandescent Illumination
- PC Mount
- SPST through 16PDT
- Switching 10 MA @ 5 VDC through 15A @ 125 VAC
- Eight Button Colors





PUSH BUTTON SWITCH SERIES

F Series Miniature Push Button: The F Series miniature push button switch forms a versatile system of modules designed for reliable performance in low voltage (dry circuit) applications.

F Series Power Switches: F Series power switches form an integral or stand alone option to our standard F Series. All mechanical functions performed by the F Series are available in the power switch offering with the exception of lockout.

KEY SWITCH SERIES (Low Travel)

Digitast Series: The Digitast Series key switch is specially designed for use with dual in-line packages, yet offers a wide variety of options.

REK Series: The REK Series key switch is designed for switching low current loads utilizing a patented contact system resulting in high reliability and long operating life.

Disc Series: The Disc Series key switch is built around two contact diaphragms separated by an insulating material designed for instant contact with the advantage of being a self-cleaning contact with tactile feed back.

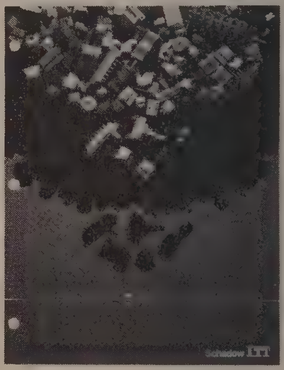
D6 Series: The D6 Series key switch is a single pole, single throw key switch designed for digital electronic control allowing keyboard design with a minimum center spacing of .500 (12.70).

KEY SWITCH SERIES (Full Travel)

DC60 Series: The DC60 Series key switches are value engineered to achieve the highest possible performance at a much lower cost than conventional mechanical switches.

ROTARY SWITCH SERIES (Closed Deck)

RT-A Series: The RT-A Series rotary switch is a PC or panel mounted switch with the shaft perpendicular to the PC Board for mounting with components such as displays and indicators.



Please write to your nearest Sales Office or Distributor, or to ITT Schadow for a free copy of the 1983 ITT Schadow product catalog. This catalog covers the following switch series . . .

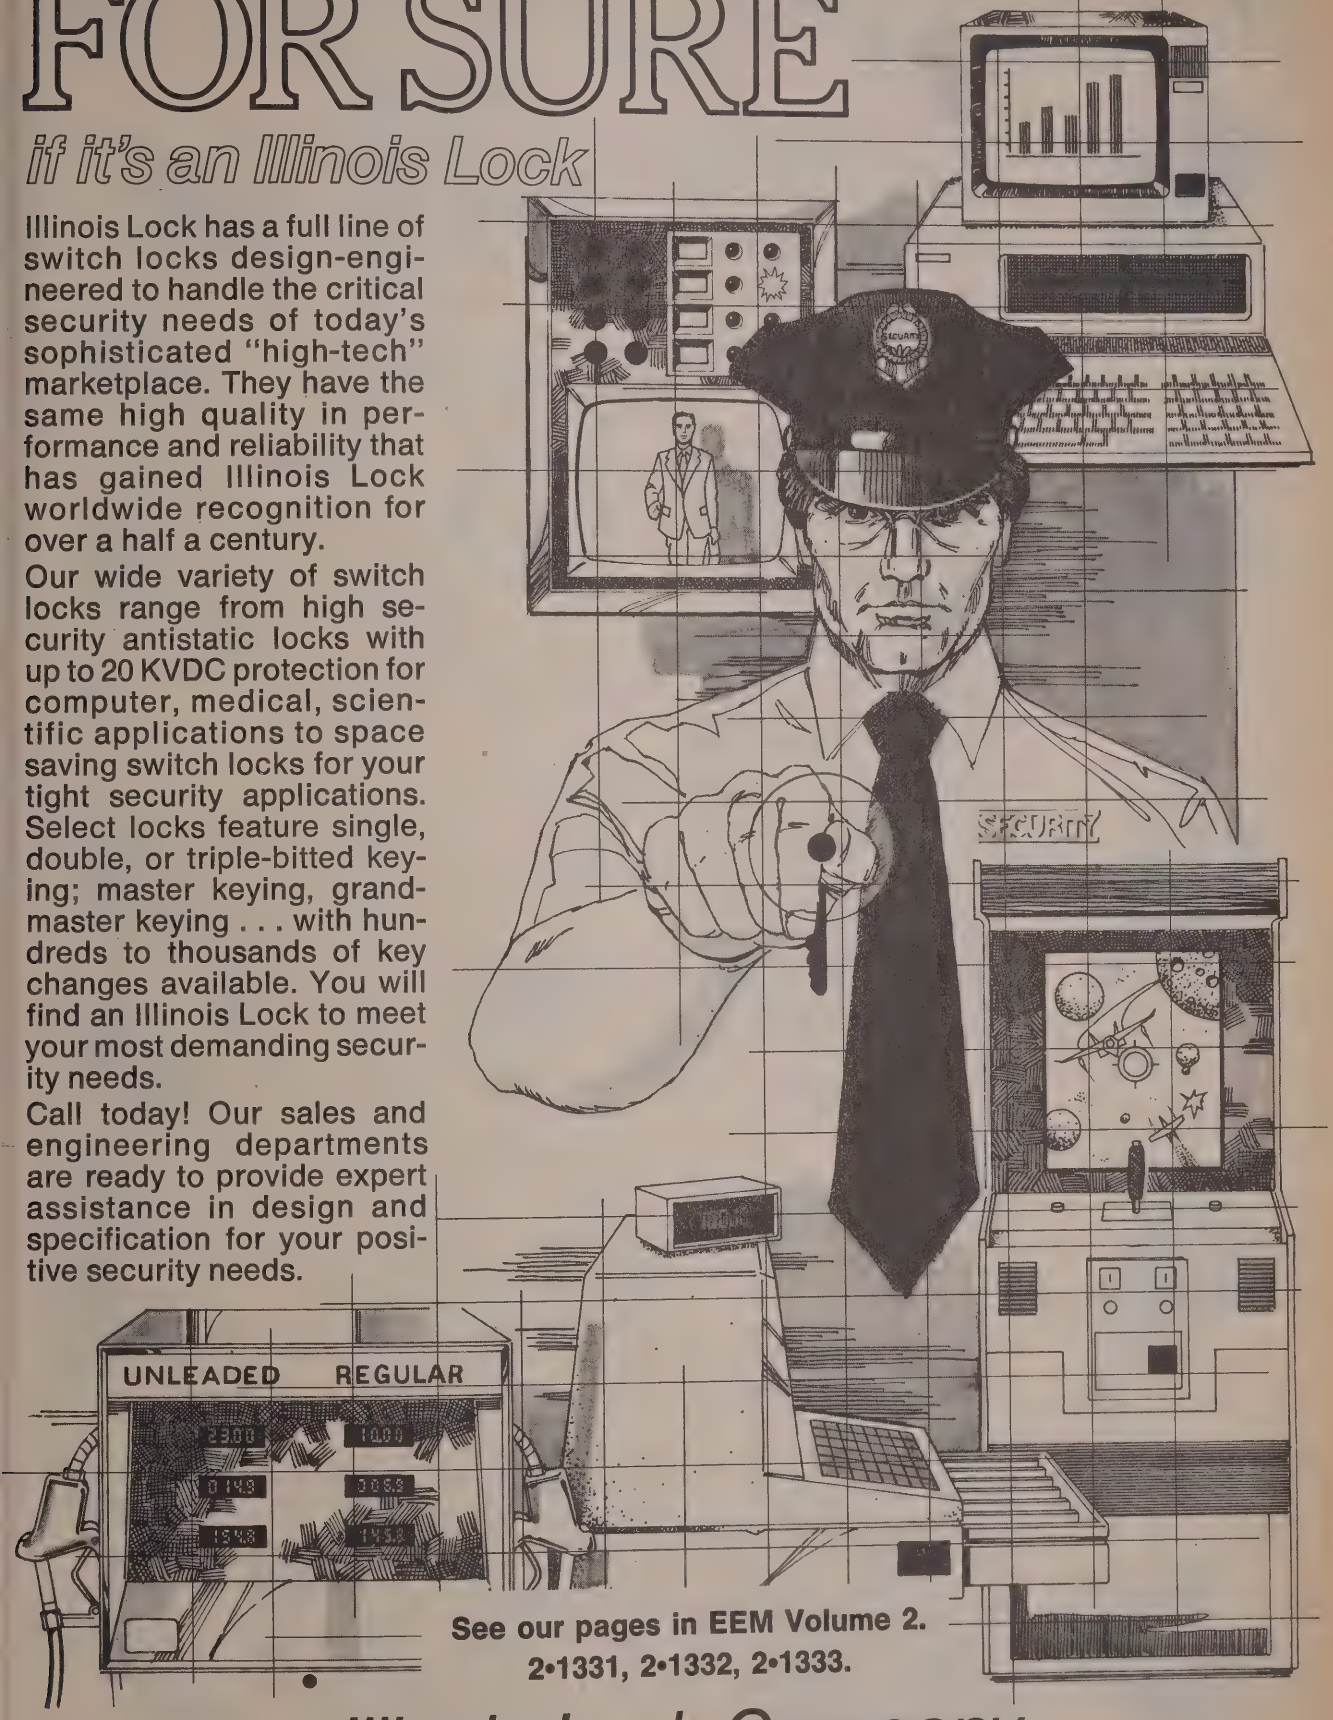
FOR SURE

if it's an Illinois Lock



Illinois Lock has a full line of switch locks design-engineered to handle the critical security needs of today's sophisticated "high-tech" marketplace. They have the same high quality in performance and reliability that has gained Illinois Lock worldwide recognition for over a half a century.

Our wide variety of switch locks range from high security antistatic locks with up to 20 KVDC protection for computer, medical, scientific applications to space saving switch locks for your tight security applications. Select locks feature single, double, or triple-bitted keying; master keying, grandmaster keying . . . with hundreds to thousands of key changes available. You will find an Illinois Lock to meet your most demanding security needs.

Call today! Our sales and engineering departments are ready to provide expert assistance in design and specification for your positive security needs.

See our pages in EEM Volume 2.

SERIES 04

Military qualified to MIL-S-3786/04. Designed for a broad range of applications, from low levels to moderately high loads. Up to 6 poles per deck with any shorting or non-shorting combination available. Meets or exceeds MIL-S-3786. Explosion proof per paragraph 4.8.16 of MIL-S-3786.

- Up to 12 active positions per deck.
- Shorting or non-shorting contacts.
- Furnished with or without panel & shaft seals.
- Approved to MIL-S-3786/04.
- Up to 9 decks.
- Up to 6 poles/deck.
- Non turn tab supplied on unsealed only.
- 1″ shaft length without shaft flat.

SERIES E015, E030

The Series EO a rotary switch offers many of the same unique design features found in the Series CO switches, plus up to 24 active positions in a 1⅜″ diameter body. The adaptability of these switches plus their relatively low cost and reliability make them an important part of the ITW product line.

- Up to 24 active positions per deck.
- Shorting or non-shorting contacts.
- Furnished with or without panel & shaft seals.
- Available with fixed or adjustable stop (Adjustable stop unsealed only).
- Up to 9 decks.
- Up to 12 poles/deck (E015).
- Panel & shaft sealed.
- 1″ shaft length without shaft flat.

SERIES C030, C036, C060

Series CO, Military Approved rotary switches are designed to simplify and reduce wiring. The contact and lug assembly is completely encapsulated to prevent movement and contamination during soldering and cleaning. These adaptable switches are available with many of the most commonly required modifications and options.

- Up to 12 active positions per deck.
- One-piece contact-terminal construction has holes large enough to accept two #22 AWG wires.
- Shorting or non-shorting contacts.
- Furnished with or without panel seal & shaft seal.
- Available with fixed or adjustable stop (Adjustable stop unsealed only).
- Approved to MIL-S-3786/41 (Comparable to MIL-S-3786/13).
- Up to 9 decks.
- Up to 6 poles/deck (C030).
- 1″ shaft length without shaft flat.

SERIES CC30

This commercially desirable series of switches has been designed to simplify and reduce wiring. The contact and lug assembly is completely encapsulated, preventing movement and contamination during soldering and cleaning. These adaptable switches are also available with many of the most commonly required options.

- Up to 12 active positions per deck.
- One-piece contact-terminal construction has hole large enough to accept two #22 AWG wires.
- Shorting or non-shorting contacts.
- Available with fixed or adjustable stop.
- Up to 6 decks.

SERIES XC30

These molded, miniature printed circuit switches are designed for commercial application. The contact and lug assembly is integrally "molded in" causing exceptionally high stability by eliminating movement. Contact surfaces are completely enclosed preventing contamination during soldering and cleaning operations.

- Shorting or non-shorting contacts.
- XC Series offers up to 12 active positions/deck. Up to 6 poles/deck.
- Up to 6 decks.
- Up to 6 poles/deck (XC30).
- 1″ shaft length without shaft flat.
- Unsealed only.
- Die cast body

SERIES RO
16 & 12 positions

A subminiature 3⁄16" diameter rotary switch offering the features of larger switches in a fraction of the space required. Designed to meet the needs of communications and related fields. Approved to MIL-S-3786/35.

SERIES FO
10 & 6 positions

A miniature rotary switch approved to MIL-S-3786/20.

SERIES VO
12, 10, 8 & 6 positions

A totally integrated series of switches approved to MIL-S-3786/20. Common angles of rotation are available in a single deck subminiature size (½" dia. x 0.355" body length).

SERIES RO — FO — VO

- Up to 10 (F036); 12 (VO); 16 (RO) active positions.
- Shorting & non-shorting contacts (all series).
- Available with fixed or adjustable stops (all series).
- Insert molded terminals.
- Poles: 1 or 2 (VO); up to 3 (F036); up to 6 (RO30).
- Panel & shaft sealed.
- Solder terminals or P.C. terminals.
- Flatted or non-flatted shaft.
- 1" shaft length without flats.
- 30°, 36°, 45° or 60° rotation increments (VO only).

SERIES RC
12 positions

A high density rotary switch, providing the most switching poles per square inch available in a commercial product.

SERIES FC
10 positions

Combines all the switching reliability of the military products and cost effectiveness of commercial products.

SERIES RC & FC

- Up to 10 (FC); 12 (RC) active positions.
- Shorting or non-shorting contacts (RC & FC).
- Available with fixed or adjustable stops (RC & FC)
- Poles: up to 3 (FC); up to 6 (RC).
- Solder or P.C. terminals (RC & FC).
- 1" shaft length without flat (RC & FC).

SERIES TO-5

This subminiature rotary switch has up to 8 positions into a TO-5 can. Gold contacts assure reliable switching over a long life. Mounting can be accomplished by soldering directly to P.C. board, by means of board sockets, or panel mounted with optional bushing. The actuator moves through 360° in detented steps of 45°. Also available with stops as required, from 2 to 8 positions. Contacts will switch 0.5 amps at 125 VAC (will carry 3 amps) with an operating temperature range of −30° to +65°C.

Applications of switches of this type are widely varied. One of the more popular uses is in manually programming a single standardized P.C. board for test or multi-function usage. With the switch mounted near the access edge, using a thumb wheel, the board does not have to be removed to change function or program. This type of application is used in test equipment, process control equipment, computer peripherals, input terminals and telephone switching equipment.

MR CLEAN II

Contact Rating: Dry circuit to 250 ma at 125 VAC
Contacts: Hard gold over nickel barrier over brass
Life Expectancy (Mechanical): 10,000 actuations
End of Life Criteria: 100 milliohms
Contact Resistance: 20 milliohms initially
Insulation Resistance: 10,000 megohms
Temperature Range: −40°C to +100°C
Operating Force: 100-500 grams initially
Stroke: .090″
HiPot Breakdown Rating: Interterminal—1,000V 60 Hz

124·□□□·020

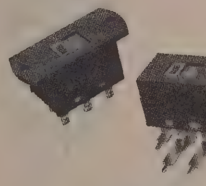
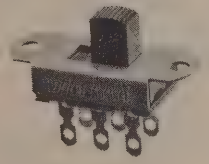
1—P.C. Silver
2—P.C. Hard Gold—50 micro inches gold over 100 micro inches nickel



SERIES SE 1022 (DPDT)

Contact Ratings: UL, CSA & SEV — 10 amp 125 VAC; 5 amp 250 VAC
VDE — 4A 125V ~ 2 (0.5)A 250 V ~ T85
Handle: 11/32″ or flush w/screwdriver slot
Electrical Life: 10,000 cycles
International Approvals: UL, CSA, VDE, SEV

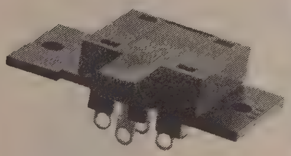
18-000-0016 Panel Mounting; Faston/Solder Terminals
18-000-0022 Printed Circuit Mounting, Printed Circuit Terminals
18-000-0019 Printed Circuit Side Mounting, Right Angle Printed Circuit Terminals.
Note: The above have Flush Screwdriver Slot and 115V/230V Nomenclature



SERIES SW

Current Ratings: Ratings from Low Level to 15A @ 125 VAC
Contact Arrangement: Configurations from SPST to 4P4T
Termination: Solder, P.C., Faston, Wire Wrap

A complete line of compact slide switches offering quality switching where space is at a premium. ITW's simple, trouble-free design assures long service under extreme conditions. A thorough contact wipe provides uniformly low contact resistance throughout the life of the switch. UL listing is available on all styles. CSA approvals are available on many units.



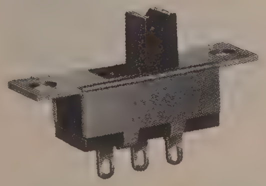
SERIES SL

The revolutionary new "SL" (Shell-Less)™ switch product provides a complete line of slide switches ingeniously designed to function perfectly without the conventional metal slide switch shell.

Standard switches are offered in single and double pole models with one, two or three throw configurations. UL & CSA listings of 4 and 10 amps are available. Precious metal plated contacts and terminals for low energy circuit applications are also available.

The "SL" offers:

- QUALITY — at lower cost.
- RELIABILITY — at lower cost. (The time tested reliability of sliding contacts.)
- LESS WEIGHT — at lower cost. (50% of the weight of most slide switches is in the metal shell which has been eliminated.)
- INCREASED SAFETY — at lower cost. (Absence of conductive shell is inherently safer electrically.)
- VERSATILITY — at lower cost.



SERIES M

Contact Resistance: 20 milliohms max. at 1 Ampere 5 Volts DC or 1 KHz
Dielectric Withstanding Voltage: 500V at 50-60 Hz for 1 min.
Electrical Endurance: 10,000 cycles
Rating: .5 Amperes 125 VAC resistive
Housing: Corrosion resistant plated steel
Terminal Board: Phenolic
Terminals: Silver plated brass
Button: Black plastic (ABS or Delrin depending on Series)
Contact: Silver plated phosphor bronze, copper or brass

MA Series: Smallest switch presently available. A dual wiping and a coil spring loaded contact combine to provide six points for lower energy transfer in a single pole on each throw.

MD Series: Dual wipe contact: Thorough contact and terminal wipe.

MH Series: Dual wipe contact, ball and spring type skid proof center detent. center off position.

MS Series: Dual wipe contacts. Positive skid proof ball and spring type side detent.

SERIES ST

ST 1032 (TPDT) 10A @ 125 VAC
ST 612 (SPDT) 6A @ 125 VAC
ST 622 (DPDT) 6A @ 125 VAC

This line of power switches is UL Recognized and CSA listed and have been approved in equipment submitted to BSI and VDE. Rugged construction for demanding applications, these enclosed housed switches are available in slide and rocker versions.

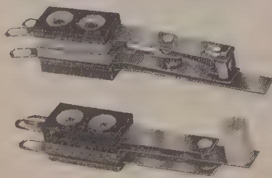
SERIES RSW

Current Ratings: Ratings from Low Level to 10.1A @ 125 VAC
Contact Arrangement: Configurations from SPST to 4P3T
Termination: Solder, P.C., Faston, Wire Wrap
Rocker or padle type actuators available

These switches are UL Recognized in various ratings. CSA Certified versions are also available. (Contact factory.) Both light and heavy duty rocker switches for today's fashionable products are available.

Stylish molded actuators in a spectrum of colors enhance the switches. Single and two piece steel housings provide numerous mountings to meet custom requirements. The thorough wiping contact guarantees extremely low contact resistance to meet advanced circuit switching specifications. A selection of terminals insure the proper choice for the most economical connection to Rocker Switches. For a solution to your switching problems, contact the factory direct or our nearest sales representative.



LEAF SWITCHES

Series 20
¼″ Mounting Centers
Series 21
⅜″ Mounting Centers
Series 37
3/16″ Mounting Centers

Custom designed leaf switches provide for low cost and long life. A variety of contacts and terminals are available for virtually any application. No matter what your requirement these switches are produced to perform.

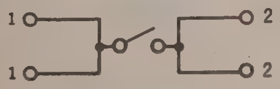
SERIES 60 DATASWITCH

Mounting: PC Board only. Switch is .39″ square

Illumination: T-1 LED when used with 60-1000 switch, 60-3000 LED support and rectangular button

Circuitry: SPST-NO Momentary



Termination: .020″ x .040″ PC Board

Button Styles: 60-1000 switch has integral .31″ x .24″ rect. black button

60-2000 switch has integral .24″ round black button

.48″ square button cap may be used with 60-1000 switches

.48″ x .86″ rectangular button cap to be used with 60-1000 switches and 60-3000 LED support

Additional button colors available — Consult factory

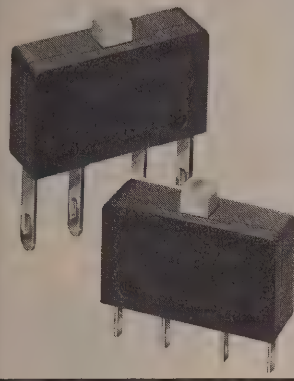
BASIC/SNAP-ACTION SWITCHES

ITW SWITCHES • 6615 W. IRVING PARK RD. • CHICAGO, IL 60634 • (312) 282-4040



TYPE 16

Sub-Miniature, 5 Amp and 1 Amp Double-Break Snap-Action Switches

Licon's lower cost versions of its Type 16 switches incorporate a simplied contact design that reduces cost by using less precious metal. A 5 amp version uses silver inlay on the terminals in place of individual stationary contacts. A low level version uses gold inlay for both the stationary and movable contacts.

Both silver and gold inlay switches are available with either .110 quick disconnect or P.C. terminals.

Licon's Type 16 Switch with gold inlay is UL Recognized at 1 amp, 125 VAC. In low level applications, it is recommended for use at 15 Volts, 100 milliamps, max. UL File No. E27957.

TYPE 16 5 AMP AND 1 AMP

Part No.	16-438003	16-438006
Termination	P.C.	.110 Q.C.

MECHANICAL CHARACTERISTICS

Pretravel	1.27 max. (.050)
Overtravel	0.30 min. (.012)
Operating Force	1.4 +0.8 −0.6 N. (5 +3 −2 oz.)
Release Force	0.6 N. min (2 oz.)
Movement Differential: (5 amp)	0.51 ±0.13 (.020 ±.005)
(1 amp)	0.38 ±0.15 (.015 ±.006)

TYPE 16

Sub-Miniature, Integral Lever, Double-Break Snap-Action Switches

Series 16-47 INTEGRAL LEVER SWITCH features the Butterfly® double-break snap action mechanism with an integral actuator assembly. Additional features are 2 circuit control with 1 switch, and a higher current rating than comparable sized single-break switches.

A variety of integral levers are available to suit your individual switching requirements, in momentary and maintained action. Contact factory for special requirements.

The 16-47 is UL Recognized at 5 amp @ 125/250 VAC, ¼ HP at 125 VAC.

TYPE 16 INTEGRAL LEVER

Part No.	16-470101	16-470104
Termination	P.C.	.110 Q.C.

	Operating Force	71 grams max.
	Release Force	28 grams min.
	Movement Differential	.047 ±.013

TYPE 16

Sub-Miniature, 10.1 Amp, Double-Break Snap-Action Switches

Licon's Type 16 switches feature the unique Butterfly® double-break momentary snap-action switch mechanism. Type 16 offers twice the electrical rating of most sub-miniatures and permits control of two isolated circuits with a single switch. Available in a wide variety of terminal configurations and styles with gold plated or silver contacts standard. Type 16 is UL Recognized and CSA Certified at 10.1 amps @ 125/250 VAC.

TYPE 16 10.1 AMP

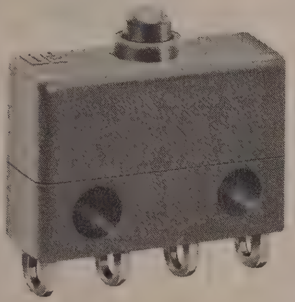
Movement Differential	.020 ±.005
Movement Differential Type 16-403 Only	.012 ±.005



TYPE 18

Sub-Miniature, 7 Amp, Double-Break Snap-Action Switches

Licon's Type 18 sub-miniature Butterfly® double-break switches are used when space is at a premium. Ideally suited for office, communications, computer systems and aircraft.

Series 18 is a single pole double-break snap-action switch utilizing the Licon Butterfly® double-break mechanism.

Gold plated contacts, solder lug, or P.C. terminals are standard features. External actuators are available. Consult factory.

UL Recognized File No. E27957. Seven amps 125/250 VAC 75-80% PF.

TYPE 18 7 AMP DOUBLE BREAK

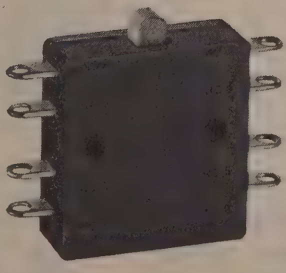
Movement Differential	.015 ±.005

U.L. Recognized File No. E27957. — 7 amps 125/250 VAC 7-80% PF.



TYPE 26

Sub-Miniature, Double Pole, 8 Amp, Snap-Action Switches

Type 26 is DPDT (Form ZZ) contact arrangement and provides the option of controlling up to 4 isolated circuits. It may be wired externally to provide two commons to form standard DPDT (Form CC) switch. Simultaneity of operation (within .004″ of plunger travel) is achieved by a special linkage mechanism. Simplified control is achieved by eliminating the need for multiple switches. Standard contacts are fine silver or gold plated.

UL Recognized File No. E27957. Eight amps @ 125/250 VAC. 75-80% PF. Meets requirements of MIL-S-8805/77.

TYPE 26 DOUBLE POLE

Part No.	Circuitry	Simultaneity	Contact Material	Terminal

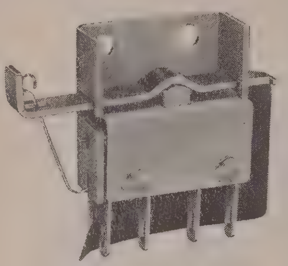
Overtravel	.012 min.	Movement Differential	.020 ±.010
Operating Force	16 ±4 oz.		



TYPE 76-6

Door Interlock Switches

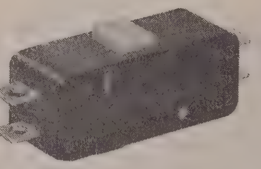
The Licon Type 76 Door Interlock Switches are for the protection of personnel involved in testing and servicing electronic equipment.

This design employs the Butterfly® double-break switching mechanism for automatic interruption of power when service door or cabinet drawer is opened, and features a manual set (pull to maintain) for restoration of power when servicing or testing circuits.

Following service when door is closed, the actuating rod returns to normal or reset position allowing power to continue. UL Recognized.

TYPE 76-6 DOOR INTERLOCK SWITCHES

Part Number	Electrical Rating	
76-6005 Single Pole	Form X or Y	10.1 amp 125/250 VAC 10 amp 28 VDC IND.
	Form A, B, or Z	5 amp 125/250 VAC 3 amp 28 VDC IND.
76-6009 Double Pole	Form XX or YY	8 amp 125/250 VAC 7.5 amp 28 VDC IND.
	Form ZZ	8 amp 125/250 VAC 5 amp 28 VDC IND.
76-6012 Triple Pole	Form XXX or YYY	7.5 amp 125/250 VAC 7.5 amp 28 VDC IND.
	Form ZZZ	7.5 amp 125/250 VAC 5 amp 28 VDC IND.



TYPE 11

Miniature, 10 Amp, Double-Break Snap-Action Switches

An ideal switch for military, commercial, and industrial applications. Type 11 is available in standard and low force momentary action, as well as reset action. Fine silver contacts are standard. A wide variety of terminals and actuators give Type 11 switches added flexibility. Gold plated contacts and external actuators are available. Contact factory.

UL Recognized File No. E27957 & CSA File No. 16388.

TYPE 11 10 AMP DOUBLE-BREAK

TYPE 14

20 Amp, Double-Break Snap-Action Switches

Type 14 switches feature double-break switching mechanisms. They are designed to handle loads up to 20 amps. Type 14 switches are available in standard and heavy duty mounting, with basic button, overtravel button or pivoted lever actuators. Semirefractory contacts and offset #6 screw type terminals with cup washers are standard.

UL Recognized File No. E27957. CSA Certified File No. 16388.

TYPE 62 AND 63

Sealed Switches

The Licon Type 63 Series is an environment-free sealed switch designed for rugged duty and to conform to the rigid specications of military and standard designs.

A one piece housing with "O" ring seals at the plunger and epoxy at terminal base provides the true environment free sealing to comply with immersion requirements of MIL-S-8805 Design Symbol #3 and #4.

TYPE 62 HERMETICALLY SEALED SWITCHES

The Licon Type 62 Series is a true hermetically sealed environment-free snap-action switch with a maximum leak rate of 1 x 10^{-8} C.C./Sec. This switch enclosure is designed to meet the sealing requirements as defined per MIL-S-8805. Hermetic, design style 5. Ref.: 62-200021 per M8805/80-01.

For additional information on Type 62 or 63 hermetically sealed switches, contact the factory or request ITW Switches Catalog #70.

TYPE 65

Subminiature sealed switch with up to 15 amp rating

Licon's Type 65 Series offers environment-free snap action switching with ratings up to 15 amps resistive @ 28 VDC. The type 65 conserves design space and provides the ruggedness and reliability to meet the demands of industrial and military applications. Type 65 switches meet the (water-tight) requirements of MIL-S-8805 enclosure design symbol 3. Contact the factory for special requirements in terminals, actuators, basic switches and high temperature requirements or request ITW Switches Catalog #70. 65-230101, 102, 65-330101, 102, 65-430101, 102 are military approved per MIL-S-8805/84.

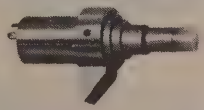
GENERAL SPECIFICATIONS

All switches offer maximum protection against radio frequency interference.
ELECTRICAL RATING:
Carry 10 amps continuous.
Make and Break — see individual switch data.
VOLTAGE DROP:
0.1 volt or less at rated amperage.
Initial Contact Resistance: .003 ohm.
LIFE:
10,000 double cycles make and break rated amperage.
TORQUE:
1 to 3 inch lbs.
SWITCHES DESIGNED AND BUILT IN ACCORDANCE WITH THE FOLLOWING SPECS.:
MIL-S-6807 (rotary switches enclosed)
MIL-S-3786 (rotary switches)
MIL-E-5272 (environmental testing)

ON MOST OF THE SWITCHES LISTED, THE FOLLOWING FEATURES ARE AVAILABLE:

- O-ring Shaft and Panel Seal
- Combination of Decks
- Bridging contacts
- Momentary positions
- Isolated positions
- Adjustable stops
- Solenoid driven
- Keylock
- Gang switches
- Concentric shaft switches

TYPICAL UNIQUE APPLICATIONS OF JANCO ROTARY SWITCHES



DOUBLE MOMENTARY ACTION

Push button switch designed for grip stick applications. Actuation to first momentary detented position closes first circuit. Second detented position completes second circuit.

FEATURES UNIQUE ON-OFF OPERATION

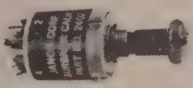
Actuated by pulling knob out and rotating to "on" positions. While in "on" positions, circuitry cannot be shut off until knob is returned to "off" position and depressed.

MASTER COMMUNICATIONS SWITCH

Provides standard coded outputs and offers unique switching functions by longitudinal shaft movement. Momentary or maintained contact positions actuated by pulling shaft.

JET ENGINE START SWITCH

Knob is depressed and contacts are held in by the solenoid. After jet engine reaches desired RPM, system removes power disengaging solenoid. Lighted knob indicates function.



Janco CORPORATION **Since 1947**

Series "D" Pushbutton Rotary Switches

QPL MIL-S-22710

FEATURES: • Totally enclosed, explosion proof. • Printed-circuit construction. • Black or white numbers on black or white background indicate switch positions (black numbers on white background for lighted switches). • All standard codes available. Available in 8, 10, 12 or 16 positions. • Plastic covered buttons, available in black, red, green, yellow, white or blue.

JUD·CO P.O. BOX 487-E84 24030 FRAMPTON AVENUE, HARBOR CITY, CALIF. 90710 (213) 534-0959

PUSHBUTTON SWITCHES

Presenting a varied line of smooth operating and low cost miniature pushbutton switches that will fit most any electrical/electronic applications. Numerous styles and colors of button caps, insulating boots, mounting nuts and related hardware are also available.
Contact materials can also be tailored to meet applications demands.
Consult JUDCO for assistance to meet your specific requirements.

ELECTRICAL RATINGS: 125 VAC 3 Amps Inductive 2A-L, 14 VDC 4 Amps. (UL File No. E70679, Switch Codes 1, 2 & 3 only). Other ratings are also available.
Dielectric Strength: 1000 VRMS

ELECTRICAL LIFE: Tested to suit requirements. **MECHANICAL LIFE:** 250,000 cycles.

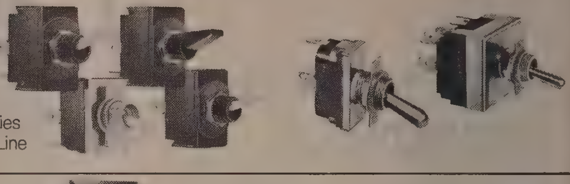
SPECIFY McGILL SWITCHES FOR RELIABILITY AND STYLE

toggle

Featuring **0151 Designer Line** toggle switches with your choice of lighted or unlighted bat caps in four different designer-styled configurations. Black, white and red caps standard. Special colors available. Die-cast zinc or plastic cover-plates. 15A, 125-250-277V AC; ¾ HP, 125-250V AC. DPST, DPDT circuitry. Other toggle switch series include 6 to 20A ratings in SP, DP, 3-pole and 4-pole models. Spade, screw or solder terminals. U.L. Listed. C.S.A. Approved.



0151 Series
Designer Line

rocker and paddle

Lighted rockers with fully illuminated separable caps or one or two lenses in a broad selection of colors are features of **0851 Series Rocker Switches.** 15A, 277V AC and 6A, 125V AC models in both SP and DP circuitry. Snap-in mounting for fast installation. Other McGill rocker and paddle switches include: **0801 SP and 0811 DP Series**—20A, 277V AC, 1½ HP 125-250V AC; **1801 SP and 1811 DP Series**—6A, 125V AC, 3A 250V AC, ¼ HP 125-250V AC; **0840 3-pole and 4-pole Series**—17A, 277V AC; 6A, 600V AC, 1 HP 125V AC, 2 HP 250-480-600V AC; 1, 2, or 3 phase. U.L. Listed. C.S.A. Approved.

0851 Series Lighted

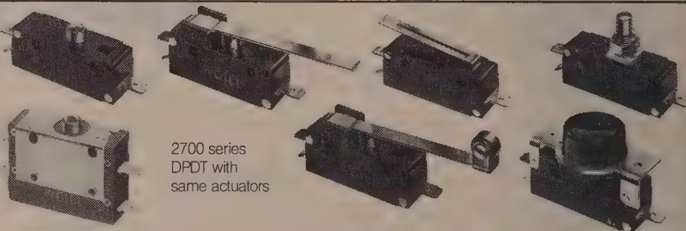
miniature rocker and paddle

0815 Series provides choice of **lighted** or **unlighted** rockers. 6 standard colors for lighted models, 3 for non-lighted. Plastic snap-in bezels, ¼" spade terminals. Ratings—12A, 125V AC, ½ HP 125-250V AC. Other series: **0805** has same electrical ratings as 0815 but in non-lighted models only. Bracket mounting and metal bezel standard. Plastic bezel and snap-in mounting optional. Rocker or paddle actuators. **0806 Series** has neon indicator light adjacent to rocker. Same ratings as 0815 and 0805 series. U.L. Listed. C.S.A. Approved.

0815 Series Lighted

snap-action

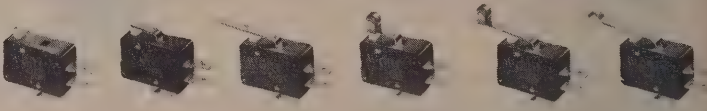
High reliability through design simplicity. Fewer parts to wear—minimum spring flexing increases life. No coil springs. Less than .005" differential travel. SPDT, SPST. **2600 Series**—20A, 125-250V AC; 1 HP 125V AC; 2 HP 250V AC; 50/60 Hz. **2650 Series**—25A, 125-250V AC; 1½ HP 125V AC; 2 HP 250V AC. Operating force: 20 oz. max. **1600 Series**—Light operating force—10 oz. max. 15A 125-250V AC; ¾ HP 125V AC; 1½ HP 250V AC. Also available as **2700 Series** in DPDT models with same actuators and rated: 20A, 125-250V AC, 2 HP 250V AC, 50/60 Hz. U.L. Listed. C.S.A. Approved.



2700 series
DPDT with
same actuators

miniature snap-action

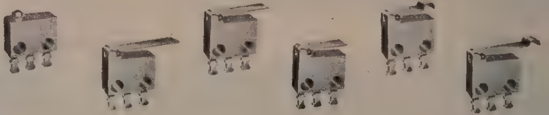
$1\frac{3}{32}$" x ⅝" x $\frac{13}{32}$" case. Oversize silver contacts. Excellent wiping action and low contact bounce. SPDT, SPST. **4600 Series**—6–14 oz. max. operating force. 15A, ½ HP 125-250V AC; ½A 125V DC, ¼A 250V DC; 4A "L" 125V AC. **4700 Series**—Light operating force—8 oz. and 75 gram max. 10A, ⅓ HP, 125-250V AC; 4A "L" 125V AC. U.L. Listed. C.S.A. Approved. **4613 Series** meets requirements for TV fire protection.



4775 Series with exclusive rolling cam design. An engineering breakthrough in light force switches that produces 150,000,000 cycle reliability, 1.5 millsec contact bounce, contact force that exceeds 50% of operating force.

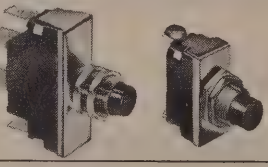
sub-miniature snap-action

4900 Series—smallest precision snap-action switches available. Case dimensions less than .250" x .300" x .100". Choice of contacts, terminals and actuators. SPDT, 2A 125-250V AC; 2A (Res.) 30V DC; 1A (Ind.) 30V DC. Meet MIL-S-8805 specifications. Temp. range −100° F to +185° F. Up to 250° F continuous duty temp. ratings available.



push button

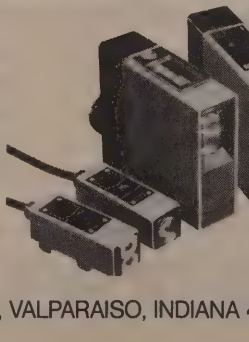
Momentary and maintained contact push-button switches up to 30A. Variety of mechanisms, including snap-action, SPST, SPDT, 2-circuit. U.L. Listed.



MODIFICATIONS OF BASIC SWITCHES
TO MEET APPLICATION REQUIREMENTS ALSO AVAILABLE

photoelectric sensors

Revolutionary integrated circuits eliminate separate plug-in modules or cards for performing optional functions. Time delay, normal and inverted logic, timing and sensitivity-adjustment circuitry are built into sensor. Operates on practically any AC or DC power source. **5000 Series**—Transmission and reflection types with built-in power supplies and relays. **4000 Series also available**—Transmission and reflecting types with built-in amplifiers.



Request Catalogs 89, 1720 and Bulletin C280 for complete specifications.

McGILL®
ENGINEERED SWITCHES

McGILL MANUFACTURING CO., INC., ELECTRICAL DIVISION, VALPARAISO, INDIANA 46383 PHONE: (219) 465-2200

MEI T-5 SERIES LIGHTED KEYSWITCHES

DESCRIPTION

The T-5 lighted keyboard switch has long life (greater than 10 million cycles), low bounce, gold-plated cross bar contacts usually found in more expensive switches.

Mechanically, the T-5 switch incorporates precision tracking surfaces providing a smooth "feel" throughout its .170 travel. Each switch has two alignment studs and four to six solder points. This makes hand or wave soldered PC board assemblies extremely rugged for the most demanding applications, while keeping the manufacturing costs down by eliminating the need for metal mounting frames.

Electrical configurations include normally open, normally closed, double pole normally open, and alternate action. MEI stocks a 5V, 60 milliamp, 100,000 hour bulb for these switches. Lamp terminal spacing is .100 inch, to fit T-1 size lamps which can be changed from the front panel by end users. Lenses are stocked in eight colors.

SPECIFICATIONS

CONTACT RATING, DC RESISTIVE: 3W max.

VOLTAGE: 24V max.

INITIAL CONTACT RESISTANCE: 100 mΩ max.

PLUNGER TRAVEL: .170 ±.010 in.

PRE-TRAVEL: .080 ±.030 in.

OPERATING FORCE
  SINGLE POLE, MOMENTARY: 3.5 ±0.5 oz.
  DOUBLE POLE AND/OR ALT. ACTION: 6.0 ±0.5 oz.

TEMPERATURE
  OPERATING: −25°C to +65°C
  STORAGE: −40°C to +70°C

CONTACT BOUNCE: 4 ms max.

MIN. ACTUATIONS, @ 5V, 100μ AMPS: 10 x 10^6

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

MICRO SWITCH

TABLE OF CONTENTS

The products described in the following pages are representative of the thousands of position sensing and manual control products manufactured and distributed by MICRO SWITCH. For comprehensive catalogs write MICRO SWITCH, Freeport, Illinois 61032, Dept. 720E. Or, call (815) 235-6600. For application assistance, contact a nearby MICRO SWITCH Sales Office. See listing in this Directory. For off-the-shelf products, see your local MICRO SWITCH Authorized Distributor listed on pages 43 & 44.

POSITION SENSORS

Hall effect position sensors
Hall effect sensors are operated by the magnetic flux from a permanent magnet or an electromagnet. The sensing element is a Hall sensor with a trigger and amplifier integrated on a silicon chip. These integrated circuits have been performance tested to over 19 billion operations. Operating speeds can exceed 100 kHz.

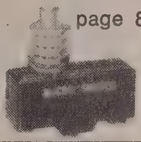
6SS .... page 2
8SS .... page 2
9SS Linear output sensor .... page 3
SR threaded sensors .... page 3
AV vane sensors — MG magnets .... page 4
Application information .... page 5

VX solid state switches page 7
VX mechanically operated Hall effect switches combine mechanical switch operating and mounting convenience with solid state reliability. The mounting dimensions and mechanical characteristics are similar to the popular V3 snap-action switch.

Z and A standard switches page 8
Standard size switches. Ratings to 25 amps. High precision-long life. Wide choice of actuators and terminals. Use for general purpose applications.



SX subminiature switches page 11
Smallest snap-action switches from MICRO SWITCH. Rated to 7 amperes. Choice of actuators and terminal styles. Use where the smallest and least weight, snap acting switch is essential.

SM subminiature switches page 13
Slightly larger than SX switches. Rated to 11 amperes. Choice of contacts, actuators and terminal styles. Use for communications/office equipment and other smaller application needs.

V3 miniature switches page 15
Standard or low operating forces. Rated to 15 amperes. Use for appliance-vending machine and similar applications.

MANUAL SWITCHES

TP sealed rockers page 17
Sealed rocker toggle series. Standard size 1, 2 and 4 poles. Various actuators, termination and circuitry. Military and UL listings.

TK industrial toggles page 18
Sealed toggle series. Standard size. 1, 2 and 4 poles. Various actuators, termination, and circuitry. UL listings.

TL sealed toggles .... page 19
As above but mil. listed.

TS standard toggles page 20
Standard size toggles, 1 or 2 pole. Various actions, circuitry and termination. Use where a lower cost standard size toggle is required.

AT toggle assemblies page 21
Toggle switch assemblies using basic switches. Wide variety of ratings, contacts, actuators, terminals, and sealing. Mil listings available.

AML advanced manual line page 22
AML provides a choice of solid state, electronic, or power controls with pushbutton, rocker, paddle or keylock actuation. Incandescent, LED or neon lighting illuminate a wide variety of display options. Single level termination with all common types available. Choice of snap-in front mount, strip or matrix mount.

MML miniature manual line page 33
MML miniature pushbuttons provide a choice of solid state, electronic or power duty controls. Plus incandescent or LED illumination with printed wiring board or snap in panel mounting. Operating modes include momentary, two level alternate action or multi-switch interlock.

FEATURES

- *Hall effect sensing*
- *Single digital output . . . current sinking or sourcing*
- *3 pin solder/quick-connect terminals . . . easy wiring as remote sensor*
- *Internally threaded flux concentrator . . . also used as mounting means*
- *4.5 to 5.5VDC or 6 to 16VDC supply voltages*

FEATURES

- *Hall effect sensing*
- *Dual digital outputs . . . current sinking or sourcing*
- *4 pin dual-in-line terminals . . . printed circuit board or standard DIP socket mounting*
- *Optional flux concentrator*
- *4.5 to 5.5VDC or 6 to 16VDC supply voltages*
- *Linear output sensor available . . . 4 to 10VDC supply voltage*

FEATURES

- *Hall effect sensing*
- *Single digital output . . . current sinking or sourcing*
- *3 pin in-line printed circuit board terminals . . . standard .100″ mounting centers*
- *Smallest ceramic package . . . 0.3″ square*
- *4.5 to 5.5VDC or 6 to 16VDC supply voltages*
- *Standard or precision magnetic characteristics*

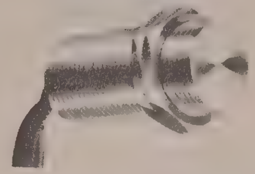
Magnetically operated position sensors 9SS LOHET™/SR

.60 H x .30 W x .07 D
9SS



15/32 thread x 1.00 L
103SR

FEATURES

- *Hall effect sensing*
- *Single linear output*
- *3 pin in-line printed circuit board terminals . . . standard. 100" mounting centers*
- *Thin ceramic package*
- *4.5 to 8 VDC or 8 to 16 VDC supply voltages*
- *Laser trimmed thick film resistors . . . minimize sensitivity variations, compensate for temperature variations*
- *Tight specifications on output as function of magnetic induction*

FEATURES

- *Hall effect sensing*
- *Single output . . . digital current sinking or sourcing*
- *Sealed threaded aluminum bushing housing . . . meets NEMA 3, 3R, 3S, 4, 4X, 6, 12 and 13*
- *20 gage, 6 inch stranded leadwires . . . color coded, teflon insulated*
- *Adjustable mounting*
- *4.5 to 5.5 VDC or 6 to 16 VDC supply voltages*
- *Linear output available*

For more information, see Catalog 20, Solid State Sensors.

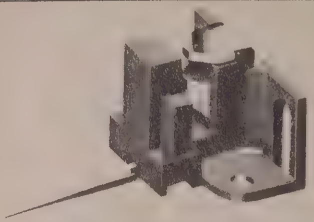
AV Vane operated position sensors

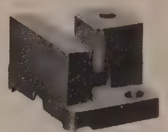


.75H x 1.23W x .58D plus term.
1AV

FEATURES

- *Hall effect sensor*
- *Single digital output . . . current sinking or sourcing*
- *Versatile mounting*
- *3 pin solder/quick-connect terminals or leadwires*
- *6 to 16VDC power supply*
- *Lower operating force*
- *UL Recognized housing and leadwires*

For more information, see Catalog 20, Solid State Sensors.



.43H x .75W x .52D plus term.
3AV/4AV

FEATURES

- *Hall effect sensor*
- *Dual digital outputs . . . current sinking*
- *Small size*
- *4 pin in-line printed circuit board terminals or leadwires*
- *Closely controlled differential to predict pulse width*
- *4.5 to 5.5VDC or 6 to 16VDC power supply*
- *Connector block available*

Principle of operation

AV vane sensors are operated by passing a ferrous vane through the gap between the Hall sensor and the magnet, shunting the magnetic flux away from the sensor.* AV's can be used as limit switches by operating with a single large vane; as tachometer sensors by using a toothed wheel; or, as machinery synchronizing elements by using cams or sectors. 1AV and 4AV Series have many features in common, such as:

- *Operation by a low cost, easy to fabricate ferrous vane*
- *Magnet and sensor incorporated in same rugged package*
- *Sealed construction . . . unaffected by dust or dirt*
- *0 to 100kHz operating speed . . . no minimum speed of operation*
- *On and Off times programmable by vane dimensioning*
- *Precision mechanical operating characteristics*

*See Catalog 20 for vane actuation information.

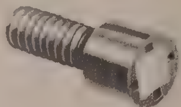
MG Magnets

101MG3/101MG4

102MG11

102MG15



106MG10

105MG5R2

101MG2L1

MICRO SWITCH does not manufacture magnets. However, we do supply bar and ring magnets for operating our Hall effect sensors. The most common form of magnet used to operate a Hall effect sensor is the bar magnet. The magnet should provide at least 10% flux overdrive above "Max. Operate", when at minimum distance from the sensing surface.

Application information

DETERMINING MAGNETIC OPERATING CHARACTERISTICS

Magnetic sensing characteristics of Hall effect devices are specified within particular ranges. For example, assume an application with a temperature range of −40° to 100°C using a 513SS16. Referring to the table on page 2, the operate point may be up to 330 gauss and the release point may be 85 to 305 gauss. To insure reliable operation, **at least** 330 gauss must be presented to the sensor. The gauss level must then be reduced below 85 gauss to insure that the sensor will release. Therefore, it is necessary to know the flux density (gauss) measured at the chip to be able to 1) select a device with the best magnetic characteristics for your application; 2) select the best magnet; and 3) verify the desired mechanical characteristics.

The Calibrated Hall Element is used to determine the flux density produced at the sensor by the magnet. The package as well as the sensitive area is identical in size and location to the actual device. The output voltage of the Hall element, as a function of magnetic flux density, is linear, providing an electrical output which is proportional to flux density. A millivoltmeter with a one megohm input impedance should be used to measure the output. A Calibration Curve is furnished with each element, showing the Hall voltage versus flux density. When the magnetic field decreases, the output voltage decreases in a like manner. Referring to the calibration curve, a reading on the voltmeter is easily converted to gauss. Mechanical characteristics can be verified by first plotting a gauss versus distance graph. By comparing the curve to the magnetic characteristics of the sensor the possible mechanical ranges of operate point and release point can be determined.

Once the operating limits of the magnet and sensor combination have been established, feeler gages, etc., may be used during installation to insure that the correct gap is maintained.

CALIBRATED HALL ELEMENTS

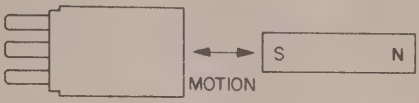
Magnetic characteristics for Hall effect devices are specified within particular ranges. To insure that all devices will operate and release in your application, gauss levels should be verified. Calibrated Hall Elements are available to measure the gauss levels produced in your application. These elements are available in packages similar to the corresponding Hall sensor. The elements are intended for laboratory use only.

METHODS OF ACTUATION

There are many ways to apply MICRO SWITCH solid state sensors. Some of the more common sensing methods are described. Further information is as near as your telephone. Just call your nearest MICRO SWITCH sales office, and one of our trained field engineers will be happy to discuss your application with you.

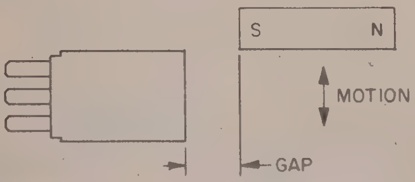
Head-on

The target is centered over the point of maximum sensitivity and is moved "head-on" to the sensor, then backed off.



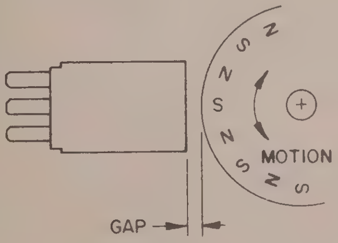
Slide-by

The target is moved across the face of the sensor at a specified distance.



Rotary

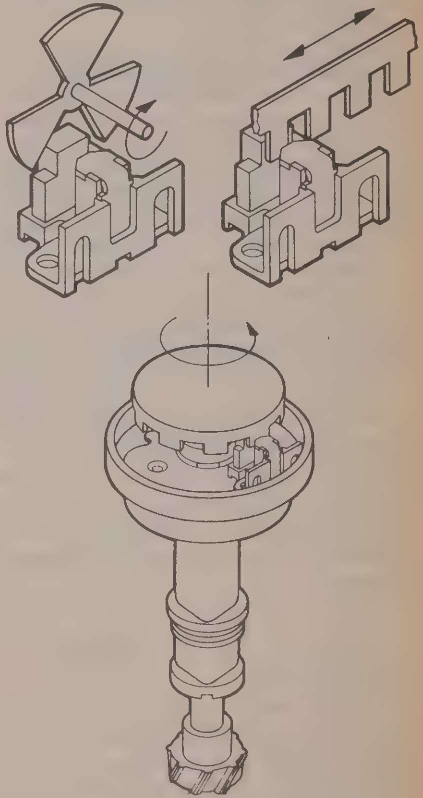
A rotating target, such as a ring magnet, provides an alternating pattern of On-Off actuation.



If you need more information, the handbook Hall Effect Transducers, How to apply them as sensors, is available from MICRO SWITCH. It is intended to assist you in understanding and applying Hall effect devices.

Vane

The target, a ferrous metal vane, slides through (or rotates through) the gap between magnet and sensor.



CALIBRATED HALL ELEMENT ORDER GUIDE

Application information

CURRENT SINKING AND CURRENT SOURCING

Two types of output circuits are common to solid state circuitry . . . current sinking and current sourcing. The names are derived from the location of the load in the output circuit.

Current sourcing (open emitter): The load is connected between the output and ground. The load is isolated from the supply voltage when the sensor is Off. When the sensor turns On, current flows from the power supply through the sensor, into the load. The sensor supplies a "source" of power to the load. A current sourcing output is Normally Low and goes High when the sensor is On.

Current sinking (open collector): The load is connected between the power supply and the sensor. In this circuit, the load is isolated from ground when the sensor is Off. When the sensor turns On, the circuit is complete and current flows from the supply through the load, through the sensor and then to ground. The sensor switches, or "sinks" the output current to ground. A current sinking output is Normally High and goes Low when the sensor is On.

INTERFACING FOR MICRO SWITCH HALL EFFECT SENSORS

The schematics shown are typical of the outputs with which MICRO SWITCH Hall effect sensors can be interfaced. Values shown are representative only.

PULL-UP AND PULL DOWN RESISTORS

It is common practice to use a pull-up resistor for current sinking and a pull-down resistor for current sourcing. These resistors minimize the effect of small leakage current from the output of the device or from the electronics with which it is interfaced. In addition, they provide better noise immunity and faster rise and fall times.

The current sinking output is open collector and the current sourcing is open emitter. These outputs are floating, so the pull-up or pull-down resistor helps establish a solid quiescent voltage level. When checking sensors, a load is essential. See interface drawings.

CURRENT SINKING OUTPUTS

(Current flow through load into sensor). Output terminal is open collector. In the unoperated condition ($I_L = 0$), the output voltage is normally High.

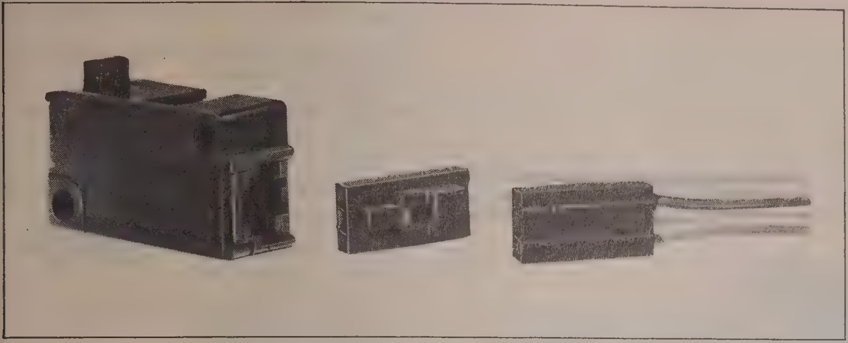
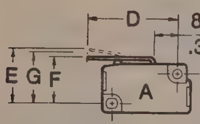
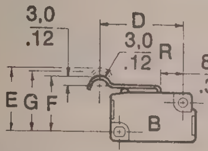
Mechanically Operated Solid State Switches VX

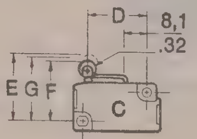


FEATURES

- *Low force operation*
- *Solid state reliability*
- *4.5 to 24 VDC supply voltage*
- *−40°C to +70°C operating temperature*
- *Direct interface to solid state circuits*
- *Reverse voltage protection*
- *Digital current sinking, normally high or normally low output (10 mA)*
- *Rugged construction*
- *Wide variety of standard levers and actuators available*
- *Lever external to switch body*
- *Industry standard mounting holes*
- *No external terminals . . . uses standard keyed and locking plug-in connectors*







GENERAL INFORMATION

The VX Series combines a miniature size mechanical switch's construction, operating and mounting convenience with solid state reliability. The switching element is a Hall effect transducer with a trigger and amplifier integrated on a silicon chip. An integral magnet molded in the plunger actuates the transducer and produces a digital logic level output.

Mounting dimensions and mechanical characteristics are similar to those of MICRO SWITCH's V3 Series snap-action switches.

Over 500 actuators are available including pin plunger, straight levers, simulated roller levers and roller levers.

TERMINATION

Terminal pins accept either AMP 102241-1 or MOLEX 70066-0177 connectors (not furnished) depending on the switch housing design. See Ordering Guide.

Note: *The output transistors of the listings shown are "normally Off" i.e., they are not conducting and the output voltage is High with plunger in free position. To order devices which are "normally On" and the output voltage is Low (conducting with plunger in free position), change the second digit from 0 to a 1 or 2 to a 3 in the catalog listing.

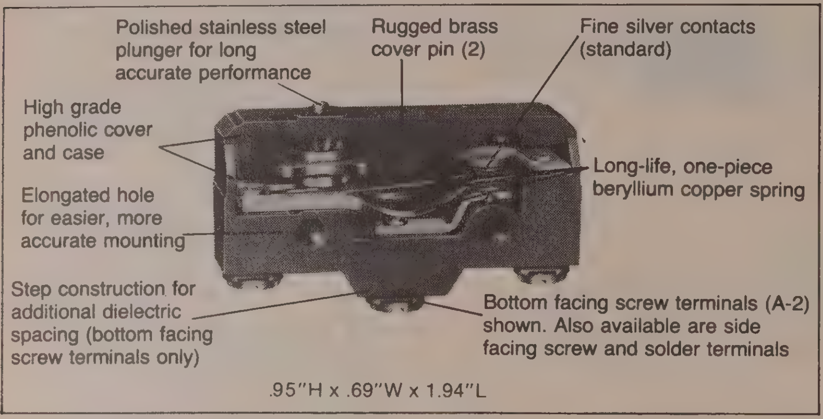
Examples VX10-A1 (VX11-A1); VX12-A1 (VX13-A1).

MICRO SWITCH, a Honeywell division

BZ/BA Standard basic switches

STANDARD BASIC SWITCH CUT-A-WAY

The cut-a-way shown is representative of the BZ/BA standard basic switches described.



Polished stainless steel plunger for long accurate performance
Rugged brass cover pin (2)
Fine silver contacts (standard)
High grade phenolic cover and case
Long-life, one-piece beryllium copper spring
Elongated hole for easier, more accurate mounting
Step construction for additional dielectric spacing (bottom facing screw terminals only)
Bottom facing screw terminals (A-2) shown. Also available are side facing screw and solder terminals
.95"H x .69"W x 1.94"L

FEATURES

- *Operating force as low as 4 oz. (113 grams) maximum*
- *Sensitive differential travel as low as .0002 to .0003 inches (0,005 to 0,008 mm)*
- *Power load switching capability to 25 amperes*
- *Motor handling capacity to 2 horsepower at 250 VAC*
- *High temperature constructions for up to +400°F (204°C)*
- *Alloy contacts available for special application needs*
- *Variety of integral actuators*
- *Variety of auxiliary actuators*
- *Variety of terminal designs*
- *Optional sealed plunger and cover*
- *Over 50 listings available which meet MIL-S-8805 Qualified products list*

MICRO SWITCH, a Honeywell division

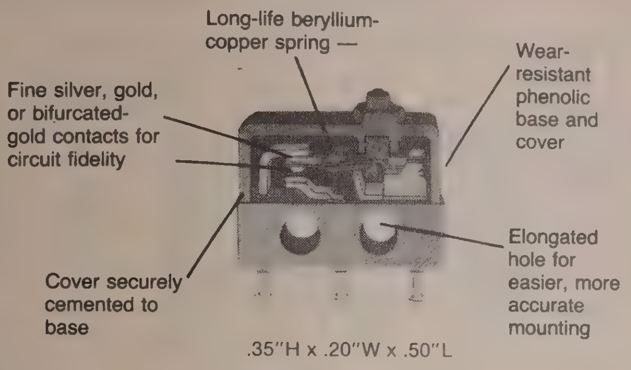
Subminiature basic switches SX



Long-life beryllium-copper spring
Wear-resistant phenolic base and cover
Fine silver, gold, or bifurcated-gold contacts for circuit fidelity
Elongated hole for easier, more accurate mounting
Cover securely cemented to base
.35″H x .20″W x .50″L

Mounting holes accept pins or screws of .087 inch diameter (2,21 mm) on .19 inch (4,8 mm) centers.

GENERAL INFORMATION

SX subminiature basic switches are the smallest snap-action switches from MICRO SWITCH. These switches are ideal where savings in space and weight are important. Unless otherwise noted, all listings have silver contacts.

FEATURES

- *Low operating force to 3 oz. (85 grams) maximum*
- *Sensitive differential travel as low as .001 inch maximum*
- *Power load switching capability up to 7 amperes — silver contacts*
- *Optional gold contacts for low energy applications*
- *Optional bifurcated gold contacts for maximum reliability*
- *Long mechanical life of 10,000,000 cycles — 95% survival for 11SX series*
- *Temperature tolerance −65° to +250°F (−54 to 121°C) on standard construction*
- *High temperature designs for up to +400°F (204°C)*
- *Variety of integral and auxiliary actuators*
- *Choice of several terminal styles*
- *Listing available which meet MIL-S-8805 Qualified products list*
- *UL and CSA listed*

Characteristics: O.F. — Operating Force; R.F. — Release Force; P.T. — Pretravel; O.T. — Overtravel; D.T. — Differential Travel; O.P. — Operating Position.

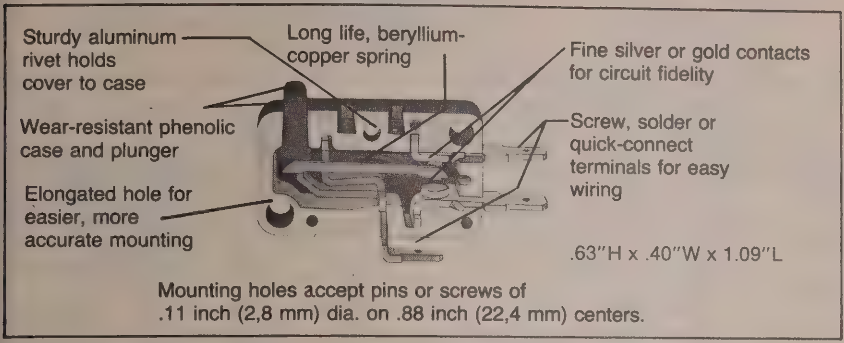
Miniature basic switches V3

CUT-A-WAY V3 MINIATURE BASIC SWITCH



Sturdy aluminum rivet holds cover to case
Long life, beryllium-copper spring
Fine silver or gold contacts for circuit fidelity
Wear-resistant phenolic case and plunger
Screw, solder or quick-connect terminals for easy wiring
Elongated hole for easier, more accurate mounting
.63″H x .40″W x 1.09″L

Mounting holes accept pins or screws of .11 inch (2,8 mm) dia. on .88 inch (22,4 mm) centers.

GENERAL INFORMATION

V3 miniature basic switches feature high electrical capacity and long life. Their size and shape meet design requirements in all types of applications.

FEATURES

- *Low operating force to .53 ounce maximum*
- *Sensitive differential travel as low as .008 inch maximum**
- *Power load switching capability up to 15 amperes — silver contacts*
- *Motor handling capacity of ½ horsepower — silver contacts*
- *Gold alloy contacts for special applications*
- *Long mechanical life of 10,000,000 cycles — 95% survival for V3-100 Series.*
- *Temperature tolerance up to +180°F (82°C) on standard construction*
- *High temperature construction for use up to +600°F (316°C)**
- *3,1 mm mounting holes available*
- *UL and CSA listed*

*Ordering information in Catalog 10.

Characteristics: O.F. — Operating Force; R.F. — Release Force; P.T. — Pretravel; O.T. — Overtravel; D.T. — Differential Travel; O.P. — Operating Position.

*These positions only are momentary. All others are maintained.

FEATURES

- *Environment sealed enclosure*
- *1 and 2-pole circuitry*
- *2 and 3-position, maintained and momentary toggle action*
- *Temperature range: −40° to +71.1°C (−40° to +160°F)*
- *UL listed, CSA certified*

TK toggles answer the need for an environment sealed industrial grade toggle switch. When mounted with a 15PA87 seal accessory, they meet NEMA 4 requirements on food processing and other industrial panels subjected to periodic washdowns. TK's withstand heavy morning dew found in the cabs of construction and farm vehicles, and beverage spillage.

CONSTRUCTION

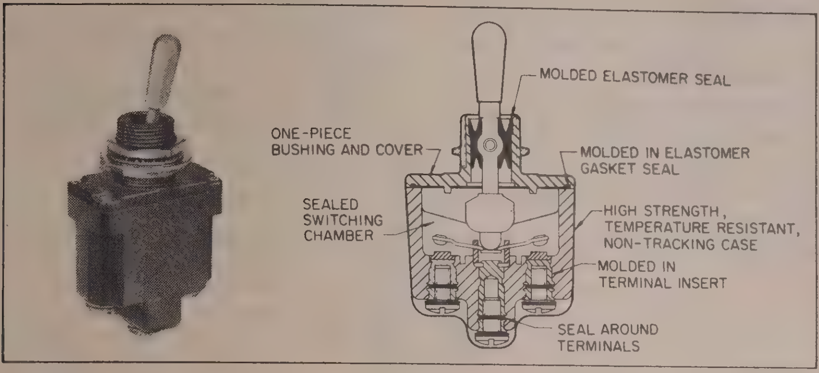
There is a premolded elastomer seal between the toggle lever and bushing, and an elastomer gasket seal between the cover and case. Terminal inserts are molded into the case.

TK's embody many of the time-proven construction features of the TL design, such as: spring-loaded actuating mechanism for direct-action operation and excellent tactile feedback; stepped terminals, which aid non-shorting wiring connections; and a high strength non-tracking case, which promotes electrical stability.

TERMINAL CIRCUIT IDENTIFICATION

Terminal identifications are refered to in the Ordering Charts to indicate which circuits are made in each toggle position (i.e. 1-2 reference indicates circuit closure through terminals 1 and 2.)

Toggle switches TL



MOLDED ELASTOMER SEAL
ONE-PIECE BUSHING AND COVER
MOLDED IN ELASTOMER GASKET SEAL
SEALED SWITCHING CHAMBER
HIGH STRENGTH, TEMPERATURE RESISTANT, NON-TRACKING CASE
MOLDED IN TERMINAL INSERT
SEAL AROUND TERMINALS

FEATURES

- *Qualified to MIL-S-3950*
- *Environment-proof sealing*
- *1, 2, and 4 pole circuitry*
- *Standard and pull to unlock levers*
- *2 and 3 position, maintained, and momentary toggle action*
- *Temperature range: −65°C to +71°C (−85°F to +160°F)*
- *UL listed, CSA certified*

	Alt. Action	**AB** 1-Pole **AD** 2-Pole
Gold Contacts	Mom. Action	**BA** 1-Pole **BC** 2-Pole
	Alt. Action	**BB** 1-Pole **BD** 2-Pole

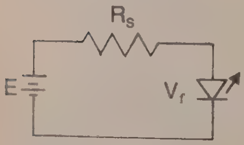
*See LED Application Notes.

Additional AML21 Options: Full guard bezel, 4 poles, and rectangular housings with two lamp circuits.

Additional AML22 Options: Full guard bezel, integral diode protection for LED, 15 V LED voltage, and 4 poles.

LED Application Notes:

1. Internal resistors control LED current to nominal 20 mA on 5 VDC devices.
2. Devices without internal current-limiting resistors require suitable external control of the LED current.
3. A minimum of 5 VDC open circuit voltage with an appropriate series resistance should drive the LED. This minimizes effect of temperature (current variation) on forward voltage of LED.
4. Reverse breakdown voltage of LED is 5 volts min.
5. Following example includes a simple DC drive circuit and equation used to determine value of series resistance.



$$R_S = \frac{E - V_f}{I_f}$$

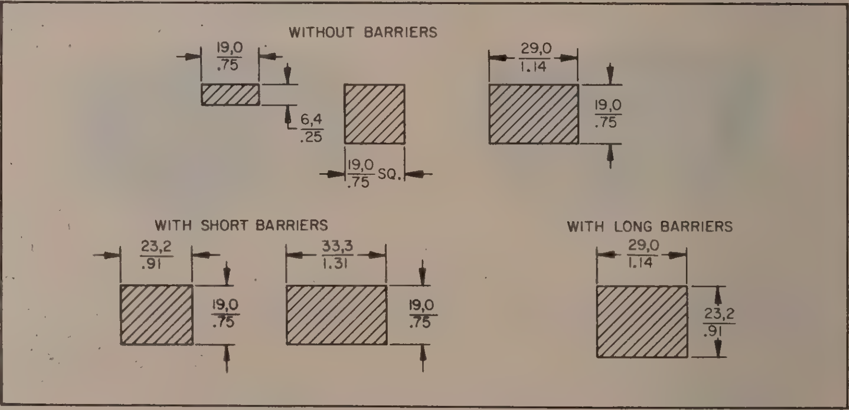
Where: R_S = Series Resistance
E = Supply Voltage
V_f = Forward Voltage of LED
I_f = Circuit Current

If a diode is added in series for reverse polarity protection then:

$$R_S = \frac{E - V_f - V_{PD}}{I_f}$$

Where: V_{PD} = Forward Voltage of Protection Diode

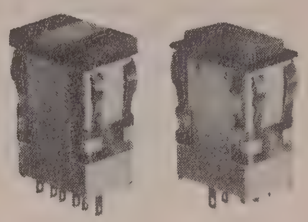
PANEL CUTOUTS FOR SINGLE SWITCHES/INDICATORS



Lighted indicators AML41/42

FEATURES

- *Choice of incandescent or LED illumination.*
- *UL listed, CSA certified (except LED indicators, which are UL recognized).*



AML41 incandescent illuminated pushbutton style (left) and lens style.

AML42 LED pushbutton style (left) and compact style.

AML41 pushbutton style indicators match display of incandescent illuminated switches.

Lens style indicators use a special cap-like button which covers the bezel to present a larger display area, without affecting family appearance. Up to 3-lamp split screen capability.

Note: Buttons (AML51) and incandescent lamps (AML91) ordered separately.

MICRO SWITCH, a Honeywell division

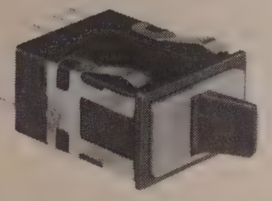
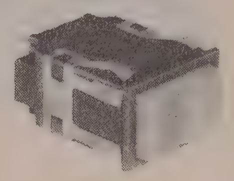
Solid state paddle and rocker switches Non-lighted or incandescent illuminated

AML13/14



AML13

Paddle covers (AML53) and incandescent lamps (AML91) ordered separately.



AML14

Rockers (AML54) and incandescent lamps (AML91) ordered separately.

FEATURES

- *Hall effect reliability.*
- *Low voltage signal interfaces with nearly all DC logic.*
- *5 or 6-16 supply voltage.*
- *Black toggle type paddle operators. (Switch covers provide color display.)*
- *UL recognized.*

Additional Options: Two lamp circuits; other two and three-position operating actions; printed circuit or push-on terminals; and two 6-16V sinking IC's.

MICRO SWITCH, a Honeywell division

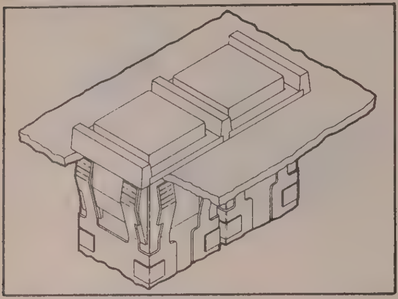
AML Advanced manual line accessories

BARRIERS



When mounting an individual unit, an end barrier is attached to each side of housing. The center barrier is used in a slot mount array (see drawing).

FEATURES

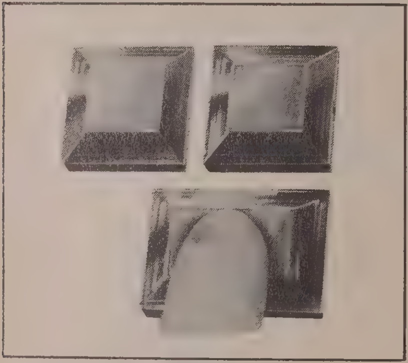
- *Helps prevent inadvertent actuation of two pushbuttons with a single push.*
- *Front of panel mounting simplifies installation.*

AML71 ORDER GUIDE

Barriers shown in order guide are black. They are not for use with AML61 mounting hardware; or with AML41J, AML41K, or AML41L lens type indicators or AML45 annunciators.

Barrier Length	Type	Catalog Listing
Short Barrier (For use with square devices and short side of rectangular devices.)	Center	AML71SCB
	End	AML71SEB
Long Barrier (For use with long side of rectangular devices.)	Center	AML71LCB
	End	AML71LEB

PANEL SEAL



AML75 panel seals are used to help protect pushbutton switches and indicators from contamination from accidental beverage spills, dust and dirt.

FEATURES

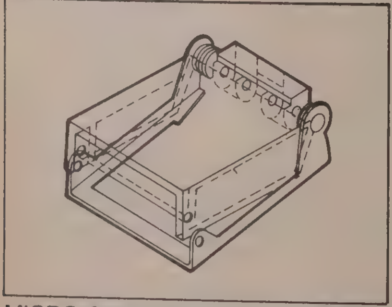
- *Easy to install, without tools.*
- *No effect on display color, light intensity, or legend quality.*
- *Replace seal or lamps without demounting switch.*

AML75 ORDER GUIDE

Panel seals are not for use with AML61 mounting hardware: or with AML41J, AML41K, or AML41L lens type indicators.

Description	For Use With:	
	Square .19″ high buttons	Rectangular .19″ high buttons
Base & Seal	AML75ABC	AML75BBC
Base Only	AML75ABN	AML75BBN
Seal Only	AML75ANC	AML75BNC

SWITCH GUARD



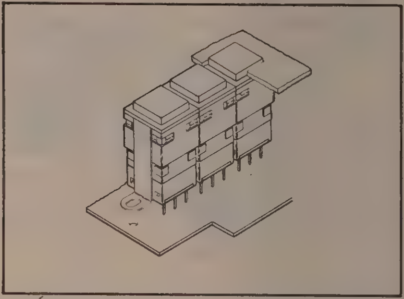
AML76 switch guard protects square and rectangular .19-inch standard height pushbuttons from inadvertent actuation. Not for use with AML61 mounting hardware, AML71 barriers or full guard bezel housings.

AML76 ORDER GUIDE

Guard Type	Catalog Listing
Square	AML76C10T01P
Rectangular	AML76F10T01P

MICRO SWITCH, a Honeywell division

MOUNTING HARDWARE

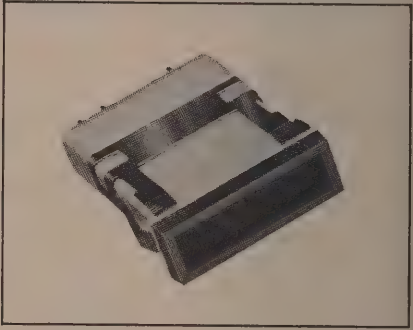


AML61 mounting hardware enables subpanel mounting of devices in factory assembled metal cans which are welded together in strips or matrices.

FEATURES

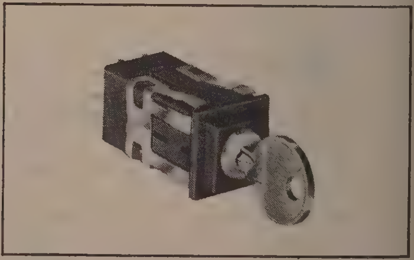
- *L-shaped mounting brackets conform to various panel thicknesses, using spacers.*
- *Simplifies panel fabrication, since only one large cutout is required.*
- *Facilitates printed circuit board mounting. For ordering information, refer to Catalog 30.*

SOLID STATE ANNUNCIATOR



AML45/59 solid state annunciators display messages which are backlighted by two LED's. Choice of full face one-color or two-color display, in red, green, and yellow.

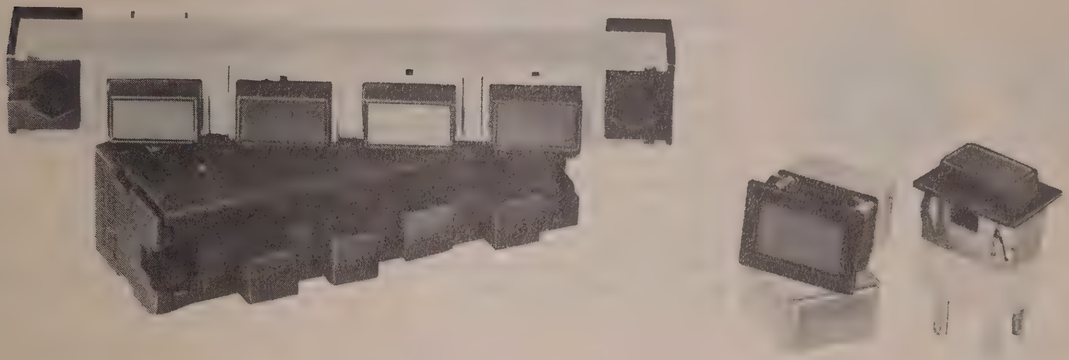
KEYLOCK SWITCH



AML27 keylock switches enable control of access to computer peripherals, keyboards, point-of-sale terminals, security systems and other locations where tampering must be discouraged.

For ordering information, refer to Catalog 30.

Miniature manual line pushbutton switches MML



MICRO SWITCH MML Series Miniature Manual Line pushbutton switches deliver a large measure of design freedom in a miniature size package. Their attractive low-profile appearance answers space and styling needs of your future computer/business, instrument, and communication equipment. MML's many design options and modular ordering system provides you flexibility to choose the mounting options, lens colors, illumination means, electrical ratings, and circuitry/operating action combinations (including multi-switch interlock) that best meet your application needs.

HOW TO ORDER

Switches, indicators, lenses, LED's, incandescent lamps, bezels/mounting clips, strip mounting frames, end rails for matrix mount, and multi-switch interlock assemblies are ordered as separate items. To order assembled combinations to meet your special needs, contact your nearest MICRO SWITCH sales office.

Refer to the order guides to specify desired MML catalog listings.

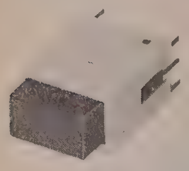
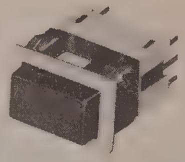
MICRO SWITCH, a Honeywell division

MML11 Solid state pushbutton switches



PWB Mount



Panel Mount

Use as an unlighted pushbutton or add one LED or incandescent lamp for lighted display.

Order LED's (MML92) and lenses (MML52) or incandescent lamps (MML91) and lenses (MML51) separately.

CURRENT SINKING OUTPUT
A permanent magnet plunger moves adjacent to the Hall effect integrated circuit to give a digital, current sinking (normally high and normally low) output.

FEATURES

- LED, incandescent, or non-lighted display
- Hall effect reliability
- Provides low voltage signals that interface with nearly all DC logic
- 5 VDC supply voltage
- Momentary action or 2-level alternate action
- Printed wiring board or panel mounting
- Legendable lenses
- Designed to comply with UL, CSA

MML92 T-1¾ LED's

MML92 ORDER GUIDE

Note: LED's should be the same color as the button/lens they illuminate. LED's are packaged 10 per listing, including stand-off spacers for mounting on printed wiring board.

MML93 ORDER GUIDE

Catalog Listing

MML93K
LED receptacle, with printed wiring board, ⅛-turn base. No LED furnished.

LED APPLICATION INFORMATION

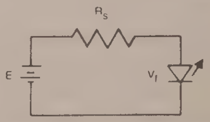
To insure stable conditions, suitable external control of the LED current must be provided. It is recommended that a minimum of 5 VDC open circuit voltage with an appropriate series resistance be used to drive LED devices. This minimizes current variation and its effect on temperature and forward voltage of the LED.

Catalog Listing	LED Color	Forward Characteristics Typ. @ 20 mA	Forward Characteristics Max.	LED Manufacturers' Part Numbers
				Stanley
MML92ERS	Red	1.7V	2.0V	ESBR5633
MML92EGS	Green	2.1V	2.5V	ESBG5633
MML92EYS	Yellow	2.1V	2.5V	ESPY5633
				Hewlett-Packard:
MML92ERH	Red	2.2V	3.0V	HLMP-3366
MML92EGH	Green	2.3V	3.0V	HLMP-3568
MML92EYH	Yellow	2.2V	3.0V	HLMP-3466

Maximum drive current is 30 mA. Reverse voltage breakdown of the LED's is 4 volts (min).

Resistor values can be determined by supply voltage or current for LED:

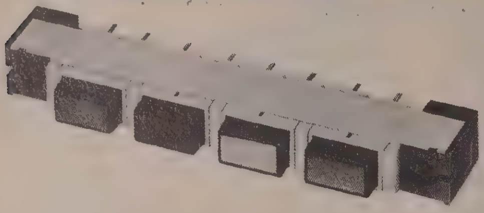
$$R_s = \frac{E - V_f}{I_f}$$



WHERE: R_s = Series Resistance
E = Supply Voltage
V_f = Forward Voltage of LED
I_f = Circuit Current

MML61/62/72 Mounting hardware

MML61 STRIP MOUNTING FRAMES



Switches and indicators are ordered as separate items.

FEATURES

- Provides back of panel or printed wiring board mounting in a multi-unit strip of switches/indicators.
- Devices can be pre-wired prior to installation.
- Holes at each end of frame will accept No. 4 screws.

MML61 ORDER GUIDE

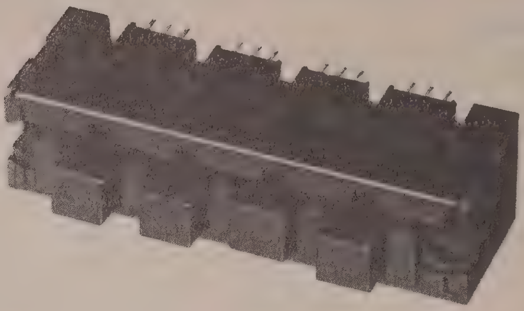
Interlock assemblies MML



MECHANICAL INTERLOCK

Mechanically interlocked switches with 1-4 pole circuitry provide latching functions. They are furnished **factory assembled** in a strip frame — ready for back of panel and/or printed wiring board mounting. Each end of the strip frame has mounting holes which will accept No. 4 screws.

Operating Mode. Depressing a switch button will release any previously operated button within a group of interlocked switches. One button is always being held down by a mechanical detent. This provides a "key-down memory" feature which indicates which switch was last operated. Circuit transfer is maintained until another button is depressed.

Override release. If two or more interlocked switches are inadvertently engaged at the same time, fully depressing any engaged switch button will release the others. (An increased actuation force is necessary for override.)

Assembly options. The following options are possible:

1. A strip of two to ten interlocked switches.
2. More than one group of two or more switches can be independently interlocked, providing there is a one-unit spacing between the groups. For example, the first four switches and the last five switches in the strip can be interlocked as separate groupings, with a one-station spacing between them.
3. A strip can include both interlocked groups of switches and switches which operate in their normal momentary or alternate action mode.

HOW TO ORDER

Only the momentary action **MML82** Electronic Control interlock switches can be used for interlocking. **MML82** alternate action switches and **MML83** Power Duty switches function as individually isolated units when added to the interlock strip.

Use the **MML88** Interlock Strip Assembly Order Sheet (FO-74023) on page 41 to specify the desired switch listings and their location in the strip. Reproduce it on your office copier or request a pad of forms from your nearest MICRO SWITCH Sales Office. (See completed example.)

SPECIAL REQUIREMENTS:

INSTRUCTIONS

△1 Enter MML82/83 Catalog Listings in each station location where a switch is to be installed.

△2 Draw a line thru all stations which are to be latched. (MML82 Interlock Action Switches only.)

3 - Allow one station spacing between separate groups of latched units within the 10-unit strip.

4 - Momentary and Alternate Action MML82/83 Switches can be located at any station.

Other MICRO SWITCH products

MICRO SWITCH's reputation as an innovator in the design and manufacture of quality position sensing and manual control products spans 40 years. Shown is a cross-section of the many varieties. This broad selection offers a wide range of technologies, sizes, actuation means, circuitries, electrical capacities, and terminations, for in-plant and original equipment needs.

Contact your nearest MICRO SWITCH Sales Office or Authorized Distributor for complete catalog information. Sales Office location's are shown in this Directory. Authorized Distributors are listed on the next pages.

Limit and enclosed switches

MICRO SWITCH offers the world's most advanced line of heavy duty limit switches and a wide selection of application proven enclosed switches (precision snap-acting switches sealed in rugged metal housing). Sealed versions keep out moisture and other contaminants. Explosion-proof types are designed for use in hazardous locations.

Request Catalog 40.

Proximity sensors

Proximity sensors detect the presence of metals or react to a magnetic field. Cylindrical, cannister, and limit switch style housings provide application versatility. Their high speed operation keeps pace with production. Models are available for operation at AC line voltage or 8.5 to 30 VDC. Optional LED indicators signal on-off condition.

Request Catalog 50.

Photoelectric sensors

MICRO SWITCH has a complete offering of modulated LED and incandescent controls. These no-touch devices detect opaque or translucent material at long or short range.

Single unit retroreflective and separate emitter/receiver styles fill a variety of application requirements. High intensity models penetrate foggy, dusty, and other poor visibility conditions. Scanning capability ranges from a fraction of an inch to hundreds of feet.

Request Catalog 60.

Oiltight manual controls

Featuring a contemporary square appearance and lighted display, these families offer a wide selection of industrial pushbuttons, selectors, and indicators. Standard, miniature, and compact sizes provide flexibility in format and circuitry. Contact blocks feature heavy duty, standard or electronic duty capabilities plus solid state.

Request Catalog 70.

Environmentally protected switches

Rugged, high performance designs; environment-proof or hermetically sealed. A complete selection includes miniature limit switches, miniature and standard size basic switches, sealed toggle switches and the highest quality lighted pushbuttons.

Request Catalog 80.

Manual control switches

Whether you're prototyping a new design or planning to face-lift an existing panel, you'll benefit by considering the wide selection of pushbuttons, indicators, toggles, rockers, paddles, rotary selectors and interlock switches available from MICRO SWITCH. Developed with adherence to good human factors principles, these products aid the designer by offering almost limitless options in visual display techniques, operators, and arrangement of components. Many are military qualified.

Request Catalog 30.

Keyboards

MICRO SWITCH offers the world's widest selection of keyboard designs. It includes capacitance membrane and contact membrane keyboards in standard or low-profile versions; touch panels; and time-proven solid state Hall effect keyboards. With our experienced application engineers and complete capabilities, we can handle virtually any keyboard application. See Section 5150.

For further information contact your local MICRO SWITCH sales office.

Current Sensors

MICRO SWITCH current sensors monitor AC or DC current flow and in turn produce either a digital or linear output signal.

Built in voltage regulation and temperature compensation assure reliable operation. Thru hole design permits maximum currents limited only by conductor size. For more information on listings and custom current sensors, see our insert in section 5500.

Temperature Sensors

MICRO SWITCH temperature sensors are precision interchangeable sensors that operate on a change in resistance as a function of temperature. Fast linear sensing of air or liquid temperature, at a low cost, with long-term stability is featured. For standard and custom packaging capabilities see our insert in section 5300.

Pressure transducers

MICRO SWITCH piezoresistive pressure transducers accurately measure gaseous pressure as the sensitive silicon diaphragm integral to the IC chip distorts ever so slightly, resulting in linear output voltage directly proportional to pressure.

Both signal conditioned (amplified and temperature-compensated) and unamplified transducers of aboslute, differential, and gage pressure design are available. Applications range from medical instruments to home appliances to altimeters. Accurate repeatability, low hysteresis, and long-term stability are characteristics of these transducers, whose pressure range extends to 250 psi. See Section 5500.

NKK nikkai

There's only one thing we haven't changed in 30 years.

Our quality. We developed the first super-subminiature washable switches, the first 10-Amp rated miniature toggles and the first miniature lighted snap-in rockers—just to name a few. But while innovation became an NKK trademark, quality remained a tradition. Today, you'll find that quality in over 500,000 different switches. In fact, we can offer you just about every type of switch you'd expect from a major manufacturer, plus a lot you won't find anywhere else. Send for our 50-page catalog, then compare the performance specs, construction materials and standard features of our switches with those of the ones you are now using. You'll see why, dollar for dollar, NKK is the standard of comparison.

We put our 30 years of experience to good use—just so you could do the same.

LIGHTED DEVICES

A variety of lighted devices are offered which include pushbutton, rockers, paddle and L.E.D. lighted toggles and rockers. The pushbuttons are available in DPDT momentary or alternate actions. The lighted rockers and paddles, "MLW" Series, are available in SPDT or DPDT in all normal circuit configurations. The LW Series is a 10 Amp device with dual lamp capabilities. All units incorporate a variety of lens colors and all are provided with isolated lamp terminations offering more user flexibility. Optional colored bezels are available for rocker configurations. The single L.E.D. toggles and rockers can be provided with the L.E.D. as part of the switching circuit or isolated from the circuit.

L.E.D. ILLUMINATED TOGGLE

Model No.	Poles	Position			Rating

FEATURES

The LB Series is a compact front panel snap-in switchlight available in round, square or rectangular configurations. The round unit snaps into a .866″ diameter hole, the square, a .638″ square panel cutout and the rectangular, a .638″ × .882″ cutout. These units can be provided with front panel relampable incandescent lamps or L.E.D.s. The terminals can be soldered or used as a #110 quick-connect terminal. Gold plated versions are available for dry circuit applications. Protective guards, splash covers, barriers and sockets for P.C. mounting are optional.

SPECIFICATIONS

SPDT and DPDT, momentary or alternate action. Contact rating: 3Amps @125 or 250Vac or 30Vdc (Resistive). 0.4 VA 28V MAX. ac/dc. Contact resistance: 50 milliohms max. @ 2-4V 0.1A DC. Insulation resistance: 200 milliohms min. 500VDC. Dielectric strength: 1000V AC terminals to terminals, 1500V terminals to ground. Endurance: 1,000,000 cycles min. (momentary), 200,000 min. (alternate action) mechanical, 100,000 cycles min. electrical.

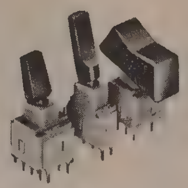
WASHABLE! Series A SUPERSUBMINIATURE'S

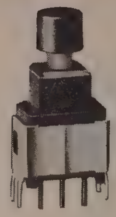
A-22AV

A-12JH

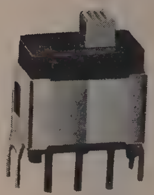
A-01BR



With Paddles & Rocker on A-12KB etc.



AB-15AB



AS-12AB

FEATURES

This supersubminiature family of SPDT, SP3T, & DPDT "Washable" PCB switches with Sliding/Twin/Cross-Bar Contacts are available in toggle, paddle/rocker & pushbutton versions. The series incorporates a bushing seal and the back is sealed which allows the unit to be subjected to wave soldering and flux cleaning operations. The series is available with a variety of toggle styles, colored paddles and rockers in all switching actions including "ON-ON-ON". All normal printed circuit board terminations are offered. Optional caps are for the pushbutton types.

SPECIFICATIONS

SPDT, SP3T and DPDT in 5 different actions. Contact rating: 0.4VA MAX. 28V ac/dc MAX. Contact resistance: 50 milliohms max. @10mA /20mV. Insulation resistance: 500 megohms min. 500V dc. Dielectric strength: 500V ac min. Endurance: 50,000 ~ 100,000 cycles mechanical, 50,000 cycles electrical min.

WASHABLE! B Series *"Static-proof" Top* SUPERSUBMINIATURE'S

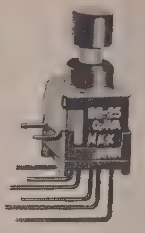
B-12AV

B-12JH

B-22HB

B-22EP

BB-15AB



BB-25AV

FEATURES

This is a supersubminiature family of "Static-proof", "Washable" PCB switches with Sliding/Twin/Gross-Bar Contacts. The family is available in toggle and pushbutton versions in SPDT and DPDT in 5 different switching actions. The units have a bushing made of a carbon impregnated resin, which when used with a support bracket and the bracket is taken to ground provides a path to ground for "static" electricity. The series incorporates a bushing seal and the backs are ultrasonically welded offering a unit which can be subjected through wave soldering and flux cleaning operations. The toggle versions are offered in a variety of toggle shapes and sizes. The devices are available in all normal printed circuit board terminal configurations. Optional caps are available for the pushbutton types.

SPECIFICATIONS

SPDT and DPDT in 5 different actions. Contact rating: 0.4VA MAX. 28V MAX. ac/dc Contact resistance: 500 milliohms max. @10mA/20mV. 50 milliohms max. @10mA/20mV. Insulation resistance: 500 megohms min. 500V dc. Dielectric strength: 500V ac min. Endurance: 50,000~100,000 cycles mechanical, 50,000 cycles electrical min.

FEATURES

This competitively priced subminiature family of toggles, rockers and paddle switches is available in SPST to 4PDT in all switching actions, including ON-ON-ON configurations. The wide variety of toggles, rockers, paddles, bushing shapes, sizes, brackets for printed circuit versions and terminal configurations offer up to 440,000 possible combinations. The switches are provided with epoxied terminals, hi-torque bushings have a built-in anti-jamming mechanism as standard features. Included in this series are leverlocks, watertight bushings and panel sealed versions.

MB-2000 SERIES

This is a competitively priced pushbutton family of switches available in SPDT, DPDT and 4PDT circuits in momentary or alternate action models. A wide range of bushing types and terminal configurations for power or dry circuit applications are available. The 1/4″ bushing versions are provided with a metal plunger. Large bushing (12 mm) sizes are available. A variety of colored caps in three(3) different sizes, a wide range of bushing types, brackets for printed circuit board mounting and termial configuration offers a broad product line. This series can be provided with a watertight bushing and a panel seal.

MB-2400 SERIES

This is also competitively priced pushbutton family of switches available in SPDT and DPDT in momentary action with precision type mechanism. Bushing seal by rubber ring, terminal seal by epoxy and flexible molded housing allow this series to be withstood to wave soldering and flux cleaning operations.

SPECIFICATIONS

SPDT and DPDT in momentary action. Contact rating: 3Amp @125Vac or 30Vdc (Silver/Resistive) 0.4VA 28V MAX. ac/dc. Contact resistance: 20 milliohms max. (Silver) 30 milliohms max. (Gold). Insulation resistance: 1,000Vac min. 500Vdc. Di-electric strength: 1,000Vac min. Endurance: 200,000 cycles min. mechanically, 25,000 (Silver) 100,000 (Gold) cycles min. electrical.

NEW DR series BINARY CODED DIP ROTARY SWITCHES

FEATURES

The new binary coded rotaries have terminals on a .100×.300 grid and are DIP socket compatible. The terminals are formed to insure device security in board insertion eliminating float during wave soldering. These decimal or hexidecimal codec devices are offered in real or complement codings.

ROTARIES

Rotary switches are available in a variety of family types from large 30 Amp devices to sealed dry circuit binary coded rotaries. With the exception of the binary coded rotaries all are provided with adjustable stops. The MR-A Series, MR-F, MR-K and the binary coded rotaries are "washable" types. These units have been designed to be subjected to wave soldering and flux cleaning operations.

OAK SWITCHES

OAK ANTI-STATIC KEYLOCK SECURITY SWITCH

¾″ diameter security switches provide up to 20 kV static protection for sensitive electronic circuitry. Supplied with stainless steel bezel and two brass keys. Keyed alike for each part number. Key pull in all positions. Single pole only.

SPECIFICATIONS

Operating Life: Tested to 10,000 cycles.
Switching: Enclosed; SPST, SPDT, SP3T
Throw: 90°.
Operating Torque: 7 to 16 in. oz.
Temperature Range: 0° to +85°C
Positive Detenting Stops: Integral with lock.
Housing: Zytel 101, Gray.
Switch Terminals: Copper alloy, silver plated.
Contact Material: Copper alloy, silver-plated.
Barrel: Zinc alloy, chromate dipped.
Bezel: Stainless steel.
Keys: Brass (2)
Hex Mtg. Nut: Cadmium plated steel.
Elec. Ratings: 1.0 A @ 28 Vdc
4.0 A @ 120 Vac
2.0 A @ 240 Vac
Contact Resistance: 10 milliohms (nominal).

All switches make before break. UL and CSA listed. Specifications through rated life after break in.

OAK TYPE AM (ACORN) ROTARY SWITCH

1″ diameter with patented Unidex® detent action. Double-wiping and self-cleaning contacts.

SPECIFICATIONS

Size: 1″ dia. (nom.), 1 to 3 sections.
Mounting: ⅜″ dia. with locating key.
Shaft: 0.250″ dia. x 1½″ grooved (breakoff).
Indexing: Dual ball 30°.
Stop Strength: Fixed — 15 in. lbs.
Adjustable — 10 in. lbs.
Terminal Strength: 2½ lb. pull.
Stator: Diallyl phthalate (MIL-M-14).
Rotor: Thermoplastic.
Contacts: Brass, silver plated and protected.
Contact Resistance: 0.003 to 0.015 Ohms between adjacent clips.
Elec. Rating: Break 0.5 A @ 28 Vdc, 0.25 A @ 110 Vac (resistive). Carry 5.0 A.
Life: 10,000 cycles at rated load (min.).
Temperature: −65° to +85°C.
Hardware: Nut, lockwasher, stopwasher.
Finish: Withstands 50 hr. MIL-S-3786 salt spray.

OAK ½″ ROTARY SWITCH

A superior subminiature switch with negligible contact noise and circuit resistance.

SPECIFICATIONS

Size: ½″ (nominal).
Mounting: "D" hole, ¼″ bushing.
Shaft: ⅛″ dia. x ¾″.
Indexing: 30°, up to 11 detents.
Stop Strength: 5 in. lbs.
Terminal Strength: 1 lb. pull.
Stator & Spacers: Diallyl phthalate.
Rotor: Thermoplastic.
Contacts: Silver alloy, gold plated.
Contact Resistance: 10-20 milliohms.
Insulation Resistance: 10 megohms (min.).
Elec. Rating: 0.25 A @ 110 Vac resistive.
0.50 A @ 30 Vdc resistive.
Life: 10,000 cycles at rated load (min.) room
Temperature: −65° to +85°C
Hardware: Nut, lockwasher, stopwasher.
Finish: Withstands 50 hr. MIL-S-3786 salt spray.

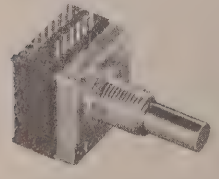
OAK TYPE 500 ½″ ROTARY SWITCH

Superior longlife subminiature switches are designed to meet MIL-S-3786/20. Sealed.

SPECIFICATIONS

Size: ½″ (nom), single pole.
Positions: 4, 6, 8, 10 & 12.
Detent: 90°, 60°, 45°, 36° & 30°.
Base: Diallyl phthalate, MIL-M-14.
Rotor: Phenolic, MIL-M-14.
Contacts: Copper alloy w/silver crown, gold plate.
Terminals: Copper alloy, silver crown, gold plate.
Contact Resistance: 20 milliohms (max) MIL.
50 milliohms (max) non-MIL
Stops: Fixed or adjustable.
Shaft & Panel Seal: Neoprene.
Voltage: 600 Vac breakdown (min).
Current Rating: 6.0 A @ 30 Vdc & 110 Vac. Resistive.
Mechanical: Stainless steel & nickel plated steel detent balls.

Write for Bulletin F-1096 for complete details and specifications.



OAK TYPE 850 PROGRAMMABLE ROTARY SWITCH

0.850″ square, sealed programmable switch with up to 28 positions, 4 sections and/or 7 outputs plus common per section. Dual-concentric shafts available. Can be wave soldered.

SPECIFICATIONS

Rating: 250 mA @ 28 Vdc resistive.
Contact Resistance: 100 milliohms (max).
Voltage Breakdown: 500 V (min) between common and open contact. 1000 V (min) between any contact and housing.
Contacts: Make before break. Break before make.
Detent Angles: 36°, 30°, 22.5°, 18°, 15°, 12.86°.
Operating Temperature: −55° to +85°C.
Stops: Available to limit rotation.
Coding: Hexidecimal, BCD, Grey and others.
Shafts: Steel, zinc plated, chromate treated.

Write for Bulletin F-1093.

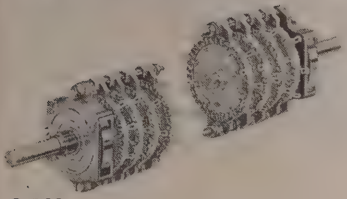
OAK SWITCHES



OAK MULTIDEX ROTARY SWITCH

Oak Multidex Switches replace older models with a completely new design. Multidex switches are smaller than older models yet provide more contacts (up to 32 and 36 positions). The patented Unidex detent system has one or two balls riding on the starwheel for smooth and positive action. The detent housing is a one-piece molding. They meet or exceed the requirements of MIL-S-3786, SR32 (latest issue).

Multidex rotors and stators are molded of diallyl phthalate and meet MIL-M-14 requirements. Contacts are silver plated brass (standard) or silver alloys (other available).

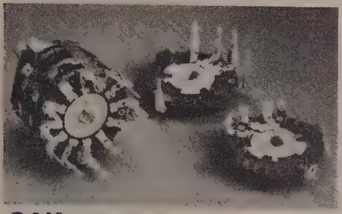
The contacts are self-cleaning, double-wiping types and are coated to resist corrosion.

Terminals are Type "A" clips for easy wire insertion and soldering.

Rated at 0.5 A @ 28 Vdc and 0.25 @ 110 Vac with silver plated contacts. Silver contacts are rated 1.0 @ 28 Vdc and 0.5 A @ 110 Vac. All ratings are for resistive loads.

Temperature ratings are:
MIL: −65° to +85°C.
Commercial: −25° to +85°C.

Both types are made of materials which meet or exceed the requirements of MIL-S-3786 50 hour salt spray test.



OAK TYPE FJ 1.421″ DIAMETER ROTARY SWITCH

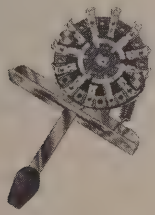
This series of Oak switches is a product expansion of the standard "F" series. They are designed to meet the requirements of MIL-S-3786/SR03.

The FJ series offers terminal clips which are offset on the rear 15° from those on the front. Each section can accommodate up to 22 clips in 30°, 60° or 90° throw. The FJ series utilizes Oak's durable high pressure double wiping contacts which are self-cleaning and corrosion resistant. Terminals are available for both hard soldering and printed circuit board mounting.

Rotation may be either continuous, with a fixed stop or with an adjustable stop.

FJ switches are rated 1.0 A @ 28 Vdc and 5.0 A @ 110 Vac with silver plated brass contacts. Ratings for silver alloy contacts are: 2 A @ 28 Vdc and 1.0 A @ 110 Vac. Contacts can be make before break or break before make or any combination of these.

All FJ switches are made of the highest quality material to meet or exceed all military and commercial requirements.



OAK TYPE 184 LEVER SWITCHES

Oak Type 184 lever switches are designed for reliable operation over thousands of cycles. The proven Type 184 offers a number of options. They are available as either 2, 3, or 4 position styles and with up to 12 terminals per side so that 12 pole 2 position circuits can be used or up to 8 poles with the 3 position style.

Mounting requires a slot and 2 holes to accept the two #4-40 mounting screws. The face of the switch is tapped. The switches require only $1\frac{7}{64}$″ of space behind the panel.

Contacts are silver plated brass and are rated at 0.5 A @ 28 Vdc and 0.25 A @ 110 Vac, resistive. The contacts will carry 5 Amps continuously.

The life of this series is rated at 10,000 cycles under standard conditions as a minimum.

The switches are supplied with a standard knob. Other designs are possible.

Write for complete details or contact your nearest Oak distributor or sales office. These are listed in EEM's "Yellow Pages" in this Volume.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC	alternating current
A/D	analog to digital
ADC	analog to digital converter
ADP	automatic data processing
AF	audio frequency
AFC	automatic frequency control
ALGOL	algorithmic language
AM	amplitude modulation
AND	a logical operator
AQL	acceptable quality level
ASCII	American national standard code for information interchange
AWG	American wire guage

B

BALUN	balanced to unbalanced
BASIC	beginners' all-purpose symbolic instruction code
BCD	binary-coded decimal
BNC	baby "N" connector
BUS	basic utility system

C

CAD	computer aided design
CAM	computer aided manufacture
CATV	cable television or community antenna television
CERMET	ceramic metal element
Comm.	communications
CMOS	complementary metal-oxide semiconductor
CPS	characters per second
CPU	central processing unit

D

D/A	digital to analog
DAC	digital to analog converter
DC	direct current
DIL	dual in-line
DIP	dual in-line package
DPM	digital panel meter
DTL	diode transistor logic

E

EDP	electronic data processing
EBCDIC	extended binary coded decimal interchange code
EEPROM	electrically erasable PROM
EMC	electromagnetic compatibility
EMI	electromagnetic interference
EPROM	electrically programmable ROM
ESR	equivalent series resistance

F

FEP	fluorinated ethylene propylene Copolymar, 200° Teflon
FET	field-effect transistor
FM	frequency modulation
FORTRAN	formula translator

G

GaAsFET	gallium arsenide field effect transistor
GPIB	general purpose interface bus

H

HF	high frequency (3 to 30 MHz)
HIPOT	test, measurement and diagnostic equipment
HLL	high level language
HV	high voltage
Hz	Hertz

I

IC	integrated circuit
IF	intermediate frequency
IO	input/output (devices)
IR	insulation resistance (or) infrared

J

JFET	junction field effect transistor
JMOS	junction metal oxide semiconductor

K

kHz	kilohertz (10^3 hertz)
KSR	keyboard send receive

L

LC	inductance capacitance
LCD	liquid crystal display
LED	light-emitting diode
LF	low frequency (30 to 300 kHz)
LSI	large scale integration
LVDT	linear velocity displacement transformer

M

MATV	master antenna television
μF	microforad
MHz	megahertz
MOS	metal oxide semiconductor
MOSFET	metal oxide semiconductor field effect transistor
MOV	metal oxide varistor
MPU	microprocessor unit
MSI	medium scale integration

N

NBS	National Bureau of Standards
NIM	nuclear instrumentation module
NOR	not OR

O

OEM	original equipment manufacturer
OR	a logical operator

P

pF	picofarad
PC	printed circuit
PCB	printed circuit board
PIN	positive-intrinsic-negative (transistor)
PLA	programmable logic array
PPI	plan position indicator
PROM	programmable read only memory
PUT	programmable unijunction transistor

Q

QAM	quadrature amplitude modulation
Q (meter)	quality-factor meter

R

RAM	random access memory
RC	resistance-capacitance
RFI	radio frequency interference
RMS	root mean square
ROM	read only memory
RF	radio frequency
RFC	radio-frequency choke
RFI	radio-frequency interference
RTD	resistance-temperature detector
RTL	resistor transistor logic
RTV	room temperature vulcanizing
RW	read/write

S

SAS	silicon asymmetrical switch
SBC	single board (micro) computer
SBS	silicon bilateral switch
SCR	silicon-controlled rectifier
SIP	single in-line package
SSI	small scale integration
SSR	solid state relay
STL	Schottky transistor logic

T

TC	temperature coefficient
TCXO	temperature compensated crystal oscillator
TFE	tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL	transistor-transistor logic
TTY	teletypewriter

U

UHF	ultra high frequency (300 MHz to 3 GHz)
UL	Underwriters Laboratory
UPS	uninterruptible power supply

V

VAC	volts (of) alternating current
VAR	volt-ampere reactive
VCR	video cassette recorder
VDC	volts (of) direct current
VHF	very high frequency
VHSIC	very high speed integrated circuit
VLF	very low frequency (3 to 30 kHz)
VLSI	very large scale integration
VRM	voice recognition module
VTVM	vacuum tube volt meter
VU	volume unit
VSWR	voltage standing wave ratio

W

WPS	word processing software

Y

YIG	yttrium iron garnet

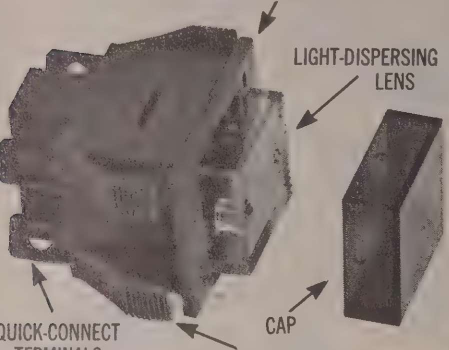
OSLO • PUSHBUTTON SWITCHES



ELECTRICAL FEATURES

Load rating: 10 amperes 125/250 volts ac.
Contacts: fine silver, double-break, break-before-make
Circuits: single-pole and double-pole
Dielectric strength: 2000 volts ac rms.
Life: 25,000 operations at maximum rating

MECHANICAL FEATURES

One-piece molded-nylon body has integral, serrated, spring-lock clips.
Bezel molded integral with body.
Metal bezel available.
Molded-in light-dispersing lens.
Interchangeable lens-caps in wide choice of colors.
Positive mechanical indication of switch-contact position.
100,000 mechanical operations.

TERMINALS

Style A—1/4-inch quick-connect
Style B—3/16-inch quick-connect
Style C—Solder-lug, for #12 wire

STANDARD LAMPS

Integral with switch;
Internally connected per diagrams above.
6, 12, and 28 volt incandescent lamps standard.
125 and 250 volt neon lamps standard.

SPECIAL ORDER LAMPS

125 and 250 volt Blue or Green neon lamps available. Consult factory for price and delivery information.

COLOR DESIGNATIONS

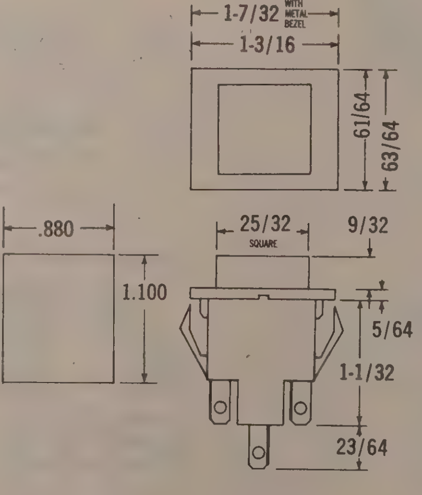
TYPE DG – Lighted Indicators

Type DG Lighted Indicators are identical in size and mounting with Type DL and DP switches and can be grouped easily with them without need for special mounting provision. A choice of different lens-cap heights is available.

TYPE DGS the low-profile indicator extends the same distance from the panel as the Type DL or DP switch in its ON position (1/16 inch).

TYPE DGT the high-profile indicator extends the same distance from the panel as the Type DL or DP switch in its OFF position (9/32 inch).

OUTLINE DIMENSIONS (inches)



METAL BEZELS (optional)

Gold-color—F1, Chrome—F2

MARKINGS

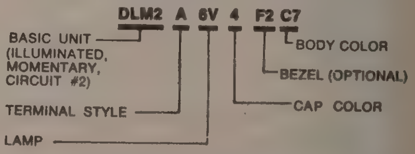
Letters, numbers, and symbols can be applied to lens-caps.

MOUNTING

Snap-in mounting in rectangular hole; fits any panel-thickness 1/32 to 3/16 inch.

ORDERING EXAMPLE

Develop catalog-number of unit by adding to the basic Type Number, shown above, the applicable code-letters or numbers in the sequence shown below.



OSLO CONTROLS INC.

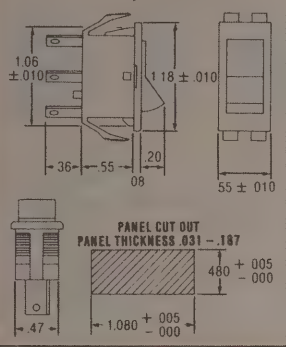
OSLO • ROCKER SWITCHES

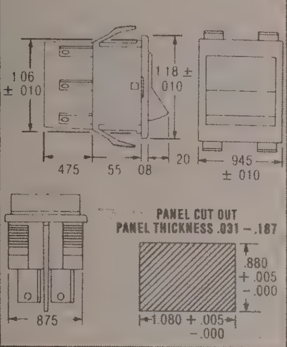
TYPE RSP

ALL DIMENSIONS IN INCHES



TYPE RTP

ALL DIMENSIONS IN INCHES



Electrical Features

Load Rating: 15 amperes 125/250 volts AC
Contacts: Fine silver for long life dependability
Dielectric strength: 1250 volts (live parts to ground)
Electrical Life: 25,000 operations at maximum rating.
Insulation Resistance: 5 megohms

Terminals

Style A – ¼ inch quick-connect

Lamps

6, 12, 28 volt incandescent, 125, 250 volt Neon

Mechanical Features

One-piece molded-nylon housing, available in choice of colors.
Integral spring-lock clip design speeds assembly.
Optional metal bezels available.
Rocker actuator available in choice of colors.
100,000 mechanical operations.

Markings

Letters, numbers, and symbols can be applied to rocker actuator or to integral nylon bezel.

Mounting

Snap-in mounting in rectangular hole; fits any panel thickness from .031 to .125 inch.

ORDERING PROCEDURE

To the basic catalog number listed, suffix letters and numbers are added in the sequence indicated below:

Example: RSL1A6V1C9F2 This specifies a SPST, lighted, maintained Off-On switch with ¼″ quick-connect terminals, transparent red actuator, black housing and optional chrome bezel.

LAMP VOLTAGE

6V=6 Volt Incandescent
12V=12 Volt Incandescent
28V=28 Volt Incandescent
125V=125 Volt Neon
250V=250 Volt Neon

BASIC SWITCHES sub-miniature
DOUBLE-BREAK B3 SERIES

MIL-S-8805/76
MIL-S-8805/101

CHARACTERISTICS
- Contact Resistance: .025Ω max.
- 10 million mechanical cycles.
- Operating Force: 5 $^{+3}_{-2}$ oz.
- Release Force: 1.5 oz. min.
- Overtravel: .006″ min.
- Move. Diff.: .018 ±.008″
- Rating: 7A Res., 115 VAC, 28 VDC.

MIL-S-8805/76 THIN **B3-22141**

For your run-of-the-"MIL" projects, OTTO's B3-22141 Series is only .200″ thick. Contact resistance less than 25 milliohms, contact pressure higher than normal, minimal contact bounce. Gold flashed contacts, solder terminals in diallyl case. Rated 7A Res.

MIL-S-8805/101 THINNER **B3-12141**

OTTO inspired military spec. is only .156″ thin, yet all the rating, life, and reliability of the /76 version. Five B3-12141 Series in the space of four B3-22141. Choice of double-break from X, Y, Z and single break form C. B3-12141 turret terminals, B3-11141 p.c. pins. Also commercial versions.

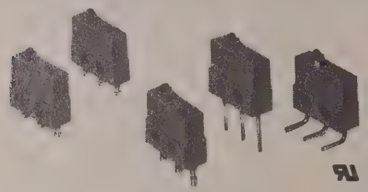
SINGLE-BREAK B2 SERIES



CHARACTERISTICS
- Contact Resistance: .025Ω max.
- 1 million mechanical cycles.
- Operating Force: 5 oz. max.
- Release Force: 1 oz. min.
- Overtravel: .004″ min.
- Move. Diff.: .005″ max.
- Rating: 7A res. @ 115 VAC, 28 VDC.

Now available in a choice of .200 and .156 inch wide models. While the OTTO B2 is qualified to MIL-S-8805/4, the same switch can be specified for commercial use at a cost savings. Whether it be military or commercial, low-level "dry circuit" or high ampacity, large or close differentials, you can specify the exact switch to meet your needs. Case is diallyl. Terminals are gold-flashed brass. Contacts are silver or gold.

P3-3

P3-6

P3-7

P3-8

FEATURES

- 250,000 mechanical cycles.
- High Contact Pressure: 120 gr.
- Low Contact Resistance:
- Repeatable trip point within .001″.
- Rolling sleeve principle seals button.
- Sealed case and terminals.

TYPE P1 (MIL-S-8805/3)

Pushbutton is sealed by silicone rubber boot operating on a "rolling sleeve" principle to give long life and smooth operation. Case and terminals sealed against environment and solder flux. Load ratings: 10A res., 5A ind., 3A lamp. Contact forms: N.O., N.C., 2-circuit. Red or black button.

TYPE P3 Commercial Grade

Momentary or push-pull double-break action. Same specs as P1 military series. Choice of solder or screw terminals. Designed for use in panel boards, computers, business machines, instruments. Can be used as limit switch.

NEW

FEATURES:

- Mini size and sealed.
- .025 ohms max. contact resistance.
- Positive tactile feed back.
- 4 mounting styles.
- 6 circuit variations.

P7-3

P7-5

P7-6

P7-1

Sealed Subminiature Pushbutton

TYPE P7

Double-break action with sealed pushbutton meets environmental and electrical requirements of MIL-S-8805. Switches loads from 10 mA @ 30 mV to 5 amps @ 28 VDC. Choice of black or silver bezel and nine button colors. The P7-1 series features swage bushing, P7-3's have front panel bezel, P7-5's have ¼″ bushing while P7-6's have 15/32″ bushing. Seal is either moisture-proof/dust-tite or water-proof. Back-of-panel less than .500″. Front panel .437″ to .562″ diameter.

twostep™ for applications requiring 3 modes of operation

FEATURES

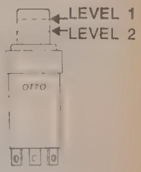
- Unique 2-position design.
- Sequential contact action.
- 12 contact arrangements.
- Make-before-break contact option.
- Moistureproof construction.
- 25,000 mechanical cycles.

P2-1

P2-3

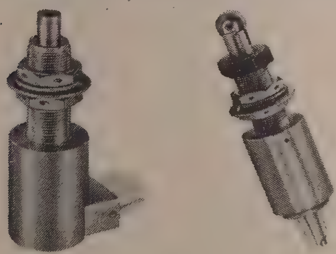
P2-6

Ideal for "off-high-low," "off-slow-fast," "Stop-fine-course" applications. Each level operates an independent set of SPDT circuits rated to 5A. Twelve contact arrangements are offered to satisfy just about any circuit requirement. Also available as DPDT single detent.



SPECIAL PURPOSE SWITCHES

ENVIRONMENT-FREE



One piece housing, sealed at plunger with ring seals and at base with hermetic header for immersion proof and against corrosive atmospheres. Case grounded for EMI reduction. P6 Series available with roller or in-line plunger.

CHARACTERISTICS

- Rating: 7A res. at 28 VDC.
- Actuating Force: 9 lbs. Typ.
- Reset Force: 5 lbs. min.

TOGGLE/ PUSHBUTTON

T2-0001

Combo toggle and pushbutton. It's a 2-position toggle and a pushbutton switch all in one. 30° toggle throw, .135″ total pushbutton travel with 4.5 lbs. operating force. Rated 10A res. and ind.

TOGGLE

T1-0001

Four position, 6-pole toggle featuring MIL-S-8805/4 basic switches. Positions #1 and #3 are 2PDT maintained action each, position #4 is 2PDT momentary, position #2 is center "off." Rated 7A. res. each pole.

T1-0004

Same except 3-position, 4-pole toggle. Position #1 is 2PDT momentary, position #2 is center "off," position #3 is 2PDT maintained action.

DEPT. EM, 2 EAST MAIN STREET / CARPENTERSVILLE, ILLINOIS 60110 / TEL: (312) 428-7171 / TELEX: 72-2426

Power Dynamics, Inc.

177 Valley Street, South Orange, New Jersey 07079 • (201) 762-6886 • TWX: 136567 (PDI)

Micro-Miniature Toggle Switches

FSC 60046 • PC • Ultra-Low Current • Low Cost

Developed especially for use with ultra-low currents. Gold-plated, plus extra heavy gold-plating on contact points. Unique contact design assures stronger and more stable contact resistance.

SPECIFICATIONS

Contacts and Terminals: Gold-plated

Rating: 5 VDC 100 mA
25 VDC 25 mA

Contact resistance: Less than 20m ohms (100 mV 1 mA)

Insulation resistance: More than 1000M ohms (500 VDC)

Current capacity: 0.1 micron A~0.1A

Dielectric strength: 100 VRMS at sea level

Life cycle: 50,000 contacts (standard type)

Mechanical life: 2 Pos.: 100,000 operations
3 Pos.: 50,000 operations

Electrical life: 2 Pos.: 50,000
3 Pos.: 25,000

Low Cost Commercial Versions: 2 Pos.: 40,000
3 Pos.: 20,000

FEATURES

- ▲ Terminals utilize international printed circuit board standard spacing to match most PC boards.
- ▲ Pins and contacts are nickel, gold-plated. (3 microns of nickel-plating with a minimum of 1.3 microns of gold).
- ▲ Case is UL-standard approved 0-94V Valox. Resists the effects of chemicals, high impact shock and high temperatures.
- ▲ Cleaning is simple even after mounting because of the design of the standoffs.
- ▲ Single and double pole types have four standoffs to allow maximum mounting stability.
- ▲ Available:
  - Plain bushing, no threads
  - ¼ threaded bushings with hexagon nuts
  - Toothwasher (standard)
  - Locking washer
  - 10.4mm long lever
  - Low-Cost Commercial Version—0.5 Microns Aμ

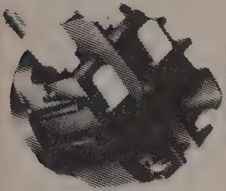
PRESSURE AND VACUUM SWITCHES

SAFE SWITCHING SYSTEMS

(Shock Proof • Water Proof • Explosion Proof)

Low Cost Pressure Switches

U.L. File Number E 80254



Low Pressure

SPDT	Range Inches Water	Electrical Rating
6731/03	1.5 — 7	3A @ 125 VAC
6731/06	5 — 45	10A @ 250 VAC
6731/10	20 — 55	15A

Approx. Overall Size
2¼" x 2⅛ O.D.

AIR INLET:
Pressure Connector 1/8" NPT brass thread or 1/8" O.D. spout

Microswitches accept Standard .250" slide on terminal.
Repeat accuracy ±2% at constant temperature
Field pressure adjustment is Phillips Head Screw.

Medium Pressure

SPDT	DPDT	P.S.I.	Electrical Rating
6741/20	6742/20	1.5 — 3.5	15A 125/250VAC
6741/30	6742/30	3.0 — 5.5	
6741/40	6742/40	5 — 10	
6741/50	6742/50	8 — 18	
6741/60	6742/60	16 — 30	
*6741/70	6742/70	25 — 50	
*6741/80	6742/80	45 — 70	
*6741/90	6742/90	55 — 80	

Approx. Overall Size
2¼" x 2" O.D.

Pressure Connector	1/8" NPT brass thread

*Consult Factory For Repeat Accuracy

See main catalog for differential pressure switch line.

Air Operated Potentiometer

Part No.	Rating	Resistance Range In K ohms	Function	Tolerance
6832	0.75W	1,10,22,47,100,220,470	Linear	± 20%

Will operate over full range of resistance when used with our standard actuators.

Low Cost Vacuum Switches

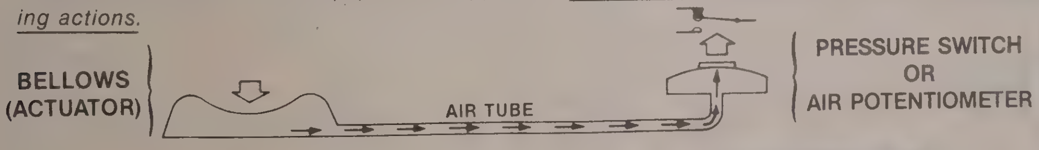
U.L. File Number E 80254

	6721/03	6721/06	6721/20	6721/30	6721/40
Inches of Water Vacuum (Adjustable)*	3" - 8"	7" - 15"	13" - 38"	28" - 80"	75" - 270"
Electrical Rating	SPDT 3A 125/250 VAC	SPDT 10A 125/250 VAC	SPDT 15A 125/250 VAC	SPDT 15A 125/250 VAC	SPDT 15A 125/250 VAC

All switches are available in SPDT and DPDT configurations with 1/8 O.D. spout or 1/8" NPT brass entry.

WATER, SHOCK AND EXPLOSION PROOF SWITCH SYSTEMS

Instead of a switch connected by cable to the equipment or appliance, an air bellows is joined by tubing to a pressure switch contained within the equipment or appliance. *Switches are available in momentary, alternate action, or sequencing actions.*



6470

The air bellows actuators in any of the various forms, are not affected by water, dirt, dust or flammable gases. Only a few of the many actuator available are shown here.

We're stocked and ready to roll.

We're the Switch Specialists. We *stock* the leading switch and electronic component lines. Call us. You'll get *what* you want, *when* you want it.

ALCOSWITCH: Switches, knobs, lights.

BEAU-VERNITRON: Plug and socket connectors, terminal blocks.

W.H. BRADY-XYMOX DIV.: Membrane switches.

C&K COMPONENTS: Sub-miniature, power, thumbwheel, dip switches.

C W INDUSTRIES: IDC connector systems.

CARLINGSWITCH: Switches and circuit breakers.

DELTROL: Relays, solenoids, timers.

GRAYHILL: Dip, pushbutton, keyboard, rotary switches.

LITTELFUSE: Fuses and fuseholders.

MULTIFLEX: Switch seals for toggle, pushbutton and rotary.

NATIONAL CONTROLS: Solid-state timers.

OLYMPIC WIRE & CABLE: Electronic wire and cable.

OMRON: Relays, thumbwheels, snap-action, lighted pushbutton switches.

OSHINO: Incandescent lamps.

OSLO: Lighted pushbutton and rocker switches.

POLLAK: Automotive and marine switch components.

SIGMA INSTRUMENTS: General purpose, reed, power, solid-state relays.

SOLICO: Indicator lights, LED's, lighted pushbutton switches.

SWITCHCRAFT: Switches, plugs, jacks, connectors.

TAIKO: Lighted pushbutton switches and relays.

TELEDYNE/ANSONIA: Solderless terminals and connectors.

UNIMAX: Snap-action, lighted pushbutton and proximity switches.

UNIMEC: Modular Switch and keycap switches.

XENELL: Neon indicator and control circuit lamps.

Rotary Switches
•Molded
•RF Power
•Subminiature

Radio Switch has a complete line of rotary switches to meet a wide variety of applications requiring exceptional reliability and quality.

With over 40 years experience in design and manufacturing, Radio Switch has the capability of providing a broad selection of standard switches as well as supplying switches to customers stringent specifications. Our staff will work closely with your engineering personnel to develop, test, and implement the rotary switch that is custom-designed for your application.

Our RF and power switches range from 2,000 volts peak flashover at 20 amperes to 24,000 volts peak flashover at 100 amperes. In the sub-miniature size, coin silver current carrying components can carry 5 amperes with initial contact resistance of only .010 ohms max. where low current switching applications are critical. Our molded type switches have the capability of switching 20 positions per circuit and are ideal for test equipment and industrial control systems.

For high performance, quality, and fast delivery, specify Radio Switch.

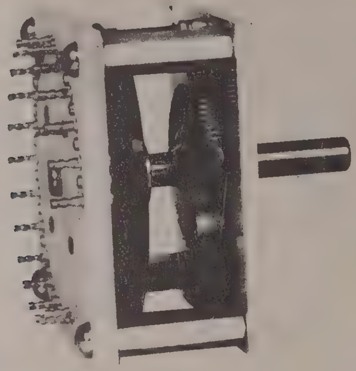
ROTARY SWITCHES SERIES C, D, AND E



SPECIFICATIONS

GENERAL:

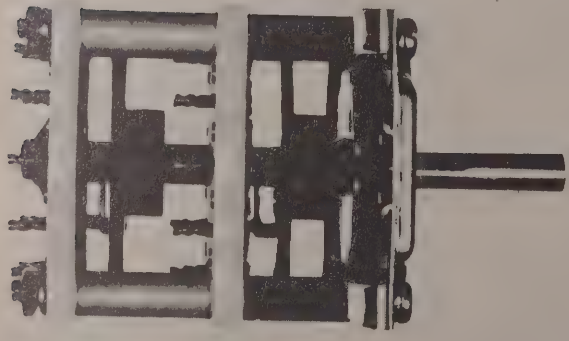
Meets or surpasses requirements of MIL-S-3786

ELECTRICAL:

Current carrying capacity—10 amps.
Current switching capacity—up to 2 amps.
Contact resistance—Initial—.005 ohms max.'
Contact resistance—After Life—.010 ohms max.
Insulation resistance—50,000 megohms
Dielectric withstanding voltage—1500V rms
Dielectric withstanding voltage after life—1000V rms

MECHANICAL:

Rotational life—50,000 cycles* min.@.250 amps.@85° C
Stop torque—50 In. Lbs.
Type construction—Open frame
Stops—Factory set to desired position.
Optional features—⅜-32 UNEF-2A bushing mount with anti-rotation pin. Shaft and front panel "O" ring seals. Spring return feature.
Concentric shafts available
Progressive shorting available
*One cycle = one full cw plus one full ccw rotation.



FEATURES OF SHALLCO 1¾, 2¼, 2¾ SQUARE SERIES C, D, E SINGLE DECK SWITCH MULTI DECKS AVAILABLE

- Meets or surpasses requirements of MIL-S-3786
- Available in one pole 2-48 position through four pole 2-15 position. See ordering information
- High current carrying capacity
- Low contact resistance

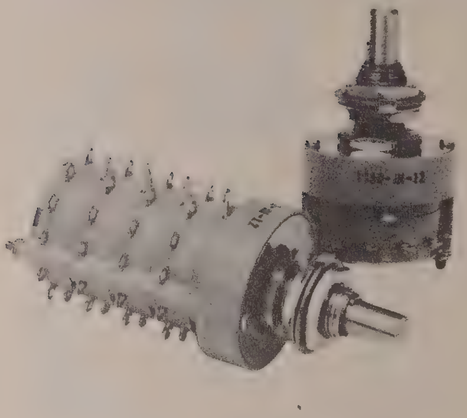
ROTARY SELECTOR SWITCHES



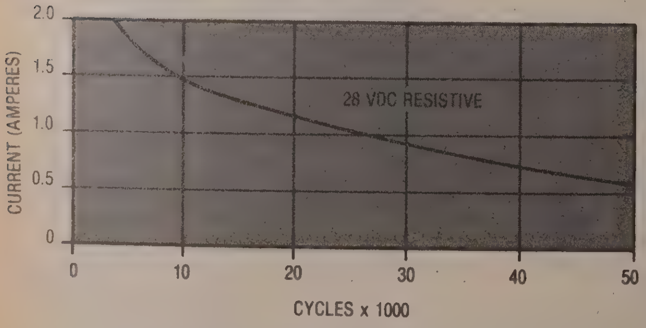
SPECIFICATIONS

GENERAL:
Designed to meet the requirements of MIL-S-3786/SR04

ELECTRICAL:
Current carrying capacity - 10 amperes
Current switching capacity - 1 ampere (28 VDC, Resistive)
Contact resistance - Initial - 5 milliohms maximum
Contact resistance - After Life - 20 milliohms maximum
Insulation resistance - 50,000 megohms
Voltage breakdown - 1000 VAC
Voltage breakdown - After Life - 500 VAC minimum

MECHANICAL:
Rotational life - 50,000 cycles
Stop torque - 15 pound-inches minimum
Construction - Enclosed
Stops - Factory set
Torque - 8 to 120 ounce-inches (dependent on decks, poles/deck)
Shaft flat - Opposite moving contact, see diagrams

LOAD vs. LIFE



FEATURES OF SHALLCO ONE INCH SERIES J SINGLE OR MULTIDECK SWITCH

- Designed to meet requirements of MIL-S-3786
- Closed construction
- Smooth, positive detent
- Low, stable contact resistance

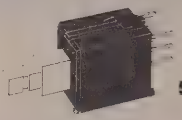
IBS MINIATURE PUSHBUTTON SWITCHES



SERIES 98000

Series 98000 IBS switches provide low cost versatility for a wide range of electrical/electronic applications. .130 in. (3.30 mm) by .130 in. (3.30 mm) square plungers accept a full line of industry standard pushbuttons. Switches have .157 in. (4 mm) long PC terminals for mtg. single- or double-sided PC boards up to .094 in. (2.39 mm) thick on .394 in. (10 mm) centers in row or arrays. Ratings are .125 A resistive @ 125 V AC or 28 V DC. .144 in. (3.66 mm) plunger travel. Contactors: beryllium copper. Contacts & Terminals: silver or gold plated.

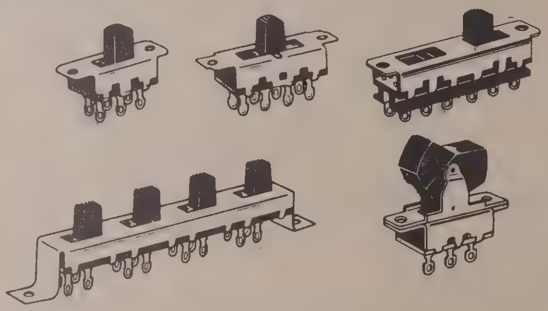
SLIDE SWITCHES



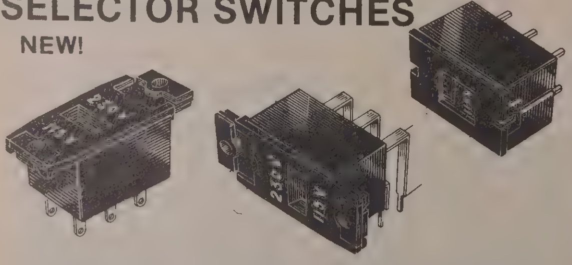
DW SLIDE SWITCHES

Instrument quality Switchcraft slide switches have low cost, precision "double-wipe" contacts with "U"-shaped bifurcated contacts rated at 0.5 A DC, 3 A AC, 125 V, non-inductive. Solder lugs have 5/64" dia. center holes and wrap-around notch. Many knob styles: crowned, rocker, flush. U.L. & C.S.A. listed types. Up to 4 poles of switching with locking or momentary action.

Series 46000E — General purpose slide switches
Series 47000E — Tandem switches
Series 51000E — Rocker switches
Series 58000 — Slide switches (6 amp)

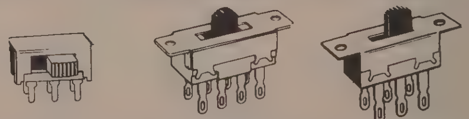
EUROPEAN LINE VOLTAGE SELECTOR SWITCHES

NEW!



Durable slide switches provide quick and easy programming/selection of 115 V or 230 V primary power in electrical/electronic equipment for international marketplace. UL, CSA and VDE (Verband Deutscher Elektrotechniker) approved. Mounting are flange or PC (straight or right angle), DPDT, locking. Ratings: UL & CSA: 2 A, 250 V AC & 4 A, 125 V AC. VDE: 2 A, 250 V AC. Switches also designed to comply with CEE and IEC requirements. Legends: 115 V-230 V.

"Tini-Slide" SWITCHES



Miniature "**Tini-Slide**" switches are precision locking switches with unique lift/wipe/slide action and silver contacts. Ratings: 0.5 A, 125 V AC or DC, non-inductive. 2- and 3-position types. U.L. listed. Solder lugs or PC terminals. Crowned knobs.

Series 56000 — DPDT & DPTT
Series C63000 — 4PDT
Series C62000 — Side Knobs

Switchcraft, Inc., 5555 N. Elston Ave., Chicago, IL 60630 Tel. (312) 792-2700 TWX 910-221-5199

SWITCHCRAFT®

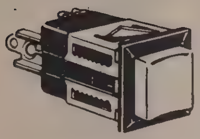
SERIES US & LUS — "Uniswitch" SWITCHES



Low cost, momentary pushbutton switches are only .688 in. (17.48 mm) square. SERIES US non-illuminated. SERIES LUS illuminated — use only 6 V, 0.5 W, T 1¾ bi-pin lamp Switchcraft Part No. P-2290 (not supplied with switch). Lamps replaced from front of panel. Both switch series incorporate "Adjusto-Clip" allowing simple "snap-lock" mounting. Solder lug terminals also accept #5-40 screw connections. PC terminals mount in single- or double-sided boards or multilayers. Solder/quick-connect terminals accept AMP Series 110 receptacles. Terminals: Solder lug, PC (PC suffix); quick-connect/solder (ST suffix). Contacts are bronze, silver plated, 250 mA, 30 W max., AC, non-inductive load, 1A circuitry. Switching is SPST (NO). Mounts in panels from .047 in. (1.19 mm) min. to .266 in. (6.76 mm) max. thick. Behind panel depth 1.313 in. (33.35 mm). Minimum square hole size .617 in. (15.67 mm). U.S. Pat. No. 3,446,467

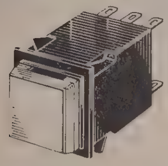
SERIES BXL — "Box Switch" SWITCHES



Miniature momentary or locking pushbutton switches offer lighted or unlighted options in minimum panel space. Molded black plastic housing protects agains dust and dirt; prevents bending/disfiguring contacts caused by excessive handling. Bezel frames pushbutton, acting as built-in escutcheon. Mounted in rows or matrixes and completely compatible with Series BXR "Box-Switch" switches. Accepts standard incandescent T 1-3/4 wedge base lamps. Relamp from front of panel. Omit lamp for non-illuminated switch. Lamps not supplied. Order pushbuttons separately from chart.

Mounting hole: .625 in. (15.88 mm) square. Panel thickness: .031 in. (.79 mm) to .093 in. (2.36 mm). Behind panel depth: 1.219 in. (30.96 mm) max

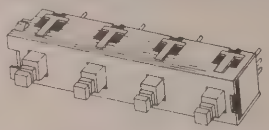
IBS Multi-Switch SWITCHES



Series 98000 IBS miniature pushbutton switches can be gang mounted on common frames, up to 12 stations long with center-to-center spacing of 10 mm, 15 mm or 20 mm. Available with interlock, non-lock, momentary or push-lock/push-release mechanical funcitons. .130 in. (3.30 mm) x .130 in. (3.30 mm) square plungers accept a full line of industry standard pushbuttons. Switches are stocked without pushbuttons due to wide variety that can be used. Order pushbuttons separately, Switches have .157 in. (4 mm) long PC terminals for mtg. single- or double-sided PC boards up to .094 in. (2.39 mm) thick. Close stacking (centers) permits high density within minimum front panel space. Plunger travel: .144 in. (3.66 mm).

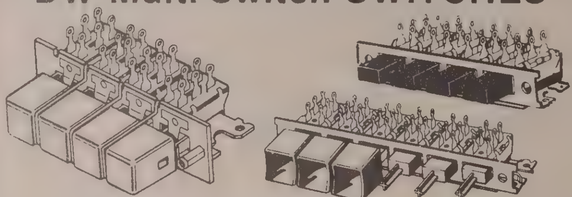
NOTE: [1] Odd numbers of stations (3, 5, 7, 9, 11) are available. Contact Switchcraft.

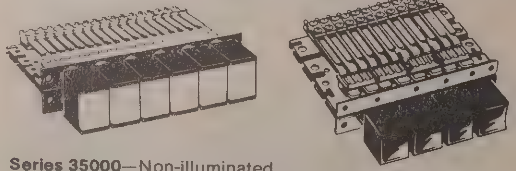
DW Multi-Switch SWITCHES



The DW (double-wipe) Multi-Switch switch is available up to 18 stations in a single row; or on special order, ganged assemblies with interaction between rows. Max. switching per station is 4-C (4PDT). Each station utilizes specially designed switching modules with U-shaped, high reliable bifurcated contactors rated at 3 amps, A.C.; 0.5 amp. D.C., 125 V, non-inductive load. DW Multi-Switch switches are available in 5 series: 65000, 66000, 67000, 70000, and 71000. All provide four standard functions: **Interlock**—actuating a pushbutton automatically restores to normal the pushbutton previously actuated. **Lock-Out**—prevents operation of more than one pushbutton at a time. This feature is included on all interlock switches. **Non-Lock**—each pushbutton has momentary action. **All-Lock**—all pushbuttons, except release, lock when depressed. All pushbuttons restored to normal by actuating (momentary) release pushbutton. **Push-Lock/Push-Release**—pushbuttons lock when depressed and release when again depressed. **All Series**—pushbuttons on ⅜" centers. DW Multi-Switch switches are available in single row assemblies with interlock and all-lock functions from one to twelve stations; with non-lock and push-lock/push-release functions up to eighteen stations.

Series 65000—Non-illuminated, integral pushbutton.
Series 66000—Non-illuminated version of Series 67000.
Series 67000—Illuminated pushbuttons.
Series 70000, 71000—Non-illuminated, cross-rib plungers, accept up to 12 different styles of pushbuttons.

littel Multi-Switch SWITCHES



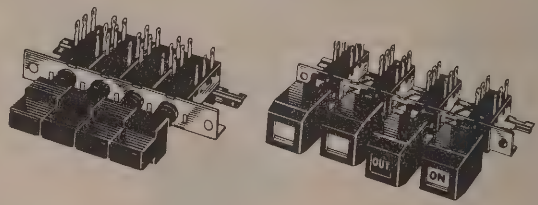
Series 35000—Non-illuminated.
Compact, rugged multiple-station switches feature up to 6PDT per station in .6 square inch space. Excellent selection of contacts for low or high current switching. Plungers accept nine different Switchcraft pushbuttons. Mechanical functions are: interlock, all-lock, non-lock and push-lock/push-release. One to 12 stations; many legends are possible.

Series 36000—Non-illuminated companion series to Series 37000. All other basic functions and features are same as Series 35000.

Series 37000—Single lamp illumination at each station. All other basic functions and features are same as Series 35000.

Series 38000—Twin lamp illumination using low power, low heat lamps. All other basic functions and features same as Series 35000.

Tini DW Multi-Switch SWITCHES

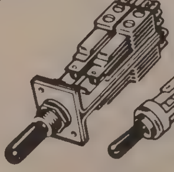


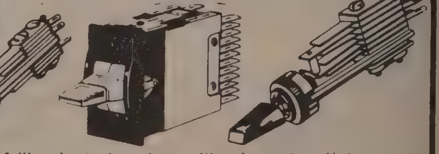
Dependable, low cost Series 90000 (10 mm centers) and 92000 (15 mm centers) switches offer a full range of versatile mechanical functions and the exclusive "Snap-Slide" switching technique.

And Tini DW Multi-Switch switches offer the bonus of up to 18 stations in a single row, each having up to 8-C (8PDT) switching. Mechanical functions include interlock, non-lock, all-lock and push-lock/push-release.

"Flip-Flop" Pushbuttons, Series TDW-F have unique internal "flip-flop" mechanism which permits button face to change colors without electrical energy, without lamps and without wiring. When pushbutton is operated, highly reflective panels inside housing change position and use ambient light to give a bright illuminated effect. ("Flip-Flop" pushbuttons designed for use on Series 92000 Tini DW Multi-Switch").

LEVER SWITCHES





Large variety of illuminated and non-illuminated switches are rugged and compact and are ideal for all control panel applications. Non-illuminated types have up to 4PDT in locking or momentary actions. Ratings: up to 3 A, 300 W max., AC non-inductive load. Illuminated switches have up to 8 A, 125 V AC contacts with up to 8PDT switching. Lever lights a different color for each position. Terminals can be solder lug or quick-connect.

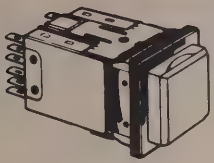
SWITCHCRAFT®

A Raytheon Company

SERIES PL "Push-Lite" SWITCHES



Completely enclosed, lighted pushbutton switches feature long-life, highly-reliable, leaf-springs. Available with or without barriers, full or split-face display. Mounts with clamp-type bracket; no screws, washers or nuts needed. Can be mounted in vertical or horizontal rows and in matrixes. Accepts standard T-1¾ flange-base lamp (not furnished with switch) in either 6 V or 28 V rating. Specify 1 lamp for single lamp type or 2 lamps for twin-lamp type when redundant or split-face lighting is required. Barriers and colored filter snap-inserts optional (order separately). Palladium contacts rated at 2 A, 125 V max., non-inductive load. Silver contacts rated at 8 A, 125 V max., non-inductive load.

MINIATURE MOMENTARY KEY SWITCHES

Switchcraft miniature pushbutton switches offer long life for instrumentation, medical electronics, radio & TV and other applications where small size, and high reliability are important design factors. All switches are PC mount type, with precious metal contact surfaces. Some are available with LED illumination. Switches are designed for modern electronics equipment using semiconductors. Short stroke, long life, audible "click", positive tactile "feel" assure switch operation. Contacts are self-cleaning with low resistance throughout life.

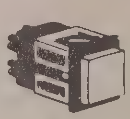
SERIES BXR — MOMENTARY "Box Switch" SWITCHES



Miniature, non-illuminated momentary pushbutton switch offers broad switching capabilities in minimum panel space. Switch only .688 in. (17.48 mm) square. Molded plastic body protects against dust and dirt; prevents bending/disfiguring of contacts caused by excessive handling. Attractive bezel frames switch and acts as a built-in escutcheon plate. "Adjusto-Clip" mounting provides snap-in, front of panel mounting. Pushbuttons have .109 in. (2.77 mm) stroke. Mtg. hole: .620 in. (15.75 mm). Max. Panel Thickness: .047 in. (1.19 mm) to .281 in. (7.14 mm). Ratings: 250 mA, 30 W max. AC non-inductive load. Contacts: brass, silver plated. U.S. Patent Nos. 3,446,467 and 3,419,696.

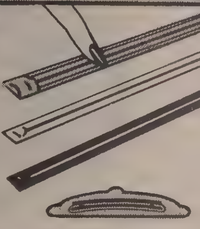
Tapeswitch

PRESS-AT-ANY-POINT

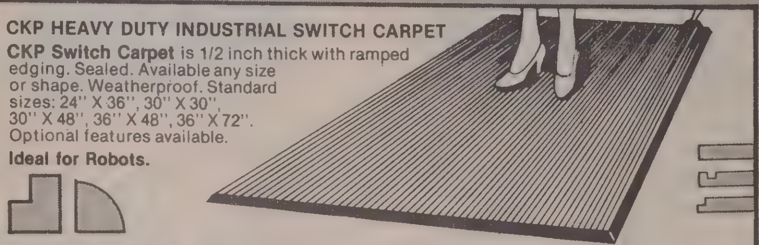
SENSING SWITCHES



RIBBON SWITCHES

Factory sealed units with 18 inch connecting leads at one end. Sensitivity: 8, 12, or 40 ounce finger pressure. Standard lengths: 1, 2, 5, 8, 10, 12, 15, 18, 20 ft. Double leads on order. See text at bottom.

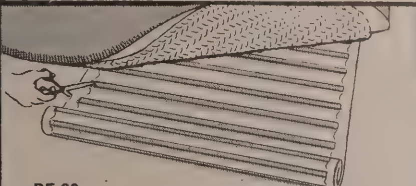
Now available with self adhesive.



CKP HEAVY DUTY INDUSTRIAL SWITCH CARPET

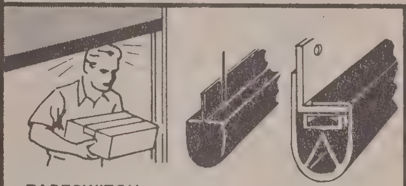
CKP Switch Carpet is 1/2 inch thick with ramped edging. Sealed. Available any size or shape. Weatherproof. Standard sizes: 24" X 36", 30" X 30", 30" X 48", 36" X 48", 36" X 72". Optional features available.

Ideal for Robots.



PE-30
UNDER CARPET SWITCHING RUNNER

30 inches wide X 3/32 inches thick 5ft., 25ft., 50ft. roll. Can be cut to any length from roll. For indoor use under carpeting. Excellent under plywood or tile. Parallel Tapeswitches between clear sheeting. Tinned wires for easy connections.

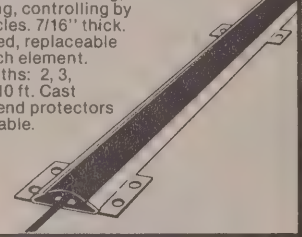


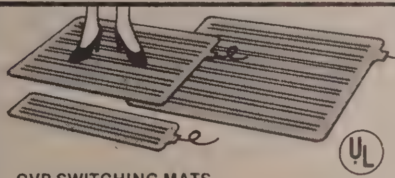
TAPESWITCH
CONTROFLEX® SAFETY EDGES

Serve as cushioned sensing switches for the leading edges of doors, gate arms, machinery, etc., to stop or reverse the action. Numerous styles available. Write or call for details.

RBMA ROAD SWITCH

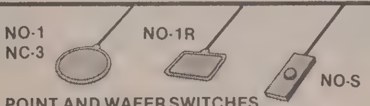
Successful, rugged roadway treadle for counting, timing, controlling by vehicles. 7/16" thick. Sealed, replaceable switch element. Lengths: 2, 3, 5, 8, 10 ft. Cast iron end protectors available.





CVP SWITCHING MATS

CVP style mats are durable flexible area switches for use exposed or under rubber mat or carpeting. UL listed for use in alarms. 3/32" thick. Available 6" X 23", 17" X 23", 23" X 35".

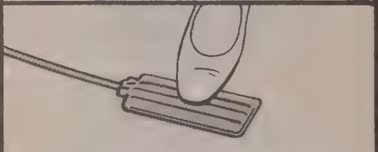


POINT AND WAFER SWITCHES

NO-1 and **NO-1R**—Rugged compact wafer switch. Normally Open. For under valuable objects or general purpose detection. 2 lb. nom. sensitivity.

NC-3—Normally Closed detector switch. Opens when weight is lifted off. 2 lb. nom. sensitivity.

NO-S—1 ounce sensitivity wiping action. Super sensitive.

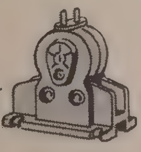


111 CONTROFLEX® FOOTSWITCH

Rugged, low-profile sealed vinyl footswitch. Rated at 100 watts. Employs Controflex® in flat pad. Non tiring. Stand or jump on it. 2" x 5" x ⅜" 6 ft. lead wire. SPST N.O.

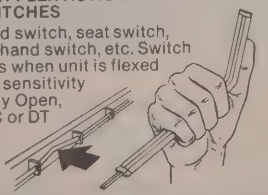
SENSITIVE AIRWAVE SWITCH MODEL AW

High quality diaphragm switch, adjustable sensitivity. Operates from tubing squeeze, air motion, light vacuum, breath pressure, etc. Silver contacts. Many adjustment features.



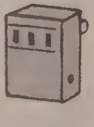
TAPESWITCH FLEX-ACTION RIBBON SWITCHES

Ideal for wand switch, seat switch, limit switch, hand switch, etc. Switch action occurs when unit is flexed 10°. Nominal sensitivity 4 oz. Normally Open, standard. NC or DT available.

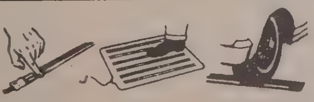


TAPESWITCH RELAY R-1

FOR AC CONTROL WITH ANY TAPESWITCH. This plug-in unit has AC outlet sockets giving Normally ON or Normally OFF 117 Volts AC at 5 Amperes. Built-in low voltage transformer. Simultaneous action.



Tapeswitch products are proven in all industries. Patented construction withstands tons of force yet can close on light finger pressure. TAPESWITCHES are unexcelled for—*safety*...*automation*...*antiburglar systems*...*counting*...*timing*...*door control*...*light switching*...*machine control*...*material handling*...*seat switching*...*computer and console switching*...plus many other applications. TAPESWITCH RIBBON SWITCHES can be bought in the size and length needed.



HAND.....FOOT.....VEHICLE

Features: Inherently sealed. Self bottoming. **Press-at-any-point operation** eliminates linkages. All styles except flex-action switches can be coiled without shorting. Millions of impacts at one point.

Rating: All Tapeswitches are rated at more than 1 ampere, 117 VAC. However, for floor switching a lower voltage is recommended.

TAPESWITCHES are designed in accord with the best principles of switch and cable design, with jacketing and insulation meeting the requirements of MIL-C-9154 and MIL-I-631C respectively.

Unique Fail-Safe circuitry is feasible with all Tapeswitches.

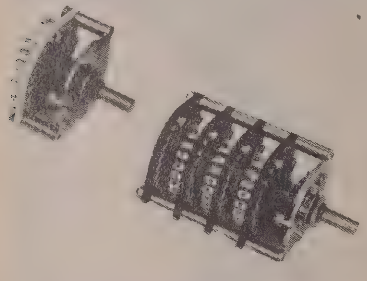
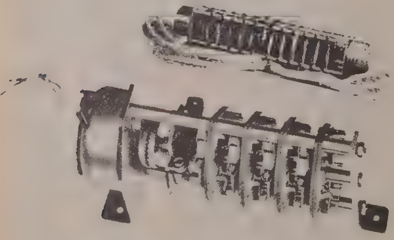
- Up to 150 positions/pole
- Fixed stops or continuous rotation
- 3 amps at 120 VAC to 15 amps at 120 VAC
- Precious metal contacts
- Adjustable stops available

TYPE 2 ROTARY SWITCH



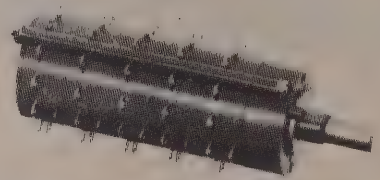
- Two insulation materials available
- 1 to 4 poles/deck
- Up to 24 positions/pole
- Adjustable stops
- 5 amps, 120 VAC max.
- Precious metal contacts

REMOTELY CONTROLLED ROTARY SWITCHES

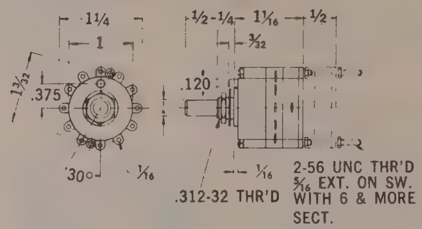


- All Tech Lab Switches can be supplied as stepping switches or continuous motor driven
- Solenoid drives
- Motor and Geneva drives
- Enercon AC incremental motor drive
- Available with interrupters or homing decks
- Completely pre-wired ready to install
- Hermetic sealing available
- May be remotely controlled by: Master-slave arrangement; Computer or other; External pulse
- Either AC or DC operation

TYPE 3 ROTARY SWITCH

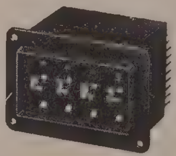


DIMENSIONS



- Enclosed molding in diallyl phthalate
- Molded in terminals
- 1 or 2 poles/deck
- Up to 12 positions/pole
- 1¼″ OD up to 8 decks (max.)
- Adjustable stops
- 12 amps, 28 VDC
- Precious metal contacts
- Mixed decks of shorting and non-shorting
- Mixed shorting and non-shorting contacts on each deck
- Choice of either ⅜-32 or ⁵⁄₁₆-32 mounting bushing
- External adjustable stops
- Offset wipers

THUMBWHEEL SWITCHES

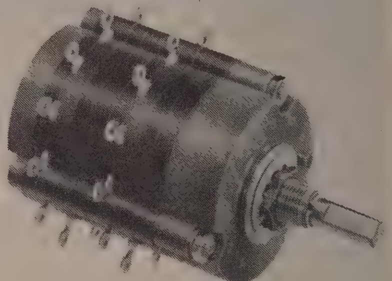


- Compact modular construction
- Positive detent, 8, 10, 11, 12 pos.
- Simple installation
- Two models available
- Wide range of codes
- Various terminations
- Illuminated
- Adjustable stops
- Decade transfer drive
- KV voltage dividers
- Precision Res. Dec.
- Capacitance decades
- Various colors

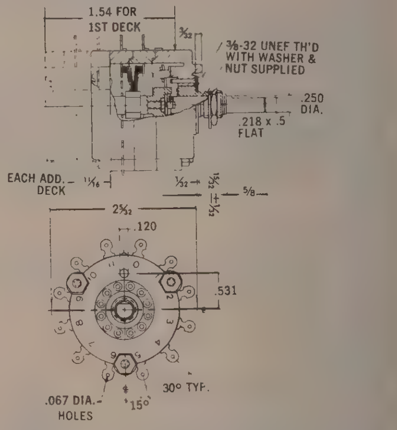
SPECIALS

Tech Labs can customize your Switch and Attenuator requirements, completely pre-wire your switches ready for installation. We can also undertake prototype design and manufacturing. Contact our factory for quotations.

ROTARY INSTRUMENT SWITCH SERIES 2000



- SP or DP/Deck
- Extremely low contact resistance — <1 milliohm
- Extremely high insulation resistance — more than one million megohms
- Totally enclosed -- dust tight
- Long life — > one million
- 12 position/1-6 pole/deck max.
- Silver alloy contacts
- External adjustable stops
- Shorting (MBB)



SPECIAL DESIGN VARIATIONS

SIX AND ELEVEN POSITION DETENTS

The six position detent is 60° throw, skipping every other contact. The eleven position detent is 30° throw with the eleventh position omitted so that the detent goes 60° from position ten to position zero.

OFFSET WIPERS

30° and 180° offset wipers are available for use in special circuits.

CAPACITANCE

Less than 1 micromicrofarad between contacts or to ground.

CURRENT CAPACITY

5 amps maximum continuous duty.

THERMAL EMF

Extremely low. Silver contacts & brushes.

VOLTAGE BREAKDOWN

Withstands 1500V RMS between contacts and to ground.

LOSSES

Low electrical losses at frequencies up to several megacycles.

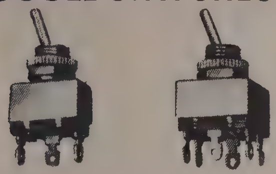
TOGGLE SWITCHES



Tech Lab switches are available in many combinations of bushings, terminals, handles, housings and electrical styles.

OPERATING CHARACTERISTICS

- **Insulation Resistance**
  Greater than 100,000 megohms at 100 VDC and 70°F
- **Dielectric Strength**
  At sea level 1,000V rms at 60 cps for 1 min.
- **Contact Resistance**
  Initial — less than .010 ohms
- **Contact Rating**

DC Load	AC Load
Inductive	Inductive
28V	**125V**
5 amp	5 amp

- **Temperature Range**
  −55°C to 85°C
- **Vibration Endurance**
  10 to 2,000 cps per MIL-R-25018
- **Shock Endurance**
  75G
- **Contact Chatter**
  10 microseconds or less MIL-R-5757
- **Corrosion Resistance**
  of complete assembly 50 hrs per QQ-M-151
- **Mechanical Endurance**
  100,000 cycles switching 10 amp. 50 VDC resistive load

MATERIAL SPEC

- **Base**
  Rogers RX-600
  Phenolic Glass Fiber
- **Housing and Mounting Bushing**
- **Brass**
- **Contacts**
  Fine silver-gold plated

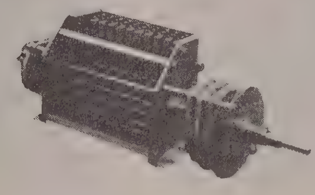
DIMENSIONS

- SP ¼" x ½" x 5/16"
- DP ½" x ½" x 5/16"
- ¼-40 TH'D Bushing
  ¼ or ⅜ long with Keyway
- Various type actuator levers
- Solder or PC Terminals

APPLICABLE MIL SPEC

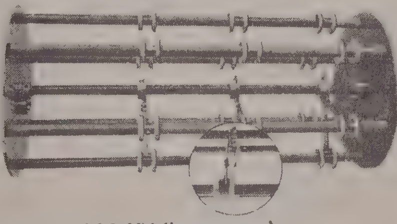
MIL-S-3950 MS-75028 MS-75029

PROGRAMMING SWITCH



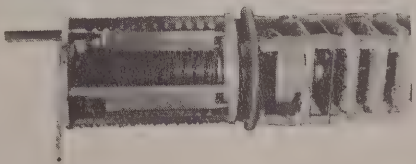
- Adjustable programming for process control, testing, sequencing, scanning, etc.
- SP or DP switches/section
- Up to 25 amp. contact rating
- Up to 48 pos./section/switch
- Remote control
- Computer interface opto-isolated

HIGH VOLTAGE SWITCHES



- Up to 100 KV (low power)
- Corona shields

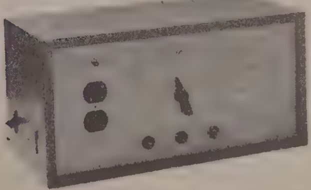
SLIP RING COMMUTATORS



- Integrated with remote controlled stepping switch
- Lift off brushes
- Multiplexing for temp. and strain gauge read out of rotating machinery

INSTRUMENTS

DC-AC INVERTERS
PREC. DECADE RESISTORS
KV-VOLTAGE DIVIDERS
MILLIOHM METER



ATTENUATORS

ROTARY/VARIABLE

- Five basic models — 1 7/16" to 3" dia.
- All circuit configurations
- Wide range of impedance
- Available with detents, tapers and cueing
- Aluminum anodized can
- Precious metal contacts
- Up to 45 steps
- Audio, video and RF

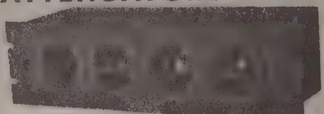
FIXED ATTENUATORS

- Two basic models
- Standard circuits "T" and Bridged "H" — others available
- Octal plug-in base available
- Up to 80 db loss
- Many impedance available

VERTICAL/VARIABLE

- Two basic models — 1" and 1½" wide
- Many circuit configurations available
- Wide range of impedance
- Available with detents, tapers and cueing
- Black anodized escutcheon plate
- Precious metal contacts
- Up to 30 steps

PRECISION ATTENUATORS



TYPE 11T AND 11H PRECISION ATTENUATORS — DC to 10 MHz*

- Circuit: "T" or Balanced "H"
- Impedance: 50 to 600 ohms, as specified
- Resistor Accuracy: ±0.1% or better
- Accuracy: ±0.1 db to 200 KHz (overall) ±0.6 db to 2 MHz
  Lower values of loss, essentially flat to 10 MHz

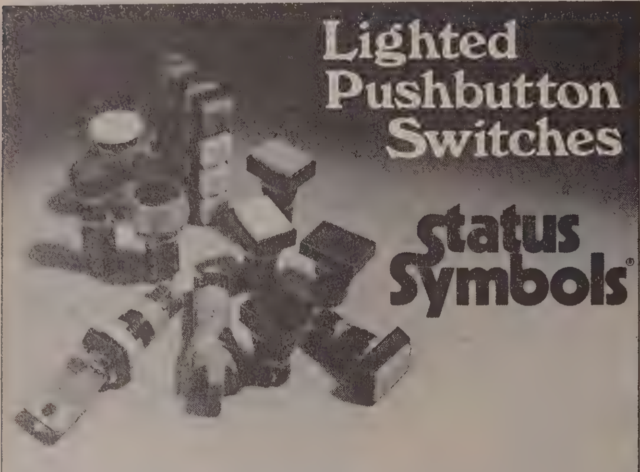
Type No.	Circuit	db Range	db/ Step	Dimensions
11-T	"T"	111	0.1	5¼"x19"x5"
11-H	Bal. "H"	111	0.1	5¼"x19"x10"

* On Low Impedance Units, Lower Losses Usable to 100 MHz.

TYPE 850T AND 850H FOR THE AUDIO RANGE

- Circuit: "T" or Balanced "H"
- Impedance: 600/600 ohms unless specified — Other values to order
- Range: 2 dial unit gives 93 db in 0.1 db steps: 3 dial unit gives 111 db in 0.1 db steps
- Terminals: Telephone type jacks for input and output — Solder terminals provided on rear for permanent connections: Insertion of plugs into jacks lifts rear connections
- Accuracy: Resistors adjusted to ±0.1% excepting low values of loss are ±.25%

UNIMAX:
BETTER SWITCHING SOLUTIONS



Lighted Pushbutton Switches

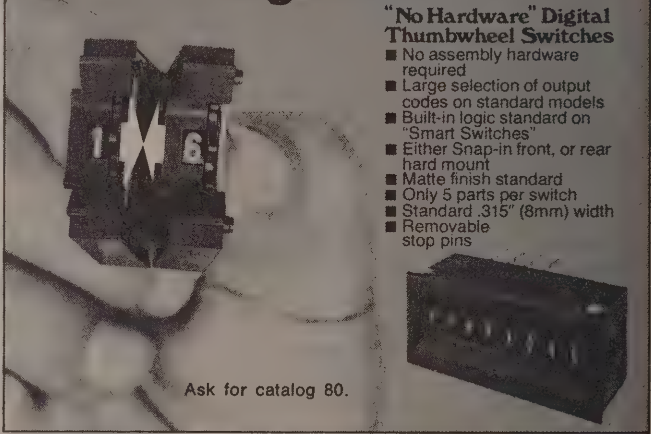
Status Symbols®

In a field full of appearance quality/performance switching variables, Unimax switches are the ones that show you care about quality, performance and price.

- *Single Lamp* —Round, square or rectangular, lighted and unlighted, momentary or alternate switching. 1-4 poles. Flat, concave and mushroom caps.
- *Four Lamp* — Multi-switch configurations. Approved to MIL-S-22885/9-12. Also meets high-shock requirements of MIL-S-910C.
- *Oil-Tight* — Key-operated, Interlock and Multi-position models also available.

Ask for Catalog TH

they SNAP together!



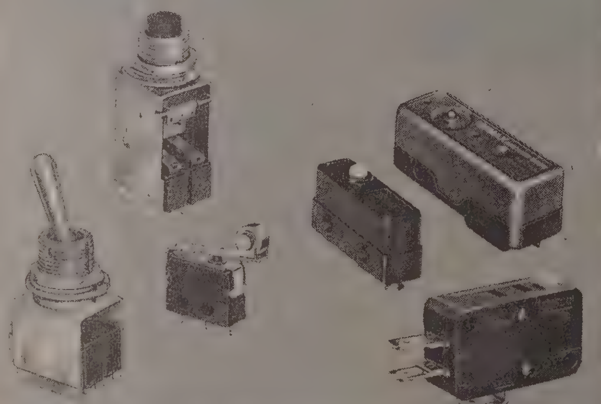
"No Hardware" Digital Thumbwheel Switches

- No assembly hardware required
- Large selection of output codes on standard models
- Built-in logic standard on "Smart Switches"
- Either Snap-in front, or rear hard mount
- Matte finish standard
- Only 5 parts per switch
- Standard .315" (8mm) width
- Removable stop pins

Ask for catalog 80.

The industry's widest selection of precision, general purpose, miniature and sub-miniature snap-action switches, as well as toggle and push-button switch assemblies. Ratings from low-level to 25A. All actuator styles available. Ask for catalog 60.

Snap-Action Switches



A full range of snap-acting switches enclosed in rugged die cast metal housings for protection against mechanical damage and, depending on the method of sealing, against destructive environmental conditions, Series KS (compact) is available with either through bolt or flange mounting. Series KL (heavy duty) is horsepower rated. Series KWL (splash proof) and KXL (explosion proof) are suitable for use in severe environments. All types are available with a variety of actuators. Ask for Catalog 30.

In a World of Touch'n Go switch to VEETRONIX & find out why we think we're a Touch Above the Rest!

OUR REPUTATION WILL TELL YOU:
With a decade of experience in designing and building switches our objective is to produce a reliable switch that meets your specifications, your time table and at a competitive price. With an in-house tool and mold shop we can respond to your needs quickly. We also furnish several OEM's with special items produced on proprietary tooling.

OUR SWITCH DESIGN WILL TELL YOU:
We design panel switches and key board switches, long and short series with bi-level, alternate actions and switching forms. Both are hermetically sealed reed switches with optional illumination. The key board switches are for PCB mounting with several options. We also design and manufacture a variety of switch caps, space-bar and supporting mechanisms.

Contact us today
and find out for yourself why we think we're a
TOUCH ABOVE THE REST!

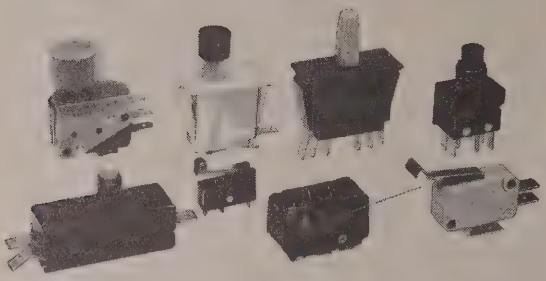
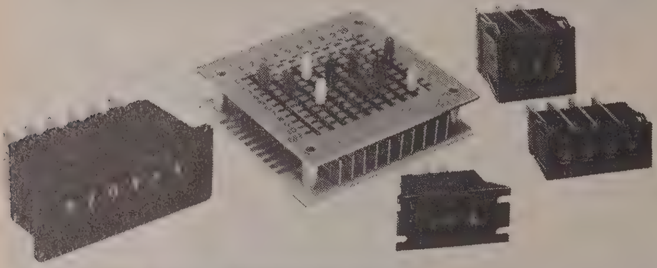
Take your pick from this CHERRY crop of fine products: CUSTOM PC BOARDS AND...



PRECISION SWITCHES

Whatever you make . . . you can make it better with a Cherry switch. Cherry snap-action switches are designed with a unique coil spring mechanism for longer mechanical life. Vast choice of sizes, operating forces, mountings, termination and actuators with electrical ratings from 1 through 25 amps. Gold crosspoint contact switches for low energy circuits, too.

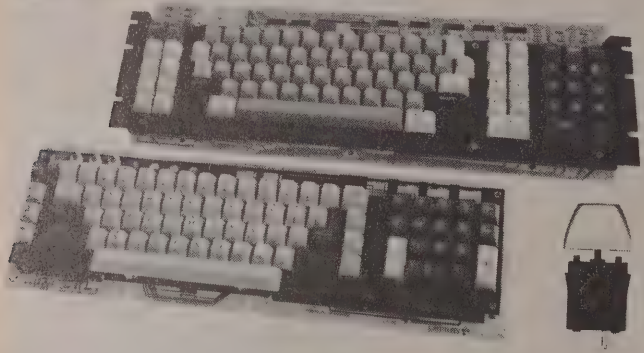
Phone: 312/587-3500



SELECTOR SWITCHES

When you need a switch to count . . . count on Cherry. For thumbwheel, leverwheel and pushwheel switches in a full range of alphanumeric readouts and output codes. Full range of sizes, too. And, for matrix selector switches with up to 2784 crosspoints . . . standard and stocked.

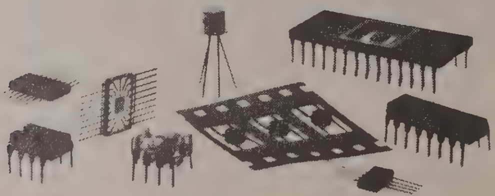
Phone: 312/587-3500



KEYBOARDS & KEYBOARD SWITCHES

Solid state . . . hard contact . . . or membrane? Cherry provides a broad range of custom designed keyboards in your choice of "any of the above" technologies. Plus, numerous standard keyboards available off-the-shelf . . . including the versatile, modifiable 67-key PRO. Many keycap colors, shapes, sizes and legends to choose from. Keyboard switches, too.

Phone: 312/587-3522



INTEGRATED CIRCUITS

Need a custom bipolar IC? Take your pick of linear or I^2L digital . . . or a combination of both on the same chip. Cherry designed tooling or your own. Semi-custom and standard ICs, too.

Phone: 401/885-3600

ALPHANUMERIC

DISPLAY PRODUCTS

A 16 character alphanumeric display system with microprocessor controlled circuitry for less than $90.00 in production quantities is only one of Cherry's cost-effective applications of gas discharge display technology. Also offered are numeric and alphanumeric display panels and systems for virtually any application.

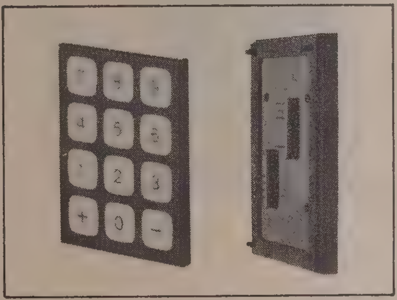
AMP keyboards—technology and experience to give your products a competitive edge.

Proven in more than 1,000 diverse applications . . .
■ Consumer products ■ Telecommunications ■ Data processing ■ Appliances ■ Instrumentation

Gives you more choice . . .
■ Standard or custom designs ■ Micromotion to full travel ■ Sublimated graphics that won't peel or wear ■ Static protection ■ EMI/RFI Shielding

And more choice . . .
■ Temperature range: −40°C to +65°C ■ Key travel: 0.005 to 0.125 inch ■ Profile thickness: 0.015 to 0.625 inch ■ Life: .5 to 10 million operations ■ Encoding: single pole, matrix, or custom ■ Operating force: 3 to 18 ounces ■ Termination: Printed or flex tail (range of center to center, 0.100 inch minimum) ■ Capacitance: ≤20 pf ■ Contact Bounce ≤6 ms ■ Contact Rating: 20 ma at 30 vdc

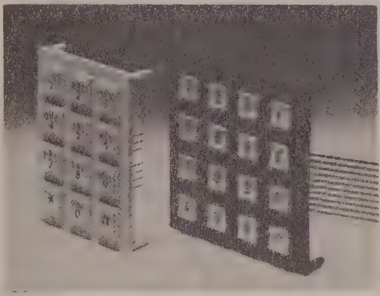
And high reliability
■ Designed and tested to meet the requirements of **MIL STD 810C**



Model EC Environmentally-Sealed Tactile Keyboards

■ Environmentally resistant design ■ "Snap action" feedback for positive data entry ■ Electrically and physically stable ■ Standard and custom legend formats available ■ Life — 1 million operations

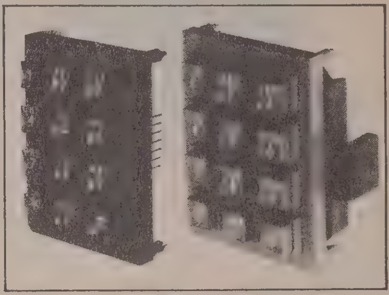
Request Catalog No. 81-637



Short-Stroke ET Keyboards

■ "Snap action" feel ■ 12 and 16 key models available ■ Long life — 10 million operations ■ Matrix encoding standard with other options available

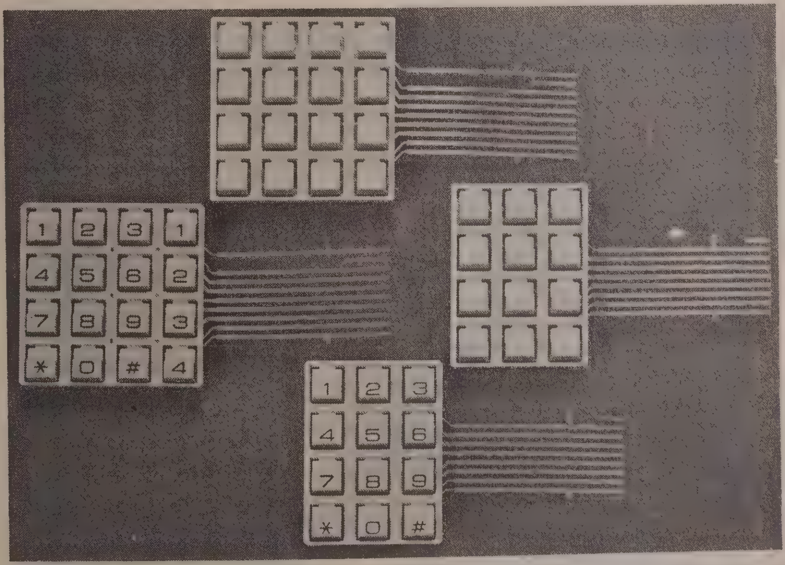
Request Catalog No. 81-639



Long-Stroke LT & BT Telephone Keyboards

■ Western Electric and GTE telephone keyboard "look-alike" ■ Simple mounting ■ Standard and optional encodings available ■ Low cost ■ .125 [3.18] key travel ■ Life — 10 million operations

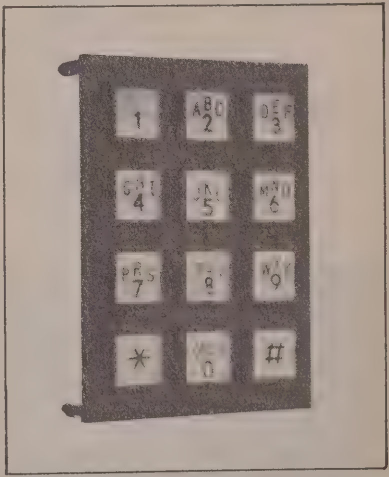
Request Catalog No. 81-641



Model EH Hinged-Key Keyboards

■ Several encodings available ■ Low profile tactile feedback ■ Stackable for large arrays ■ Life—½ million operations

Request Catalog No. 81-640



Model BL (Back Lightable) Tactile Keyboards

■ Translucent keytops ■ Proprietary key marking insures long wear ■ Snap-action tactile feel ■ Long life—1 million operations ■ Easy front panel mounting

Request Catalog No. 81-642

Pertinent Keyboard Specifications

- Actuation force: 25 oz ± 5 oz standard
  (other forces available)
- Travel: 0.015 in., 0.062 in. Standard
- Contact Resistance: Digital Logic Compatible (Gold on Gold)
- Contact Bounce: 1 ms typical
- Tactile Element: Various metallic materials plated gold
- Lighting: Incandescent, LED, and electroluminescent lamp sources
- Environmental standards are in accordance with typical airborne/ground military specifications for:
  - Temperature
  - Altitude
  - Rain
  - Humidity
  - Salt Spray
  - Vibration and Shock

Each design produced meets environmental requirements for the specific application.

16 Station Multifunction Keyboard Assembly

Standard Specifications

Interface: RS232C
Display Font: BIC version of standard ASC II, character set
Brightness Control: Front panel (manual)
Display: Red LED, 5x7 Dot Matrix
Overlay Markings: Window pane, white dividing line
25 Ounce Switch Actuation Force
Unit Color: Lusterless black
External Connector: 37 pin "D" type
RS232 BAUD Rate: 1200/2400
Power Supply: None (See options)
Mounting: MS25212 (5¾" standard rack mounting)

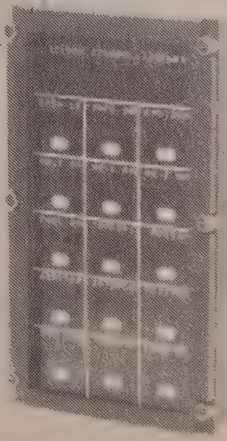
Options Available

Interface: 1553A/B, 8 BIT/16 BIT Parallel, RS422
Display Font: Customer Specified, On Line Programmable
Brightness Control: Automatic or Remote Dimming
Display: High Efficiency Red LED, Yellow or Green LED
Overlay Markings: Customer Specified, For Example: Raised Keystation Dividers
Unit Color: Customer Specified Color
External Connector: Customer Specified
RS232 BAUD Rate: Customer Specified
Power Supply: Logic Power Supply Available
Mounting: Customer Specified

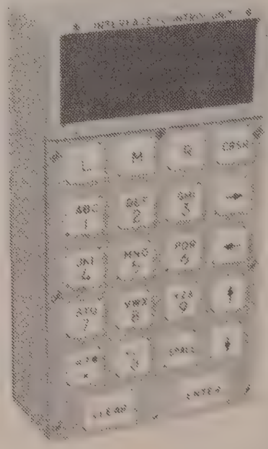
Custom Design Flexibility

- High Reliability — Trouble free and long lasting construction.
- Keyboards combined with electronic packages.
- Custom designs — stand alone keyboards.
- Keyboards combined with panels.
- Dedicated or programmable keystations or controllers.
- Lighted or unlighted configurations.
- Personalized service for solving your problem or design.
- Prompt turnaround and delivery.
- MIL-Q-9858A Quality System.

- 15 Keystations
- 16 Segment LED Legends (red)
- Low power
- Ideal for use where panel depth is limited (less than 2")
- Standard 5¾" wide mounting
- RS232C interface



All necessary electronics for interface, display driving and other related needs are found behind the display surface. These electronics may be remoted where space conflicts. DC power supply is needed for operation.



Display & Entry System

This computer Peripheral Display & Entry System provides complete interface capability with only four control lines and an 8-bit bi-directional data bus.

- Microprocessor controlled
- Full alpha-numeric display from a 6-bit ASCII data input
- 5x7 dot matrix character generation
- Blinking character cursor
- Two-key rollover on data entry
- Fully debounced and decoded keystroke data
- Designed to meet applicable MIL specifications
- Choice of keyboard options

CHERRY SOLID STATE KEYBOARDS

The B4VE-9501 and B4VE-9601 keyboards are comprised of 95 and 96 capacitive encoded keys respectively. Both include the full ASCII alphanumeric typing array, a right hand pad, and a top row of 17 keys with re-legendable caps. Both have two user labeled keys on either side of the space bar. The B4VE-9501 has a 14 key auxiliary right hand numeric pad and the B4VE-9601 has a 15 key right hand numeric pad of which four are user labeled.

KFN3-8354

83 KEY IBM*PERSONAL COMPUTER COMPATIBLE KEYBOARD IN A 30mm DIN ENCLOSURE

Part Number KFN3-8354
(Without housing specify **Part Number BFN3-8354**)

CHERRY Keyboards

KXN3-8451 CHERRY IR WIRELESS KEYBOARD — 84 KEY, COMPATIBLE WITH IBM PC JR.*

Comes in DIN enclosure. This state-of-the art keyboard is equipped with CMOS electronic components and special power circuitry which requires power only when a key is depressed. This extends life of 4 AA alkaline batteries. May be used in a wireless, simplex mode at distances of 20 feet (line-of-site) with IBM PC jr. For use with IBM PC use the same Cherry IR Wireless Keyboard KXN3-8451 plus IR Receiver Part No. 0B99pl3AL which may be plugged into the keyboard jack on the IBM PC. This IR Receiver converts the PC jr code signals to IBM PC code. Also available with keyboard is optional cable (Part No. 37CO-C913) for wired use.

- ASCII jumpers allow conversion to serial with TTL
- 2-shot molded keycap matté finish
- Full N Key rollover
- Lighted "alpha lock" and "num lock" keys
- Chassis ground. External reset. Matching color shielded coil cord with 5 pin circular DIP connector. Auto repeat
- Low profile-30mm (1.181″) from enclosure base to center point of home row key cap top

IBM Compatible interface at 18K Baud serial output with Up/Down codes and special handshaking, differential output. (Baud rates 300, 1200, 9000)

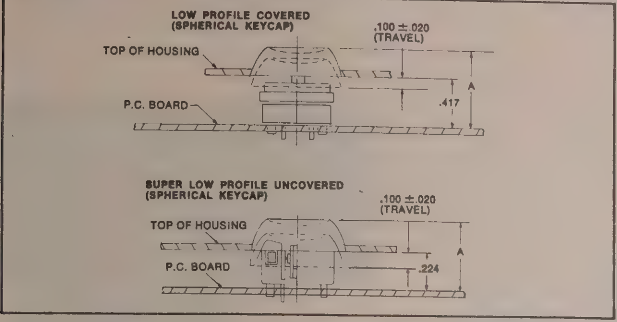
CHERRY Keyboard Switches

M8 SERIES — SUPER LOW PROFILE DIN-COMPATIBLE GOLD CROSSPOINT CONTACT



Super low profile technology is available in individual keymodules or as complete keyboards. Keymodules are offered in covered or uncovered version with spherical caps and covered version with cylindrical sculptured caps.

- Super low profile from P.C. board to center point of home row keycap top—
  - .426″ uncovered spherical keycap
  - .619″ covered spherical keycap
- Linear feel with positive stop
- New ergonomic cylindrical button set
- Gold Crosspoint Contact switching

SUPER LOW PROFILE M8 MODULES

Part Number	Description
M81A-0100	Standard Force, Uncovered, Very Low Profile.
M81A-01R0	Standard Force, Uncovered, Very Low Profile, Red LED.
M81G-0100	Higher Force, Uncovered, Very Low Profile.
M81E-0500	Standard Force With Cover.
M81E-05R0	Standard Force With Cover With Red LED.
M81H-0500	Higher Force With Cover.

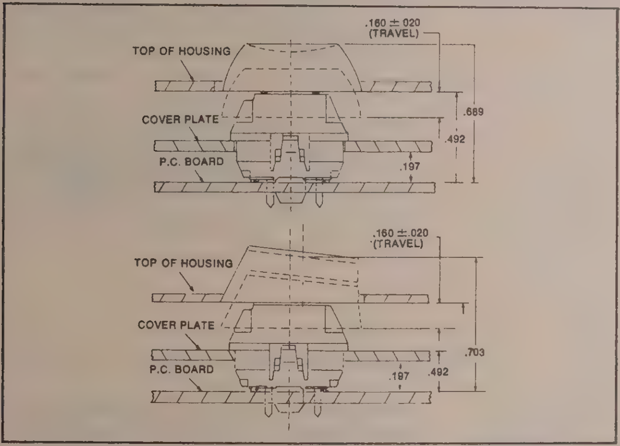
MECHANICAL SPECIFICATIONS

Rest Height (A)	.426″ ±.015″ (10.82 ±0.38mm) — Type I
Pretravel	.063″ ±.024″ (1.60 ±0.61mm)
Total Travel	.100 Nom. (2.54mm)
Operating Force	2½ oz. typical (70 grams)
Life	10 x 10⁶
Mounting	Printed Circuit Board (no coverplate)
Feel	Linear — positive stop

ELECTRICAL SPECIFICATIONS

Contact Rating:	
DC Resistive	3W max.
AC Resistive	3 VA max.
Current switching	0.125A max.
Current carry	0.5 max.
Voltage	28V max.
Initial Contact Resistance — milliohms	200 max. (typically 25m)

MX SERIES — LOW PROFILE DIN-COMPATIBLE GOLD CROSSPOINT CONTACT



- Low profile — .689″ from PC board to the center point of home row keycap top with lo-pro spherical cylindrical sculptured keycaps.
- Linear or tactile feel — positve stop.
- Full Travel — .160″.

LOW PROFILE MX MODULES

Part Number	Description
MX1A-11NN	Standard Force, Linear, Face Plate Mount.
MX1A-21NN	Higher Force, Linear, Face Plate Mount.
MX1A-11NW	Standard Force, Linear, PCB Mount.
MX1A-21NW	Hgher Force, Linear, PCB Mount.
MX1A-A1NN	Standard Force, Tactile, Face Plate Mount.
MX1A-B1NN	Higher Force, Tactile, Face Plate Mount.
MX1A-A1NW	Standard Force, Tactile, PCB Mount.
MX1A-B1NW	Higher Force, Tactile, PCB Mount.
MX1A-31NN	Alternate Action, Face Plate Mount.
MX1A-31NW	Alternate Action, PCB Mount.

MECHANICAL SPECIFICATIONS

Rest Height ("A")	.689″ ±.015″ (17.5 ±0.38 mm)
Pretravel	.080″ ±.025″ (2.03 ±0.64 mm)

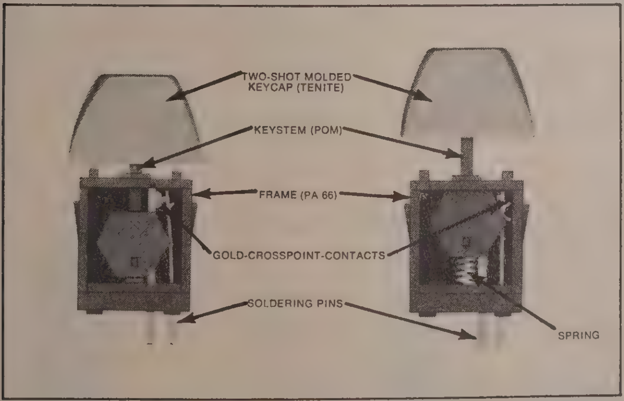
Operating Force	2.5 oz. typical (70 grams)
Life	20 x 10⁶
Mounting	Cover Plate
Feel	Linear or tactile feel — positive stop

ELECTRICAL SPECIFICATIONS

Contact Ratng:	
DC Resistive	3W max.
AC Resistive	3 VA max.
Current switching	0.125A max.
Current carry	0.5A max.
Voltage	28V max.
Initial Contact Resistance — milliohms	200 max. (typically 25m)

M4/M5/M6 SERIES — REGULAR PROFILE GOLD CROSSPOINT KEYBOARD SWITCHES



The proven design concept — crossed knife edge contact configuration — provides high force per unit of contact area and virtually eliminates contact closure interference by contaminates. Precious metal contact material (W/E Alloy #1) consists of 69% gold, 25% silver and 6% platinum. Contact interfaces are inert to chemical action with resultant low contact resistance (typically 25 milliohms).

REGULAR PROFILE KEYSWITCH

Part Number	Operating Force	Stem Angle	Action
M41-0100	6 oz.	0°	Momentary, Lighted, 1A Contact
M41-0103	2½ oz.	0°	Momentary, Lighted, 1A Contact
M51-0182	2½ oz.	10°	Momentary, 1A Contact
M51-0143	6 oz.	0°	Momentary, 1A Contact
M51-0229	4 oz.	0°	Momentary, 1A Contact
M61-0120*	2½ oz.	0°	Momentary, 1A Contact
M61-0800	2-4½ oz.	0°	Alternate Action, 1A Contact
M62-0100	2-4½ oz.	0°	Momentary, 2A Contact

* Replaces M61-0100

MECHANICAL SPECIFICATIONS

Operating Force	2½ oz. ±½ oz. Std. (Also available in forces from 2 oz. and higher)
Pretravel	.085 ±.030 Std. (Alternate action version pretravel .030″ to .065″)
Total Travel	.160 ±.020 Std.
Key Module Case Material:	Thermoplastic (Nylon)
Temperature	Operating — 0°/60°C Storage — −35°C/65°C

ELECTRICAL SPECIFICATIONS

Contact Rating (Form A contacts)	
DC Resistive	3W max.
AC Resistive	3 VA max.
Current	0.125 amp. max. switching 0.5 amp. max. carry
Voltage	28V max.
Initial Contact Resistance	200 milliohms max. (typically 24 milliohms)

STANDARD 77-KEY KEYBOARD

Flexible adhesive backer, Part No. V1G1-0019; Contact factory for other versions, including full-logic rigid backer, and for available housing.

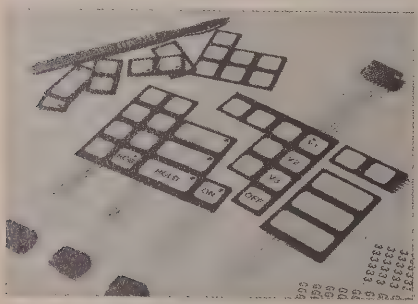
MEMBRANE ELECTRICAL SPECIFICATIONS

Maximum ratings: 100 ma @ 35 VDC 1.5 watts. Circuit resistance (closed): 100 ohms (max) for screened silver; 50 ohms (max) for etched copper; (open): 10 megohms (min). Circuit capacitance: 10 pf (typ). Contact bounce (at 100 ohms): 10 msec (typ). Life expectancy (operations): 5 x 10^6 (min).

STANDARD SWITCHES

The 4 x 3 panel has the numerals 0 to 9, with * and #, while the 4 x 4 panel provides four additional key positions with alpha characters A — D. Or, you can buy either without graphics for custom graphic capability.

PROTOPAD MEMBRANE PANELS



As a design aid to the Engineer considering a membrane panel application, Cherry provide a cost effective prototype answer with their 'Protopad' membrane development series.

Features

- Key pad configurations of 1 x 4, 2 x 4 and 4 x 4 for economic grouping.
- Modular design provides layout matching in both the horizontal and vertical axis.
- Colour co-ordinated graphics, beige key pads on dark brown background, for balanced contrast.
- Self adhesive backing for ease of mounting.

Protopad keys may be progressively cut away toward the flex tail without disturbing circuit continuity to the remaining keys.

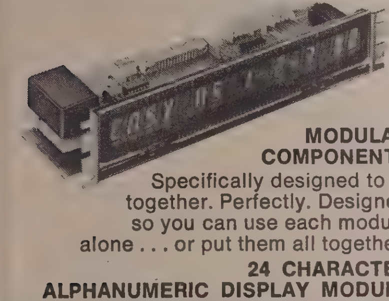
CHERRY Displays

TECHNICAL INFORMATION

- 100,000 hour display life. • Wide viewing angle.
- Baud rates from 300 to 9600 selectable on back panel.
- RS232C, RS422, 20 ma loop, or TTL parallel interface operation.
- End of Line Modes — left entry with automatic carriage return; writeover carriage return, horizontal scroll.
- Self-test mode: ASCII character set scrolled across panel.
- Environmental Operating Range: 0-70°C, 5-95% relative humidity (non-condensing).
- Designed to meet NEMA Pub. ICS 2-230 standard for EMI noise immunity (showering arc transients).
- Metal enclosure wth sealed bezel compatible with NEMA 12 standards.
- 115/220 VAC • Full address capability

ALPHANUMERIC DISPLAY SYSTEMS



MODULAR COMPONENTS
Specifically designed to fit together. Perfectly. Designed so you can use each module alone . . . or put them all together.

24 CHARACTER ALPHANUMERIC DISPLAY MODULE
A totally self-contained system. Complete microprocessor controlled circuitry includes drivers, character generator, refresh memory and provides all standard functions.

Result	Characteristics
W424-1051 . . . requires 12 VDC only and accepts parallel or serial input — serial in either RS232 or 20 ma current loop. Selectable baud rates.	Receives only, in parallel or serial.
W424-1053 . . . requires 12 VDC only and accepts parallel or serial input (RS232 or 20 ma current loop.) Selectable baud rates. Fully interactive with half and full duplex operation capability.	Receives in parallel or serial. Sends in serial only.
W424-1058 . . . requires 12 VDC only and accepts binary input, 6 bits and strobe.	Will output a total of 64 messages, each being as long as 32 bytes. User can program his own message EPROM (2716). Requires no ASCII code or serial input.

W424-105D — It can display up to 256 messages that have been stored in a nonvolatile, battery backed CMOS RAM.

W424-4040 — On a 4-line by 24 character display, the W424-4040 can show any of the 256 messages stored in the battery backed CMOS RAM memory. Each message may be up to 32 characters in length.

GAS DISCHARGE BAR GRAPH DISPLAY

The single wide bar graph is 10 inches long and is viewable at 50 feet. The elements are bussed together in a 5-phase arrangement for high brightness and provide for a flicker-free continuous appearing display.

Two separate graphs give continuous glow on precisely controlled bar lengths. The bars operate independently of each other because of separate connections. Each bar graph can be viewed from both directions at once, or from either direction. Two separate pieces of information can be viewed in each bar as long as the total elements do not exceed 201. Cathodes in each bar are bussed together in a 3-phase arrangement.

Militarized Full Travel Keyboards

These rugged custom units meet military requirements for vibration, shock, fungus, water, dust, salt spray, EMI/RFI, thermal, blast, EMP, high/low temperature, and key cycle life. Full tempest shielding is available.

Flex-Key engineers its militarized full-travel keyboards for optimum reliability and continuous operation while meeting all human factor requirements. These conductive elastomer keyboard assemblies provide command, control, communications, and data entry functions and have proven themselves in many demanding applications.

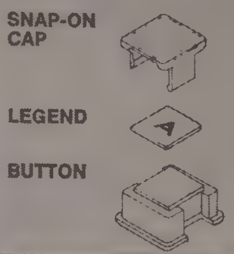
Legends, Specifications, Prices



Standard Legends

All legended buttons shown here are two-shot molded. Blank areas are self-legend style buttons with snap-on caps as shown at right. The legend card with adhesive backed, printed inserts has additional blank inserts for dry transfer lettering. Inserts are 0.275" square. Snap-on cap projects 0.015" above keyboard.

Specifications

Rating Criteria

Rating At 24 VDC: 10 milliamps, resistive.

Contact Resistance: Compatible with MOS, TTL and DTL

Voltage Breakdown: 250 VAC between mutually insulated parts.

Life Expectancy: 3,000,000 operations per button.

Contact Bounce: Less than 4 milliseconds at make, 10 milliseconds at break.

Operating Temperature: -40° C to +80° C.

Materials and Finishes

Housing: ABS Plastic (Black).

Button: ABS Plastic (White with Molded-in Black Legend; White Self-Legend Style.

Snap-On-Cap: Clear Polycarbonate.

Terminals: Copper Alloy, CDA No. 725.

Operating Features

Button Travel: 0.015" nominal total travel.

Typical Operating Force: 350 grams.

Note:

The 2 out of 7 (8) "Telephone Code" was developed primarily for audio tone generation. To discuss critical data input applications, please contact Grayhill.

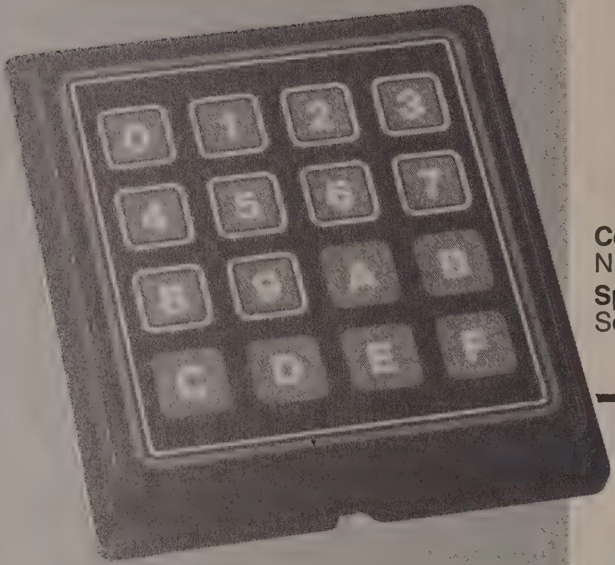
Sealed And Lighted Keyboards

1/2 Inch Button Centers—Flange Mounted Keyboards 12, 16, Or 20 Buttons



Features

- Colorful
- Sealed Contacts
- Panel Seal Option
- Lighted
- Audible Contact
- Tactile Response

Code and Truth Tables—See GRAYHILL Catalog Number One.

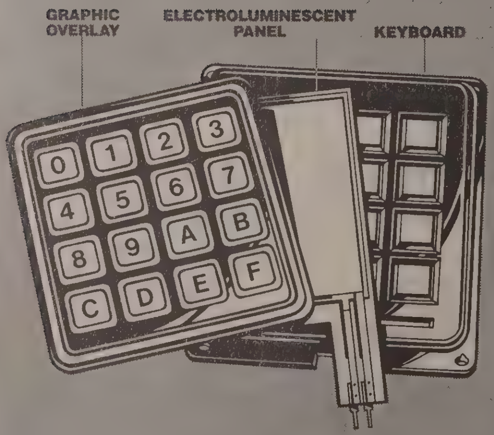
Specifications—See the Specifications listed for the Series 83, 84 and 86 Keyboards.

Dimensions

See also Series 86 on previous page.

No. Buttons \ Dim.	Outside	Thru Panel	Hole Centers
12	2.20 x 3.00	1.99 x 2.69	2.00 x 2.80
16	2.70 x 3.00	2.49 x 2.69	2.50 x 2.80
20	3.20 x 3.00	2.99 x 2.69	3.00 x 2.80
All	Ht. = .360*	Corner .150R	.093 Dia.

*Height above PC Board. Height above board for flange is .128″. Terminals are .025″ square, .280″ long, spaced on .100″ center, in line across top of keyboard, .220″ below center line of mounting holes.



Sealed Contact System

The snap-dome contact system is sealed by a polyester graphic overlay in the lighted, as well as unlighted, keyboards. The overlay is second surface printed and is colorful yet waterproof and washable with most cleaning solutions.

Panel Seal

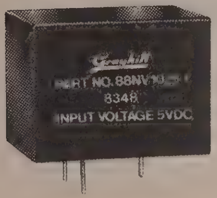
Lighted as well as unlighted keyboards can be sealed to the panel using an optional panel seal gasket. A gasket is available for either topside or sub-panel mounting. The first is .094″ thick and the second is .062″ thick. Both are made of cellulose fiber, foam, nitrile rubber.

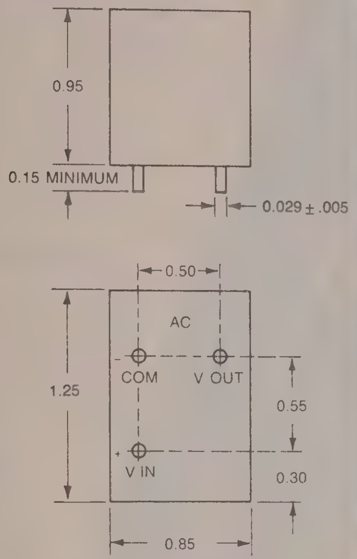
Light

Lighted keyboards contain a thin electroluminescent panel located beneath the graphic overlay. The panel is terminated in a 3 inch flexible tail with flat solder tab pins measuring .150″ x .025″ x .010″. The phosphor particles in the panel are excited by alternating current of sufficient voltage and frequency: approximately 130 Vac, 400-600 Hz.

Series 88 Keyboards

DC To AC Inverters For Lighted Keyboards





To achieve the 130 Vac, 400-600 Hz input for the electroluminescent panel using a DC source requires an inverter. It is a three terminal device: DC voltage input, AC voltage output, and common. For your convenience GRAYHILL carries small quantities of 3 inverters, designed for the 3 keyboard sizes using a 5 Vdc source. For input voltages of other than 5 Vdc or for inverter source recommendations, contact GRAYHILL.

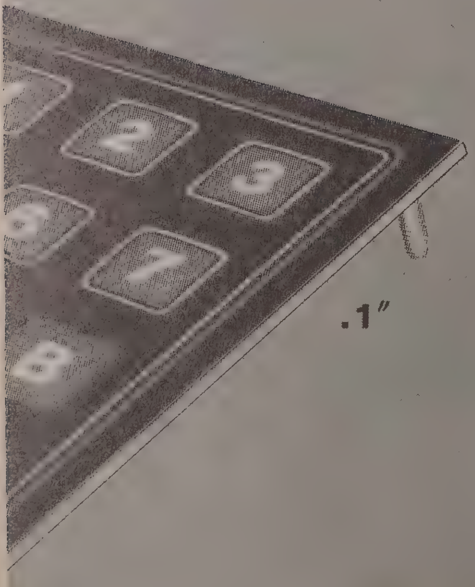

Graphic Overlay Characteristics

The legend is printed on the second surface of a graphic overlay providing maximum legend protection. The graphic overlay is made of a polyester material which will withstand high humidity and which has excellent resistance to solvents. It is also resistant to scratching, marring, and dulling of the surface from contact by fingernails, wiping cloths, and cleaning materials.

Solvent Resistance: The graphic overlay is resistant to attack from water, petroleum oil, alcohols, and aliphatic hydrocarbons. In addition, it will not be attacked by any of the following common solutions: 5% acetic acid, 5% citric acid, 2% detergent solution, soapy water, 30% hydrogen peroxide, wine, beer, whiskey, coffee, cocoa, milk, tomato juice, lemon juice, and other materials of similar nature.

Although the overlay may not be affected by hydrocarbons, ketones, and freon, it is not recommended that keyboards be immersed or subjected to prolonged contact with these solvents. Depending on how the keyboard is mounted, extensive contact by these chemicals with the edges of the keyboard may affect the adhesive beneath the overlay.

Graphics: The graphic legend is applied by a printing process which makes custom legends of infinite design and color combinations an easy option.

Series 89

Mounting

The Series 89 low profile keyboards are provided with adhesive or studs or a combination of both. The adhesive mounting is a pressure sensitive material with a protective backing. To mount, peel off the back and set keyboard in place. The mounting studs are countersunk, non-turn studs which are not visible from the front of the keyboard. Mounting nuts are not provided.

Specifications

Rating Criteria

Rating At 24 VDC: 10 milliamps, resistive.

Contact Resistance: Compatible with MOS, TTL and DTL

Voltage Breakdown: 250 VAC between mutually insulated parts.

Life Expectancy: 3,000,000 operations per button.

Contact Bounce: Less than 4 milliseconds at make, 10 milliseconds at break.

Operating Temperature: -40°C to +80°C.

Materials and Finishes

Base (PC Board): FR-4 glass epoxy.

Graphic Overlay: Polyester.

Spacer (beneath overlay): Polyester.

Terminal Pins: Copper alloy, CDA No. 725.

Adhesive Mounting Sheet: 3 mil Polyester, coated on 2 sides with acrylic adhesive.

Mounting Studs: Phospher Bronze, Tin plated.

Operating Features

Button Travel: 0.015″ nominal total travel.

Typical Operating Force: 260 grams nominal.

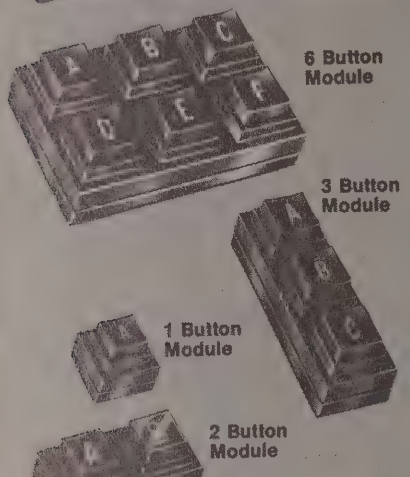
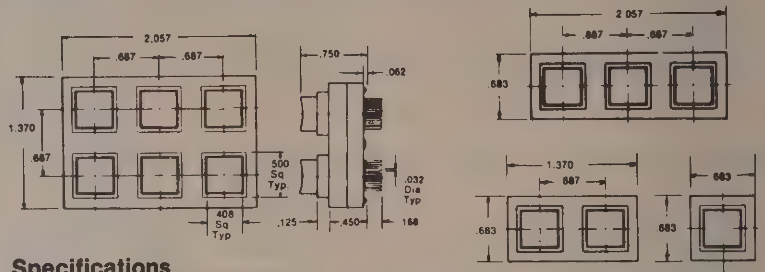
Modular Keyboards
Series 82—Long Stroke, PC Mountable

- **Create Your Own Keyboard Configuration**
- **Modules Retain 0.687 Centers When Placed Side By Side**
- **SPST To 4PST Under Each Button**





Specifications

OPERATING FEATURES:

Button Travel: 0.130" total travel.

Overtravel: 0.080" nominal.

Operating Force: 8 ± 3 ounces (dependent upon number of poles).

MOUNTING:

Modules are designed to plug into any printed circuit board from 1/16" to 1/8" thick.

Modules can be stacked horizontally or vertically for any combination of button array and still maintain 11/16" button centers.

RATING:

Rating at 5 VDC: 100 milliamps.

Contact Resistance: 25 milliohms or less on a new switch.

Voltage Breakdown: 250 VAC between mutually insulated parts.

Insulation Resistance: 1,000 megohms minimum.

Life Expectancy: 1,000,000 operations.

Contact Bounce: 10 milliseconds or less for the life of the switch.

Keyboard Modules The Stackable SYSTEM 87

- Low profile
- Long life — 3,000,000 operations
- Positive audible and tactile feedback

Select the modules you require to build your own keyboard design. The modules can be stacked side by side on your prototype PC board in any configuration that is required. ½-inch button centers will be maintained.

Circuitry is single pole/common bus in the single row switches and single pole/common bus or matrix code in the 3 x 4 and 4 x 4 keyboard pads.

Prototype and Short Run Production

Arrange the modules in the required array on your PC board. Snap-on cap allows user to legend button with inserts from legend card and/or dry transfer lettering. For moderate quantities legends can be printed on the button by Grayhill. Printed legends will closely duplicate your prototype legend.

High Volume Production

Grayhill will provide a custom keyboard. The modules will be arranged and the board terminated to your specifications.

Legends — your choice of printed or molded-in legends; button color and legend color.

Prototype Legends

GIVE THEM A PROFESSIONAL APPEARANCE

The System 87 modules described can be easily legended by you. The clear, protective, snap-on cap removes readily without special tools. To assist you, GRAYHILL has a legend card (Part No. 87AC2046) which includes all the popular legends and symbols on a clear insert, die-cut to fit the button. Type style is News Gothic Condensed.

Or, create your own legends. The GRAYHILL card contains blank inserts for your special needs. For this purpose, sheets of dry transfer lettering are also available in type style and sizes similar to the chart below. A sheet of small type is part number 87DT2096-088; medium is 87DT2096-125; and large is 87DT2096-187. You can also prepare and cut your own legend inserts. They should be cut to fit a 0.275" square surface.

ORDERING INFORMATION

All numbers describe self-legend style. Contact Grayhill for other legends.

IEE

Planar Products Division

For over fifteen years IEE has been the quality leader in keyboards for commercial, industrial and military applications. Today more than 100,000 are in use worldwide, performing reliably despite constant exposure to dust, dirt, corrosive atmospheres, submersion in water, extremes in altitude, wide temperatures and humidity ranges.

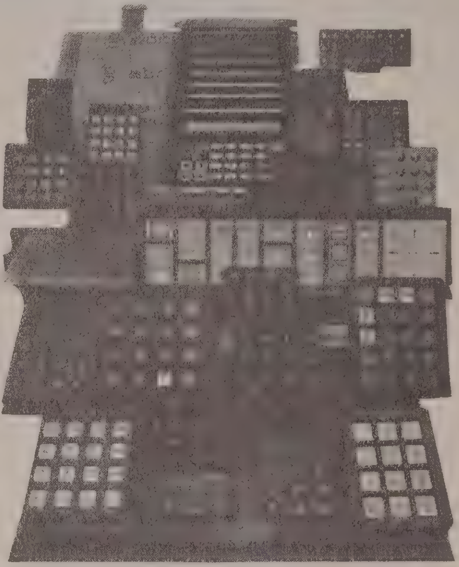
A continuing dedication to high quality is the reason for our success. This can be seen in features like high grade polyester, a special sealing process to keep out moisture, and etched circuitry instead of silkscreened ink for low contact resistance, better quality and longer life. The results are switch products with the highest reliability — with most exceeding many military test requirements. Keys to the maintenance of this reputation for quality are the talents of our engineering staff, the efficiencies of large scale manufacturing, and an exceptionally rigorous quality assurance program.

STANDARD KEYBOARDS

IEE's wide selection of standard keyboard models offers you an opportunity to save by consulting with our engineering staff and designing in our standard, keyboards in what you might have considered a custom application. Our standard keyboards include: Hi-Rel and Industrial PANELSWITCHES™, THINSWITCHES™, SEALEDSWITCHES™, TELSWITCHES™, THINPANEL™, and ASCII Keyboards.

CUSTOM KEYBOARDS

Custom configurations include: special coding/output, multiple color combinations; any number of custom arrangements; keyboards that are resistant to highly caustic solutions; stainless steel construction; EMI/RFI shielding; varying actuation force and key travel; movable legends and rigid backs, wide temperature range, high humidity. Incandescent, LED and electroluminescent backlighting is also available.



LOW COST
14 MESSAGES IN ONE DISPLAY

AUDI DASHBOARD

PROJECTION DISPLAYS/PROSWITCHES

TITAN™ Projection Displays and PROSWITCHes are the world's most extensively used family of graphic displays. The line offers many features not found in other display technologies

- The most cost effective system for displaying any image in any color
- Displays can be programmed to feature from 11 to 48 messages
- Over 15 models with display screens ranging from .076" to 3.375"

Recent advances include modular lamp assemblies and a new lens system for greater illumination. Our PROSWITCH™ series combines the features of projection displays with a tactile, membrane or opto switches. Projection displays and PROSWITCHes can save panel space, provide a significant reduction in hardware and wiring, and a noticable improvement in man/machine interface. Commercial and ruggedized configurations are available.

DISPLAY SUB-SYSTEMS

We have the capability to engineer the best man/machine interface solution using a wide spectrum of display technologies. Recent programs have involved meeting the custom requirements for a wide range of commercial, industrial and military applications.

Display accomplishments include a ruggedized 10" square interactive panel with over 1400 color and graphic messages, support electronics, and single interface connection. Another program involved a Touch Display militarized with a high MTBF, RFI shielding, and meeting exacting MIL vibration standards.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

Mantex membrane switches and keypads offer differences you can feel, hear and see.

Differences you can feel include touch variations, surface finishes and embossed outlines. Hear the keystroke with audible feedback. See the difference that top quality color matching, texturing, graphics and mar-resistant surfaces can make to your finished product. Mantex offers all these differences plus price, fast turnaround, reliability and quality advantages made possible by vertical integration.

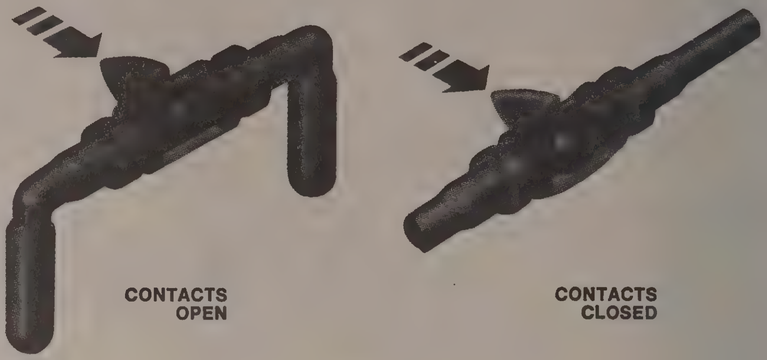
MEI DN & DNT SERIES KEYSWITCHES

SEALED CONTACTS

DN and DNT switches work in your product's environment because the contacts are sealed in a silicone rubber tube. And since they are sealed, the contacts can be silver with its lower cost and cleaner electrical characteristics. That's why DN reliably tests to over 15 million cycles, and DNT to over 50 million cycles.



DN SERIES

FOR DEMANDING INSTRUMENT PANEL APPLICATIONS

The DN series keyboard switches, because of their versatility of configuration, are the ideal choice for almost any front panel key array. Options include lighting, double pole, alternate action, sub-panel mounting, boot protection and numerous relegendable and double-shot keytops. The very low profile, sealed contact and full key travel features make the DN an excellent "operator friendly" alternative to touch panels.

DNT SERIES

HIGH QUALITY, LOW COST, FULL TRAVEL KEYBOARDS

The DNT series because of its exceptional life and sealed contacts offers a low cost alternative to a solid state keyboard. The long travel and break-away touch are design features providing the maximum operator satisfaction. Profile height, while greater than the DN, is still low enough to allow construction of keyboards meeting the ergonometric standard of 30 mm height of home row keys. DNT switches may be used with or without a metal sub-panel.

SPECIAL ARRAYS

Both DN and DNT keyboard switches can be delivered configured in a custom array with properly legended keytops in a steel or aluminum sub-panel. Such arrays can simply be placed on the PCB with other components and wave soldered followed by a water wash.

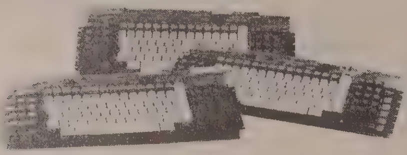
MICRO SWITCH KEYBOARDS...

Quality and Reliability, each carries a 1% Acceptable Quality Level and a 2-year Warranty*

Until now getting a keyboard at the price you needed could have meant giving up the kind of performance you wanted. Not anymore. Now, in addition to our time-proven solid state Hall effect offerings, you can specify full travel capacitance or contact membrane keyboards in low profile (DIN standards) or touch panel membrane keyboards.

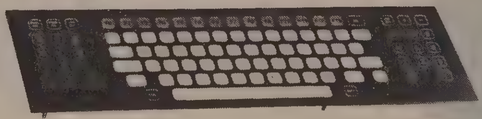
And you get them all — custom or off-the-shelf — backed with the experience and full application support that's been a MICRO SWITCH tradition.



SD Series Hall Effect Keyboard (104SD30)

FEATURES

- Solid state Hall effect keys with a single chip microcomputer
- 4-mode 8-bit USASCII code assignment . . . Key array in 4-language configurations
- Parallel data 8-bits and strobe . . . 50 microseconds nominal strobe pulse
- Serial output . . . 1-start, 8-data, even parity, 1-stop (TTL compatible) with choice of 4 baud rates
- Electronic shift lock with LED indicator
- Choice of 4-tones for audio feedback
- Manual/Auto repeat for designated keys . . . Repeat key controls repeat for other selected keys
- 1-function key . . . positive or negative logic
- 1-shift lock key, 2-shift keys, 1 control key, 1 alternate action caps lock key
- 121 possible coded keys, 6 mode keys, 1 function key
- 14 LED's in top row with current limit resistors
- 8-byte FIFO (first-in first-out) character storage
- N-key rollover
- Operates on a single 5 VDC supply
- MCBF . . . 20 billion operations

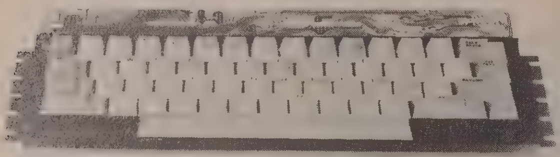


TC Series Touch Panel Keyboard (TC 454)

FEATURES

- Customized design. Graphics, colors, styles, and formats can be selected to achieve optimum clarity of operating functions
- Advanced construction and manufacturing processes. Reflects the MICRO SWITCH commitment to quality, reliability and performance
- Tactile feedback. Snap-disc provides positive feel of switching action; embossed touch surface enables positive finger positioning
- Micro-travel (.016 in. nominal)
- Environmentally sealed. Protects against contamination of switch contacts
- Provides both serial and parallel data outputs
- Pin-for-pin compatible EPROM capability
- Operates on a single 5 VDC supply
- Ultra-low profile membrane easily adapts to styling and package size requirements
- Channel venting. Prevents temperature/altitude changes from affecting operating characteristics

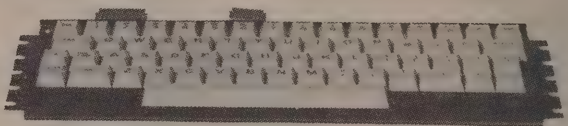
* One year warranty



Low Profile Capacitance-membrane Keyboard (58ST13-1)

FEATURES

- European ergonomic standards compliance
- Only 19,05 mm (.750″) nominal profile
- 3,2 mm (.125″) nominal key travel
- N-key rollover
- Parallel/serial data outputs
- Environmentally sealed membrane protects against liquid spills, airborne dust and moisture
- Internal venting protects from the effects of ambient temperature and pressure changes
- Operator preferred silent-tactile feel
- Electronic shielding reduces problems caused by electrical noise, cross coupling and stray capacitances
- Low power consumption



Contact-membrane Keyboard

FEATURES

- European ergonomic standards compliance
- Only 19,05 mm (.750″) nominal profile
- 3,2 mm (.125″) nominal key travel
- Environmentally sealed membrane protects the contacts from contamination
- Internal venting protects membrane from effects of ambient temperature/pressure changes
- Operator preferred silent-tactile feel
- Adherence to good human factor principles promotes maximum throughput

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A

AC	alternating current
A/D	analog to digital
ADC	analog to digital converter
ADP	automatic data processing
AF	audio frequency
AFC	automatic frequency control
ALGOL	algorithmic language
AM	amplitude modulation
AND	a logical operator
AQL	acceptable quality level
ASCII	American national standard code for information interchange
AWG	American wire guage

B

BALUN	balanced to unbalanced
BASIC	beginners' all-purpose symbolic instruction code
BCD	binary-coded decimal
BNC	baby "N" connector
BUS	basic utility system

C

CAD	computer aided design
CAM	computer aided manufacture
CATV	cable television or community antenna television
CERMET	ceramic metal element
Comm.	communications
CMOS	complementary metal-oxide semiconductor
CPS	characters per second
CPU	central processing unit

D

D/A	digital to analog
DAC	digital to analog converter
DC	direct curent
DIL	dual in-line
DIP	dual in-line package
DPM	digital panel meter
DTL	diode transistor logic

E

EDP	electronic data processing
EBCDIC	extended binary coded decimal interchange code
EEPROM	electrically erasable PROM
EMC	electromagnetic compatibility
EMI	electromagnetic interference
EPROM	electrically programmable ROM
ESR	equivalent series resistance

F

FEP	fluorinated ethylene propylene Copolymar, 200° Teflon
FET	field-effect transistor
FM	frequency modulation
FORTRAN	formula translator

G

GaAsFET	gallium arsenide field effect transistor
GPIB	general purpose interface bus

H

HF	high frequency (3 to 30 MHz)
HIPOT	test, measurement and diagnostic equipment
HLL	high level language
HV	high voltage
Hz	Hertz

I

IC	integrated circuit
IF	intermediate frequency
IO	input/output (devices)
IR	insulation resistance (or) infrared

J

JFET	junction field effect transistor
JMOS	junction metal oxide semiconductor

K

kHz	kilohertz (10^3 hertz)
KSR	keyboard send receive

L

LC	inductance capacitance
LCD	liquid crystal display
LED	light-emitting diode
LF	low frequency (30 to 300 kHz)
LSI	large scale integration
LVDT	linear velocity displacement transformer

M

MATV	master antenna television
μF	microforad
MHz	megahertz
MOS	metal oxide semiconductor
MOSFET	metal oxide semiconductor field effect transistor
MOV	metal oxide varistor
MPU	microprocessor unit
MSI	medium scale integration

N

NBS	National Bureau of Standards
NIM	nuclear instrumentation module
NOR	not OR

O

OEM	original equipment manufacturer
OR	a logical operator

P

pF	picofarad
PC	printed circuit
PCB	printed circuit board
PIN	positive-intrinsic-negative (transistor)
PLA	programmable logic array
PPI	plan position indicator
PROM	programmable read only memory
PUT	programmable unijunction transistor

Q

QAM	quadrature amplitude modulation
Q (meter)	quality-factor meter

R

RAM	random access memory
RC	resistance-capacitance
RFI	radio frequency interference
RMS	root mean square
ROM	read only memory
RF	radio frequency
RFC	radio-frequency choke
RFI	radio-frequency interference
RTD	resistance-temperature detector
RTL	resistor transistor logic
RTV	room temperature vulcanizing
RW	read/write

S

SAS	silicon asymmetrical switch
SBC	single board (micro) computer
SBS	silicon bilateral switch
SCR	silicon-controlled rectifier
SIP	single in-line package
SSI	small scale integration
SSR	solid state relay
STL	Schottky transistor logic

T

TC	temperature coefficient
TCXO	temperature compensated crystal oscillator
TFE	tetrafluoride ethylene propylene Copolymer, 250° Teflon
TTL	transistor-transistor logic
TTY	teletypewriter

U

UHF	ultra high frequency (300 MHz to 3 GHz)
UL	Underwriters Laboratory
UPS	uninterruptible power supply

V

VAC	volts (of) alternating current
VAR	volt-ampere reactive
VCR	video cassette recorder
VDC	volts (of) direct current
VHF	very high frequency
VHSIC	very high speed integrated circuit
VLF	very low frequency (3 to 30 kHz)
VLSI	very large scale integration
VRM	voice recognition module
VTVM	vacuum tube volt meter
VU	volume unit
VSWR	voltage standing wave ratio

W

WPS	word processing software

Y

YIG	yttrium iron garnet

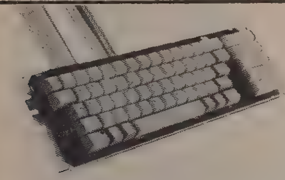
OAK KEYBOARDS, KEYPADS, KEYSWITCHES

OAK STANDARD 81 POSITION KEYBOARD

Oak's FTM full-travel membrane keyboard includes a 60-key typewriter layout, an 11-position numeric keypad and 10 function keys. Sculptured keycaps are available in beige or flat gray. Operating voltage: 1.0 to 30 V. Operating current: 50 microamps to 20 miliamps per single switch. Interconnection is row/column. Life rating exceeds 100 million per key. Pretravel: .080″ ± 0.020″ and total travel is 0.160″. Keyboards are environmentally top-sealed.

The encoded version features a choice of 2-key rollover of Oak's E^3 (entry-error-elimination) system, a multi-key rollover function with phantom key lockout for all data keys. The encoder debounces all keys and permits selection of auto repeat for all noncontrol keys. The board is 4-mode with ASCCI output codes and parallel transmission with a serial option.

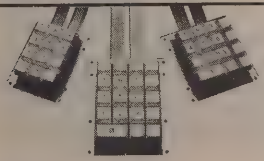
Contact your nearest Oak sales office for complete details and specifications.



LOW PROFILE FTM KEYBOARD

Measuring just 19.9 mm from the center of the home row keycap to the bottom of the aluminum baseplate, Oak's low profile FTM keyboard allows designers to place the FTM in an enclosure and still meet the international 30 mm DIN standards. One of the most notable features of the keyboard is a rocker mechanism which gives a distinct nonfatiguing feel for the keyboard operator. Other features include LED indicators for shift lock and function keys, variable operating force, RFI/EMI/ESD protection, single tail termination and custom encoding electronics.

Contact your nearest Oak sales office for complete details and specifications.



FULL TRAVEL MEMBRANE KEYPADS

The Oak FTM keypad incorporates human-engineered feel and touch and is useful in a wide range of data entry applications. With life expectancy rated at 100 million cycles per key, the keypad features full travel design (0.160″). The pretravel and overtravel features promote operator ease, input accuracy and low fatigue. The keypad is front sealed to protect against spilled liquids and other contaminants. EMI/RFI shielding is available on all standard keypads.

Contact your nearest Oak sales office for complete details and specifications.

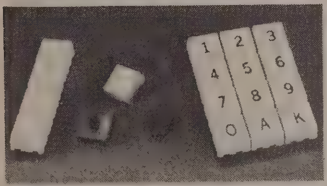
MEMBRANE SWITCHES

Oak TIP switches offer the ultimate in environmental resistance and flexibility. TIP switches are available in a variety of sizes, colors and designs. Tactile feel available.

The TIP switch product line consists of three designs. Type A and B products use rigid single-or double-printed circuit boards. Operating voltage: 1 to 50 (AC or DC). Operating current: 0.05 to 100 milliamps.

Type C products are completely film-based, using a non-rigid polymer substrate instead of a PC board. Termination is achieved via a "tail" which is compatible with standard commercial connectors. Operating voltage: 1 to 30 (AC or DC). Operating current 0.05 to 50 milliamps.

Contact your nearest Oak sales office for complete details and specifications.

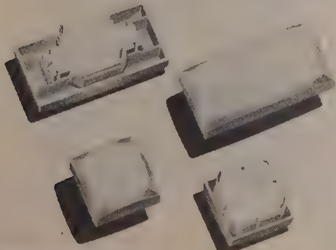


SERIES 225 LOW PROFILE PUSHBUTTON KEYBOARD SWITCH

Oak's series 225 switch is fully compatible with front panel styling and is available in five standard colors with a wide choice of legends. Switches with integrated LED's can be incorporated wherever positive visual confirmation of data entry is required. These unique microprocessor compatible switches are sealed to avoid contamination during wave soldering and immersion cleaning.

Series 225 is supplied in several styles with either .300″ or .225″ profile. Life rating exceeds 1 million cycles for operation over the range of −25° to +75°C. Max. loads are 5 V (AC or DC) @ 100 mA.

Contact your nearest Oak sales office for complete details and specifications.



SERIES 415 KEYBOARD SWITCH

Oak's series 415 switch is available in both single and double station styles. Standard sizes: .610″ square and .720″ square. Double station styles: .610″ x 1.235″ and .720″ x 1.470″.

This series mounts directly to a PC board. Keys are available in white, black, blue, red, and gray. Standard markings are numbers 0-9 or blank. Special markings and colors are available.

Minimum operating life is 10 million cycles under rated loads of 5 V (AC or DC) @ 100 mA.

Contact your nearest Oak sales office for complete details and specifications.

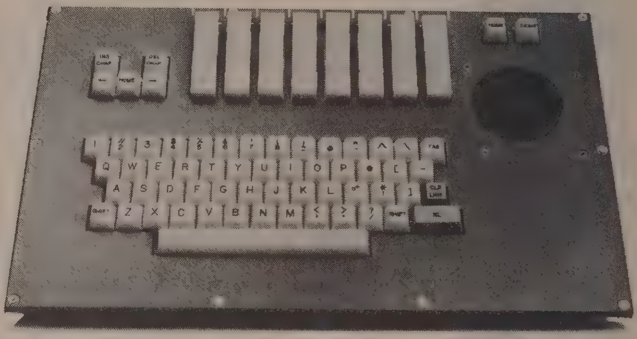
MILITARIZED KEYBOARD/ BALL TRACKER ASSEMBLIES

INSTALLED IN CONSOLES AS A REMOVABLE ASSEMBLY FOR EASY ACCESS

INCLUDES

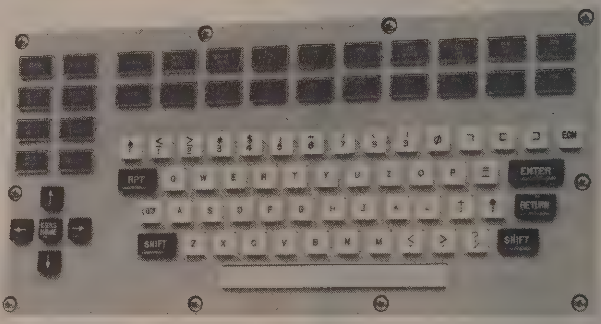
- 32 Function Switches For Fast Control Action
- Orbit Instrument 2″ Diameter Ball Tracker With 256 Output Pulses Per Revolution Of The Ball
- Bi-Directional Data Bus
- Qualified To MIL-STD-810 For Humidity, Salt Fog, Shock, Vibration, Dust And Fungus
- Ball Tracker Can Be Quickly Detached From The Keyboard



BACK LIGHTED KEYBOARDS

These Custom Keyboards Feature

- Low Profile Design
- Sealed For Drip-proof Environments
- Relegendable Function Keys For Added Flexibility
- Any Key Can Be Backlit
- Custom Encoding
- Tactile Feel



CUSTOM PANEL DESIGNS

USING

- Orbit Low Profile Snap Action Switch Technology
- Switches Can Be Split Legend Or TRI Split
- Rugged Design Construction
- Relegendable Keycaps

PROJECTION READOUT DISPLAYS
"The Link Between Man and Machine"

ORBIT INSTRUMENT CORP.

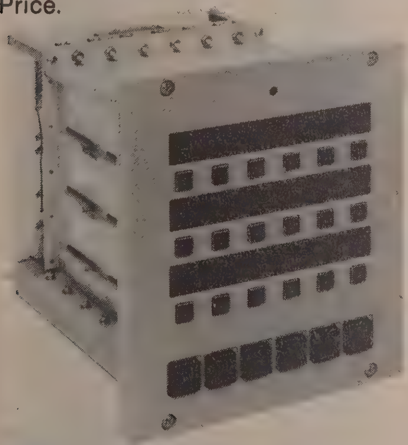
CORPORATE FACILITIES:
80 CABOT COURT, HAUPPAUGE, L.I., NY 11788, TELEPHONE: (516) 435-8300
6431 GLOBAL DRIVE, CYPRESS, CA 90630, TELEPHONE: (714) 527-0561

SERIES 62000 REAR PROJECTION READOUTS

These Multi-Message Readouts Have Become World Renowned For Their Good Looks When Displaying Graphic Symbols As Well As Alpha-Numeric Data.

- The Series 62000 Is Capable Of Displaying 24 Or 48 Projected Images.
- Only 5 VDC Required.
- Time Tested To Withstand Humidity, Temperature, Shock And Vibration.
- A Distinct Advantage In Areas Of Limited Space.
- Switches Can Be Made An Integral Member Of Each Readout.

Features Like These Make It Difficult To Find Another Display That Offers So Much At a Comparable Price.



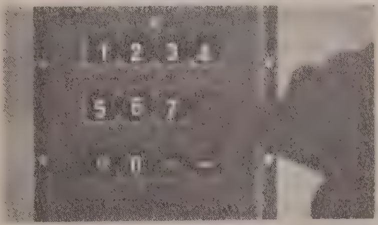
MULTI-LEGEND MATRIX DISPLAYS

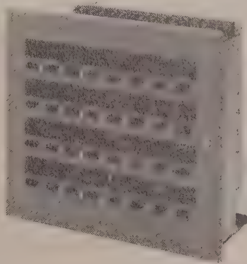
Data Subsystems incorporating the Series 62000 Readout can be arranged in a number of different matrices with the ability to present great amounts of pictorial or alpha numeric information.

Typically a 4 row by 8 column matrix can display over 1500 different legends.

SERIES 61000 DRIVER DECODERS

- Used In Conjunction With Orbit's Multi-Message Readouts.
- The Selection Of Any Desired Message Will Be Displayed When The Driver/Decoder Receives A (BCD) Binary Coded Decimal Signal From A C.P.U. Or External Logic Source.
- Orbit Driver/Decoders Assure Our Customers That Proper Voltage Levels Will Be Maintained Thus Extending The Life Of Orbit Rear Projection Readouts.

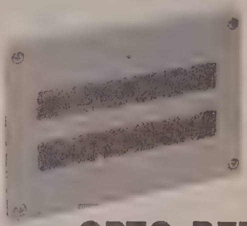




As a service oriented manufacturer, Orbit enjoys being able to see a product through development, manufacturing and test cycles. Careful process controls and quality assurance programs are the earmarks that set Orbit apart.

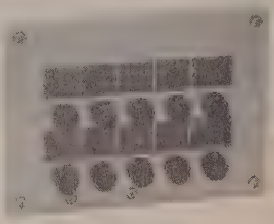
Each (MLM) Multi Legend Matrix is tailored specifically to satisfy the requirements of end users in the military, industrial and commercial environments.

Orbit Engineering Services have designed a variety of display subsystems integrating both hardware and software.



OPTO BEZELS

Data Entry Becomes A Simple Function Of Touching A Particular Message Area. Orbit's Infrared Switch Network Detects The Interruption Of Invisible Light And Actuates A Signal To Sensing Logic.



MECHANICAL SWITCH BEZEL

When tactile feel is the preferred means of data entry, we offer several different Bezel configurations to choose from. Whether it be push-button micro switch bezels with variable actuating forces or Orbit's own high reliability low profile, snap action technology, you can count on the quality!

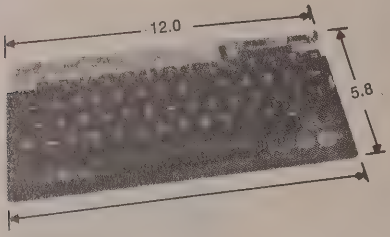
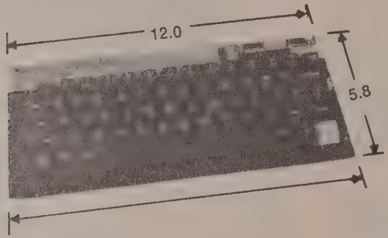
G.R.I. PLAZA / KIMBALL, NEBRASKA 69145 / TELEPHONE (308) 235-4645 / TWX 910-620-9040

KEYBOARDS



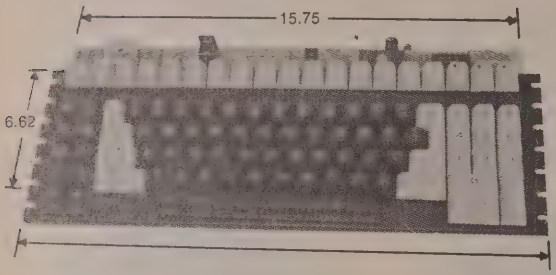
MODEL 7056

• 56 keys — full 128 character ASCII encoding • Two-key rollover • Buffered parallel output • TTL/CMOS compatible • Easy mounting provisions • Non-glare double-shot molded keycaps • Expandable for additional features.



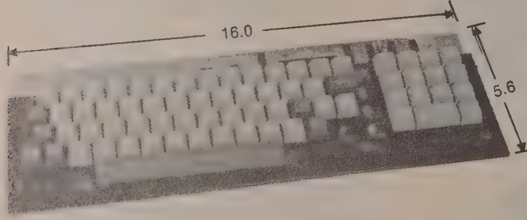
MODEL 7062

• 62 keys — same features as 7056 PLUS separate cursor control keys • User defined key with relegendable keycap or custom engraved • Auto-repeat on all keys • Four mode operating including CAPS LOCK.



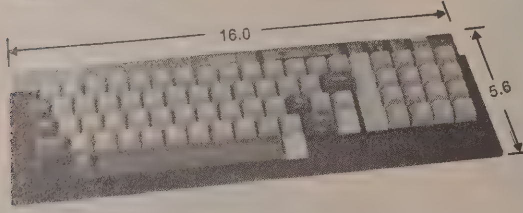
8000 SERIES

• State-of-the-art, microcomputer controlled keyboard, 95 keys, including 19 special function keys • High reliability performance • Four-wire serial interface, 300 or 1200 baud • Unique variable key rollover with phantom key lockout • High speed operation with NO input errors • Ergonomic design.



MODEL 7071

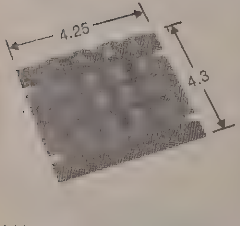
• 71 keys — full 128 character ASCII encoding • Integral 15 key numeric and cursor pad • Four mode operation including ALPHA LOCK • User selectable data and strobe signals • Buffered parallel output • Interface with APPLE II (with slight modifications) special instructions included.



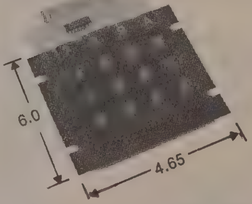
MODEL 7078

• 78 keys — identical to 7071 with the addition of 7 relegendable keycaps or custom engraved.

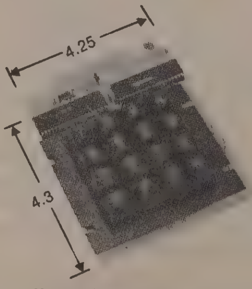
KEYPAD MODELS 10, 12 or 16 keys



• 4 bit hex encoded • Full CMOS design • Outputs compatible with LS and standard TTL logic.



• Parallel or serial RS232 output
• Custom keyboard encoder
• Full 7-bit ASCII characters.



• Unencoded wiring, 1 of 16 or X-Y matrix • One side of each keyswitch is common • Design to be used with custom-supplied encoding.

Thermostats

Series 5003 – Low-Profile Thermostat

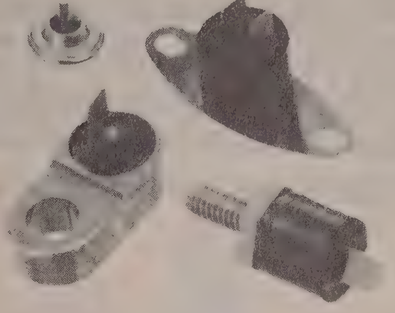
Extremely thin, lightweight, wafer-type thermal switch that provides fast, positive response, excellent repeat reliability, good shock and vibration resistance over a wide operating range.

Features:
- Overall depth is only .250".
- Operating temperature range from 15°F to 355°F.
- OPR or CLR contacts are available.
- 120Vac 5 amp, 240Vac 3 amp.
- Weight 2.3 grams.
- Variety of mountings and terminations available.
- Enviromental sealing available.
- Approval: ЯU SP

Series 5200 – Isolated Contact Thermostat

This hermetically sealed thermostat is perfect for applications requiring isolated contacts. The laser-welded construction withstands vibration and shock, and is designed to meet MIL-Spec requirements. Its size and reliability make it highly suitable for products such as business machines, hot glue-melt systems and other industrial-environment products.

Features:
- Hermetically sealed.
- Designed to meet military standards.
- Operating temperature range from 15°F to 500°F.
- ЯU Certified for regulating.



Series 5011 – Low-Cost, Grounded Thermostat

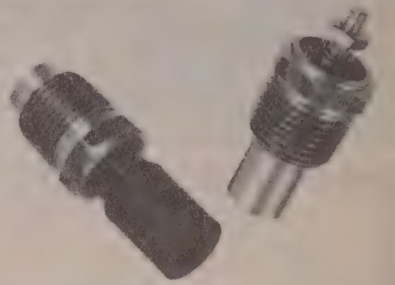
A very low-cost thermostat that will meet a number of exacting requirements for shock and vibration resistance. It is hermetically sealed and offers fast response. The only surface-sensing grounded device offered today. Plug, wire-lead, and isolated-base mountings are available. 1/4-20 boss-mounted and 3/8-16 UNC-2A sizes.

Features:
- Low-cost, grounded unit.
- Operating temperature range from 15°F to 550°F.
- Many mounting packages available: 120Vac, 32Vdc, 3 amp.
- Stud-mounted version available.

Series 5100 – Isolated Case Thermostat

This two-terminal, immersion-type hermetically sealed thermostat can be used on water-cooled engines, hydraulic systems, degreasers, industrial air compressors and tanks where liquids are heated. Its isolated contact is designed to switch 110Vac within your control circuitry. It offers rapid response to liquid or air temperature.

Features:
- Hermetically sealed.
- All stainless T.I.G. construction.
- Operating temperature range from 15°F to 550°F.
- 120Vac 3 amp and 240Vac 1.5 amp. models available.
- Approval: ЯU SP



Series 5021 – Sealed Immersion-Type Thermostats

A single throw, snap-action, sealed temperature control. Snap action disc located in the very tip of the probe. Ideally suited to protect engines from overheating damage by accurately sensing high water and oil temperatures.

Features:
- Solid one piece body construction.
- Operating temperature 15°F to 325°F.
- High vibration resistance.
- Conforms to MIL-12285/2.

Series 5020 – Hermetically Sealed Thermostat

This snap-action hermetically sealed temperature control is designed for use wherever a sealed unit and high vibration resistance are required. Protects engines from damage from overheating by sensing high water or oil temperatures. Snap-action disc located in the very tip of the probe assures rapid and true response to liquid temperature. The all-welded construction (and grounded case) of this sealed thermostat insures meeting Thermal Shock Specifications of MIL-STD-202, Method 107, Test Condition B. The tube will withstand a Pressure Exposure Limit of 1500 PSI. Insulation Resistance of 50 megohms minimum at 500 Vdc.

Features:
- Hermetically sealed.
- Grounded case.
- Operating temperature range from 15°F to 525°F.
- 32Vdc, 3 amp.
- 5020 – 13 Conforms to MIL-12285/1.

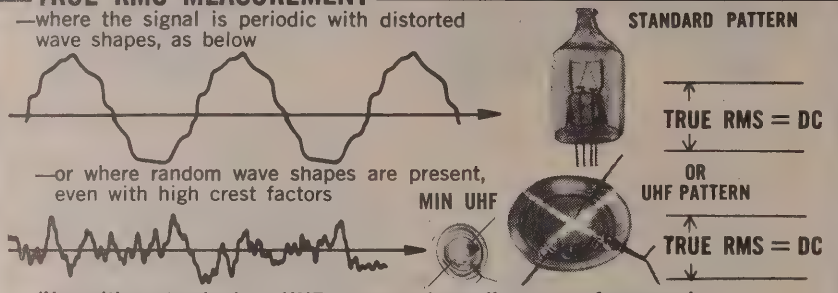
Guide to types, models and applications of
BEST vacuo-junction THERMOCOUPLES
as used by leading instrument manufacturers for:

TRUE RMS MEASUREMENT



—where the signal is periodic with distorted wave shapes, as below

—or where random wave shapes are present, even with high crest factors

(Use either standard or UHF pattern, depending upon frequency)

LINEAR TRUE RMS MEASUREMENT

MATCHED PAIRS

	UHF TYPES	STANDARD PATTERN TYPES	
	Model MPU 1	Model MP1S7	Model MP219
Tracking accuracy	0.5%	0.5%	0.2%
Time constant	1 sec	1 sec	200ms
Nominal current	5mA	5mA	6.67mA

Tracking accuracy applies over full 25°C temperature range.

Single standard patterns for 5mA and higher, useable to −65MHz; for less than 5mA, usable to 10MHz.
Single UHF types usable to 500MHz
Temperature coefficient of output available from −0.2% per °C down to 0.005% per °C on special order.

Reversal error, standard 0.2%. Most models available with R/E down to 0.02%, some models to 0.005%.
Optional special features: short time constants to 50 ms; double heater devices, ultra miniature sizes.

PHYSICAL DATA, STANDARD PATTERNS	
Height of envelope	0.900 inch
Diameter of envelope	0.437
Length of lead from envelope	2 ± ¼ inches
Length of sleeve from envelope	1¾ ± ¼ inches
Heater leads:	
Up to 400 milliamps	0.012 ± 0.002 inch diameter
500 milliamps and over	0.020 ± 0.002 inch diameter
Couple leads—all ranges	0.012 ± 0.002 inch diameter

PHYSICAL DATA, U.H.F.	MIN	REGULAR
Height of envelopes	.43	.75
Diameter of envelope	.47	.80
Width across heater leads	1.42	1.50
Diameter of heater and couple wires	.02	.02

Positive indicated by spot of red lacquer.

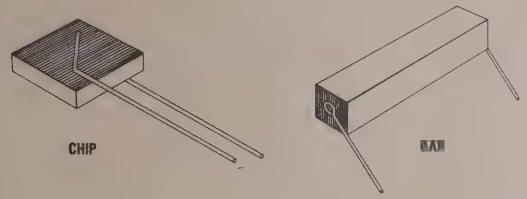
CAL-R®, INC.

THERMISTORS

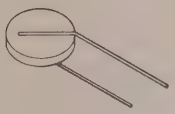
LEADED CHIP, BAR & CUBE

Cal-R Leaded chip and bar thermistors are produced from metal oxide ceramic materials utilizing a unique process which affords the highest degree of manufacturing control.



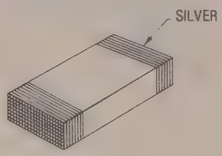
NTC DISCS

Maximum operating temperature 150°C (higher temperatures available).



HYBRID CHIP

Cal-R Hybrid Chip Thermistors are produced by the same exacting manufacturing process as the Leaded Chip Thermistor and demonstrate the same electrical characteristics. Only the configuration is changed in order that they may be mounted in hybrid circuits utilizing the same equipment and techniques employed in the installation of other hybrid components. Cal-R hybrid chip thermistors are available with either silver or palladium-silver terminations to meet your process requirements.



LINEAR PTC DEVICES

Temperature Coefficient: +.45%/°C & ±.02%/°C (+0.6%°C available).

EPOXY COATED — RESISTANCE TOLERANCE ±1, 3, 5 & 10%

INTERCHANGEABLE THERMISTORS

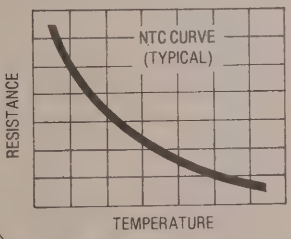
Thermistors designed for interchangeability over a temperature range of 0°C to 80°C without the necessity of recalibrating the system.

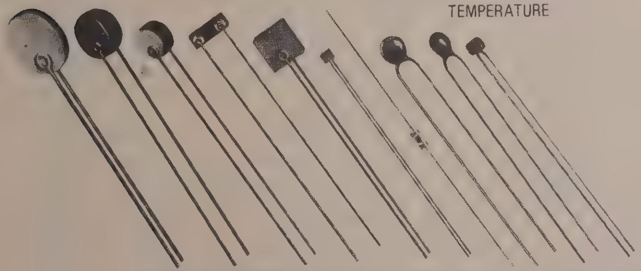
EPOXY COATED

NTC (Negative Temperature Coefficient)

Thermistors offer inexpensive solutions to:

- Temperature Compensation
- Time Delay
- Soft Start
- Gas and Liquid Level Sensing
- Temperature Sensing and Control





SOFT START "INRUSH CURRENT" SUPPRESSING DEVICES

Cal-R Soft Start devices, made from rugged metal oxide ceramic materials, protect against high inrush currents in either AC or DC circuits. Soft Start affords protection for circuit components and assures longer equipment life.

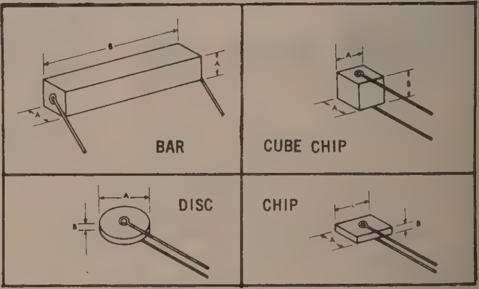
The alphabetical letter in the part number indicates the curve. To determine the approximate resistance of a thermistor at a specified temperature, multiply the thermistor resistance at 25°C by the ratio factor opposite that temperature on the R/T conversion table.

CURVE **B**	Ratio $\frac{R@\,25^\circ C}{R@\,125^\circ C} = 12.95 \pm 10\%$
CURVE **D**	Ratio $\frac{R@\,25^\circ C}{R@\,125^\circ C} = 19.8 \pm 10\%$
CURVE **J**	Ratio $\frac{R@\,25^\circ C}{R@\,125^\circ C} = 29.85 \pm 10\%$



***DISSIPATION CONSTANT**

Dissipation Constant, expressed in mw/°C, represents the amount of power required to raise the temperature of a thermistor 1°C.

****TIME CONSTANT**

Time Constant, expressed in seconds, is the time required for a thermistor dissipating zero power to change 63% of the difference between its initial temperature value and that of a new temperature environment.

CAL-R thermistors conform to AQL and confidence levels specified in MIL-T-23648, tables V and VI.

Coatings, marking, special leads, probes, resistor/thermistor networks, resistance values from 1 ohm to 150 KΩ, and other product variations are produced to meet your design requirements.

Resistance tolerances of ±1% through ±20% are available and may be specified at 25°C or any temperature within the operating range. Maximum operating temperature with leads 150°C.

"SOFT-START"

INRUSH CURRENT SUPPRESSING DEVICES

''Soft-Start'' devices display relatively high resistance to starting currents in a variety of electronic circuits. Having a negative temperature coefficient of resistance, these devices exhibit a large decrease in resistance when an AC or DC current is applied.

Unlike circuit breakers and fuses, ''Soft-Starts'' prevent dangerous, short-duration, peak inrush currents present at turn-on. Especially useful in power supplies where charging capacitors initially present extremely low impedance, ''Soft-Starts'' actually limit inrush currents thereby extending the life of other critical components.

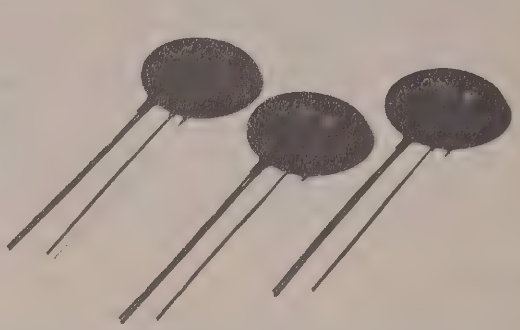
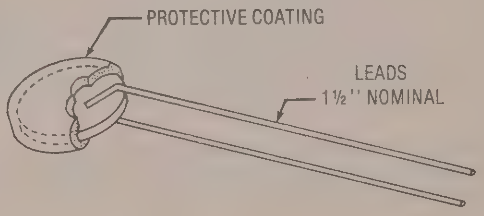
- Standard R_o25°C tolerance is ±20%. Closer tolerances are available upon request.
- Protective silicone coating is standard and has a nominal thickness of .02 inches. Other coatings are available upon request.
- Standard lead material is tinned copper-clad steel. Nickel or copper leads are available upon request.
- Special marking is available upon request.





DEFINITIONS

I_{max}
Represents the maximum rated steady state DC or RMS current and is expressed in amperes.

R_o25°C
Represents the zero power resistance of the device at +25°C and is expressed in ohms.

R@I_{max}
Represents the approximate resistance at maximum steady state current conditions and is expressed in ohms.

Ambient Temp.
Full rated current may be applied in the ambient temperature range of +25°C to +65°C and must be derated in accordance with I_{max} derating curve.

I_{op}
Represents the actual operating current applied.

Cool-Down Time
Is the amount of time needed for a ''Soft-Start'' device to cool enough to cause the necessary amount of resistance to limit inrush current.

CARBORUNDUM THERMISTORS

APPLICATION DATA

Carborundum thermistors are temperature dependent resistors, offered in a wide variety of resistance-temperature characteristics. They are available with a wide range of negative temperature coefficients at 25°C ranging from −0.3%/°C to −5.4%/°C. These parts are made from ceramic materials, bonded in a high-temperature firing process into rod, disc, and chip configurations. They are available in a large range of sizes, thermal characteristics, resistance values, and temperature coefficients to suit the needs of many types of electrical and electronic circuits.

Carborundum offers long experience in the design of special resistance devices. This, together with expertise in the field of ceramic technology, assures a stable and uniform product to meet your thermistor requirements. All materials used in the manufacture of Carborundum thermistors are of the highest quality. Strict quality control is maintained over all stages of manufacture, and a minimum of two calibrations at the specified reference temperature is standard.

DEFINITIONS

Zero Power Resistance . . . is the resistance of a thermistor at the calibrating temperature, measured in such a manner that the measuring current does not appreciably heat the thermistor. Resistance, as used here, means zero power resistance unless otherwise stated.

Beta (β) . . . is the number that satisfies the equation:

$$R_1/R_2 = \epsilon^{\beta\,(1/T_1-1/T_2)}$$

Carborundum determines beta from measurements at 25°C and 73.2°C. Beta is proportional to the slope of the resistance-temperature characteristic, and it is also known as the material constant. It is not truly a constant, but it gives a good approximation of resistance over a substantial working range. In the equation, ϵ is 2.718 . . ., the base of natural logarithms, and β, T_1, and T_2 are in Kelvin (K).

Alpha (α) . . . or temperature coefficient of resistance (TCR) is proportional both to beta and to the square root of the temperature at which it is specified. Very nearly,

$$\alpha = -100\ \beta/T^2$$

In this equation, temperature is in Kelvin (K), and α is in percent per degree C (%/°C). It is evident that alpha becomes much higher as temperatures decrease.

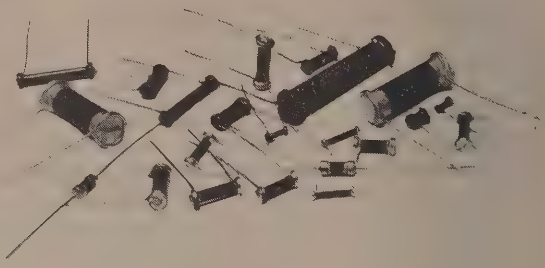
Dissipation Constant (δ) . . . is the ratio of power dissipated by the thermistor divided by the temperature rise above ambient due to self-heating. Here, it is 20 times the power required, in watts, to bring the thermistor to 75°C in an ambient of 25°C, and it is expressed in milliwatts.

Time Constant (τ) . . . is the time required for a thermistor which has attained equilibrium after being self-heated to 75°C to cool to 43.4°C in an ambient of 25°C. It is expressed in seconds.

Both δ and τ are necessarily approximate quantities, and they represent complicated concepts. They cannot be fully defined or used unless the conditions under which they are measured are fully defined.

In particular, note that the dissipation of a thermistor is the sum of dissipation due to conduction, convection, and radiation, which are related to temperature by linear, square-law, and fourth-power equations respectively. Only over narrow temperature ranges can dissipation constant be considered constant.

Also note that time constant is defined by a zero-power cooling curve. If the thermistor is attached to a heat sink the effective time constant is changed substantially. The time required for a thermistor to reach equilibrium due to heating from a current passing through it may be dramatically different from the time constant as defined above.



THERMISTOR SPECIFICATION

Thermistors are most often specified by a zero power resistance, suitably toleranced, at some specified temperature (most often 25°C or 37.8°C), and by a temperature coefficient, also suitably toleranced. This is all that is required as an electrical specification. Additional specifications may result in double dimensioning and be unduly restrictive (and therefore costly) or ambiguous.

The zero power resistance of a thermistor should be read in a temperature controlled, agitated oil bath. Not only does the oil bath provide a more controllable constant temperature, but it also speeds the settling of the reading.

ROD THERMISTORS

Rod thermistors are manufactured by extruding and firing a suitable ceramic mixture. For a given type of thermistor, low-, medium-, or high-sensitivity, a number of mixtures are available: in general, a mixture yielding a higher resistivity product also yields a higher beta or temperature sensitivity.

Standard rod thermistors are shown in the following table. They have a resistance tolerance of ±10% at 25°C, and they are neither coated nor marked. Special rod thermistors may be ordered with intermediate resistance values, other resistance tolerances, other calibration temperatures, coating, marking, special lead preparation, etc. Parts without wire leads are also available.

DISC THERMISTORS

Disc thermistors are manufactured by pressing and firing a suitable ceramic mixture. Carborundum offers six standard mixtures of various resistivity and beta.

Standard disc thermistors are shown in the following table. They have a resistance tolerance of ±10% at 25°C, and they are neither coated nor marked. Special disc thermistors may be ordered with intermediate resistance values, other resistance tolerances, other calibration temperatures, coating, marking, special lead preparation, etc. Parts without wire leads are also available.

DALE® THERMISTORS

Interchangeable and Custom Negative Temperature Coefficient (NTC)

NTC Thermistors are the most sensitive temperature sensors known to exist for temperature measurement and control between −50°C and +150°C. Dale Thermistors are rugged, reliable, predictable and are easily assembled in small housings to meet a multitude of temperature measurement and control requirements. The effects of "noise", which may be a factor with other sensors, and conductor resistance resulting from the installation of thermistors in remote locations, has minimal effect on system accuracy.

Interchangeable Thermistors provide greater temperature measurement and control accuracy over wider temperature ranges. In addition, they allow the use of multiple thermistor sensors with a single readout or control system and save money by eliminating costly calibration procedures. Dale Thermistors are backed by more than a decade's experience in manufacturing smaller, low-cost NTC styles which are used in a variety of temperature measurement and control equipment worldwide.

Resistance values and tolerances. The following charts list "standard" thermistor resistance values and tolerances. Contact us for additional information and assistance in developing custom thermistors and sensor assemblies to meet your application requirements.

SPECIFICATIONS

Point-Matched Tolerance: NTC Thermistors may be ordered with a temperature or a resistance tolerance at a temperature point. Parts listed are specified at 25°C:

Ω TOLERANCE	TEMPERATURE TOLERANCE
±10%—no suffix	±1.0°C— -A
± 5%— -5	±0.5°C— -B
± 3%— -3	±0.2°C— -C
± 1%— -1	

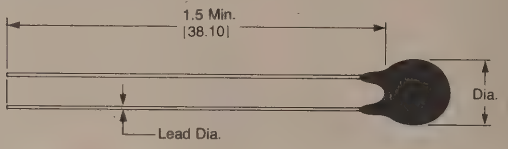
Interchangeable Tolerance: To simplify specification in ordering interchangeable Thermistors, they are specified to a temperature tolerance over a temperature range. The temperature tolerance corresponds to a resistance tolerance based on the temperature coefficient at each temperature point within the specified range (see definition of NTC).

INTERCHANGEABLE TOLERANCES AVAILABLE

TOLERANCE	0° to 70°C	SUFFIX
±1.0°C	—	A3
±0.5°C	—	B3
±0.2°C	—	C3

To specify, add the appropriate suffix to the part number selected from the "Most Specified NTC Thermistors" chart. *Example:* 1M1002-B3, Curve 1, 10KΩ @25°C, *interchangeable to* ±.5°C from 0° to 70°C. Asterisk (*) indicates ±0.2°C tolerance available for interchangeable thermistors.

R25 Values ±10% listed are typical. 40Ω to 40 megohm @ 25°C available. Add -5 for ±5%, -2 for ±2%, etc. to part number for closer tolerance at temperature T.



Leads: T series thermistors have Teflon insulated leads 3" [76.20] ± .25 [6.35]. All others are solid tinned copper 1.5 [38.10] ± .2 [5.08] long unless otherwise specified.

Coating: "Baked-on phenolic" for durability and improved long term stability. Other coatings are available.

Sensor Assemblies are designed to enhance applicability, protect and appropriately locate thermistors for maximum efficiency, whether used in liquids, solids or gases. They may be designed to meet the stringent requirements of automotive, energy, industrial, computer, aerospace, consumer appliance, medical and ecology related industries. "Standard" sensor-assemblies are available; however, most are manufactured to customer specifications. Contact our engineers for design assistance and quotations.

DEFINITIONS

$R_T \div R_{25}$ ratio is Resistance at temperature T divided by resistance at 25°C. To determine the resistance of a NTC thermistor at temperatures other than 25°C, multiply the ratio selected from the appropriate curve column above by resistance at 25°C, e.g., Curve 1, 10KΩ @ 25°C, 1256Ω @ 80°C. Call us for 1°C ratio tables.

NTC (−%/°C) is negative temperature coefficient of resistance at temperature (T) expressed in % resistance change per °C. Since one NTC resistance change is approximately equivalent to a 1°C temperature change, NTC is useful in developing Interchangeable thermistor specifications, e.g., Curve 1, 10,000Ω ± 4.4% @ 25°C, 32,660Ω ± 5.1% @ 0°C, 1751Ω ± 3.4% @ 70°C results in a ±1°C Interchangeable Thermistor 0° to 70°C, .5 NTC = ±.5°C, etc.

Maximum Temperature for thermistors listed is 150°C; however, continuous operation or cycling above 125°C, or above specified temperature range for Interchangeable thermistors, may cause thermistors to exceed originally specified tolerances.

MT±% is manufacturing tolerance at temperature. Add to resistance tolerance specified at 25°C, e.g., Curve 1 10K ± 10% @ 25°C, 1256Ω ± 12.1% @ 80°C. Not applicable to Interchangeable Thermistors.

Dissipation Constant (D.C.) is the amount of power, in milliwatts, which will raise the thermistor 1°C above its environment while suspended by its leads in still air at 25°C.

Time Constant (T.C.) is the time, in seconds, required for the thermistor dissipating zero power to change 63% of the difference between its initial temperature value and that of a new temperature environment, while supported by its leads in still air.

Thermistor Resistance Measurements must be made at precisely controlled temperature while applying essentially zero power to assure measurement accuracy.

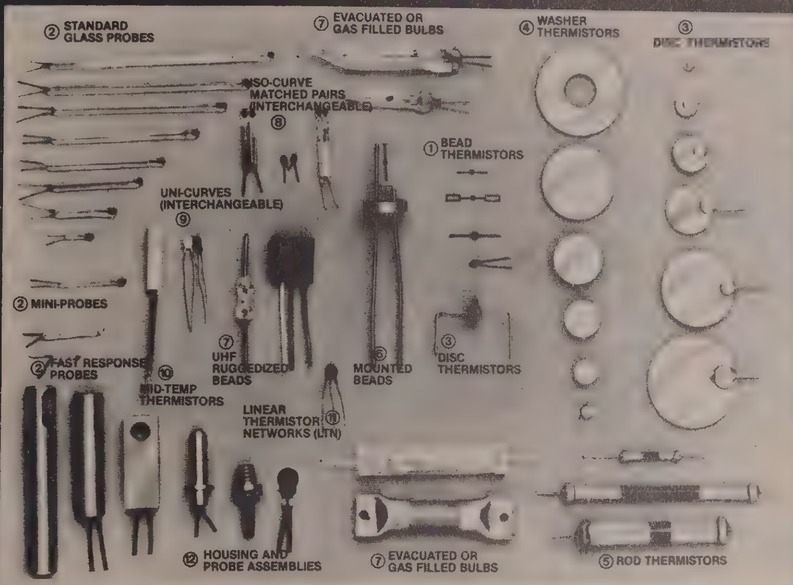
BROADEST THERMISTOR LINE AVAILABLE ANYWHERE



THE MOST COMPLETE LINE OF PRECISION THERMISTORS

THERMISTOR CONFIGURATIONS

1. **Glass Coated Beads** — used where small size, fast response, high precision, stability, and temperatures to 300°C are required.

2. **Glass Probes** — medium-small in size. Many of the advantages of beads but rugged, more easily mounted, useful in liquid media.

3. **Discs** — used where medium power dissipation is a requirement and space not a problem. Useful to 150°C.

4. **Washers** — used where high power dissipation is a prime requirement.

5. **Rods** — these units have power dissipation intermediate between discs and washers and are also used where their physical shape is an asset.

6. **Mounted Beads** — provide ease in using glass beads in such applications as gas chromatography, flow and vacuum measurement, etc.

7. **Vacuum and Gas Filled Assemblies** — high power sensitivity for specialized circuit applications.

INTERCHANGEABLE THERMISTORS

8. **Iso-Curve® Interchangeable Thermistors** — these units available in bead or glass probe configurations, follow standard L-2B curves over wide temperature range, and are completely interchangeable. Units match standard curves as close as ± ¼ % of resistance or as required. Bulletin L-2B.

9. **Uni-Curve® Interchangeable Thermistors** — completely interchangeable units having an accuracy of + 0.2%C over a temperature range of 0°C to 70°C and available on special order to other tolerances and ranges. Bulletin L-6B

MID-TEMP THERMISTORS

10. **Mid-Temp Thermistors** — Bead and probe thermistors designed for useage at the higher Mid-Temp range from 200°C to 600°C. Ask for bulletin L-10.

LINEAR THERMISTOR NETWORKS(LTN)

11. **Linear Thermistor Networks (LTNTM)** — precision resistors and thermistors which are designed to produce a resistance change or voltage output that varies linearly with temperature over the selected temperature range. Ask for Bulletin L-9A.

THERMISTOR PROBES

12. **Probe Assemblies** — standard catalog types or built to specific military or commercial requirements. We are experienced in design of probe assemblies for all fields of application including industrial control and indication, aerospace — specializing in telemetry applications, and oceanographic — featuring fast response, very high pressure, and interchangeability using our Iso-Curve and Uni-Curve Thermistors. Ask for Catalog L-5A.

NTC (Negative Temperature Coefficient) thermistors decrease in resistance as temperature increases. Their maximum operating temperature is 125° C. Zero-power resistance values at 25° C range from 10 Ω to 250K Ω ; other values upon request. Disc thermistors are available with various coatings, lead styles, and resistance tolerances. Contact Keystone Thermistor Engineering or write for catalog T384.

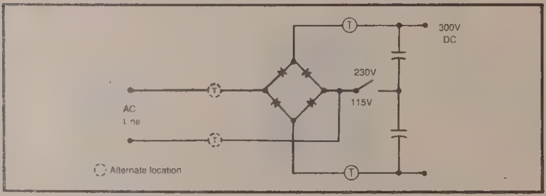
†Resistance Ratio: Ratio of zero-power resistance @ 0°C to zero-power resistance @ 50°C.

INRUSH CURRENT LIMITERS



The circuit diagram above displays a typical way to limit inrush current.

Protection against extremely high peak inrush current, especially in AC/DC switching power supplies, is now available with Keystone Inrush Current Limiters. These special NTC thermistors effectively control surge currents because the thermal time constant of the current limiter is longer than the electrical time constant (RC) of the thermistor and the capacitor.

All inrush current limiters are insulated with a protective coating. Caution must be taken when parts are cleaned in solvents.

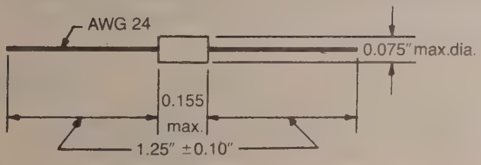
—G15 for Glass Probes.

GLASS ENCAPSULATED THERMISTORS

Keystone glass encapsulated NTC thermistors are tiny pellets of thermistor material hermetically sealed in glass bodies with a controlled amount of selected atmosphere. The hermetic seal makes these parts extremely stable in applications up to 204° C (400° F).



Temperature Range: −50°C to +204°C
Time Constant: 3 sec.
Dissipation Constant: 2.0 mW/°C
Tolerance: ±10% @ 25°C

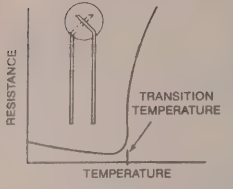
PTC — POSITIVE TEMPERATURE COEFFICIENT THERMISTORS



Positive Temperature Coefficient (PTC) thermistors are characterized by an extremely large resistance change in a small temperature span. The figure at left depicts a generalized resistance temperature plot for a PTC. The temperature at which the resistance begins to increase rapidly is referred to as the transition temperature. This point can be changed from below 0° C to above 160° C.

TYPICAL PTC APPLICATIONS

• Automatic Color TV Degaussing • Air Flow Measurement • Non-Destructive Fuse • Single Phase Motor Starting • Liquid Level Sensing • Combination Heater-Thermostat • Arc Suppression • Time Delay Fusing.

For detailed application notes, write for Bulletin P-780.

TYPICAL CONFIGURATIONS

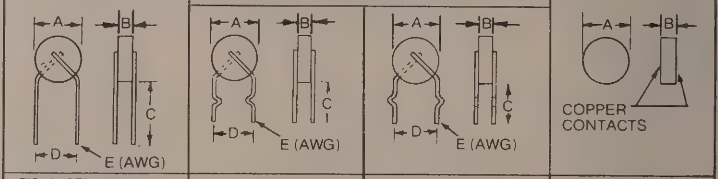

FIG. A (STRAIGHT LEAD) FIG. B (INSIDE KINK) FIG. C (OUTSIDE KINK) FIG. D (NO LEADS)

NOTE: 1. Operating Voltage: D.C. or 60Hz A.C. (for higher voltage req. — contact factory).
2. The specifications and configurations shown above are typical of standard items. Special characteristics, designs and alternate physical sizes are available upon request.

PTC RESETTABLE FUSES

Typical applications for PTC fuses:

- Telephone line fault protection
- Fuse for intermittent solenoids
- Over-current protection for transformers
- Locked rotor protection for FHP motors

Minimum Limit Current — The minimum amount of current required by the PTC to guarantee switching at the minimum ambient temperature.

Maximum Limit Current — The maximum amount of current the PTC must be able to pass without switching at the maximum ambient temperature.

PTC SURFACE-MOUNT OVERTEMPERATURE PROTECTORS

Positive Temperature Coefficient (PTC) thermistors — act as solid-state switches. A typical application of these surface mount units is to prevent destruction of a power transistor.

PTCs are bonded to a tab which is mechanically mounted to the power transistor package. The PTC thermistor measures the surface temperature of the transistor. When the temperature of the transistor case reaches a critical point, the PTC switches and turns off the drive circuitry for the transistor. This action prevents its destruction. Then, as the transistor cools, so does the thermistor, automatically resetting itself to once again guard the power transistor.

Specifications:

1. Resistance @ 25° C: 100Ω + 30% (70Ω - 130Ω).
2. Transition temperature per table is defined as the temperature at which the measured resistance is two times the minimum resistance.
3. Maximum voltage that can be applied to the device in DC or 60Hz sinusoidal wave form AC is 30 volts.
4. Maximum operating temperature 140° C.
5. Dielectric withstand between PTC element and aluminum tab is 50 VDC min.
6. Basic construction: .200″ dia. x .060″ thk. PTC disc with radial leads attached to an anodized aluminum tab.
7. Physical design — as shown.
8. Optional resistance values, switch temperatures and physical designs are available upon request.

THERMISTOR PROBES

The probes illustrated below include stainless steel, aluminum, and chrome-plated materials in a variety of configurations. In addition, a variety of other designs are available. These probes are used in conjunction with solid state circuitry for liquid level measurement, and for use as sensors to measure the temperature of liquids or surface temperatures.

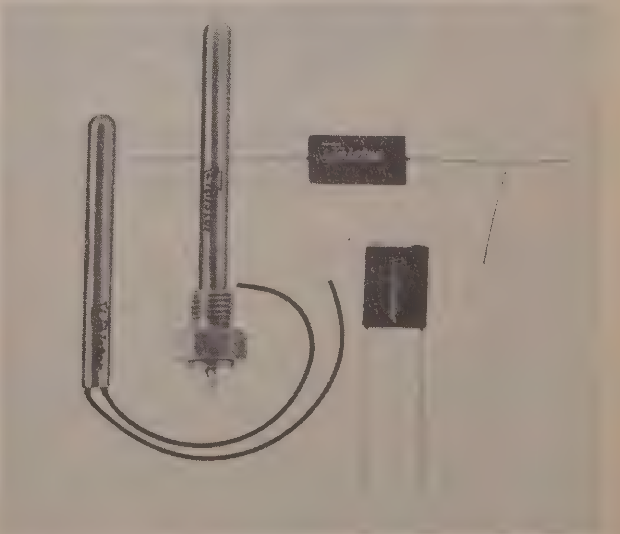
LINISTOR® ASSEMBLIES

Keystone developed Linistor assemblies to give an accurate resistance response over a temperature span of 0° to 100° C. Because Linistor assemblies have flattened out the thermistor resistance curve to a constant and predictable straight-line plot, they are valuable in a wide range of applications. Four standard encasements are available. Tolerance on resistance of Linistor is ±2% at 25° C.



EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

+150°C (302°F)	3114 ±25 (2.5°C)

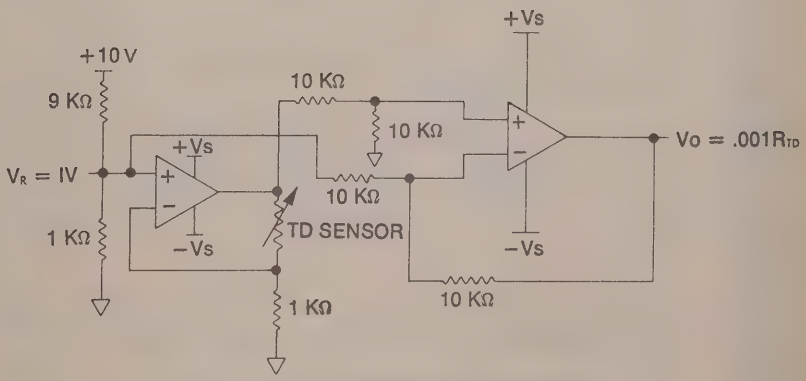
MICRO SWITCH TD Series are precision-interchangeable temperature sensors that operate on a change in resistance as a function of temperature. Each sensor includes a 0.040″ x 0.050″ silicon sensing chip. A thin film resistive network containing a sensing resistor and a laser trimmable resistor is patterned on each chip. Individual chips are laser trimmed to provide 2000 ohms nominal resistance at room temperature (20°C). Room temperature trim is accurate to ±0.70°C, and maximum error over the entire operating range of −40°C to +150°C (−40°F to +302°F) is ±2.5°C. This accurate trimming allows true sensor-to-sensor interchangeability without recalibration of the users circuit. During packaging the chip is covered with hard epoxy for environmental protection.

FEATURES

- *Interchangeability*
- *Very small thermal mass for fast response*
- *Air or liquid temperature sensing*
- *Linear temperature sensitivity*
- *Proven thin film processing reliability*
- *Low cost*
- *Long term stability*
- *2000 ohms nominal resistance at 20°C*

ELECTRICAL INTERFACING

The high nominal resistance, positive temperature coefficient and linear sensitivity characteristics of the TD Series temperature sensors simplifies the task of designing the electrical interface. Shown is an interface for applications requiring a voltage that varies linearly with temperature. In the example shown the current regulator can be affected by temperature, so only the temperature sensor should be exposed to thermal changes.



SIMPLE CURRENT REGULATOR INTERFACE

ABSOLUTE MAXIMUM RATINGS

Operating Range	−40°C (−40°F) to 150°C (302°F)
Storage Temperature	−55°C (−67°F) to 170°C (338°F)
Voltage	10 VDC Continuous (24 Hours)

ORDER GUIDE

Description	Catalog Listing
Fast response temperature sensor, 0.2 inch square ceramic package, 0.1 inch centers.	TD1A
Liquid temperature sensor, 1.50″ threaded (⅜-24 UNF-2A) anodized aluminum housing, 2 six-inch black teflon insulated leads.	TD4A

MICRO SWITCH, a Honeywell division

OTHER OPTIONS

MICRO SWITCH has the capability of packaging the TD Series temperature sensors in plastic, aluminum, brass, stainless steel or other materials depending on customer need and volume. By designing the sensing element of the TD Series on a silicon chip, a great deal of versatility is possible. Custom packaging could be for surface, liquid or gas temperature sensing, and signal conditioning electronics circuits are possible.

NTC THERMISTORS

MANUFACTURED BY MIDWEST COMPONENTS, INC.

H-Series Hermetically Sealed Thermistors Manufactured by MIDWEST COMPONENTS INC. are small, rugged, and good for use up to 400ºC. The H-Series sensor is a preferred choice for all types of temperature sensing compensation or control circuits. Uniform dimensions make them desirable for automatic insertion in printed circuit boards. Dumet leads are weldable and/or solderable.

TUFF·SENSORS™

TEMPERATURE SENSORS INCAPSULATED IN THERMOPLASTIC

MANUFACTURED BY MIDWEST COMPONENTS, INC.

TUFF·SENSORS™, a family of thermoplastic molded probes, provide reliable protection against environmental extremes for our line of temperature sensors and switches. Use of high performance plastics creates a temperature probe that resists temperature variations, humidity, chemicals and rough handling.

Many standard sizes and shapes are available, with selection of type based on conditions of use.

Custom designs available to your specifications.

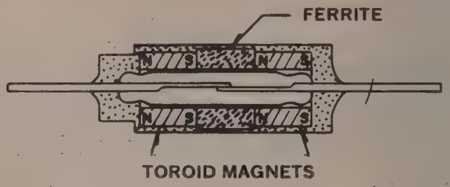
TEMPERATURE SENSING SWITCH

MANUFACTURED BY MIDWEST COMPONENTS, INC.

CONVENIENT AND RELIABLE TEMPERATURE CONTROL



Miniature temperature switches use an electro-ceramic element instead of a bimetallic switch. The Reed Switch Temperature Sensor works on these two principles: a reed switch actuation occurs because of changes in strength of a magnetic field in the vicinity of the contact gap; and certain materials exhibit great changes in magnetic reluctance when the temperature is varied in the vicinity of the material's curie temperature.

The unit has good response time, and is operable in a variety of atmospheres and solutions. Variations in configurations suitable for installation in automotive engine crankcases and automatic transmissions, or mountings for use in computer cabinets are possible. Other applications include oven over-heat alarms, corrosive liquid temperature control, food freezer thaw warning and cooling fan stop indication. This switch replaces many thermally actuated devices now used where increased life is required or protection of the switching contacts from adverse environments is deemed desirable.

EPOXY PACKAGED SWITCHES

MANUFACTURED BY MIDWEST COMPONENTS, INC.

Switches feature small size for fast response. Eopxy package resists most chemicals and is good for use up to 125°C. Standard units from 0°C to 125°C are available in five degree nominal increments.

FREEZE SENSORS

MANUFACTURED BY MIDWEST COMPONENTS, INC.

The Solar Freeze Sensor, Catalog Number TS-5B1, was developed to provide controller activation before freezing conditions damage collector. This activation will then provide recirculation or drain down to protect system. To meet the needs of high temperature exposure, the switch is packaged to withstand 400°C. Switch has also found application as road surface freeze indicator, refrigerated van warning sensor and is widely used as a frost sensor in the agricultural industry.

CONTACT ARRANGEMENT	SPST Form B (Normally Closed)

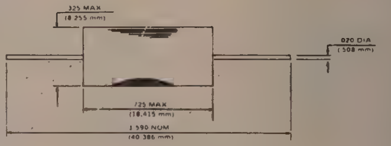
DIAMETER	325" maximum
WEIGHT	1 6 grams



HIGH TEMP. SWITCHES

MANUFACTURED BY MIDWEST COMPONENTS, INC.

In addition to the three standard temperature switches, we now offer a high temperature Form B version. This new high temperature version is available from 0°C to 250°C. Typical applications include sensing temperature increases in temperature chambers, instrumentation, liquids, semi-solids or solids.

TEMPERATURE SENSING SWITCH

MANUFACTURED BY MIDWEST COMPONENTS, INC.

TEMPERATURE SENSING REED SWITCHES
PMS SERIES

Midwest Components, Inc. has now packaged the reliable temperature sensing reed switch in a convenient and easy to use housing. The molded plastic body offers the additional advantages of complete moisture and dust protection at an economical price.

This rugged switch can be quickly mounted with a screwdriver. An indentation on the housing also facilitates attachment by ordinary hose clamps or clip hardware supplied by the user. Type A (normally open) or Type B (normally closed) switches may be used in this new package.

TEMPERATURE SENSING REED SWITCH PROBES

Now Available . . .
The ultra reliable temperature sensing reed switch in a convenient probe assembly. Probe is designed for liquid temperature sensing on auto, truck, compressor, or equipment cooling systems. Rugged brass body is hermetically sealed against harsh environments. Switching temperatures are available from - 10°C to 150°C. 3 million operations are possible at full rated load.

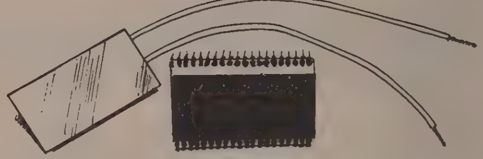
SPECIALTY CERAMICS

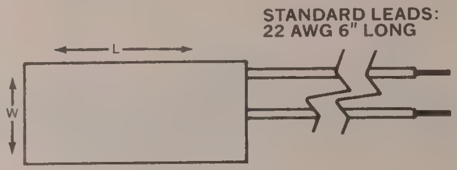
MANUFACTURED BY MIDWEST COMPONENTS, INC.

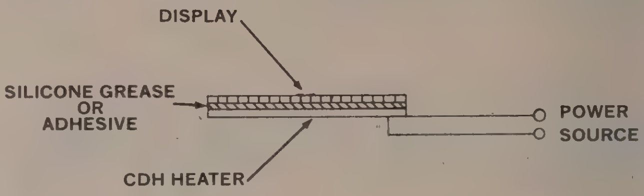
SELF REGULATING DISPLAY HEATER

The unique self-regulating heating effects of specially doped ceramics are utilized to create a new type heater for liquid crystal or other temperature sensitive displays. These devices produce heat at cold temperatures and curtail heating at normal or high temperatures. This feature allows its use in battery operated instruments due to low normal current drain. Use of this heater allows a broader application of displays by removing the adverse effects of temperature.

Heater is attached to reverse side of display with thermally conductive epoxies or silicone adhesives depending upon display's thermal coefficient of expansion or temperature to which it may be subjected. Actual performance of the display will depend upon manufacturers specifications.







ORDER NUMBER	SIZE* L X W	OPERATING VOLTAGE**	NOMINAL RESISTANCES R@ - 35°C	NOMINAL RESISTANCES R@ 50°C

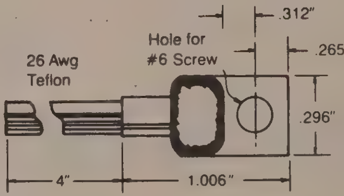
OVER TEMPERATURE PROTECTORS

MIDWEST COMPONENTS' Over Temperature Protector provides shutoff or regulation of expensive RF or AF Power Transistors. Protects against over heating that occurs from output stage component failure, antenna breakage, or short conditions.

Unlike fuses or bi-metal elements its action is recyclable and has no hysteresis effect.

Also available:

- Other switching temperature or resistances compatible with package constraints.
- Special lead types or end terminations.
- Body styles for protection of TRIAC or SCR Rectifiers.



Order Number	Switching Temp. (Nom.)	Resistance at 25°C (Ohms)	Resistance at Switching Temperature	Max. Cont. Oper. Temp.

OVER TEMPERATURE PROBE 9RT1P—SERIES

This rugged Probe is designed for over temperature sensing on compressors, engines, or fluid transfer lines. When over temperature occurs its resistance increases by a factor of five or more. This large increase allows simple interface with relay or Thyristor controls. Probe functions on AC or DC without regard for polarity. Stainless steel is used to minimize corrosion.

PTC SWITCHING THERMISTORS

MANUFACTURED BY MIDWEST COMPONENTS, INC.

THE POSITIVE WAY TO SENSE, MEASURE, CONTROL, REGULATE AND PROTECT.

MIDWEST COMPONENTS INC. PTC switching thermistors are thermally sensitive resistors which exhibit large positive increases in resistance with temperature. At customer specified temperatures the resistance rises abruptly from a low value to a high value. This resistance shift is infinitely repeatable and has no hysteresis associated with its action.

ALL LEADS TINNED COPPER 1" MINIMUM

• CURRENT LIMITERS

The ceramic element protects circuits from destructive overcurrent conditions by switching to a high resistance which trims the current back to a safe level. The unit then recovers automatically when the overcurrent condition is corrected.

The ceramic current limiter is an inexpensive alternative to fuses and fixed resistors. It has obvious advantages over all of these since it has infinite life, is self resetting which eliminates field servicing and will not "flame out" eliminating the fire hazard of fixed resistors.

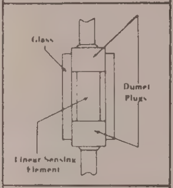
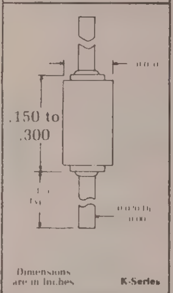
TEMPSISTOR

TEMPSISTOR© TEMPERATURE COMPENSATOR

MANUFACTURED BY MIDWEST COMPONENTS, INC.





The Tempsistor© manufactured by MIDWEST COMPONENTS INC. is a temperature compensator designed to offset the temperature drift of metallic and semi-conductors. Applications include pressure transducers, opto amplifiers, inductive motor controllers, and automatic gain controls. Small size can replace ⅛ watt or large resistors.

The Tempsistor© is available in resistances from 10 to 39,000 ohms at 25°C.

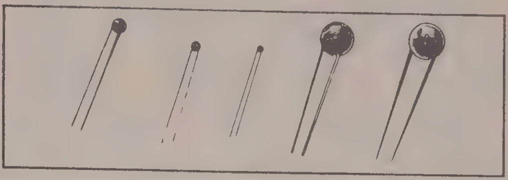
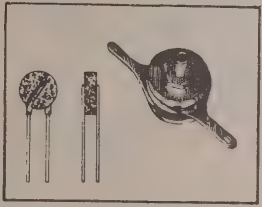
Disc Series Thermistors are small rugged Thermistors with close electrical tolerances. Their small mass gives short thermal time constants, yet they are not so small that it is difficult to handle them. The tinned copper leads are easily soldered into electrical circuits.



SUPPRESSORS

INRUSH CURRENT SUPPRESSORS FOR SWITCHING POWER SUPPLIES.



Switching power supplies present high initial currents due to filter capacitor impedance upon turn-on. The use of Midwest's NTC (Negative Temperature Coefficient) devices limits this current to a low valve. After current flow their resistance becomes negligible and offers little voltage drop.

MCI P/N	Description	FIG.	Size	Cold Resistance at 25°C	Maximum Applied Current	Hot Resistance At Specified Current

BEAD PROBES

Glass coated bead Thermistors feature SMALL SIZE, FAST RESPONSE, and improved HIGH-TEMPERATURE STABILITY. Leads are fired-in platinum-iridium. Bead probes, incorporating the bead in the tip of a glass probe, offer the additional advantages of more rugged construction in an easy to mount package which can be used in liquid media. Tinned Dumet leads are supplied on probes. The maximum operating temperature for beads and bead probes is 400°C.

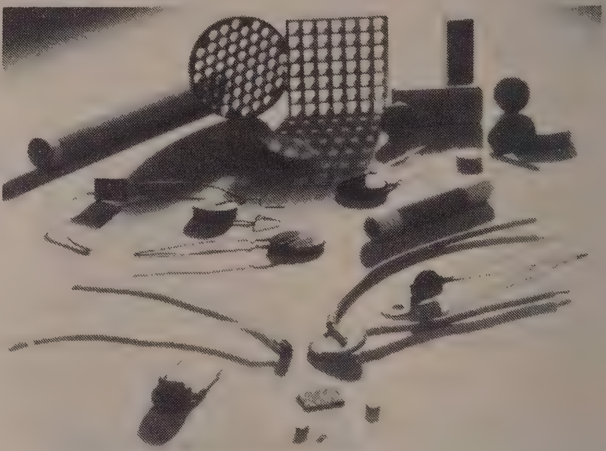
SYLVANIA Control Devices **GTE** **THERMASTER™**

PTC's (Positive Temperature Coefficient Thermistors) To Heat, Sense and Control



A versatile tool for design engineers

Whatever your product application, there will be problem areas where the unique characteristics of Thermaster™ PTC thermistors can provide a reliable and cost-effective solution. These versatile components can be used as self-regulating heaters, temperature sensors or control elements. Applications occur in all industries, including transportation, consumer products, office data processing equipment, industrial controls, instrumentation and communications. The advantages of Thermaster components include simplicity, solid-state reliability, versatility, stability, sensitivity and resolution. They are producible in a wide range of ratings and package styles. Isn't it time you looked into their capabilities? Ask for literature.

APPLICATIONS

HEATERS

Fluid

Cartridge

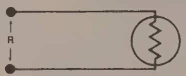
Surface

ADVANTAGES

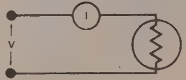
- No overtemperature protection required
- Fixed temperature operation, wide range of temperatures producible
- Stable characteristics over wide voltage range

Cost Effective—The ability of the PTC thermistor to auto-stabilize over wide variety of operating temperature precludes the need for temperature regulators and/or over temperature protectors in most heater applications.
Producible in a number of shapes and packages for heating liquids, solids or gases.

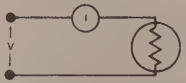
SENSORS



Temperature



Liquid Level



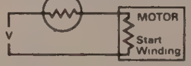
Air Flow

ADVANTAGES

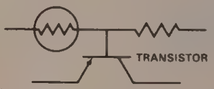
- Small size
- Low power levels required
- Broad resistance range producible

Versatile—PTC's are offered in a wide range of switching temperatures and resistances for maximum design flexibility.
Producible with attached leads for PC board mounting; as discs for surface mounting; as chips for hybrids; and in various other shapes.

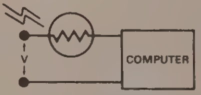
CONTROLLERS (Protectors)



Current Limiters



Overtemperature Protector



Surge Voltage & Line Fault Protectors

ADVANTAGES

- No moving parts
- Small size
- Wide range of packages
- High reliability

Control PTC thermistors provide a simple means to protect loads against fault conditions; i.e.; voltage surges such as line crosses; undesireable temperature rises; or to protect circuits from excessive current.
They have no moving parts, are rugged, and are available in a number of sizes and resistance ranges for almost any application.

Micro Devices thermal cutoffs and Therm-O-Disc sensors and controls...

Your reputation for product quality and safety is a valuable asset you need to protect. Therm-O-Disc can help with more than 50 reliable sensors and controls now in production. Everything from general purpose fixed-setting controls to pressure-actuated and temperature/current sensing switches.

Plus MICROTEMP® thermal cutoffs made by our Micro Devices Product Group in many ratings and configurations for positive upper limit temperature protection. We've been meeting the special needs of our customers since 1945. Write or call about your requirements. We'll be glad to help...

protect your product quality and safety.

THERMISTORS

OUR STANDARD COMPREHENSIVE LINE OF QUALITY, STABLE, LOW COST THERMISTORS AND THERMISTOR ASSEMBLIES ARE AVAILABLE FROM STOCK OR SHORT DELIVERY.

		DESCRIPTION	APPLICATION	BULLETIN
	BEADS	Glass coated beads from .005" dia. to .055" dia.	Temp. measurement & control. Gas analysis. Circuit compensation. Flow, microwave power, small size, fast response.	B1 B3 B5 B7 B9
	PROBES	Enclosed bead at tip of glass cylinder: .020" dia. to .100" dia.	Temp. measurement & control. Circuit compensation. Liquid level & flow. Rugged, easily mounted. Fast response.	C-1 C-3 C-7
	RODS	Ruggedized bead in glass rod: .060" to .100" dia.	General application where opposite lead ruggedized configuration is required.	C-5
	FLAKES	Thin Flakes: .020" x .020" x .001" to .120" x .120" x .004". Matched units on mounts.	IR measurement. Non-contact temp. meas. Intruder alarms. Microcircuit applications.	D-1 D-3 D-5
	ULTRA-FAST RESPONSE	Response times to 3 ms. Probes, insulated lead assemblies.	Where ultra-fast thermal response is required, in flow, temp. measurement. Catheter applications.	F-1
	HI-TEMP	.055" dia. beads & .060" to .100" dia. glass probes, using special matls. & processing.	Where operating temperatures of 450°C continuous are required.	E-1 E-3
	ASSEMBLIES	Large variety of special & standard housings.	Protected thermistor assemblies.	H-1 H-3 H-5
	TEMPERATURE STANDARDS	Precision temperature standards: 0°C to 60°C with calibrations every 0.01°C.	Laboratory & field temperature standards. OEM applications.	I-1 I-3
	ULTRA-STABLE THERMISTORS	Glass probes .060" to .100" dia. Interchangeable matched pairs. Guaranteed stability to 0.02% or 0.005°C/year.	Precision temp. measurement & control. Laboratory standards.	C-7
NEW!	THERMISTOR CHIPS	.050" x .050" to .100" x .100" sizes; bare and epoxy coated; broad tolerance or interchangeable.	General temperature measurement and control applications, low cost.

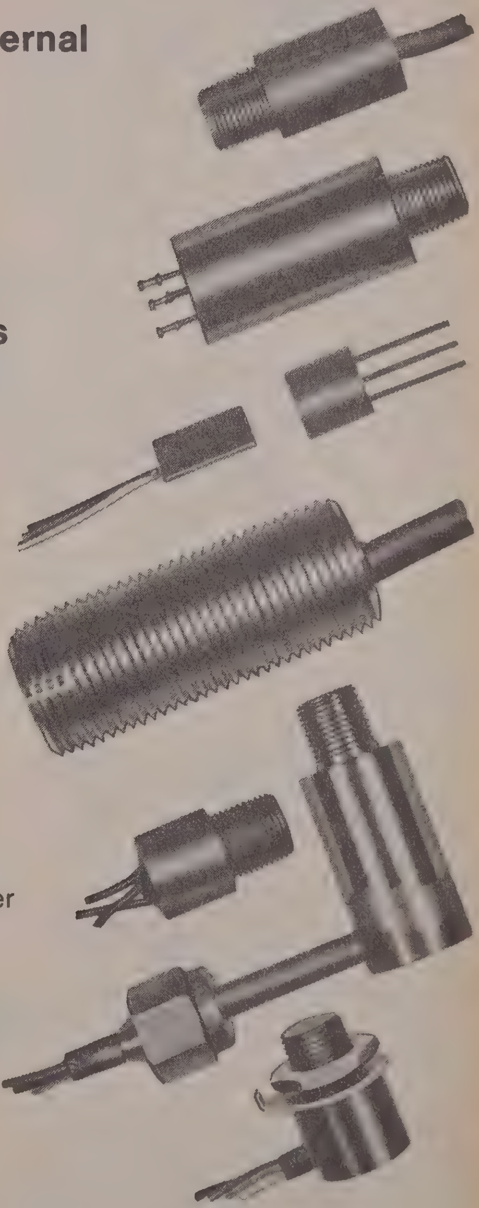
Speed-Independent Magnetic Pick-ups

Their output voltage amplitudes are totally independent of the rate of change to the external magnetic field. They provide

- **True zero speed sensing**
- **Contactless limit switches**
- **Translational and rotational velocity, direction and position sensing**
- **Counting, indexing, and timing functions**



Benefits:

- Simplify designs
- Low power consumption
- Rugged enough for engine environments
- Aerospace reliability
- Operate from logic power bus
- Freedom from EMI (no choppers or oscillators)
- Freedom from actuator mechanisms
- Can replace optical systems

Applications:

Computer peripherals—sensing of indexing marks for drive mechanisms in card readers / magnetic tape memories / paper roll drive, and character selection in printers

Transportation—wheel speed sensing (skid-controlled braking) / ignition system timing / vehicle sensing (traffic control)

Industrial — speed, position and limit sensing

Aerospace — wide applications

Other Products:

Solid state Push Button and Toggle Switches / Solid state current sensors / as well as brushless DC Motors and Torquers.

WHEN THE QUESTION IS MOTION CONTROL, THE ANSWER IS BEI

Call the division that matches your application.

H-25
L-25
Extra heavy duty H-40
New economy E-25

Our INDUSTRIAL ENCODER DIVISION guarantees 30-day delivery on standard model encoders with over 125 resolutions in stock from 1 to 50,000 CPT *incremental:* a wide choice of mechanical and electrical options.

Designed for the abusive machine tool environment. Rugged cast housing, heavy duty shaft and bearings. Available sealed against liquid entry and for shaft loads up to 200 lbs. and 200G shocks.

TYPICAL APPLICATIONS: Incremental machine tool, process control, instrumentation, incremental motion computer peripheral.

FOR FAST, LOW OEM PRICE QUOTES CALL OUR APPLICATIONS ENGINEERS.

New Series 143

Our DIGITAL PRODUCTS DIVISION offers a wide choice of high accuracy optical rotary, *absolute, incremental* and *tachometer* encoders. Standard resolutions to 1,048,576 bits-per-turn. Special resolutions to 16,777,216 (2^{24}) bits per turn.

Also Ultra-Loc® direct drive programmable rate and position digital control servo system.

TYPICAL APPLICATIONS: Space rated, military high reliability, precision servo systems, pointing and tracking.

M-15
E-15
Self-contained, self-aligning

Our COMPUTER PRODUCTS DIVISION offers small, high quality optical encoders for high volume computer peripheral, medical and robotics markets.

Our modular M-15 can be customer installed in 60 seconds. Not a kit! Totally self contained. Needs no alignment. The E-15 is also self-contained, with shaft and bearings. Both models are 1.5″ diam. TTL outputs with resolutions up to 1024 CPT in quadrature with zero reference. Dual inch/metric outputs available.

FAST DELIVERY for standard shaft sizes.

TYPICAL APPLICATIONS: Computer Peripheral, Medical Electronics, Robotics, General applications requiring small size encoder.

BLATEK ULTRASONIC TRANSDUCERS

Blatek Industries, Inc. offers ultrasonic transducers in several frequencies providing for a wide range of applications.

The 9000 series of transducers are high frequency, but low cost transducers designed for use in industrial controls and level sensing. Available in OEM quantities or custom designs.

The 9350 (pictured above, top center) is a 1Mhz unit designed for use in various liquid media including hydrocarbons. It is in a brass housing with a UHF connector. Minimum order is one piece.

The 8010 and 8020 model transducers, available in either 25 or 40KHz, are ideal for a variety of applications where a low to medium power ultrasonic transducer is required. Operating distance on these units is a minimum of six feet to a maximum of twenty feet.

Both have painted aluminum housings. The 8010 is available with either PC pins or a phono plug; the 8020 with either PC pins or wire lead attachments. Minimum order is five pieces. Available in OEM quantities.

BLATEK SPECIAL PRODUCTS

Blatek provides specific customer design assistance and/or assembles special products for companies that do not have in-house capability.

Some other special product lines include:

- — MEDICAL TRANSDUCERS AND SUBASSEMBLIES
- — SMALL MILITARY PARTS
- — PIEZO CERAMIC BIMORPHS
- — CUSTOM DESIGN AND SUB-ASSEMBLY WORK OF YOUR COMPANY'S PRODUCT OR SYSTEM

For an estimate on a specific design or project, submit a complete set of prints, drawings, or tentative application of product.

Confidentiality of proprietary project guaranteed. Customer references furnished upon request.

BLATEK AUDIO TRANSDUCERS

Blatek piezo ceramic audio transducers are available in three standard sizes, with or without feedback tab. All units can be provided with soldered-on lead wires at additional charge. Units requiring a stud mount or other special treatment will be quoted upon request.

MODEL	O.D.	RES FREQ. (KHz)
6010 (6013)*	1.062"	4.8 ± 500
6020 (6023)	1.250"	3.5 ± 600
6030 (6033)	1.375"	3.0 ± 600

*Units in parenthesis designates feedback pattern. Special electrode patterns and frequency requirements quoted upon request. Small quantities from stock. Minimum order 30 pieces.

MODEL/FREQ.	*DIMENSIONS*	*BANDWIDTH*	*POWER RATING*	*IMPEDANCE*	*MAX. DRIVING VOLTAGE*
9350-1MHz	1.0"x1.250"	±10%	20 watts	300 ohms	200 (p-p)
8010-25KHz	1.0"x .562"	.4 KHz	.2 watts	325 ohms	35 (p-p)
8010-40KHz	1.0"x .562"	.4 KHz	.2 watts	750 ohms	60 (p-p)
8020-25KHz	1.5"x .375"	.8 KHz	2 watts	1150 ohms	100 (p-p)
8020-40KHz	1.5"x .375"	1.0 KHz	2 watts	525 ohms	100 (p-p)

Calibration Chart for Accelerometer Type 4370

Brüel & Kjær

Serial no. 619771

Reference Sensitivity at 50 Hz at 25 °C

Cable Capacitance of 115 pF

Charge Sensitivity** 9,99 pC/ms⁻² or 98,1 pC/g*

Voltage Sensitivity** 7,43 mV/ms⁻² or 72,9 mV/g

Capacitance (including cable) 1345 pF

Maximum Transverse Sensitivity at 30 Hz 1,7 %

Weight 54,1 grams

Undamped natural frequency 28 kHz

For mounted Resonant Frequency and for Frequency Response relative to Reference Sensitivity, see attached individual Frequency Response Curve

Polarity is positive on the center of the connector for an acceleration directed from the mounting surface into the body of the accelerometer

Resistance minimum 20000 MΩ at room temperature

Date 17-9-76 Signature

* 1 g = 9.807 ms⁻²

** This calibration is traceable to the National Bureau of Standards Washington D.C.

BC 0100

Physical

Material: Stainless Steel

Mounting Thread: 10–32 UNF 2B

Electrical Connector: Coaxial 10–32 UNF 2A thread

Environmental

Humidity: Sealed

Max. Temperature: 250°C or 482°F

Max. Continuous Sinusoidal Acc. (peak) 20000 ms⁻² or 2000 g

Max. Shock Acceleration 50000 ms⁻² or 5000 g

Typical Magnetic Sensitivity (50 Hz) 1.2 ms⁻²/T or 0.012 g/kgauss

Typical Temperature Transient Sensitivity (Low Lim. Freq. 3 Hz) 0.08 ms⁻²/°C or 0,008 g/°C

Typical Base Strain Sensitivity 0,003 ms⁻²/μstrain or 0,0003 g/μstrain

celesco POSITION TRANSDUCERS

	Model	Ranges	Resolution	Accuracy	Thermal Effects (Zero)	Thermal Effects (Span)
	**PT101 Position/ Displacement Transducer:** Provides an electrical signal proportional to the linear extension of a stainless cable through the use of a precision potentiometer.	0-2 inches to 0-500 inches	essentially infinitesimal (most ranges)	±0.1% full scale (linearity and repeatability)	0.01%/°F full scale	0.01%/°F
	**VT201 Velocity Transducer:** Generates a DC signal proportional to the velocity of cable extension or retraction.	0-2 inches to 0-500 inches	essentially infinitesimal	±3%, linear to 0.1%	not applicable	0.01%/°F
	**DV301 Position/ Velocity Transducer:** Combines linear tachometer with potentiometer, offering both displacement and velocity outputs.	0-2 inches to 0-500 inches	position and velocity: essentially infinitesimal (most ranges)	position: ±0.1% full scale (linearity and repeatability) velocity: ±3% linear to 0.1%	position:0.01%/°F full scale velocity: not applicable	position: 0.01%/°F velocity: 0.01%/°F
	**PT420 Position Transmitter:** Combines a position transducer with two-wire 4-20 ma electronics. Operates from 12-45 VDC across input.	0-2 inches to 0-500 inches	essentially infinitesimal (most ranges)	±0.15% full scale (linearity and repeatability)	±0.015%/°F full scale	±0.015%/°F
	**Model PT801 Underwater Transducer:** A position/displacement transducer useful in underwater or extremely hostile environments. Available in stainless steel or anodized aluminum.	0-2 inches to 0-150 inches	essentially infinitesimal (most ranges)	±0.1% full scale (linearity and repeatability)	0.01%/°F full scale	0.01%/°F

celesco PRESSURE TRANSDUCERS

Piezoelectric Pressure Transducers

	Model	Sensitivity	Sensitivity	Charge Sensitivity	Capacitance	Maximum Pressure	Rise Time
	LC-33 Blast Pressure Transducer: High sensitivity; records a variety of dynamic pressure phenomena commonly found in free-field blast measurements, shock tunnel pressure-time profiles. Miniaturized LC-13 version available.	0.67V/psi	-101 db re $1V/\mu$ bar	3000 pc/psi	4500 pf	500 psi	10 μ sec
	**LD-25 Blast Pressure Transducer:** Flush-mounted economy model for various measurements of dynamic pressure, acoustic phenomena; useful for high-pressure transients, low-level acoustics.	0.15V/psi	-113 db re $1V/\mu$ bar	35 pc/psi	240 pf	3000 psi	1 μ sec
	LC-70 and LC-71 Pressure Transducers: Small, highly sensitive flush-mounted transducers for recording a variety of dynamic pressure and acoustic phenomena.	0.15V/psi	-113 db re $1V/\mu$ bar	120 pc/psi	800 pf	300 psi	4 μ sec

celesco PRESSURE TRANSDUCERS

Variable Reluctance Pressure Transducers

	Model	Ranges	Linearity	Maximum Line Pressure	Over-pressure	Working Fluids	Output
	**P1 Pressure Transducer:** Operates reliably under adverse environmental conditions; ideal for aircraft/missile flight, ground-test applications. Compatible with most carrier systems.	±0.1 to ±1000 psi gage, absolute or differential	0.5% full scale, best straight line	2000 psi	200% of range in either direction	liquids and gases, both sides	25mv/V nominal full scale at 3000 Hz
	**P2 Pressure Transducer:** Highly shock resistant; ideally suited for corrosive media and accidental pressure overloads in water and hydraulic systems. Can be disassembled for field cleaning.	0-200 to 0-10,000 psi, gage or absolute	±0.5% full scale, best straight line	not applicable	200% of range or 12,000 psi, whichever is less	liquids, gases and solid suspensions	25mv/V nominal full scale at 3000 Hz
	**P3D Differential Pressure Transducer:** For precise measurement of low differential pressure at high line pressures; insensitive to shock and vibration, and suitable for corrosive fluids.	±0.1 to ±5000 psi, gage or differential	±0.5% full scale, best straight line	5000 psi	200% of range of 7500 psi, whichever is less (either direction)	liquids and gases, both sides	25mv/V nominal full scale at 3000 Hz
	**P7D Differential Pressure Transducer:** Ideal for low- and medium-pressure measurements of laboratory accuracy. Commonly used in aircraft and missile flight and in ground test and control applications.	±0.1 to ±500 psi, gage or differential	±0.5% full scale, best straight line	1000 psi	200% of range in either direction	liquids and gases, both sides	25mv/V nominal full scale at 3000 Hz
	KP15 Pressure Transducer Kit: Perfect for general laboratory use. Kit includes case, wrenches spare seals, accessories and diaphragms for five different ranges.	±1, ±5, ±25, ±100 and ±500 psi, gage or differential	±0.5% full scale, best straight line	2000 psi	200% of range in either direction	liquids and gases, both sides	25mv/V nominal full scale at 3000 Hz
	P90D Differential Pressure Transducer: Measures very low pressure differences at line pressures to 1000 psi. Has low acceleration sensitivity and wide dynamic response.	±1 in. H_2O differential (.036 psi)	±0.5% full scale, best straight line	vacuum to 1000 psi	±15 psid, with less than 0.5% full scale shift	liquids and gases, both sides	25mv/V nominal full scale at 3000 Hz
	**CP51 Pressure Transducer—DC Output:** Combines a variable reluctance pressure transducer and carrier demodulator in a single package. Operates from 28 VDC or 115 VAC (optional).	±0.1 to ±1000 psi, gage, absolute or differential	±0.5% full scale, best straight line	2000 psi	200% of range in either direction	liquids and gases, both sides	0-5 VDC or ±5 VDC full scale
	LCVR Low Cost Differential Pressure Transducer: Designed to fill the need for a low-cost, ultra-low range, lightweight transducer for medical and industrial markets.	0-2 cm H_2O to 0-1000 cm H_2O gage or differential	±0.5% full scale, best straight line	30 psia	300% of range with less than 1% full scale zero shift	air, oxygen, CO_2 or any inert gas	25mv/V nominal at 4000 Hz

Strain Gage Pressure Transducers

	Model	Ranges	Accuracy	Resolution	Overpressure	Working Fluids	Output
	**PLC Pressure Transducer:** General purpose transducer. Low-cost, accurate, rugged, compact. Weather resistant and temperature-compensated.	0-15 to 0-10,000 psi gage or absolute	±0.5% full scale (linearity, hysteresis and repeatability)	infinitesimal	200% of range	liquids and gases compatible with 17-4 pH stainless steel	10mv/V ±1%, zero balance ±1% full scale
	P2805 Pressure Transmitter: Ideal for most fluids or gases, for hydraulic and pneumatic systems, automotive and aircraft instrumentation. 5 VDC output. 19-32 VDC input.	0-15 to 0-5000 psi gage or absolute	±0.5% full scale (linearity, hysteresis and repeatability)	infinitesimal	200% of range	liquids and gases compatible with 17-4 pH stainless steel and Viton O-ring	0-5 VDC (0-10 VDC optional)
	Model P4420 Pressure Transmitter: Similar to P2805 except offers 4-20 ma, two-wire output. Compatible with a wide range of electronic receiving, readout equipment. Transmitter requires 12-45 VDC input.	0-15 to 0-5000 psi gage or absolute	±0.75% full scale (linearity, hysteresis and repeatability)	infinitesimal	200% of range	liquids and gases compatible with 17-4 pH stainless steel and Viton O-ring	two-wire, 4-20 ma

DATA INSTRUMENTS' PRESSURE TRANSDUCERS

Features
- Pressure ranges: 0–5 to 20,000 PSI
- Output: voltage, frequency, or current
- A unique design that puts stainless steel in contact with your pressure media
- 2x rated pressure without damage. 10x rated pressure without bursting
- Full calibration and temperature compensation
- Unit-to-unit interchangeability: ±1%
- Rated intrinsically safe

Options

Optional features can be obtained at additional costs:
1. Absolute pressure version.
2. Improved zero and span temperature compensation to 1%/100°F (55°C) and improved accuracy (combined non-linearity, hysteresis and repeatability) from 1% to 0.5%.
3. Barbed fitting for attaching protective hose around cable.
4. Install longer cable by splicing to existing 3 ft. cable.
5. Install longer continuous cable.
7. Extended operating temperature range to 300°F (148.9°C) 6 and 15 PSI excluded. Includes Bendix PTIH-10-6P electrical connector with an extended case.

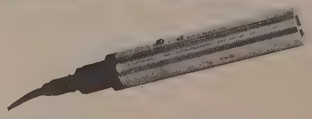
Series E Explosion-Proof Housing

Series E may contain Models AB, BF, or BL. Consult above chart for specifications.

Model DS Depth Sensor



- Two-wire • 4–20 mA output
- Watertight connector
- Waterproof housing withstands 10,000 PSI

Transducer Instrumentation

Signal Conditioners/Controllers, Data Acquisition Systems, Meter Indicators, and Power Supplies are available.

Features
- Digital readout • Multi-channel operation
- Bridge excitation for transducers • Zero and span controls • Dual set points for controls and alarms • Auxiliary output signal

Talk to us about your special needs in the areas of:
- gaging • specifications • material • mounting

Let us help you find the answers to your pressure measurement problem.

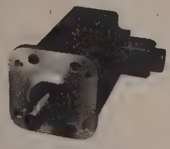
OPTICAL SHAFT ENCODERS

INCREMENTAL ENCODERS

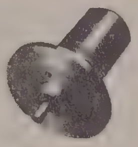
	Pulses Per Revolution	Input Voltage (VDC)	Output Formats	Frequency Range (KHz)	Shaft Diameter (Inches)	Outline Dimension (Inches)
K15 Modular	50 to 1000	5 or 12	Square Wave	0 to 50	N/A	1½ Dia. x ¾ L
	Ultra low cost, very small modular encoder for easy installation on servo or stepper motor. Hybrid circuitry minimizes solder connections and improves reliability.					
K3 Modular	50 to 1200	5	Square Wave, Sine Wave	0 to 50	N/A	2 Dia. x ¾ L
	Low cost modular encoder designed to be integrally mounted on servo or stepper motor having shaft diameter of up to ½ inch. Square wave or amplified sine wave output.					
LC-15 Instrument Grade	50 to 1000	5 or 12	Square Wave	0 to 50	¼	1½ Dia. x 1½ L
	Very low cost shaft encoder for applications where space is at a premium. Unit features a single LED light source, a monolithic sensor array and hybrid circuitry for maximum reliability.					
LC-23 Instrument Grade 	30 to 2500	5 or 12	Square Wave, Sine Wave, Line Driver	0 to 50	¼	2¼ dia. x 1⅞L
	Low cost shaft encoder which offers many of the optional features of far more expensive units. Face or servo mount, choice of output formats, cable or terminal connections.					
Tru-Mite Heavy Duty	100 to 5000	5 to 15	Square Wave, Sine Wave, Line Driver	0 to 100	⅜	2½ Dia. x 2½ L
	High performance, industrial duty encoder with ⅜" diameter shaft and sealed bearings. Cast aluminum housing with flange or servo mount. LED light source 100 KHz frequency range and up to 5000 PPR resolution.					
Tru-Tac Heavy Duty	10 to 1200	5 to 24	Square Wave, Sine Wave, Line Driver	0 to 30	⅜	3L x 3¼ W x 3⅛ H
	Very rugged encoder with double-ended ⅜" diameter shaft and sealed bearings. Cast aluminum housing with foot or face mounting. Built-in voltage regulator permits use over a wide supply voltage range.					

OPTIONAL ENCLOSURES



L Series

The L Series consists of a heavy duty sealed, NEMA 4 enclosure within which an encoder is mounted. A flexible coupling connects the encoder shaft to the enclosure's shaft, thus isolating the encoder's bearings from shaft loading effects. Two Datametrics encoder models can be mounted in the L Series — LC-23 and Tru-Mite.



EX Series

The EX Series consists of an explosion-proof enclosure which is FACTORY MUTUAL LISTED for Class I, Divisions 1 and 2, Groups C and D; and Class II, Division 1, Groups E, F and G indoor and outdoor (NEMA 4) hazardous locations. Two Datametrics encoder models can be mounted in the EX Series — LC-23 and Tru-Mite.

ABSOLUTE ENCODERS

	Resolution (Counts)	Input Voltage (VDC)	Output Codes	Output Format	Frequency Range (KHz)	Shaft Diameter (Inches)	Outline Dimensions (Inches)
LR Absolute	360 or 512	5 to 24	BCD, Gray Natural Binary, Gray	Square Wave	0 to 50	⅜ or ⅝	5 L x 3½ W x 3⅝ H
	Industrial duty, absolute encoder with BCD, natural binary or Gray code output. 360 or 512 counts per revolutions, 5 to 24 VDC input voltage range, open collector or passive pull-up output.

DATAMETRICS®

1-800-243-8160

The advantages of being tiny.

At Entran, we've solved most of the problems you might encounter with pressure transducers by making them tiny. And nowadays, tiny is the state-of-the-art.

Being tiny means you don't interfere with the integrity of the system being measured.

Being tiny means less measuring surface to bear loads, and a more compact solid state density with no moving parts.

Being tiny means being insensitive to acceleration, vibration and shock, so you get flat pressure readings, both static and dynamic.

And, being tiny means greater handling ease in hard-to-get-at places. Which adds up to more applications flexibility.

Entran pressure tranducers can usually be interfaced directly with scopes, recorders and milliammeters.

Our transducers come complete and ready to use. All you need supply is the excitation voltage on two leads and read output on the other two leads.

All units give you direct linear output in millivolts/psi and read both static and dynamic pressures. There's no need for charge or voltage amplifiers. Calibrations are traceable to The National Bureau of Standards.

Write Entran Devices, Inc., 10 Washington Ave., Fairfield, N.J. 07006 (201) 227-1002, Telex 130-361.

$360.00

Must not be used in water or corrosive medium.

Only 0.080 in diameter (that's tiny), EPI-080.

This solid-state pressure transducer is 0.080" in diameter, 0.25" in length and occupies a volume of only 0.0013 cubic inches. Yet it gives accurate static and dynamic pressure readings like the big ones do. Its atomically bonded, diffused diaphragm with leads attached to the non-active area make this device virtually insensitive to acceleration, vibration and shock.

Typical ranges	25 psi	50 psi	100 psi	250 psi	500 psi
Sensitivity nom.	3 mV/psi	1.8 mV/psi	1.0 mV/psi	0.4 mV/psi	0.2 mV/psi
Useful frequency nom.	25 KHz	30 KHz	40 KHz	60 KHz	80 KHz

Excitation. 5V. Output impedance: 750 Ω nom. Repeatability: 0.5%.
Non-linear and hyst: ± ¾%. Resolution: infinite.

$385.00

Tiny but easy to handle, EPX-10

This easy to install pressure transducer is built with standard 10-32 UNF thread and is available in an optional M5 metric version. it gives flat pressure readings static and dynamic, in 5 to 5,000 psi ranges to as high as 90KHz. Has infinite resolution and is also insensitive to acceleration, vibration and shock. Made of stainless steel, and with its built-in "O" ring seal can be screwed in just about anywhere. However, for corrosive or water usage, order our "welded" version.

Typical ranges	5 psi	50 psi	100 psi	250 psi	1000 psi
Sensitivity nom.	3 mV/psi	1.5mV/psi	1.2 mV/psi	0.5 mV/psi	0.12 mV/psi
Useful frequency nom.	9 KHz	15 KHz	15 KHz	20 KHz	40 KHz

Combined non-linear and hyst: ± 1% below 100psi, ½% above 100 psi.
Excitation: 10V. Output impedance: 350 Ω nom.
Repeatability: 0.25%. Thread length: 7/16".

Entran® Pressure Transducers.

(Today, miniature makes sense.)

Call (201) 227-1002

The advantages of being tiny.

At Entran we build a line of accelerometers that can best be described as tiny.

Being tiny means you don't interfere with the integrity of the system being measured.

Being tiny gives you greater handling ease in hard-to-get-at places, which adds up to more applications flexibility. And, being tiny means less mass to distort your test scale, more room for other instruments. All at no sacrifice in test data.

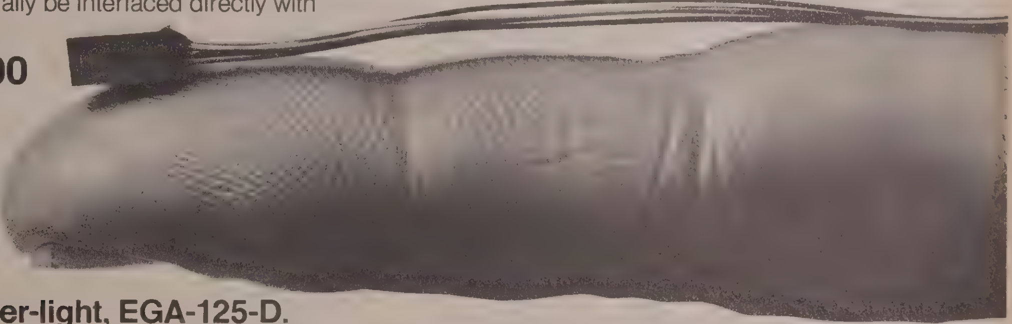
Entran accelerometers give you high output, low impedance readings, both static and dynamic. As a result they can usually be interfaced directly with scopes, recorders and milliammeters.

Entran accelerometers come complete and ready to use. All you supply is the excitation voltage on two leads and read output in millivolts on the other two leads.

All units give you direct linear output in millivolts/g and read both static and dynamic acceleration. There's no need for charge or voltage amplifiers. Calibrations are traceable to The National Bureau of Standards.

Write Entran Devices, Inc., 10 Washington Ave., Fairfield, NJ 07006 Phone 201/227-1002, Telex 130-361.

$329.00



Tiny and feather-light, EGA-125-D.

This accelerometer weighs only one half a gram. Is less than 0.006 cu. inches in volume. Yet gives you static & dynamic readings of acceleration, vibration and shock. And comes with .7 critical damping to eliminate resonance. ("D" is for "damped.")

Typical ranges	± 5g	± 10g	± 50g	± 100g	± 500g
Sensitivity nom.	15 mV/g	12 mV/g	4 mV/g	2.5 mV/g	0.5 mV/g
Useful frequency nom.	150 Hz	200 Hz	500 Hz	600 Hz	1200 Hz

Excitation: 15V, Weight: ½ gram without leads, Linearity: ± 1%,
5 other mounting styles available at no extra charge

$389.00

Tiny but tough, EGC-500DS.

Guaranteed overrange of 1000%. And only a half inch cube to boot.

Static & dynamic measurements of acceleration, vibration and shock in ranges from 5 to 1,000 g. Fully damped to eliminate resonance and fitted with mechanical stops to impede overload response.

Typical ranges	± 5g	± 10g	± 50g	± 100g	± 500g
Sensitivity nom.	25 mV/g	20 mV/g	4 mV/g	2 mV/g	0.5 mV/g
Useful frequency	150 Hz	200 Hz	600 Hz	1000 Hz	1500 Hz

REED SWITCHES • SENSORS • REED, HG & MOS RELAYS • LIQUID CRYSTAL DISPLAYS

MAGNETIC ACTUATED REED PROXIMITY SENSORS

Offer the long life and high reliability of reed switches. Include all the advantages of magnetic reed switches but come packaged ready for mounting. Expoxy package resists most solvents, acids and salts. Safe for use in hazardous environments. Shock and vibration characteristics comparable with the basic reed switch.

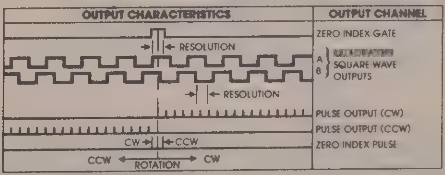
OD—Outside Diameter **ID**—Inside Diameter **C**—Self-contained Electronics **S**—Separate electronic enclosure **T**—2 speed geared paired configurations

Features: • Parallel whole word unambiguous output • T TL/DTL compatible • Resolution to 0.31 arc-seconds (22 bits) • Highest accuracies available anywhere • Operating temperature –40° to +71°C • Military Specification rated • Instant on-the-fly readout • LED light sources • Separate Electronics—no electronics in optical unit (thru-hole systems)

Available Options: • Serial readout • Line driver output • Redundancy • Chrome slit and disc (standard on size 23 and size 158) • Binary lamp display • Subtractor card for electronic zeroing

Features: • Quadrature square wave or pulse output, zero index • T TL/DTL compatible • Resolution to 0.31 arc-seconds (22 bits) • Self-contained electronics • Operating temperature –40° to +71°C • Military Specification rated • LED light sources

Available Options: • Line driver output • Pigtail cable • Square wave or pulse output



Environmental Ratings. All DIGISEC® encoders are designed to meet rigid military specifications. The following environmental specifications are typical.
Temperature, –40° to +71°C Vibration, 10-20g Humidity, 0 to 98%
Shock, 50g, 11 milliseconds (higher on solid shaft models)

Spacecraft Encoders: Absolute & Incremental

Model	Type	Diam. (Inches)	Resolution (Quanta/Rev.)	Accuracy	Weight (lbs.)	Power (watts)	Features

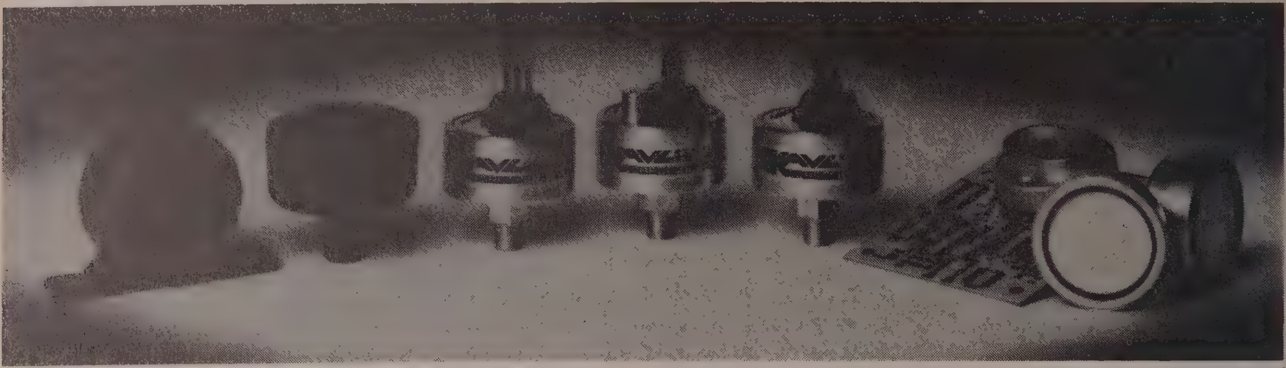
NEW P600 SERIES PRESSURE TRANSDUCERS



Providing excellent performance at minimum cost, the P600 Series is intended for custom, OEM pressure measurement applications. This series features exceptional repeatability, low hysteresis, accurate operation over a broad temperature range, and the ability to perform without zero shift when subjected to high overpressures. These characteristics, combined with long term stability, make the series ideal for microprocessor-based applications.

Key to the uniform performance and low cost features of this series is Kavlico's patented ceramic sensing element with its integral signal conditioning that employs a reliable solid state, custom hybrid circuit. Temperature compensation and calibration is provided through use of computer-controlled laser trimming of hybrid circuit components. As a result, uniformity from unit-to-unit is assured and there is no need for adjustment or recalibration by the user. In addition, the P600 Series maintains repeatable performances even after extraordinary overpressure, which has been demonstrated in over five years of automotive service.

The P600 Series provides a high level output voltage, permitting it to interface easily with a variety of circuits, indicators, or alarms. In addition, its ratiometric output is ideal for digital monitoring. By using the supply voltage as the reference for the conversion circuit, measurement accuracy is maintained regardless of supply voltage variations.

The P600 series provides a choice of rugged die cast aluminum or high dielectric strength Valox housings. Seal materials are available to meet a variety of applications.

In electrically noisy environments, reliability and performance are assured with protection against electromagnetic interference (EMI) and line voltage transients as a standard feature on most models.

The Litton Encoder team leads the way with encoders and special products that help you build more reliable, higher quality, cost-effective products with the precision you need.

Our product lineup is the broadest in the industry and meets a wide range of requirements in applications from robotics, computer peripherals, medical equipment, and industrial controls to specialized, high-reliability designs for aerospace and defense.

For anything from simple modular kits to sophisticated custom designs, put Litton Encoder on *your* design team. For complete data and specifications, contact —

	Diameter (mm)	Resolutions (Cycles/Rev.)	Output Channels	FEATURES
01A	22	15	Dual	**01A** High Precision. LED Operating Current: 5-20mA. Phototransistor Maximum Power Dissipation: 50 mW. Maximum Frequency approx.: 10 KHz (40,000 RPM). Signal Phase Shift: 120°. Output Wave Shape: Incremental Quasi-Sinusoidal. Available fitted to our Faulhaber Motors.
09A or 10A 	22	100 180	Single Dual	**09A or 10A** Quasi-Sinusoidal Output Signals can be interfaced through a standardized 6-pin connector. Signal Phase Shift: 90°. LED Operating Current: 50 mA. Phototransistor Maximum Power Dissipation: 100 mW. Available fitted to our Faulhaber Motors.
012H 	12	50 90 125	Dual	**012H** Our smallest, custom and thru-shaft versions available. Factory equipped leads and double-shielded dual ball bearing construction standard. Compact P.C. Board mountable, weighs 0.26 oz. Optional Squaring Circuit available. Speeds up to 8,000 RPM. Signal Phase Shift: 90°. Standard Output Wave Shape: Incremental Quasi-Sinusoidal. LED Operating Current: 40 mA. Max. Phototransistor Maximum Power Dissipation: 75 mW.
018H 	18	100 200 300 360	Dual with Indexing	**018H** Rugged construction. Custom and thru-shaft versions available. Same as our 012H. Optional Built-in Squaring Circuit TTL compatible. Speeds up to 8,000 RPM. Signal Phase Shift: 90°. Output Wave Shape: Incremental Quasi-Sinusoidal. LED Operating Current: 40 mA. Max. Phototransistor Maximum Power Dissipation: 75 mW.
E-3030	30	100 200	Dual with Indexing	**E-3030** Encoder with Standard Square-Wave Output. Amplifier built-in, with Standard 7½" flexible cable. Power Supply Voltage: 5VDC ± 5% at 80 mA. Max. Supply Current. Signal Phase Shift: 90°. Maximum Operating Frequency: 20 kHz.
KRE-01 	NA	100	Dual with Indexing	**KRE-01** Easy installation. Modular Unit consists of Encoded Disk and separate Sensor Module. Output Wave Shape: Quasi-Sinusoidal. Signal Phase Shift: 90°. Operating Frequency: 20 kHz. Power Dissipation: 60 mA. Max.
SZS-1 **SZS-3** **SZS-4** 	20 50 70	100 to 4000	Dual with Indexing	**SZS-1-3-4** General purpose high resolution. Signal Phase Shift: 90°. Operating Current to 100 mA. Max. Speeds up to 5,000 RPM. TTL, Square Wave Output. Channel Output Options: a/Clockwise, B/CCW or A, B, C/Direction.

☐ New Item - Rotary Hall Effect Encoders Available.

MICRO SWITCH

PRESSURE SENSORS

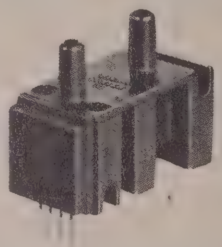
MICRO SWITCH solid state pressure sensors are ideally suited to applications that require exact measurement of pressure. They provide the important benefits of repeatability, low hysteresis, and long term stability.

The sensing element in each sensor is a square silicon chip with integral sensing diaphragm and ion implanted piezoresistors. Pressure applied on the diaphragm causes it to flex, changing the resistance, which results in an output proportional to pressure.

NON-SIGNAL CONDITIONED SENSORS

There are four series of non-signal conditioned sensors. They provide a low level output (typically 40 to 250 mV). Each series includes the basic sensor version, and a version with laser trimmed resistors (for close tolerances on null and sensitivity) and a thermistor for limited temperature compensation.

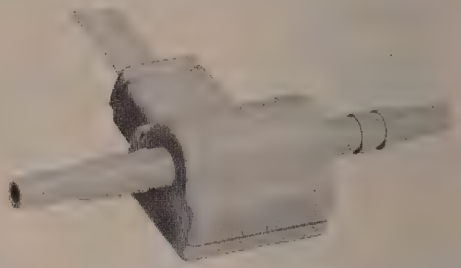
120PC



120PC series are small plastic packages equipped with printed circuit board terminals. 124PC is the basic sensor, and 126PC is trimmed and has limited temperature compensation.

Series	Pressure Range (psi)	Type*	Full Scale Output (F.S.O.)**	Electrical Excitation
124PC	0-5	D	115 mV ±35	10 VDC or 2 mA
	0-15	D	250 mV ±75	
	0-30	D	195 mV ±85	
126PC	0-5	D	50 mV ±1.5	16 VDC max.
	0-15	D	100 mV ±1.5	
	0-30	D	79 mV ±4	

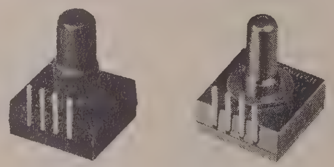
150PC



150PC series are specifically designed to measure flow-thru pressure media. The remote pressure reference is inside the termination cable. 154PC is the basic sensor, while 156PC is trimmed and temperature compensated.

Series	Pressure Range (psi)	Type*	Full Scale Output (F.S.O.)**	Electrical Excitation
154PC	0-5	G	115 mV ±35	10 VDC or 2 mA
	0-15	G	99 mV ±41	
	0-30	G	195 mV ±85	
156PC	0-5	G	250 mV ±75	14 VDC max.
	0-15	G	40 mV ±1.5	
	0-30	G	79 mV ±4	

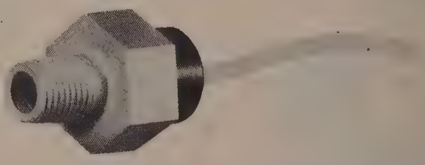
130PC



130PC series are miniature plastic packages, also equipped with printed circuit board terminals. 134PC is the basic sensor version. 136PC and 137PC are trimmed and temperature compensated. 136PC is voltage excited, while 137PC is current excited.

Series	Pressure Range (psi)	Type*	Full Scale Output (F.S.O.)**	Electrical Excitation
134PC	0-5	A, G	115 mV ±35	10 VDC or 2 mA
	0-15	A, G	250 mV ±75	
	0-30	A, G	195 mV ±85	
136PC	0-5	A, G	50 mV ±1.5	16 VDC max.
	0-15	A, G	100 mV ±1.5	
	0-30	A, G	79 mV ±4	
137PC	0-5	A, G	50 mV ±1.5	2 mA max.
	0-15	A, G	100 mV ±1.5	
	0-30	A, G	79 mV ±4	

230PC



230PC series are stainless steel housed Gage type sensors, compatible with a wide range of pressure media. The atmospheric pressure reference is inside the termination cable to reduce the chance of contaminants entering the enclosure.

Series	Pressure Range (psi)	Type*	Full Scale Output (F.S.O.)**	Electrical Excitation
234PC	0-15	G	250 mV ±75	10 VDC or 2 mA
	0-30	G	195 mV ±85	
	0-60	G	135 mV ±45	
	0-100	G	225 mV ±75	
236PC	0-15	G	100 mV ±1.5	16 VDC max.
	0-30	G	79 mV ±4	
	0-60	G	60 mV ±2	
	0-100	G	100 mV ±2	

* Type: A — Absolute; D — Differential; G — Gage.

** F.S.O. is the algebraic difference between end points (output at minimum and maximum pressure).

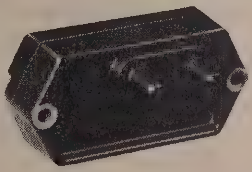
MICRO SWITCH

PRESSURE SENSORS

SIGNAL CONDITIONED SENSORS

The three signal conditioned series provide amplified high-level outputs (5V or ±2.5V). They are hybrid IC devices, with integral temperature compensation circuitry optimized on each unit as part of the calibration procedure. Null and full scale output are similarly controlled.

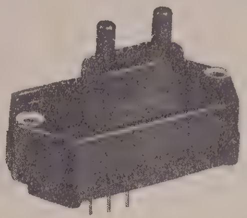
140PC



140PC series are plastic packages, equipped with printed circuit board terminals (color-coded leadwires are optional). They may be used to measure positive pressures, or for positive/negative pressure measurement. This series includes a two-wire pressure-to-current transducer, which senses industry standard 3-15 psi and provides a 4-20 mA output proportional to pressure.

Series	Pressure Range (psi)	Type*	Full Scale Output (F.S.O.)**	Electrical Excitation
142PC	0-5	D, G	5 VDC ±.15 1 VDC Null	7-16 VDC
	0-15	A, D, G		
	0-30	A, D, G		
143PC	±2.5	D	±2.5 VDC 3.5 VDC Null	7-16 VDC
	±5	D, G		
	±15	D, G		
149PC	3-15	D	4-20 mA	10-40 VDC

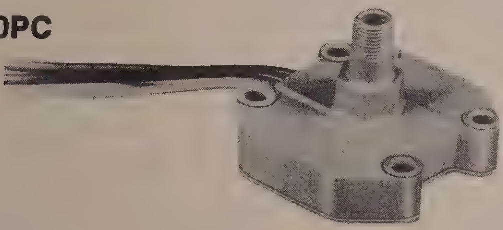
160PC



160PC series pressure sensors measure extremely low pressures, and feature high reliability. The package is similar to the 140PC series.

Series	Pressure Range (psi)	Type*	Full Scale Output (F.S.O.)**	Electrical Excitation
162PC	0-1	D, G	5 VDC ±.20 1 VDC Null	4.8-12 VDC
163PC	±5″ H_2O	D, G		
164PC	0-10″ H_2O	D, G		

240PC



240PC series sense positive pressures up to 250 psi, in addition to positive/negative pressures up to ±15 psi. They are protected by die-cast aluminum housings with O-ring sealing for contamination resistance.

Series	Pressure Range (psi)	Type*	Full Scale Output (F.S.O.)**	Electrical Excitation
242PC	0-15	G	5 VDC ±.20 1 VDC Null	7-16 VDC
	0-30	G		
	0-60	G		
	0-100	G		
	0-150	G		
	0-250	G		
243PC	±2.5	G	±2.5 VDC 3.5 VDC Null	7-16 VDC
	±5	G		
	±15	G

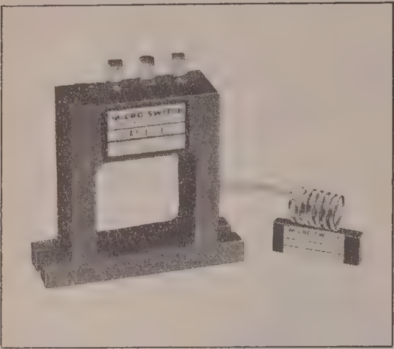
MICRO SWITCH, a Honeywell division

MICRO SWITCH

Current Sensors CS



MICRO SWITCH CS Series solid state current sensors are available with digital or linear output for either alternating or direct current.

Current sensors monitor current flow and in turn produce either a digital or linear output signal. When these signals have reached a predetermined current level, the control system logic is instructed to perform a function. The digital signal, with its simple ON/OFF output, may sound an alarm, start a motor, open a valve, or shut down a pump. The linear signal identifies the degree of current change and in a feedback application increases or decreases the current accordingly. Applications may include motor speed control for regulating the air volume in a heating and air conditioning system, or current regulation in welding equipment.

FEATURES

- *Digital or linear output*
- *AC or DC current sensing*
- *Through-hole design*
- *Fast response time*
- *Output voltage isolation from input*
- *Minimum energy dissipation*
- *Maximum current limited only by conductor size*
- *Built-in voltage regulation and temperature compensation assure reliable operation over a wide supply voltage range of 4.5-16 VDC*

SPECIFICATIONS

LINEAR OUTPUT SENSORS

ORDER GUIDE

Description	Catalog Listing
½ amp digital current sensor, AC/DC	CSDA5N1
5 amp digital current sensor, AC/DC	CSDA5P0
80 amp linear output current sensor, AC/DC	CSLA8P1
100 amp linear output current sensor, DC	CSLA1P2
300 amp linear output current sensor, AC/DC	CSLA3P2

TECHNOLOGY

The ½ and 5 amp digital, and 100 amp linear current sensors described use a magnetically sensitive thin film alloy of nickel-iron on a silicon integrated circuit (permalloy). The 80 and 300 amp linear current sensors described incorporate a MICRO SWITCH LOHET™ (Linear Output Hall Effect Transducer) integrated circuit.

OTHER OPTIONS

MICRO SWITCH will design a current sensor to fit your application. Circuit options include additional compensation, adjustment, and amplification for better performance over different temperatures, output scales, or improved response time. Package customization includes various printed wiring boards or plastic housings. Termination can include screw or quick-connect terminals. Early discussion with a MICRO SWITCH field engineer in the design of your system will result in the best product for your current sensing needs.

FOR DIMENSIONS REQUEST CATALOG #983

FEATURES AND APPLICATIONS:

- Accurate measurement of electric power consumed by equipment
- Accurate for any conditions of phase, voltage unbalance, current unbalance and power factor
- Output is proportional to true power delivered to the load
- Transducers using internal sensors or sensors C, D, or E provide excellent current transient response for measuring SCR controls, chopped waveforms or application where harmonics are present
- Highly-accurate, without worrying about the inaccuracies of current transformers and potential transformers
- Split sensors available
- Current sensors are included and are calibrated with the watt transducer (where required)
- For interface with meters, recorders, data loggers, computer or other instrumentation, select options "A" through "E"
- Wide frequency range: 48 to 70 Hz
- Standard 1 mA output, other options available

PC5 SERIES SPECIFICATIONS:

INPUT:

Voltage: See Tables. .

Current: See Tables

Frequency Range: 48 to 70 Hz

Power Factor Range: Any

Response (Transient 90%): <100 microseconds with models using internal sensors or sensors C, D, or E 1 millisecond with models using current sensors W, X, and Y

Burden:
Voltage: 1.25 VA
Current: 1.25 VA
Option Amplifier: 2 Watts

Current Overload:
1 thru 15 Ampere models and those using current sensors W, X, and Y
2 times rating (continuous)
6 times rating (10 sec)
Models using external current sensors C, D and E
50 times rating (continuous)

SPECIFICATIONS (cont.):

OUTPUT:

Output is proportional to real power delivered to the load. P = EI cos ϕ

Standard B: 1 mA DC at Rated Output (Requires 115 VAC instrument power)

Option A: 1 mA DC at Rated Output (See Note 1)

Option C: 10 VDC at Rated Output (See Note 1)

Option D: 10 VDC at Rated Output (Requires 115 VAC instrument power)

Option E: 4-20 mA DC. 20 mA DC at Rated Output, 4 mA DC at Zero

Millivolt Options Available Consult Factory

Output Ripple: <1% of R.O.

Response Time: 250 milliseconds to 90%

Output Loading:
  Standard Model B: 0-10K ohms
  Options A: 0-10K ohms
  Options C & D: >2K ohms
  Option E: 0-1500 ohms

Calibration Adjustment Range: ±10% Min.

Temperature Effect (−10°C to +60°C): ±1% of Reading, ±0.1% R.O.

ACCURACY:

±0.5% at Rated Output (including power factor, linearity, repeatability, initial set point, and current sensor).

NOTE (1) Self powered input voltage ranges for models with options A and C are limited as follows: 85 to 135V for 0 to 150V models 200 to 280V for 0 to 300V models, and 380 to 550V for 0 to 600V models.

NOTE: On 3 phase 4 wire models, phase to neutral voltage is specified.
Optional for 50 Hz operation add "X-127" to model number.

FEATURES AND APPLICATIONS:

- Provides ±0.2% of reading accuracy and 0 to 1 mA current output proportional to reactive power
- Models available in 1, 2, 2½, and 3 element configurations to meet monitoring and control needs
- Measures forward or reverse reactive power flow
- Each unit is calibrated at the factory to provide 1 mA at the Rated Output (RO) against standards which are traceable to NBS
- Accuracy specifications include influences of variation in voltage, current, power factor and load changes
- Temperature effects are less than ±0.005% per degree C over the range of −20°C to +65°C

EV5 AND EW5 SERIES SPECIFICATIONS:

INPUT:

VOLTAGE

Effective Range: See Tables
Burden: Less than 0.1 VA at 120V, 240V, or 480V
Overload: Max continuous 175V, 350V, or 600V

CURRENT

Effective Range: See Tables
Burden (max.): 0.28 VA per element
Overload: (continuous) 2X rating for 6.25A or 10A, 1X rating for 20A
(Transient) 50A for 10 sec. per hour, 250A for 1 sec. per hour

OUTPUT:

Rated Output (RO): ±1 mA DC
Output Loading: 0 to 10K ohms
Compliance: 12.0 volts DC minimum
Open circuit output voltage limited to ±15 VDC
Response Time (99%): Less than 400 milliseconds

ACCURACY:

(±0.2% of reading, ±0.05% of RO)
Includes the effects of voltage, current, load and power factor within the effective ranges

Specifications continued on next page

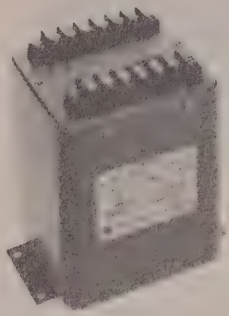
OSI ELECTRONIC PRECISION AC WATT TRANSDUCER EW5 SERIES

ACCURACY ±0.2% OF READING



FEATURES AND APPLICATIONS:

- Provides ±0.2% of reading accuracy and 0 to 1 mA current output proportional to electrical power delivered to a load
- Models available in 1, 2, 2½, and 3 element configurations to meet monitoring and control needs
- Measures forward or reverse power flow
- Each unit is calibrated at the factory to provide 1 mA at the Rated Output (RO) against standards which are traceable to NBS
- Accuracy specifications include influences of variation in voltage, current, power factor and frequency, and load changes
- Temperature effects are less than ±0.005% per degree C over the range of −20°C to +65°C

SPECIFICATONS (cont.):

Frequency, VAR Only: 60 Hz, 50 Hz Models (optional)

Frequency, Watt Only: 58 to 62 Hz, 48 to 52 Hz on 50 Hz Models (optional)

Power Factor: Any

Temperature Range: −20°C to +65°C

Temperature Effect: ±0.005% per degree C

Operating Humidity: 0 to 95% non-condensing

Dielectric Test: Input/Output/Instrument Power/Case — 1500 VAC (RMS)

Surge: Withstands IEEE SWC Test

Calibration Adjustment: ±2% minimum

Instrument Power: 90 to 135 VAC, 50 to 70 Hz Burden less than 2 VA at 115 VAC

Weight: 3.1 lbs. Maximum

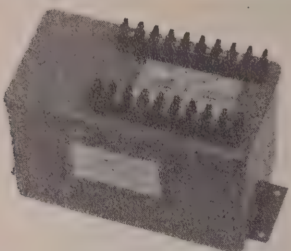
OSI AC POWER FACTOR, AND WATT TRANSDUCER PC11 SERIES



FEATURES:

- True power and power factor measurements for distorted sine wave inputs
- Two separate output signals of 0 to 1 milliampere corresponding to watts and power factor
- Direct reading of power factor, not phase angle for sinusoidal waveforms or distorted waveforms
- Power factor computed by dividing real power by apparent power
- Current sensors are included and are calibrated with the watt transducer (where required)

SPECIFICATIONS:

INPUT:

Voltage: See Tables

Current: See Tables

Frequency Range: 50 to 70 Hz

Power Factor Range: Unity to Lead or Lag 0

Response: 100 microseconds to 90%

Burden: Voltage: 1.25 VA
Current: 1.5 VA

Current Overload:
2 times continuous
6 times for 10 Sec.

Dielectric Test: (Input/Output/Case) 1500 VAC

Instrument Power Required: 115 VAC ±10% 50/60 Hz

OUTPUT:

Watts: 1 mA at Rated Output

Power Factor: +1 mA at Unity PF, 0 mA at Lead or Lag 0

Response Time: 250 mSec. to 90%

Output Loading: 0 to 10KΩ

Temperature Effects (−10°C to +60°C): ±1%

ACCURACY:

Watts: ±0.5% RO

Power Factor: From 10% to 120% of Rated VA ±0.01 PF

OSI DC TO 400 Hz WATT TRANSDUCER PC8 SERIES

FEATURES AND APPLICATIONS:

- DC to 400 Hertz
- Ideal for variable frequency applications
- Accurate monitoring of power that contains dc, AC and non-sinusoidal waveforms
- Response less than 50 microseconds
- Ideal for use in SCR and other AC or dc switching circuits
- Output isolated from input

ORDERING INFORMATION:

The part numbers listed in the selection tables are incomplete. The voltage and current designation code must be added.

Part Number PC8- * — △

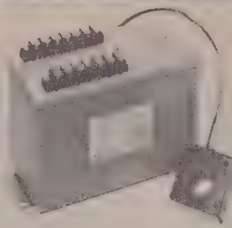
Example: PC8-3-01, which would be a PC8 transducer with 125VDC @ 100 amperes.

"*" Voltage Designation

CODE	FS VOLTS	RANGE
1	25	0 to 30
2	50	0 to 60
3	125	0 to 135
4	250	0 to 275
5	400	0 to 450
6	500	0 to 550
7	600	0 to 650

"△" Current Designation

CODE	FS CURRENT	RANGE	CURRENT SENSOR
01	100	0 to 100	C
02	200	0 to 200	D
03	300	0 to 300	D
04	400	0 to 400	D
05	600	0 to 600	E
06	1000	0 to 1000	E
07	2000	0 to 2000	E



SPECIFICATIONS:

INPUT:

Voltage: Check code designation for FS voltage ranges from 25 to 600 volts (peak AC or dc)

Burden: >1 megohm

Current: Check code designation (specify FS range from 100 ampere to 2000 ampere, lower range uses 100 ampere transducer with ampere turns)

DC Insertion Loss: None

Overrange Without Damage: 10 times rating

Frequency Range: DC to 400 Hz

Response Time: <50 microseconds

OUTPUT:

Full Scale Output: 1 mA dc (0 to 10K ohm)

Response: 250 milliseconds

Ripple: <1% Full Scale at 60 Hz

Accuracy: (FS Voltage X FS Current) ±1.0% FS

Temperature Effect: (0 to 40°C) ±0.1% of FS ±1% of Reading

Isolation: Input/Output/Case 1000 Vdc

Instrument Power: 115 VAC ±10% 50/400 Hz

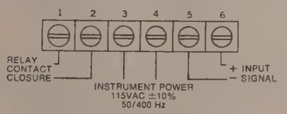
FOR DIMENSIONS REQUEST CATALOG #983

OSI PRECISION INTEGRATOR VFC SERIES ANALOG TO PULSE CONVERTER

FEATURES:

- Output is a switch closure for activating external circuits
- Switch closure can be directly related to a specific integrated quantity
- Output can be preset at the factory

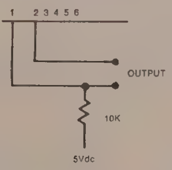
TRANSDUCER CONNECTIONS



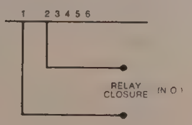
Calibration and zero adjustments are provided through recess holes in the top of the case.

USE WITH ELECTRO MECHANICAL COUNTER

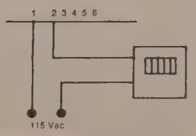
OUTPUT TO TTL CIRCUIT



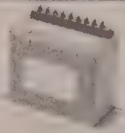
STANDARD OUTPUT



USE WITH ELECTRO MECHANICAL COUNTER



SPECIFICATIONS:
(common to all)



INPUT:

Impedance: >1 megohm except VFC-50, 100 ohms

Usable Range: Up to 1.25 x FS

Frequency: DC with up to 100% ripple at 120 Hz or higher

OUTPUTS:

Linearity: ±0.1% FS Accuracy: ±0.25% FS

Relay: Normally open, SPST

Relay Contact Rating: 10 VA Max., 120V Max., 0.3A Max.

Relay Closed Period: 100 milliseconds, typ.

Temperature Effect: (−10°C to +60°C) ±0.5%

Instrument Power: 115 VAC ±10%, 50/400 Hz

Isolation (Input/Output/Case): 1000 Volts dc

MODEL	INPUT	OUTPUT RELAY CLOSURE RATE*
VFC-10	0 to +50 mV	0 to 10,000 per hour
VFC-20	0 to +100 mV	0 to 10,000 per hour
VFC-30	0 to +150 mV	0 to 10,000 per hour
VFC-50	0 to +1 mA	0 to 10,000 per hour
VFC-60	0 to +10V	0 to 10,000 per hour

* NOTE: Output closure rate can be set between 1K and 12K counts per hour at no charge.

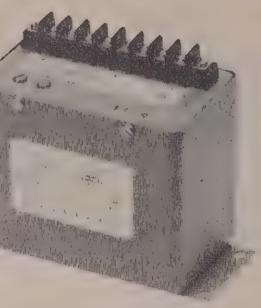
DC & RMS SIGNAL CONDITIONERS CTA SERIES



FEATURES AND APPLICATIONS:

- Designed for use with OSI current transducers
- Suitable for monitoring or control purposes
- CTA113 through CTA215E provide an output directly proportional to the true RMS value
- Calibration and zero adjustments provided

SPECIFICATIONS:

AMPLIFIER:

Linearity: 0.1% RO
Frequency Range: DC to 5 KHz
Output Response: to 90% 40 μsec.
(RMS Models) 200 msec.
Ripple: <0.25% RO
Crest Factor: 3 within rating
7 within 1%
Short Circuit Protected: Yes
Isolation: Input/Output isolated from case

EXCITATION CURRENT:

Regulation: Line/Load ±0.01%
Output Voltage at Full Load: 6 VDC

TEMPERATURE EFFECTS:

(0-70°C) ±0.005%/°C

INSTRUMENT POWER:

115 VAC ±10%, 5W, 50-400 Hz
24/28 VDC ±10%, 8W, DC
(Positive to Terminal 8)

INPUT OPTIONS: (OPTION LETTER INDICATES A NON STANDARD INPUT)

Option (H) 75 mV Input
Option (P) 100 mV Input
Option (K) 150 mV Input

APPLICATION NOTES:

(1) When using an OSI current transducer, the output shield should be tied to terminal 3 on the signal conditioner.
(2) For a positive amplified output, connect the current transducer with the red polarity dot toward the most positive voltage terminal. See connections below.
(3) All RMS models provide a DC output proportional to the true RMS value of the input.
(4) All Analog models provide an output proportional to magnitude and direction.

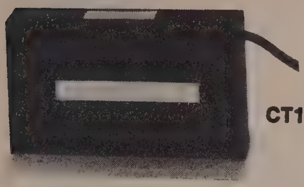
OSI CURRENT TRANSDUCERS CT-L SERIES

DC TO 5 KILOHERTZ RESPONSE



CT1KHT

CT50LT

CT200LT

CT1KLTS SPLIT-CORE OPTION

FEATURES AND APPLICATIONS:

- 5000 Volt line-to-output isolation
- DC to 5 kilohertz response
- Bi-directional operation
- Linearly 0.5%
- ±1% change over temperature range
- Less than 50 microsecond response time
- Output is proportional in direction and magnitude to the current flow through the window
- Sustained overload capability to 50 times rating
- Stable during severe vibration
- Easy installation
- Split-core models available
- Suited for variable frequency AC systems with DC components or chopped waveforms,
- Replace shunts
- No insertion loss

NOTES: The split core option is available on all Models except the 50 Ampere size. To order, add the letter "S" to the Model Number.
The electrical isolation (line to output) is at least 5000 volts for all Models, except the 50 Ampere size which is rated at 600 volts.

OSI AC VOLTAGE AND CURRENT TRANSDUCERS VT SERIES CT SERIES

FEATURES AND APPLICATIONS:

- Inexpensive
- Accurate
- Self powered
- Wide frequency range
- Isolated Output
- Reliable

SPECIFICATIONS (common to all):

Accuracy (Calibration, linearity @ 25°C): ±0.5% FS

Frequency Range: 50 to 500 Hz

Response Time: 400 msec.

Temperature Effect (from calibrated value):
−20°C to +60°C ±1% of Reading

Ripple: <1% FS

Full Scale Output: 1 mA dc

Output Loading: 0-10K ohms

Overload (Continuous):
Voltage: Full Scale Rating
Current: 2X Rating except CT10-1 & CT20-1,
1.25 Rating —
1 Second Transients, 50 X Rated Input

Burden:
Voltage: 2.8 VA FS
Current: 1 VA FS

Operating Range (Extended):
Voltage: Full Scale
Current: 1.2 X Rating

Dielectric Test (Input/Output/Case): 1500 VAC

NOTE: For 2 or 3 Transducers in 1 enclosure add the number required to the front of model number. Typical number 3 CTS-1 or 2 VT 120. Multiple input units have separate isolated 0-1 mA outputs corresponding to each input.

OSI RMS VOLTAGE & CURRENT TRANSDUCERS CT-R SERIES VT-R & CT-RT SERIES

FEATURES AND APPLICATIONS:

- Accuracy 0.25%
- Output directly proportional to the RMS value of input
- Can be overranged 20% with accuracy
- Current Transducers: 20 to 2000 Hertz range
- Voltage Transducers: 50 to 400 Hertz range
- CT1R and CT1RV, DC to 2 KHz

SPECIFICATIONS:

Accuracy and Linearity: ±0.25% FS at 60 Hz
Accuracy & Linearity: ±0.5% over frequency range
Frequency Range: 48 to 420 Hz
  CT1R and CT1RV only DC or 20 to 2 KHz
Inputs:
  Voltage: See Tables
  Current: See Tables
Overload:
  Voltage: See Table
  Current: (Transient) 50A for 10 Sec. Per Hour, 250 A for 1 Sec. Per Hour, excluding CT1R and CT1RV
Input Signal Burden:
  Voltage: 0.12 VA FS
  Current: 0.28 VA FS
  CT1R and CT1RV: 0.5 VA FS
Dielectric Test (Input/Output/Case): 1500 VAC RMS
  Voltage: 1500 VAC RMS
  CT1R and CT1RV only not isolated
Output Response: 200 milliseconds to 90%
Ripple: <1% FS
Output Short Circuit Protected
Temperature Effect: ±0.5% (−10°C to +60°C)
External Power: 115 VAC ±10%, 50 to 400 Hz

CURRENT TRANSDUCERS NOT ISOLATED

CT1R	0 to 5A	1 mA DC @ 5A	0-10K
CT1RV	0 to 5A	10 VDC @ 5A	>2K

* NOTE:

(1) CTR Series output is NOT isolated from input. Use instrumentation which is isolated from source. Caution is advised when making connections.

(2) All models have been calibrated at the factory to give the correct output at the specified input rating. The "CAL" adjustment is set at the factory and should not be adjusted unless recalibration is required. The "ZERO" adjustment is provided to correct for an output offset "at zero input conditions," without affecting the calibration of the unit.

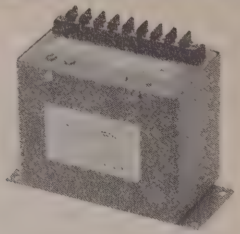
OSI DC & RMS VOLTAGE TRANSDUCERS VT7 & VT8 SERIES



FEATURES AND APPLICATIONS:

VT7 SERIES:

- DC to 5 KHz Frequency Response
- Provides an output isolated signal proportional to DC input voltage
- 50 or 100 millivolt shunt model available
- 1500 V isolation input to output

ORDERING INFORMATION:

Add the "Code Designation" to the Model Number below for the Type, Rated Voltage, and Rated Output desired.

Example: VT7-01B: DC Input of 0 to 50 MVs and output 0 to 1 mA.

MODEL NO.

VT * — O X

*CODE	TYPE
7	DC, Input
8	AC, AC/DC Input

O CODE	RATED VOLTAGE	
(1) 01	50 mV	
(1) 02	100 mV	
1	12V	
2	25V	
3	50V	
4	100V	
5	150V	
6	200V	
7	300V	
8	400V	
9	500V	
10	600V	
11	700V	External multiplier resistance box is supplied.
12	800V	
13	900V	
14	1000V	

X CODE	RATED OUTPUT SIGNAL
B	1 mA
D	10 Volts
E	4-20 mA

NOTES:

(1) 50 or 100 millivolt model is available in the VT7 Series only.

(2) Models with the rated input voltage above 600 volts require an external multiplier resistance box, which will be supplied with the unit.

FOR DIMENSIONS REQUEST CATALOG #983

FEATURES AND APPLICATIONS:

VT8 SERIES:

- DC to 5 KHz frequency response
- Output signal proportional to RMS value of AC, or AC/DC input
- 1500 Volt isolation between the input and output

SPECIFICATIONS:

INPUT:

Voltage: (Check code designation for rated input)

Overvoltage: 2 times rated input or 1500V whichever is smaller

Impedance: >100K ohm

Frequency Range: dc to 5 KHz

Response Time (99%): 50 μsec.

Isolation (Input/Output/Case/Instrument Power): 1500 VAC

Instrument Power Required: 115 VAC ±10%, 50-400 Hz

OUTPUT: (Short Circuit Protected)

Output Signal:

For VT7: 0 to ± mA, 0 to ±10 volts or a 4 to 20 mA signal which is directly proportional to the DC input voltage

For VT8: 0 to +1 mA, 0 to +10 volts or 4 to 20 mA DC signal which is directly proportional to the RMS input voltage

Response Time:

VT7 Models: 50 microseconds

VT8 Models: 200 milliseconds

Load on Output:

1 mA, 0 to 10K ohms

10 Volts, >2K ohms

4-20 mA, 0 to 500 ohms

Temperature Effects on Output (−10°C to +60°C): ±1%

ACCURACY:

±0.5% RO

(including set point, linearity and repeatability)

Calibration: Each unit is calibrated at the factory for Rated Input Voltage

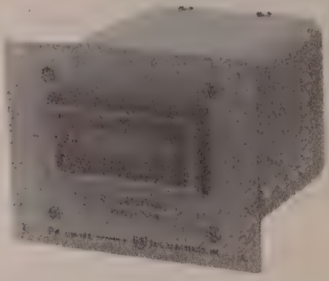
PROCESS ACCUMULATOR PA SERIES



FEATURES AND APPLICATIONS

- Accumulate watt hours, ampere hours, VAR hours volume, weight, or distance
- Readout directly related to the time integral of the analog input signal
- 6 digit 0.35″ LCD readout
- Battery backup
- Current or voltage inputs
- Can be set from 200 to 100,000 counts per hour
- Front panel, remote or combination reset
- Panel or rack mount

SPECIFICATIONS:

INPUT:

Rated: See Table Code*
Over-range: 1.25 X Rating
Burden:
Voltage Units > 100K Ohm
1 mA Units < 1K Ohm
20 mA Units < 100 Ohm

OUTPUT:

Counter: 6 digit 0.35″ LCD
Counter Batteries: (2) MN9100 Mallory
Reset — Front Panel Manual: Remote or Combination
Count Rate: 200 to 100K, Counts Per Hour

ACCURACY:

±0.25% RO
Linearity: ±0.1% RO
Temperature Effect: (−20°C to +60°C) ±0.005%/°C
Instrument Power:
115 VAC ±10%, 50 to 400 Hz
220 VAC, 50 Hz, Add Option X22 to Part Number

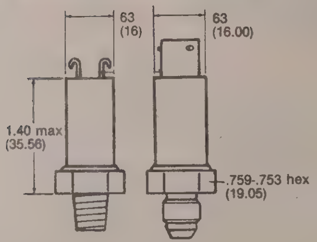
Paine® BONDED STRAIN GAGE PRESSURE TRANSDUCERS FOR INDUSTRY & AEROSPACE

SERIES 210-30

Series 210-30: 0-500 to 0-5000 PSIA and PSIS. When you need a rugged transducer for hydraulic systems with non-corrosive media applications see 210-35.

This series is ideally suited for the rigorous environments found in test stand work and wet industrial applications.

This series is available with either hooked terminals or electrical connectors.

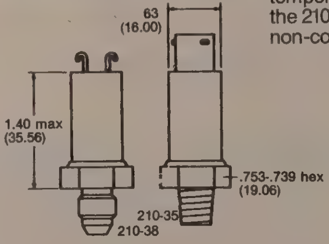


SERIES 210-35 AND 210-38

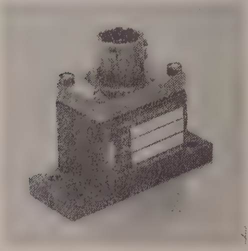
Series 210-35 and 210-38: 0-2000 through 1-10,000 PSI. A very rugged transducer for use in all industrial corrosive materials are present.

This series features all welded, all stainless steel construction to provide a high degree of compatibility and system integrity.

Both series are available with either MS Bayonet lock connectors or hooked terminals. The 210-35 is temperature compensated while the 210-38 is lower in cost and non-compensated.



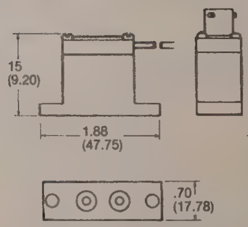
SERIES 210-60 AND 216-65



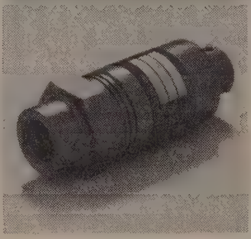
Series 210-60 and 210-65: ±500 to ±10,000 PSI. This is a full line differential pressure transducer designed for hydraulic systems. (Available in an all-welded, all-stainless steel version for corrosive media).

These transducers are unique because of their small size. The units have two separate sensing elements to measure the pressure at the input ports. Each sensor has two strain gage legs. These two sensors are connected to provide a fully balanced bridge. This sensing method provides an output directly proportional to the pressure difference at the two ports.

The series 210-60 is temperature compensated while the lower cost 210-65 is non-compensated. The 210-65 is particularly suited to rate derivation.



SERIES 212 ISOLATED



Series 212 Isolated: 0-10 through 0-10,000 PSI. When you need input to output isolation for system flexibility.

The Series 212 Isolated is a rugged, lightweight, all stainless steel, welded pressure transducer. It's tough enough to withstand harsh industrial environments. It's an easy transducer to install and features input/output isolation which decouples any interplay between power and signal, allowing flexibility in signal and power grounding connections. This also protects the transducer against output short circuits.

Output is 0 to 5 volts and the series is available in 18 different pressure ranges for incremental coverage of the full pressure spectrum.

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with The System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will accompany your System.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,

Portescap U.S.

escap® rare earth magnet-based components for the creation and control of electronic motion

The source of the technology is also your source for the products!

The business of Portescap U.S. is putting great ideas in motion with great precision. Our escap line represents a wide selection of electronic drive and motion system components for applications ranging from relatively simple incremental motion systems, to such high-tech uses as robotics, computer peripherals, and medical implants. It incorporates steppers and micro-steppers with integrated velocity sensors in quadrature, based on samarium cobalt thin layer disk rotor technology—a technology we developed—plus ironless DC micromotors, and a full line of integral and discrete accessories including optical encoders and torque multipliers. Many models are available for immediate delivery at volume discount. New technology components are available in sample quantities from stock. Come to the source.

Stepper Motors & Micro-Steppers—rare earth permanent magnet design; integral velocity coils; single and two-phase designs; micro-stepping to 6,400 steps/revolution.

DC Micromotors & Servomotors—ironless design; low inertia; 7 x 12 mm motors to 36 mm diameters.

Gearmotors & Gearboxes—spur and planetary designs; torques up to 350 lb/in; 9 x 12 mm to 42 mm diameters.

Motortachometers & Tachometers—ironless design with precious metal commutation; 23 mm to 36 mm diameters.

Integral Motors & Optical Encoders—motor, tachometer, and optical encoders in any integral combination; encoding up to 1,000 lines with quadrature and zero index; 16 mm to 36 mm diameters.

Flag Motors—brushless with integral return spring.

RENCO CORPORATION

DIVISION OF ELECTRO-CRAFT CORPORATION

26 COROMAR DRIVE, GOLETA, CA 93117 • (805) 968-1525 TWX 910-334-1180

RENCO RETURNS TO INDUSTRIAL AUTOMATION.

We have been a major supplier of optical encoders to the machine tool and computer peripheral market since 1968. With the need for cost reductions through industrial automation, Renco supports this emerging industry with its complete line of state-of-the-art encoders.

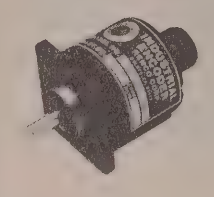
Our research and engineering departments are second to none, and over the years have consistently found and developed innovative ways to apply new technologies to encoder design and manufacturing processes. Today, Renco encoders incorporate solid state electronics, LED light sources, and our own Radial-line sensor array to improve performance and reliability.

Watch us as we expand our product lines to incorporate interface electronics for industrial robotics and other position and velocity control systems to meet the challenges of industrial automation.

CNC + PC COMPATIBLE ENCODERS IMMEDIATE DELIVERY PROGRAM

Renco is meeting the challenge of industrial automation by offering CNC + PC compatible encoders and fast delivery. Various TTL, CMOS, and Line Driver models are available from our 48-hour or maximum of two weeks delivery programs. Consult our order desk or application engineers for availability information or assistance in selecting encoders compatible with your CNC or Programmable Controller.

INCREMENTAL



HEAVY DUTY INDUSTRIAL ENCODER
HDR70

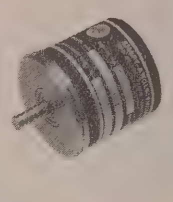
2.5 inch cast aluminum housing
Flange or servo mount
Direction sensing logic
Resolution to 5000 PPR
LED
Radial-line sensor array
Optional gated index
Phase quadrature 90° ± 36°

SPECIFICATIONS

Mechanical
Moment of inertia: 4.0×10^{-4} oz-in-sec^2 maximum
Shaft loading: Radial 35 lbs. max.; axial 40 lbs. max.
Slew speed: 5000 RPM STD. (10,000 special)
Weight: 20 oz.

Electrical
Output: TTL or CMOS
Operating frequency: Data 75 kHz, Index 20 kHz
Input power: 5V, 12V, 15V and 24V @ 125 mA
Light source: LED
Useful life: 100,000 hours min.
MTBF: 41,000 hours

Environmental
Operating temp.: 0°C to +70°C
Storage temp.: −25°C to +90°C
Humidity: 98% relative, noncondensing
Shock: 50 G's for 11 milliseconds
Vibration: 5-2000 Hz @ 20 G's



INCREMENTAL SHAFT ENCODER
R2520

2.5 inch servo housed
LED
Radial-line sensor array
Resolution to 5000 PPR
Phase quadrature 90° ± 36°

SPECIFICATIONS

Mechanical
Shaft size: ¼ or ⅜ inch diameter available
Moment of inertia: 5×10^{-4} oz-in-sec^2 max.
Shaft loading: Radial 15 lbs. max.; axial 15 lbs. max.
Slew speed: 5000 RPM max.
Weight: 7 oz.

Electrical
Type 1. Differential sine wave
Type 2. Amplified sine wave
Type 3. TTL square wave
Type 4. CMOS square wave
Operating frequency: Data to 60 kHz, Index 20 kHz
Input power: 5V, 12V, ±15V and 24V @ 125 mA
Useful life: 100,000 hours
MTBF: 41,000 hours

Environmental
Operating temp.: 0°C to +60°C
Storage temp.: −25°C to +90°C
Shock: 20 G's for 11 milliseconds
Vibration: 5-2000 Hz @ 10 G's
Humidity: 95° relative, noncondensing

DUAL RESOLUTION INCREMENTAL SHAFT ENCODER
R2540

2.5 inch servo housed
Dual resolution count to 2540/2500
Phase quadrature 90° ± 45°

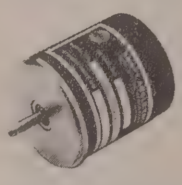
SPECIFICATIONS

Mechanical
Shaft size: ¼ inch O.D.
Moment of inertia: 3.5×10^{-4} oz-in-sec^2
Shaft loading: Radial 15 lbs. max.; axial 15 lbs. max.
Slew speed: 5000 RPM
Weight: 10 oz.

Electrical
Type 1. Differential sine wave
Type 3. TTL square wave
Operating frequency: 50 kHz
Input power: 5V DC ± 5% @ 150 mA
Useful life: 75,000 hours
MTBF: 25,000 hours

Environmental
Operating temp.: 0°C to +55°C
Storage temp.: −30°C to +90°C
Shock: 20 G's for 11 milliseconds
Vibration: 5-2000 Hz @ 10 G's
Humidity: 95° relative, noncondensing

ABSOLUTE



ABSOLUTE POSITION ENCODER
R2553

2.5 inch housed encoder
Available in Natural Binary, BCD, or grey code
Up to 12 bits standard resolution
Accuracy ±½ bit

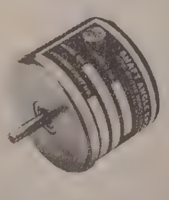
SPECIFICATIONS

Mechanical
Moment of inertia: 4×10^{-4} oz-in-sec^2
Shaft loading: Radial 5 lbs., axial 5 lbs.
Slew speed: 5000 RPM

Electrical
Input voltage: 5V DC ±5% @ 400 mA ±10 mA per bit
Output is TTL compatible
Frequency response: 50 kHz

Environmental
Operating temp.: 0°C to +50°C
Storage temp.: −30°C to +90°C
Humidity: 95% relative, noncondensing

ANALOG



ENCODER/ANALOG TACHOMETER
RENCOTACH I

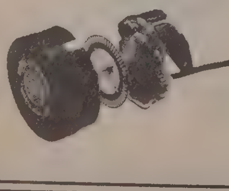
2.5 inch housed encoder
Analog ±10V DC
Up to 1000 count/turn
Bidirectional triangle wave and TTL output

SPECIFICATIONS

Mechanical
Height: 2.5 inches max.
Moment of inertia: 5×10^{-4} oz-in-sec^2

Electrical
Analog output: ±10V DC max.
Output gradient: 1V/1K RPM to 10V/1K RPM
Ripple: <10 mV to 8 kHz
Linearity: ±1%
Input power: +15V @ 150 mA, −15V @ 30 mA
Encoder output: 2 to 5V P/P triangular waveform and TTL

Environmental
Operating temp.: 0°C to +50°C
Storage temp.: −30°C to +90°C
Humidity: 90% relative, noncondensing



ANALOG/DIGITAL TACHOMETER
RENCOTACH II

2 inch modular kit
Analog tach .05 to 10V DC
Digital tach pulse
Speed range of 500 to 10,000 RPM

SPECIFICATIONS

Mechanical
Height: .84 inches maximum
Moment of inertia: 3.2×10^{-5} oz-in-sec^2 minimum

Electrical
Analog output: 1V DC/1K RPM; .05-10V DC
Digital output: 60 PPR, 15V square wave output @ 4.7K Ohms impedance
Ripple: 20 mV @ 1 kHz
Linearity: ±.1%
Input power: +15V @ 15 mA, −15V @ 10 mA

Environmental
Operating temp.: 0°C to +70°C
Storage temp: −30°C to +90°C
Humidity: 95% relative, noncondensing

PANEL

FRONT PANEL ENCODER
RFP

1.5 inch
Potentiometric mounting
Built-in shaft tension
Phase Quadrature 90° ± 45°
Card-edge, Cable or PC Board Header Interconnect
Designed to replace Potentiometers and A to D Converters

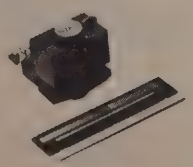
SPECIFICATIONS

Mechanical
Shaft torque: 2 ± 1 oz. in.
Mounting bushing: ⅜ x 32 UNEF

Electrical
Input voltage: 5V, +12V, or +15V @ <40 mA
Output: TTL or CMOS compatible square wave, 2 channel phase quadrature 90° ± 45°

Environmental
Operating temp.: 0°C to +70°C
Storage temp.: −40°C to +70°C
Humidity: 90% relative, noncondensing

LINEAR



LINEAR MODULAR SCALE
RML100

2 x 2 modular kit
Length: 2 to 6 inches
Choice of resolution: 25 LPI to 500 LPI
TTL compatible
Beginning of trend/end of trend marker
Lower power long life miniature incandescent lamp

SPECIFICATIONS

Mechanical
2″ x 2″ cross section
Slew rate: 70 inches/sec. max.
Linear acceleration: 20 G's max.
MTBF: 80,000 hours
Lamp useful life: 50,000 hours min.
Air gap: .005 inch

Electrical
Output: zero crossing sine wave

Input power: 5V DC ± 5% @ 200 mA

Environmental
Operating temp.: +10°C to +40°C
Storage temp.: −30°C to +90°C
Shock: 100 G's max. for 2 milliseconds duration
Vibration: 60 to 500 Hz 2 G's
Relative humidity: 20% to 90% noncondensing

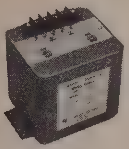
EXCELTRONIC™ PHASE ANGLE TRANSDUCER



DESCRIPTION

These transducers measure the phase angle between two voltage inputs (6314) or between one voltage and one current input (6330). All models have a ±180° phase detector preventing ambiguous readings when the input goes beyond full scale. The unique circuits use both zero-crossing times to measure the angle. They use phase locked loops to reduce the effects of noise interference and harmonics on the inputs.

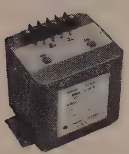
The units can be supplied for full scale ranges of ±45° up to ±180° and with outputs of ±1 mA, 0-1 mA, 1-5 mA or 4-20 mA.

SPECIFICATIONS

Full Scale Range: ±45° to ±180°. **Phase Angle Range without Ambiguous Readings:** ±180°. **Accuracy at 25°C, Normal Condition:** ±1%. **Additional Error Between −20°C and +60°C:** ±0.5°. **Potential Input(s):** 95-1135 VAC (nominal). **Overload, continuous:** 150V at 120V. **Burden:** 4 VA at 120V. **Current Input:** 0.5 to 5A (nominal). **Overload, continuous:** 10A. **Overload, 1/2 sec./hr:** 400A. **Frequency Range:** 60 Hz. **Adjustment (non-interacting), Zero:** ±3°. **Span:** ±5°. **Ripple:** 1% of maximum output (Peak). **Response Time:** 0.4 seconds to 99% of final value. **Protection Isolation:** Input/Output/Case. **Dielectric Test:** 1500V rms for 1 minute. **Surge Withstand:** Proposed IEEE SWC Test. **Outputs:** 0- ±1.0 mA into 0-10 kilohms. **Option — PA6:** 1-5 mA into 0-2.4 kilohms. **Option — PA7:** 4-20 mA into 0-1.2 kilohms. **For Model 6314 or 6330 add following suffix to complete model number:**

— 45	±45°, PF 1 to 0.7071
— 60	±60°, PF 1 to 0.5
— 75	±75°, PF 1 to 0.2588
— 180	±180°

EXCELTRONIC™ FREQUENCY TRANSDUCERS MODELS 6281B, 6283B, 6284B



DESCRIPTION

These transducers develop a DC output signal which is proportional to input frequency, have an expanded scale output, and feature constant current output. This means, for a given input, no adjustment is necessary to compensate for various output signal loop characteristics.

SPECIFICATIONS

	6281B	6283B	6284B
Input Voltage	120V	120V	120V
Overload	150V	150V	150V
Frequency Range	45-55 Hz	375-425 Hz	55-65 Hz
Output	0-1 ma into 0-10K ohms	0-1 ma into 0-10K ohms	0-1 ma into 0-10K ohms
Accuracy	±0.02% of Center frequency at 25°C	±0.02% of Center frequency at 25°C	±0.02% of Center frequency at 25°C
Ambient Temperature Effect on Accuracy	±0.0025%/°C Max.	±0.0025%/°C Max.	±0.0025%/°C Max.
Adjustments	Zero, Span	Zero, Span	Zero, Span
Burden	4 VA	4 VA	4 VA

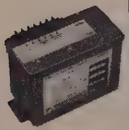
Temperature Range	−20°C to +60°C	−20°C to +60°C	−20°C to +60°C
Response	0.4 sec. to 99% of final value	0.4 sec. to 99% of final value	0.4 sec. to 99% of final value

EXCELTRONIC™ POWER TRANSDUCER "P SERIES" A6 1-5 ma, A7 4-20 ma, A8 10-50 ma



DESCRIPTION

Scientific Columbus has over 60 high output constant current transducers available for your selection. These transducers measure voltage, current, watts, vars, frequency and power factor with the popular outputs compatible with control equipment.

SPECIFICATIONS COMMON TO WATT AND VAR MODELS

Nominal Voltage Input: 120V. **Voltage Range:** 0-135V. **Permissible Voltage Overload:** 150V. **Voltage Burden (per Element):** 0.05 VA at 120V. **Nominal Current Input:** 5A. **Permissible Current Overload:** 10A cont., 250A for 1 sec. **Current Burden (per Element):** 0.10 VA at 5A. **External Power Required:** 100-130V, 50 Hz-500 Hz 12 VA. **Dielectric Test:** 1500 VRMS. **Frequency Range Watts:** 50-60 Hz. **Frequency Range Vars:** 60 Hz. **Power Factor Range:** Any. **Temperature Range:** 0-50°C. **Temp. Effects in Accuracy:** ±0.0075%/°C. **Accuracy/Linearity @ 25°C:** ±0.25%. **AC Component P to P:** 0.5% max. **Response Time:** 1 sec. max.

SPECIFICATIONS COMMON TO VOLT, CURRENT, POWER FACTOR, FREQUENCY, AND ISOLATION TRANSDUCERS

Nominal Voltage Input: 120V. **Permissible Voltage Overload:** 150V. **Voltage Burdens:** 3 VA max. **Current Circuits Nominal Input:** 5A. **Permissible Current Overload:** 10A Cont., 250 for 1 sec. **Current Circuit Burdens:** 3 VA max. **External Power Required:** 100-130V, 50 Hz-500 Hz 12 VA. **Dielectric Tests (Isolation unit):** 1500 VRMS. **Input Terminals:** 4000 VDC. **Temperature Range:** 0-50°C. **Temp. Effects on Accuracy:** ±1%. **Accuracy/Linearity @ 25°C:** ±0.5%. **AC Compinent P to P:** 0.5% max. **Response Time:** 1 sec. max.

EXCELTRONIC™ TEMPERATURE TRANSDUCER SERIES 9015N, 9016P, 9019C

DESCRIPTION

These transducers have true constant current output of 0-1 MA that will simplify your own calibrating or scaling networks, as well as allowinging telemetering over long distances without line drop error.

SPECIFICATIONS

Constant Current Output: 0-1 mA for Full Range Input. **Load Resistance Range:** Any Load Between 0-10K Ohms. **Temperature Range:** −4°F to 140°F. **Ripple:** 1% RO (Peak). **Connections:** See Model 9015- 49F, Model 9016 & 9019 - 49G. **Adjustments Span:** ±10%. **Zero:** ±3%. **Response Time:** <50 Milliseconds. **Dielectric:** 1500 VRMS @ 60 Hz for 1 Min. **Power Requirement:** 110 VAC ±20 VAC, 50 to 450 Hz, 3.5 Watts Max. **Temperature Influence on Accuracy (−4°F to +140°F):** ±.015%/°F (from 77°F). **Open Circuit Voltage:** 16 VDC. **Dimensions:** See Style II-Models 9016 & 9019, Style III-Model 9015.

Basic Model	RTD Type	Suggested Sensor Resistance	Temp. Span	Temp. Range	Max. Sensor Current
9015N	Nickel-Iron	676Ω @ 77°F	50°F or 150°F	−200°F to 500°F	< 3 Milliamps
9016P	Platinum	100Ω @ 32°F	150°F or 300°F	−320°F to 1000°F	< 5 Milliamps
9019C	Copper	10.0Ω @ 77°F	150°F or 300°F	−100°F to 300°F	<50 Milliamps

CALIBRATOR

PORTABLE TRANSDUCER MODEL 6444

- 40% Lighter • 40% Smaller • All Digital
- Replaces the 1369C • Watts • Vars • Amps
- Volts

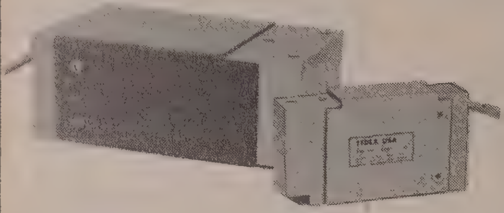
SPECIFICATIONS

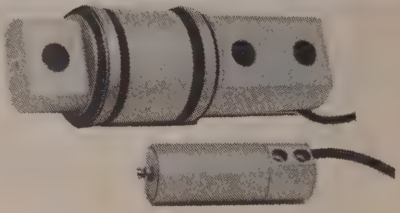
Function: AC watt, var, current and voltage transducer tester and calibrator. **Ranges:** 0-150 VRMS, 0-5A, 0-10 ARMS, Avg. Sensing. 0-750/0-1500W, 0-750/0-1500 Var. **Voltage Output:** VA rating 15 VA. **Current Output:** VA rating. Hi Range: Hi-24 VA @ 1. PF, 22V @ 0.5 PF. **Lo Range:** Lo-6 VA @ 1.0 PF., 2.4 VA @ 0.5 PF. **Load Power Factor:** Unity and 0.5 lag (approx.) **Transducer Signal Load:** 1 ohm to 100K ohms and infinity, selected by thumbwheel digital readout switches. **Standard Output Signal:** 0-10 volts dc for zero to full scale of test quantity (V, A, W, var). **Meters, all meters are 3½ digit liquid crystal display (LCD):** Volts 0-150, Amperes 0-5/0-10, Watts/Vars 0-750/0-1500, Error −20% - 0 - +20%. **Accuracy of Internal Std. Transducers:** ±0.1%. **Accuracy (Digital Indicating Meters):** Volt, Amp & Watt/Var indicators, ±0.15% of f.s. ±1 digit. **Accuracy (Standard Output):** ±0.1% (maximum). **Temperature Range:** +25°C ±10°. **Power to Operate Unit:** 120V ±10%, 60 Hz, Approx. 130 VA. **Terminations:** Five-way binding posts are mounted on the front panel of the instrument. Power receptacle is on the rear of the case. **Accessories:** No accessories are required for complete functional testing of transducer being checked. **Packaging:** Wood-formica portable instrument case with carrying handle. **Dimensions:** 13″ high x 22″ wide x 9″ high (330 x 560 x 230 mm). **Weight:** 45 lbs. (20.4 kg).

TEDEA USA Load Cells

.02% TOTAL ERROR • 100% TESTING • OIML COMPATIBLE

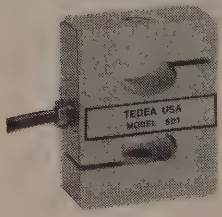
Series 1000
Off-Center-Loading Weigh Cells
- Capacities 4 to 500 lbs.
- Simple single-point mounting
- Insensitive to off-center moments
- Integral overload protection



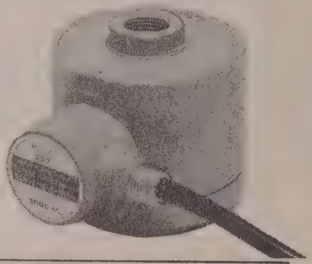


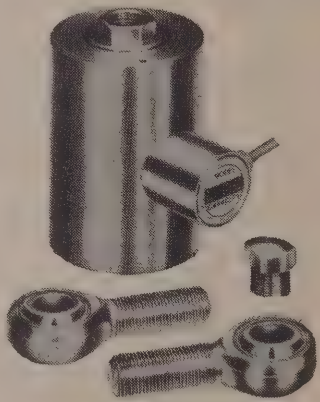
Series 300
Bending-Beam Weigh Cells
- Capacities 10 to 2,000 lbs.
- Low sensitivity to side loads
- Built-in overload protection (Model 300)

Series 600
S-Type Tension Weigh Cells
- Capacities 200 to 1,000 lbs.



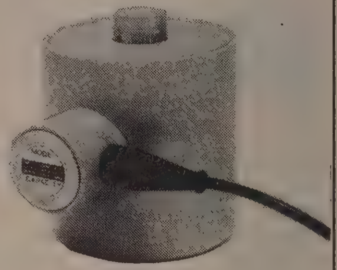
Series 700
Tension-Compression Weigh Cells
- Capacities 2,000 to 10,000 lbs.
- Welded, hermetically sealed configuration
- 400% F.S. Safe compression overload



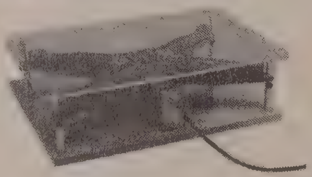


Series 400
Tension-Compression Weigh Cells
- Capacities 100 to 2,000 lbs.
- Splash-proof sealed configuration
- Rugged design

Series 100
Heavy Duty Compression Weigh Cells
- Capacities 20,000 to 100,000 lbs.
- Total error .15%



ACCESSORIES

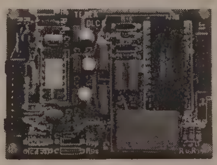


MODEL SM 1010
Shock Mount Assembly

Provides the basis for an extremely rugged high performance scale base. Available in varied configurations in ranges from 10 lbs. through 200 lbs.

MODEL BCR-50
Digital Transducer Indicator

Complete electronics package that provides excitation voltage, output signal conditioning and adjustable digital display for strain gauge load cells. 0-5 VDC analog or buffered BCD output available.



NEW!
TEDEA's DLCC-LSI...
- Serial and parallel outputs
- 32,000 count resolution
- Single power supply only

GENERAL SPECIFICATIONS:

Rated Output	2 mV/V
Total Error	.02% rated output
Safe Overload	150% rated output
Excitation	10-20 V AC or DC

On-target sensors for position and speed control.

Choosing the right up-front sensor can make a big difference in position- and speed-control system requirements.

At TSI, if you need a non-contact pickup, with or without logic signal conditioning, with or without zero-speed and/or direction output, its performance will be strictly as specified, and its cost-saving advantages will be welcome news.

Pickups, proximity sensors and switches, LVDTs, and velocity transducers—all are manufactured in their entirety at TSI. Select from hundreds of standard models and custom designs.

Sensor Type	Variable-Reluctance Magnetic Pickups	DIGIMAG	DIGITRAC®	BITRAC™
Features	Non-contact, high frequency output capability, several output/resolution packages. High environmental adaptability.	Digital output, insensitive over a range of, and to variations in supply voltage and air-gap distance. Non-contact.	Zero-speed output, digital, good noise immunity, magnetoresistive sensing, non-contact.	Directional and zero-speed digital output from one differential magnetoresistive sensor. High noise immunity, easy installation, non-contact.
Output, General	Analog, logic signal conditioning available	TTL- and CMOS-compatible	TTL- and CMOS-compatible	TTL- and CMOS-compatible
Output Range	250 mV p-p to 300 V p-p	**at 5 Vdc supply*** 0.2 V low; 4.75 V high. **at 15 Vdc supply*** 0.2 V low; 14.25 V high *operates at 5-to-15 Vdc supply.	**at 5 Vdc supply** 0.2 V low; 4.75 V high. **at 12 Vdc supply** 0.2 V low; 11.4 V high	**at 10-14 Vdc supply** zero-speed and position output: 0.4 V low; 4.75 V high direction output: clockwise - 0.2 Vdc counterclockwise - 3.0 Vdc
Air-gap Range	0.2" max.	0.080" max.	0.060" max.	0.025" max.
Cut-off Frequency	1 MHz	20 kHz	20 kHz	20 kHz
Target Material	Ferromagnetic	Ferromagnetic	Ferromagnetic	Ferromagnetic

OUR PRECISION PRODUCTS INCLUDE:

LINEAR VARIABLE DIFFERENTIAL TRANSDUCERS

- *DC in/DC out or AC in/AC out*
- *High accuracy and stability*
- *Low input power:<300mWDC*
- *±0.02" to ±10.00" full scale*

MDP/SD LVDTs provide self-contained signal conditioning. MA/MDP models offer small size, high accuracy, and high sensitivity. SA/SD models allow higher ranges and ruggedized design.

LOW RANGE FORCE/WEIGHT TRANSDUCERS

- *AC and DC models*
- *Tension/compression from ±5 gms full range*
- *20ms full load response*

Applications include laboratory use, biomedical and pharmaceutical measurements, high speed weighing, aero/hydrodynamic modeling, and others where precise determination of low range forces is necessary.

LINEAR VELOCITY TRANSDUCERS

- *0.5" to 20.0" ranges*
- *Single-piece high fluxdensity magnetic core*
- *High Sensitivity*
- *Non-contact measuring*

These LVTs provide outputs directly proportional to the rate of change of an object's position. The output also indicates the direction of motion. Rugged construction assures high tolerance to shock and vibration.

ROTARY VARIABLE DIFFERENTIAL TRANSFORMERS

- *AC and DC models*
- *Unlimited rotation*
- *±60° linear range*
- *Infinite resolution*

These angular position LVDTs offer unlimited rotation and non-contact measuring. They are available in two styles — completely self-contained or with an independent stator and core.

INCLINOMETERS

- *±5° to ±90° full scale*
- *Resolution to 0.1 second of arc*
- *Linearity to ±0.025%*
- *AC and DC models available*

These inclinometers provide an output proportional to the sine of the angle of tilt, resolving changes in angle as small as 0.1 second of arc, and changes in tilt as low as 0.000006 inch/foot.

LOW COST MEASURING SYSTEM

- *±0.1" range*
- *0.25% linearity*
- *High sensitivity*
- *High resolution*
- *LVDT reliability*

Convert ANY mechanical output to an electronic output — for measuring displacement, force, weight, pressure, velocity, acceleration, slope, tilt — anything that moves mechanically can be measured electronically. You add only a fixture for your particular application.

SIGNAL CONDITIONING MODULES & CONTROL BOXES

Signal conditioning modules for our AC-LVDTs, and all of our AC transducers, are available for AC or DC inputs/outputs, with options such as zero adjustment ranges to 100%, output currents to 500mA, preset limits, frequency outputs, and a choice of several methods of interconnection. Control boxes, including digital displays, printers, and other output instrumentation are also available.

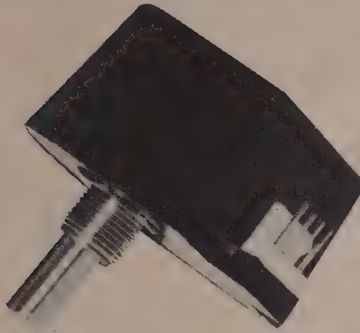
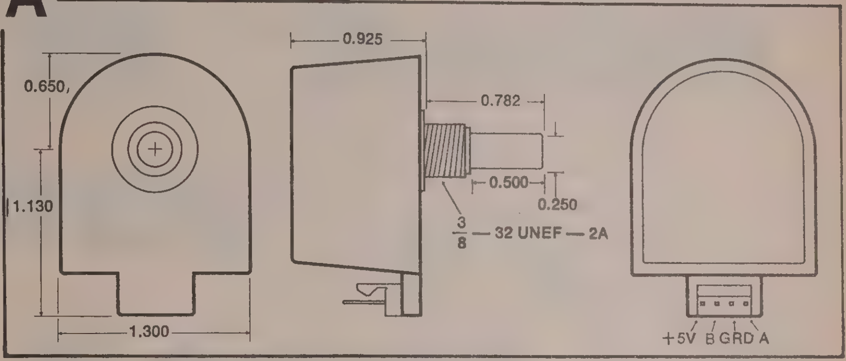
SOFTPOT DATA





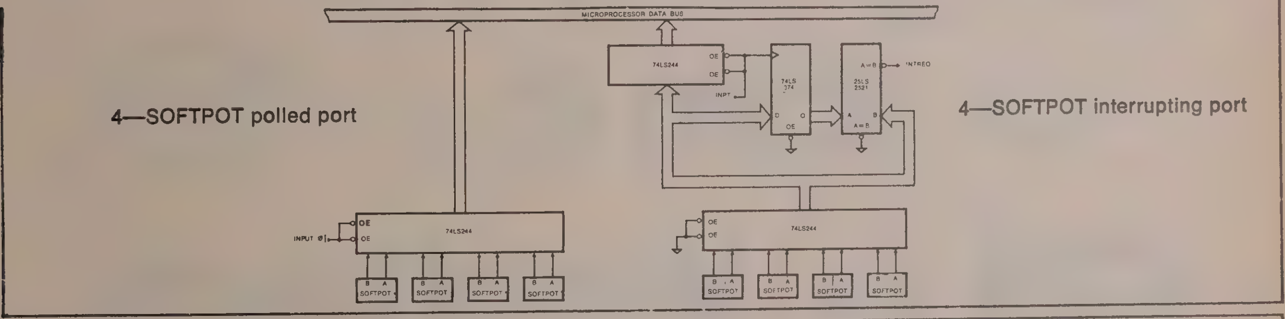
DESCRIPTION

The SOFTPOT is a front panel optical incremental encoder which converts mechanical action directly to digital output. Its low cost has made software programmable performance practical for new applications. Shaft tension provides the feel of a potentiometer but there are no stops. Since the SOFTPOT is an incremental device the absolute value of the controlled parameter may be maintained in memory by your microprocessor providing:

- Software presetable parameters
- Software definable limits
- Software programmable interaction

The two channel outputs are quadrature phase encoded to provide a resolution of 4 quadrants per cycle and 16 cycles per revolution yielding a code change every 5.6 degrees or 64 quadrants per turn. LED light sources assure low power consumption and a long reliable life. One external 74LS244 will interface four SOFTPOTS to standard TTL.

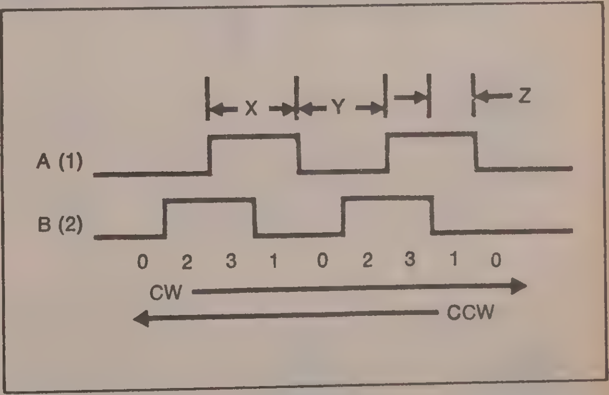
INTERFACE



ELECTRICAL SPECIFICATIONS

PARAMETER	MIN	NOM	MAX	UNITS	NOTE
Supply Voltage	4.75	5.0	5.25	Volts	
Supply Current		22	30	MA	
VoutH	3.5	5.0	5.25	Volts	2
VoutL		0.15	0.4	Volts	2
Iout (Vout=.5v)	0.5	2.0		MA	
Iout Short		8	18	MA	
Symmetry	150	180	210	Degrees	3, 4
Quadrature	60	90	120	Degrees	3, 5

NOTES:
1. A 74LS244 is recommended as the interface to TTL.
2. At 74LS244 input
3. At 74LS244 output
4. Symmetry is a measure of the relationship between (X) and (Y) in electrical degrees.
5. Quadrature is specified by (Z) and is the phase lag or lead between channels A and B in electrical degrees.
6. Channel B leads channel A for clockwise rotation.



MECHANICAL SPECIFICATIONS

Dimensions:		See above
Connectors:	Unit	AMP—640456—4
	Mate	AMP—640441—4
Materials:	Housing	ABS# KJB4051 (fire retardant)
	Shaft	Brass
	Bushing	Brass
	Torque	0.5 in. oz. +/−0.20 in. oz.
	Weight	1.0 ounces
	Operating Temperature	−20 to 85 degrees C
	Storage Temperature	−40 to 85 degrees C
	Mounting Hole Size	.380 inch
	Panel Thickness	.125 inch max.

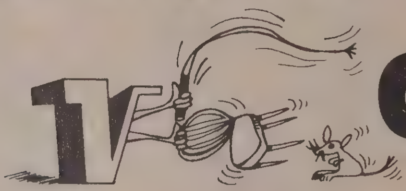
If you want to move it

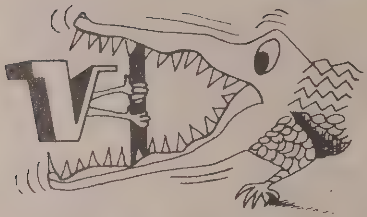
,



control it,

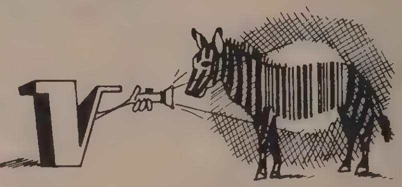
sense it

,



stop it,

or scan it

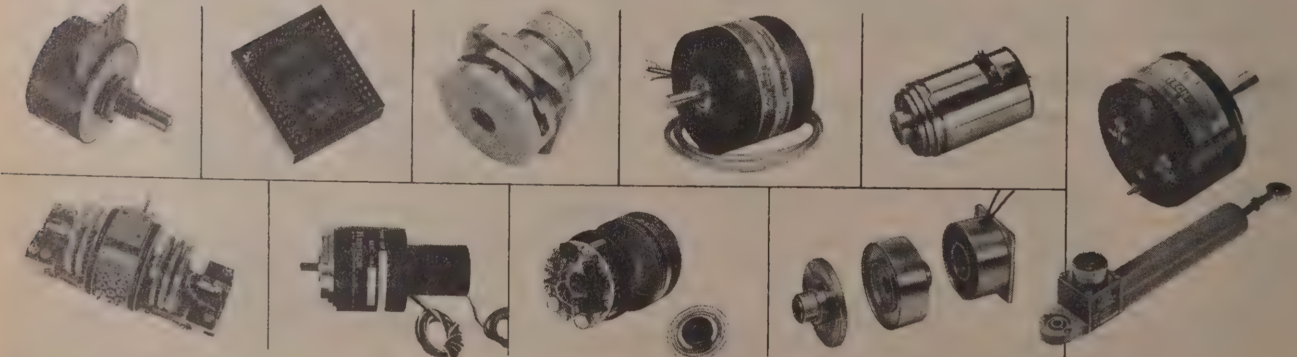


,

call Vernitech.

That is, if you're looking for instrument motors, optical and contacting shaft angle encoders, rotary and linear potentiometers, potentiometric pressure transducers, industrial precision brakes or clutches, or laser scanning motors, we'll probably have just what you're looking for. Just look on the opposite page. And if you *don't* find what you want, call Vernitech, give us the particulars, and we'll make it for you.

VERNITECH



VERNITECH, a division of Vernitron Corp., 300 Marcus Blvd., Deer Park, NY 11729 • 516-586-5100 • TWX 510-227-6089

POTENTIOMETERS

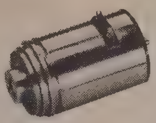
employing Vernitech's unique conductive film and precious metal wipers... respond to wiper motions as small as .000005".

Rotary Single Turn
Linear, non-linear, sine/cosine available.
Sizes 0.5", L 0.5" to Dia 5.0", L 1.880".
Linearity or conformity ±2% to 0.025%.
Resistance range 1KΩ to −250KΩ.

Rotary Multi-Turn
10 to 100 turns available.
Sizes Dia 0.5", L 1.5" to Dia 2.0", L 2.625".
Linearity or conformity ±0.5% to 0.015%.
Resistance range 1KΩ to 500KΩ.

Linear Motion
Electrical stroke lengths 1" to 60".
Linearity or conformity ±0.2% to 0.01%.
Resistance range 250Ω/in to 250KΩ/in.

CLUTCHES AND BRAKES



(electromagnetic)

hundreds of models and sizes available from stock.

Precision Instrument Type
Sizes 5, 8, 11, 13, 15, and 18.
Standard length and wafer types. Spring and magnetic.
Meet MIL-E-5272C. Zero backlash.
Torque 5 to 150 oz. in. Response time 5 to 142 ms.

Industrial Types — open frame
Sizes 8, 12, 17, 22, 26. Torque to 75 in. lb.
Response time 6-30 ms at rated voltage.

Industrial Types — enclosed frame
Hybrid or special units designed for particular applications when MIL-SPECS and close tolerances are not essential, but where having a complete "self-contained" unit is desirable: cassette tape decks, analog devices actuators, etc.

Fail Safe
Braking action occurs 10 ms after coil is de-energized or power fails. Sizes 8, 17, 30, and 45.
Torque up to 50 in. lb. Zero backlash. Adjustable to compensate for wear.

PRESSURE TRANSDUCERS

potentiometer type,

featuring infinite resolution, long life, and high reliability through the use of conductive film resistance elements, multiple wipers, and direct coupling of pressure sensing element to potentiometer wipers.

Pressure ranges from 0.1 to 10,000 psi in gage, absolute and differential types. Also available with high overpressure capability.

Linearity to ±0.3%. Air speed, altitude and low cost types available.

VERNITECH

MOTORS

Over 1500 Standard Designs or Custom Designed to your requirements.

Synchronous — for laser scanning
Sizes 5, 8, 11, 15, 18, 20, 25, 35.
Speeds 100 to 48,000 rpm.
5 through 1600 Hz. 2, 4, 8, 12 poles.

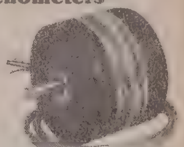
Servo
Viscous damped — sizes 8, 10, 11, 15, 18.
Speeds 3000 to 10,000 rpm.
Inertially damped — sizes 8, 11, 15, 18.
Speeds 3000 to 9500 rpm.

Stepper
Sizes 5, 8, 11, 15. Stepping angles 7.5°, 15°, 45°, 90°.
Stepping rates 100, 110, 125, 130, 175, 180, 225, 240, 260, 400, 725, 800, 1000 pps.

Precision Motor Generators Sizes 8, 10, 11, 15, 18, 23.

Integrating and Computer Motor Tachometers
Sizes 8, 10, 11, 15, 18, 23.

SHAFT ANGLE ENCODERS



featuring precision chrome on glass discs for highest accuracy.

Optical Incremental
VOE 005 — Dia. 0.500", 0.510" L. To 256 pulses (modular)
VOE 05 — Dia. 0.500", 0.820" L. To 256 pulses
VOE 11 — Dia. 1.062", L. 1.80". To 1024 pulses
VOE 015 — Dia. 1.510", L. 0.88". To 1024 pulses (modular)
VOE M15 "Dial Coder" — panel mounted, 1.500" dia., L. 1.08" 127-256 pulses
VOE 023 — Dia. 2.25", L. 80". To 1250 pulses (modular)
VOE 23 — Dia. 2.250", L. 1.875". To 1250 pulses (available sealed)
VOE L23 "Thrift-Line" Dia. 2.250" L. 1.875". To 600 pulses
VOE 25 — Dia. 2.500", L. 2.500". To 3000 pulses (available sealed)

Optical Absolute
VOE 23: Binary, Gray or BCD to 512 counts per turn. Counting speed: 3000 rpm.
VOE 30: Single or multi-turn; Binary, Gray or BCD. To 1024 counts per turn. Max count (2^{19}) in 512 turns. Counting Speed: 30KHz.

Contacting Absolute
Sizes 11, 18, 23, & 31. Binary, Gray, and BCD. Single or multi-turn. Max count (2^{19}) in 2048 turns. 64 to 1024 counts per turn. Operating speed 200 rpm max.

SYNCHRO CONVERTER MODULES

Tracking Synchro-to-Digital and Resolver-to-Digital Converters
Economy Series VSD/VRD. Precision Series VSDH/VRDH Compact, solid state, high performance converters employing type 11 servo loops for lag free tracking at rates to 3600°/sec. Resolution 10 bits, 12 bits, or 14 bits.

Digital-to-Synchro and Digital-to-Resolver Converters Series VDS/VDR: Accept shaft angle data in digital form for conversion to analog at accuracies up to ±4'.

Tracking Synchro-to-Linear DC Converter Module
Series VSDCH/VRDCH: Accept 3-wire synchro or 4-wire resolver input data, convert it to DC analog voltage proportional to synchro angle of input. Accuracy ±6' (typ.).

Tracking Angle Position Indicator
VNST-104: Tracking Synchro-to-Digital Converter, can also be used as a control element. Four decade 0.8" red LED display. Display accuracy ±6' arc (typical). Tracking rate 3600°/sec max. Parallel binary or BDC output. Self contained line operated power supply.

Custom designs available to your specifications.

EEM PRODUCT SELECTION GUIDES

There are 33 Guides in this edition of EEM. See page 2 (1A•2, 1B•2, 2•2, 3•2) of each volume to locate the Product Selection Guides that pertain to your needs.

CALL VIBRO-METER for all your vibration sensor needs.

Vibro-Meter manufactures the broadest line of custom and off-the-shelf vibration sensors. We will meet your needs in the most extreme environments and in your most unique applications. We're known for our cost performance, meeting stringent delivery schedules, and for our technical expertise. We also are known for our extensive product line which now includes dynamic pressure sensors, torque transducers and dynamometers. We maintain a complete inventory of standard products, and for custom sensors, we can meet your specifications and deliver in 90 days...Guaranteed.

Piezoelectric accelerometers with built in electronics. CE 500 Series.

- operating temperature range: −65°F to +250°F (54C to 121C)
- eliminate cable length limitations: allow varying cable lengths between sensor and power supply with no degradation in sensitivity or performance
- eliminate cable motion effects
- standard accessories available: extension cables, magnetic mounts, isolation studs, constant current single and multi channel power supplies
- other operational characteristics and mechanical configurations are available

Model Number	Sensitivity	Frequency Response ±5%	Operating Dynamic Range	Dimensions	Weight
CA 424 M201	100 pC/g	2 Hz to 6 kHz	25 g	1.0″ Hex. x 2.2″H.	100 grams
CA 426 M101	10 pC/g	1 Hz to 12 kHz	100 g	0.5″ Hex. x 1.45″H.	15 grams
CA 431 M201	70 pC/g	1 Hz to 2 kHz	200 g	1.0″ Hex. x 1.65″H.	180 grams

Charge coupled accelerometers. CE 400 Series.

- operating temperatures in excess of 700°F (375C)
- highly stable to temperature changes
- integral cabling available
- hermetically sealed
- other operational and mechanical configurations available

vibro-meter corp.

WR VIBRATION TRANSDUCERS

Wilcoxon Research specializes in the development and manufacturing of high quality instrumentation for use in the vibration test and monitoring field. A wide range of vibration transducers and related accessories are offered to fulfill most laboratory and industrial applications. Electromagnetic and high frequency piezoelectric shakers are offered to excite structures for vibrational analysis. Experienced technical assistance is available to aid in instrument selection and application.

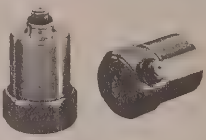
Internally Amplified Accelerometers

700 Series Accelerometer System

NEW

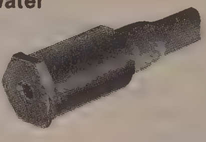
The New 700 Series Accelerometer System offers an array of internally amplified accelerometers, power supplies, post-amplifiers and vibration measurement kits. These are designed as interchangeable systems featuring ruggedness, ease of operation, virtually free from erroneous signals caused by conditions such as mechanical strain, mounting torque, thermal transients and cable motion. The extremely low noise floor and very wide measuring range are unparalleled features of the 700 Series.

720 Series



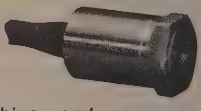
For general purpose vibration testing and monitoring. Low sensitivity to strain, torque, and thermal transients. Very low noise floor allows external velocity or displacement integration to low levels and low frequencies. Internal PIEZOFET® amplifier drives long cables. 10, 25 or 100 mV/g 1 to 10,000 Hz

740 Series Underwater Accelerometers



Designed for testing and monitoring of underwater structures. Geophysical cable is sealed into the transducer for operation to pressures greater than 1000 psi. Ultra low noise amplifier allows measurement to extremely low vibration levels. 10, 25 or 100 mV/g 1 to 10,000 Hz

760 Series Industrial Accelerometers

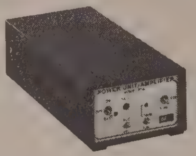


Designed to withstand the harsh environments found in industrial applications such as bearing, pump, turbine, and gear case monitoring. Rugged and shock protected for long term reliability. Special environmental and electrical isolation. 10, 25 or 100 mV/g 2 to 10,000 Hz

P700 Series Power Supplies & Amplifiers

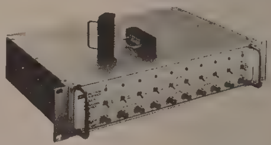
These units supply power to any of the 700 Series Accelerometers with integral amplifiers and allow operation directly into standard readout equipment. The new "smart" power supplies provide gain and monitor and signal to insure proper operation for increased measurement confidence.

Single Channel



- P702 Power Unit/Amplifier
- Power any 700 Series Accelerometer
- Gain trim to standardized sensitivity
- Overload/fault alarm — audible and visible
- Wide dynamic range
- Battery test light
- Amplifier gain of 1, 10, and 100
- Acceleration or velocity output
- Ultra low noise
- Powered by 9V transistor batteries

Multichannel Power Unit Racks

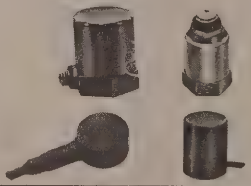


PR710 — Supplies power to ten 700 Series Accelerometers with low noise amplification of X1, X10 or X100. Fault indication warns of defective accelerometer or cabling.

PR712 — Supplies power to twelve accelerometers and provides fault indication with no additional amplification.

High Impedance Accelerometers

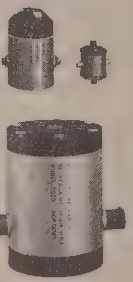
A variety of charge type (non-amplified) accelerometers are offered for use with external charge amplifiers. Charge type accelerometers have a wide dynamic range and high temperature capability. Low noise cables must be used. Modifications and special OEM units can be provided by our Custom Design Section. 1 pC/g to 10 V/g sensitivities



Force Gages

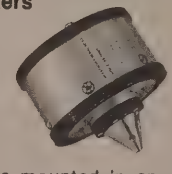
Piezoelectric force gages measure dynamic forces with high gage stiffness. Miniature and general purpose units are available. Low weight.

Impedance Heads



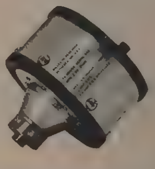
An impedance head combines a force gage and an accelerometer in a single unit. When driven by a shaker, this allows the measurement of force applied to the structure and the resulting motions.

Electromagnetic Shakers



These small electromagnetic shakers are designed to attach to (or push against) a structure and generate a vibratory force. The mass reaction principle of operation allows the shakers to be mounted in any orientation. Available with built-in force gage and accelerometer (impedance head) for complete measurement capability.

Electromagnetic/Piezoelectric Shaker Combinations



This new approach to structural excitation combines an electromagnetic shaker which drives at the lower frequencies and a piezoelectric (crystal) shaker which drives at high frequencies. The combinations are selected so that both shakers can be driven at the same time to cover a very wide frequency range.

Piezoelectric Shakers

Piezoelectric shakers are designed for high frequency structural excitation. A variety of models are available as mass-reaction force generators (F7, F8, F9) or in shake table configurations (D60, D125). Extremely high vibration levels may be attained with very low stray electromagnetic fields.

Signal Conditioners, Power Amplifiers & Accessories

Wilcoxon Research offers a selection of signal conditioners, shaker power amplifiers and accelerometer accessories to fully support our lines of transducers and shakers. This ensures system component compatibility from a single supplier.

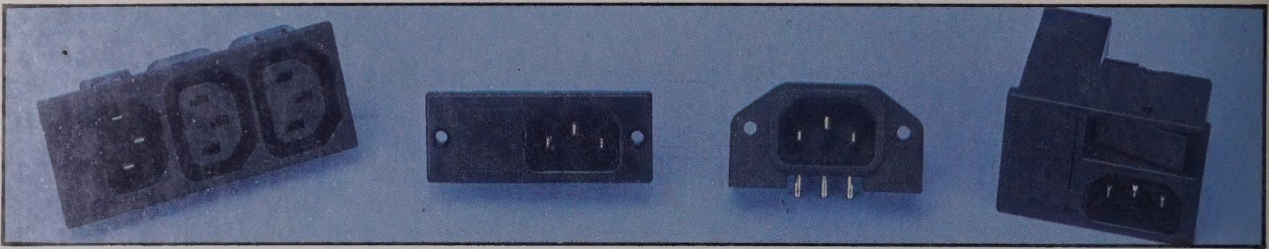
IEC CONNECTORS
Standard and Power Entry Modules



COMBINATION
Input/Output Module

Single male outlet may be combined with 1 to 6 female outlets. Rated 6 amp. Simple snap-in mounting. Solder or faston terminals.

Approvals: UL, CSA

POWER ENTRY MODULES
(Fused, with On/Off, Snap Action Power Switches)

Single and double pole switch configurations. Accepts American 3AG or European 5 x 20mm fuses for max. flexibility. Single or double Fuse holders. Integral voltage selector. Solder or faston terminals.

Approvals: UL, CSA, VDE, SEV

PRINTED CIRCUIT

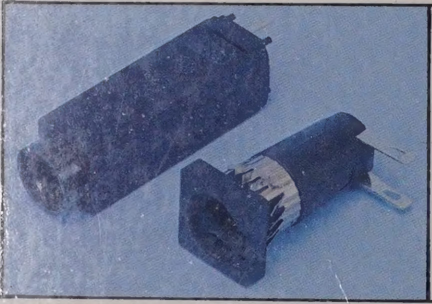
General purpose Power Cord Connector with PRINTED CIRCUIT TERMINALS. Rated 6 amp. Designed for automated assembly operation. Four color options. Conforms with all International safety requirements.

Approvals: UL, CSA, VDE

FUSED
(With Voltage Selector Switch)

Switch voltages changed by rotating snap-in cartridge (100/120/220/240V). Accepts American 3AG or European 5x20mm fuses for max. flexibility. Rated 6 amp. Screw or Snap-in mount configurations. Four color options.

Approvals: UL, CSA, VDE

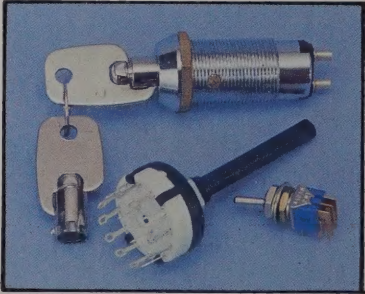


FUSE HOLDERS & FUSES

- Combination Fuse Holders accept Domestic and European Fuses for maximum versatility.
- Printed circuit and Solder terminations.
- Shock-safe Fuse Holders.
- TR3 and Microfuse Holders.
- Fuse Blocks.
- Standard and Sub-Miniature Fuses.
- Approvals: UL, CSA, VDE

KNOBS
(COLLET, SET SCREW, & PUSH-ON)

Designed for function, styling and labor saving assembly. The most complete line of Knobs and Accessories. Also available with aluminum or matte finishes. 70 different color options.



MINIATURE and SUB-MINIATURE SWITCHES

PRINTED CIRCUIT
ROTARY
KEYLOCK
TOGGLE
SLIDE

LCD CONNECTORS

Triple supports provide minimum plug-in pressure and positive contact at top and bottom of LCD. Four pin lengths. Molded shoulders prevent longitudinal movement under the most severe shock and vibration conditions. (No epoxy or bezel required for LCD retention).

.05 and .10 PIN SPACING

COMPONENTS OF QUALITY WITH DELIVERY FROM STOCK!
